## **1 Introduction**

- 1.1 Rochford District Council is in the process of preparing a collection of local planning documents that will form part of the Local Development Framework, and set out how the District will develop in the future. The adopted Core Strategy DPD (Dec 2011) is the overarching planning policy document and sets out the main issues for the future and the policies that will shape the future development of the District. The Rochford Area Action Plan sits below the Core Strategy in the hierarchy of planning documents and sets out the framework for development sites and planning policies for Rochford town centre, and will help guide public and private investment in the area.

### **Background**

- 1.2 The Rochford Area Action Plan (RocAAP) has undergone the Issues and Options stage and several community involvement exercises from 2008. The Issues and Options report was published in 2009.
- 1.3 The RocAAP follows on from, and is required to conform to, the Rochford Core Strategy (2011). The Rochford Core Strategy was subject to Habitats Regulations Assessment, including assessment of the policy that guides the RocAAP.

### **Consultation**

- 1.4 The Habitats Regulations require the plan making/competent authority [Rochford District Council] to consult the appropriate nature conservation statutory body [Natural England (NE)]. This HRA (Screening) Report will be sent to NE for consideration alongside the Rochford Area Action Plan Submission document.

### **Requirement for Habitats Regulations Assessment**

- 1.5 The Conservation of Habitats and Species Regulations (as amended) 2010 [the Habitats Regulations] require that HRA is applied to all statutory land use plans in England and Wales. The aim of the HRA process is to assess the potential effects arising from a plan against the conservation objectives of any site designated for its nature conservation importance.
- 1.6 The Habitats Regulations transpose the requirements of the European Directive (92/43/EEC) on the Conservation of Natural Habitats and Wild Flora and Fauna [the Habitats Directive] which aims to protect habitats and species of European nature conservation importance. The Directive establishes a network of internationally important sites designated for their ecological status. These are referred to as Natura 2000 sites or European Sites, and comprise Special Areas of Conservation (SACs) and Special Protection Areas (SPAs) which are designated under European Directive (2009/147/EC) on the conservation of wild birds [the Birds Directive]. In addition, Government guidance also requires that Ramsar sites (which support internationally important wetland habitats and are listed under the Convention on Wetlands of International Importance [Ramsar Convention]) are included within the HRA process as required by the Regulations.
- 1.7 The process of HRA is based on the precautionary principle and evidence should be presented to allow a determination of whether the impacts of a land-use plan, when considered in combination with the effects of other plans and projects against the conservation objectives of a European Site; would adversely affect the integrity of that

site. Where effects are considered uncertain, the potential for adverse impacts should be assumed.

### **Guidance and Good Practice**

- 1.8 The application of HRA to Local Development Documents is an emerging field and has been informed by a number of key guidance and practice documents. Draft guidance for HRA ‘Planning for the Protection of European Sites: Appropriate Assessment’, was published by the Government (DCLG, 2006) and is based on the European Commission’s (2001) guidance for the Appropriate Assessment of Plans. The DCLG guidance recommends three main stages to the HRA process:
- **Stage 1:** Screening for Likely Significant Effect.
  - **Stage 2:** Appropriate Assessment, Ascertaining Effects on Integrity.
  - **Stage 3:** Mitigations Measures and Alternatives Assessment.
- 1.9 If alternative solutions or avoidance/mitigation measures to remove adverse effects on site integrity cannot be delivered then current guidance recommends an additional stage to consider Imperative Reasons of Overriding Public Interest (IROPI) for why the plan should proceed. For the HRA of land use plans IROPI is only likely to be justified in a very limited set of circumstances and must be accompanied by agreed, deliverable compensation measures for the habitats and species affected. For this reason the IROPI stage is not detailed further in this report.
- 1.10 More recently Natural England has produced additional, detailed guidance on the HRA of Local Development Documents (Tyldesley, 2009) that complements the DCLG guidance, and builds on assessment experience and relevant court rulings. The guidance: sets out criteria to assist with the screening process; addresses the management of uncertainty in the assessment process; and importantly outlines that for the HRA of plans; ‘ ... what is expected is as rigorous an assessment as can reasonably be undertaken in accordance with the requirements of the Regulations ...’.
- 1.11 The approach taken for the HRA of the Allocations DPD(2013) follows the method set out in formal guidance documents and has additionally been informed by recent good practice examples. The key stages of the HRA process overall, and the specific tasks undertaken for each stage are set out in **Table 1**.

**Table 1 – Habitats Regulations Assessment: Key Stages**

Stages	Habitats Regulations Assessment
<b>Stage 1: Screening for Likely significant Effects</b>	1. Identify European sites in and around the plan area.
	2. Examine the conservation objectives of each interest feature of the European site(s) potentially affected.
	3. Analyse the policy/plan and the changes to environmental conditions that may occur as a result of the plan. Consider the extent of the effects on European sites (magnitude, duration, location) based on best available information.
	4. Examine other plans and programmes that could contribute (cumulatively) to identified impacts/ effects.
	5. Produce screening assessment based on evidence gathered and consult statutory nature conservation body on findings.
	6. If effects are judged likely or uncertainty exists – the precautionary principle applies proceed to <b>Stage 2</b> .
<b>Stage 2: Appropriate Assessment</b>	1. Agree scope and method of Appropriate Assessment with statutory nature conservation body.
	2. Collate all relevant information and evaluate potential impacts on site(s) in light of conservation objectives.
<b>Stage 3: Mitigation Measures and Alternatives Assessment</b>	1. Consider how effect on integrity of site(s) could be avoided by changes to plan and the consideration of alternatives (e.g. an alternative policy/ spatial location). Develop mitigation measures (including timescale and mechanisms for delivery).
	2. Prepare HRA/AA report and consult statutory body.
	3. Finalise HRA/AA report in line with statutory advice to accompany plan for wider consultation.

## **2 Method**

### **Screening Stage**

- 2.1 In accordance with guidance and current practice, conducting the screening stage of the HRA for the Rochford Area Action Plan used the method outlined below.
- 2.2 Other avoidance or mitigation measures developed during the HRA process may include policy caveats at a strategic level. In some instances where decisions on avoidance and mitigation can only be made when site level detail becomes available, then the HRA process should be undertaken in relation to lower level planning documents (Tyldesley, D. 2009).
- 2.3 The key tasks employed for the HRA Screening are set out in **Table 2**.

**Table 2 – HRA Screening Stage: Key Tasks**

<b>Task 1 Identification of Natura 2000 sites &amp; characterisation</b>	<ul style="list-style-type: none"> <li>• Identification of European site within Rochford District Council boundary and/or within the potential influence of the plan.</li> </ul>
	<ul style="list-style-type: none"> <li>• Information was obtained for each European site, based on publicly available information and consultation with Natural England where appropriate.<sup>1</sup></li> </ul>
	<ul style="list-style-type: none"> <li>• This included information relating to the sites' qualifying features; conservation objectives (where available); vulnerabilities/ sensitivities and geographical boundaries.</li> </ul>
<b>Task 2 Strategy review, policy screening and identification of likely impacts</b>	<ul style="list-style-type: none"> <li>• Screening of the Rochford Area Action Plan Submission Document and the identification of likely impacts (including a review of the strategy to determine likely impacts).</li> </ul>
<b>Task 3 Consideration of other plans and programmes</b>	<ul style="list-style-type: none"> <li>• Consideration, where appropriate, of other plans and programmes that may have in-combination effects with the Rochford Area Action Plan Submission Document.</li> </ul>
<b>Task 4 Screening Assessment</b>	<ul style="list-style-type: none"> <li>• Summary of screening outcomes and recommendations.</li> </ul>

---

### 3 Screening Stage

#### Task 1 – Identification of European Sites and Characterisation

3.1 There are five European sites within the Rochford District administrative boundary. Taking into account the potential for transboundary impacts the screening has identified sixteen European sites potentially within the influence of the plan (**Table 3**). Hydrological connectivity, air quality and the potential for disturbance as a result of increased air traffic was a major consideration during the identification of European sites, given the number of water dependent sites and designated bird species in South Essex.

**Table 3**

European Sites	Designation
Benfleet and Southend Marshes	SPA & Ramsar
Blackwater Estuary	SPA & Ramsar
Crouch and Roach Estuaries	SPA & Ramsar
Dengie	SPA & Ramsar
Essex Estuaries	SAC
Foulness	SPA & Ramsar
Medway Estuary and Marshes	SPA & Ramsar
Thames Estuary and Marshes	SPA & Ramsar
Outer Thames Estuary	Marine SPA

#### Task 2 – Strategy Review, Policy Screening and Identification of Likely Impacts

3.2 Screening of the Rochford Area Action Plan Submission Document involved identifying the policies that may lead to significant effects on European sites-both alone and in-combination. The approach taken was in accordance with Natural England additional guidance on the HRA of Local Development Documents (Tyldesley, D. 2009).

3.3 In order to complete the policy screening each policy was categorised as to its likely effect on each European site identified in Appendix 1. The four categories of potential effects are as follows:

- **Category A:** elements of the plan/options that would have no negative effect on a European site at all;
- **Category B:** elements of the plan/options that could have an effect, but the likelihood is there would be no significant negative effect on a European site either alone or in combination with other elements of the same plan, or other plans or projects;

- **Category C:** elements of the plan/options that could or would be likely to have a significant effect alone and will require the plan to be subject to an appropriate assessment before the plan may be adopted;
- **Category D:** elements of the plan/options that would be likely to have a significant effect in combination with other elements of the same plan, or other plans or projects and will require the plan to be subject to an appropriate assessment before the plan may be adopted.

3.4 Categories A, C and D are subdivided so that the specific reason why a policy has been allocated to a particular category is clear. The detail of the screening assessment which considers each of the RocAAP policies against the categories is provided in **Appendix 3**. The screening matrix did not identify any policies proposed in the Rochford Area Action Plan Submission Document that are likely to have a significant effect alone.

### **Task 3 – Consideration of other plans and programmes**

3.5 The Habitats Regulations requires that the effects of the Plan are considered in-combination with the effects of other plans and programmes. Appendix II provides a summary of each plan/programme and describes potential impacts that could cause in-combination effects for each document. The findings of this review were used to inform the Strategy Review, Policy Screening and Identification of Likely Impacts (Task 2) and screening assessment (Task 4). The following Plans and Programmes were considered:

#### **Regional**

- East of England Plan 2001-2021 (2008)<sup>2</sup>

#### **Sub-Regional/County**

- Essex Transport Strategy: the Local Transport for Essex June 2011
- Essex County Council Minerals Development Preferred Approach Paper 2010
- Essex County Council Waste Development Document: Preferred Approach Paper 2011
- Essex Thames Gateway Water Cycle Study - Scoping Study Final Report March 2009
- Anglian River Basin Management Plan, September 2009
- Essex and Suffolk Water Final Water Resources Management Plan 2010-2035

---

<sup>2</sup> The East of England Plan was revoked on 3 January 2013.

- The Combined Essex Catchment Abstraction Management Study (CAMS), Feb 2007
- The Combined Essex Catchment Abstraction Management Study (CAMS) update, March 2008
- Exceeding Expectations Tourism Growth Strategy for Essex March 2007

#### **Local**

- Rochford Core Strategy, adopted December 2011
- Rochford Allocations Submission Document 2013
- Basildon District Council Core Strategy Preferred Options 2012
- Castle Point Core Strategy Final Publication Document, 2009<sup>3</sup>
- Chelmsford Borough Council Core Strategy, 2008
- Maldon District Council Local Development Plan Preferred Options, 2012
- Southend-on-Sea Borough Council Core Strategy, Adopted September 2009
- Southend-on-Sea Local Transport Plan 2006-2011
- London Southend Airport Runway Extension and Associated Development, October 2009
- London Southend Airport & Environs Joint Area Action Plan Submission Document 2013

3.6 The potential effects of these plans are reviewed in detail at **Appendix 2** and the findings of this review considered in the light of impacts arising from the screening process are used to inform the screening assessment (**Appendix 3**).

3.7 The screening matrix did not identify any policies proposed in the Rochford Area Action Plan that are likely to have a significant in-combination effect on European sites.

---

<sup>3</sup> On 27 September 2011, Castle Point Borough Council was formally resolved to withdraw the Core Strategy. Issues and Options consultation on a new Local Plan was being scheduled in August 2012.

**Task 4 – Screening Assessment of the Rochford Area Action Plan**

- 3.8 In line with the screening requirements of the Habitats Regulations, an assessment was undertaken to determine the potential likely significant effects of the Pre-Submission document of the Development Management Plan on the integrity of European sites that lie within a 15km radius of the Rochford administrative boundary.
- 3.9 The screening assessment detailing the analysis in accordance with Natural England guidance is set out in the screening matrix (**Appendix 3**) and the results of the assessment are summarised in Table 5 below.
- 3.10 The screening assessment identified that none of the policies in the RocAAP are likely to have a significant effect alone or in combination, given the type, scale, location of the development proposed, as well as European Site sensitivities.
- 3.11 To conclude, it is assessed that none of the policies in the RocAAP are likely to act in-combination with other plans, programmes and projects to have a significant effect on the identified European sites.

**Table 5 – HRA Screening Table Summary**

European Sites	Designation	AA required alone? ✗ No ✓ Yes ? Uncertain	AA required in combination? ✗ No ✓ Yes ? Uncertain
Benfleet and Southend Marshes	SPA & Ramsar	✗	✗
Blackwater Estuary	SPA & Ramsar	✗	✗
Crouch and Roach Estuaries	SPA & Ramsar	✗	✗
Dengie	SPA & Ramsar	✗	✗
Essex Estuaries	SAC	✗	✗
Foulness	SPA & Ramsar	✗	✗
Medway Estuary and Marshes	SPA & Ramsar	✗	✗
Thames Estuary and Marshes	SPA & Ramsar	✗	✗
Outer Thames Estuary	Marine SPA	✗	✗

## **4 Conclusions**

- 4.1 This HRA screening process has considered the potential for likely significant effects arising from the policies within the Rochford Area Action Plan Submission Document.
- 4.2 The HRA considered five European sites within Rochford District Council's plan boundaries and eleven European sites within a 15km search area around the Authority's boundaries. The European sites are predominantly situated in the sparsely populated, relatively inaccessible east of the District. The west contains the majority of the District's population and settlements as there is better access to services and fewer physical constraints.
- 4.3 The assessment suggested that none of the policies in the RocAAP are likely to have significant impacts, either alone or in combination, on European Sites.
- 4.4 Natural England and other stakeholders were consulted on these findings. Natural England's response (

## Special Areas of Conservation (SAC)

### 1 Essex Estuaries SAC

Site Name: Essex Estuaries Location Grid Ref: TM103048 JNCC Site Code: UK0013690 Size (ha): 46140.82 Designation: SAC	Habitats Regulations Assessment: Data Proforma
<b>Site Description</b>	This is a large estuarine site in south-east England, and is a typical, undeveloped, coastal plain estuarine system with associated open coast mudflats and sandbanks. The site comprises the major estuaries of the Colne, Blackwater, Crouch and Roach rivers and is important as an extensive area of contiguous estuarine habitat. Essex Estuaries contains a very wide range of characteristic marine and estuarine sediment communities and some diverse and unusual marine communities in the lower reaches, including rich sponge communities on mixed, tide-swept substrates. Sublittoral areas have a very rich invertebrate fauna, including the reef-building worm <i>Sabellaria spinulosa</i> , the brittlestar <i>Ophiothrix fragilis</i> , crustaceans and ascidians. The site also has large areas of saltmarsh and other important coastal habitats.
<b>Qualifying Features</b>	<p><b>Annex I habitats that are a primary reason for selection of this site:</b></p> <ul style="list-style-type: none"> <li>• Estuaries</li> <li>• Mudflats and sandflats not covered by seawater at low tide</li> <li>• Salicornia and other annuals colonising mud and sand</li> <li>• Spartina swards (<i>Spartinion maritimae</i>)</li> <li>• Atlantic salt meadows (<i>Glauco-Puccinellietalia maritimae</i>)</li> <li>• Mediterranean and thermo-Atlantic halophilous scrubs (<i>Sarcocornetea fruticosi</i>)</li> </ul> <p><b>Annex I habitats present as a qualifying feature:</b></p> <ul style="list-style-type: none"> <li>• Sandbanks which are slightly covered by sea water all the time</li> </ul>

## Special Protection Areas (SPA)

### 2 Benfleet and Southend Marshes SPA

Site Name: Benfleet and Southend Marshes Location (Lat and Long): 51 31 42 N 00 41 00 E JNCC Site Code: UK9009171 Size (ha): 2251.31 Designation: SPA	Habitats Regulations Assessment: Data Proforma
<b>Site Description</b>	Benfleet and Southend Marshes are located on the north shore of the outer Thames Estuary in southern England. The site comprises an extensive series of saltmarshes, cockle shell banks, mud-flats, and grassland that supports a diverse flora and fauna. The productive mud-flats, cockle shell banks and diverse saltmarsh communities provide a wide range of feeding and roosting opportunities for internationally important numbers of wintering wildfowl and waders.
<b>Qualifying Features</b>	<p><b>Article 4.2 Qualification (79/409/EEC)</b></p> <p>Over winter the area regularly supports:</p> <ul style="list-style-type: none"> <li>• Dark-bellied Brent Goose (<i>Branta bernicla bernicla</i>) 1.3% of the population</li> <li>• Dunlin (<i>Calidris alpina alpina</i>) 2.1% of the population in Great Britain</li> <li>• Knot (<i>Calidris canutus</i>) 2.6% of the population</li> <li>• Ringed Plover (<i>Charadrius hiaticula</i>) 1.3% of the population in Great Britain</li> <li>• Grey Plover (<i>Pluvialis squatarola</i>) 2.3% of the population</li> </ul> <p><b>Article 4.2 Qualification (79/409/EEC): An Internationally Important Assemblage of Birds</b></p> <p>Over winter the area regularly supports:</p> <ul style="list-style-type: none"> <li>• 34789 waterfowl (five year peak mean 30/06/1999) including: <i>Branta bernicla bernicla</i>, <i>Charadrius hiaticula</i>, <i>Pluvialis squatarola</i>, <i>Calidris canutus</i>, <i>Calidris alpina alpina</i>.</li> </ul>

3 Blackwater Estuary SPA

Site Name: Blackwater Estuary Location (Lat and Long): 51 45 13 N 00 51 59 E JNCC Site Code: UK9009245 Size (ha): 4395.15 Designation: SPA	Habitats Regulations Assessment: Data Proforma
<b>Site Description</b>	<p>The Blackwater Estuary is located on the coast of Essex in eastern England. It is the largest estuary in Essex and is one of the largest estuarine complexes in East Anglia. Its mud-flats are fringed by saltmarsh on the upper shores, with shingle, shell banks and offshore islands a feature of the tidal flats. The surrounding terrestrial habitats: the sea wall, ancient grazing marsh and its associated fleet and ditch systems, plus semi-improved grassland, are of high conservation interest. The diversity of estuarine habitats results in the sites being of importance for a wide range of overwintering waterbirds, including raptors, geese, ducks and waders. The site is also important in summer for breeding terns.</p>
<b>Qualifying Features</b>	<p><b>Article 4.1 Qualification (79/409/EEC)</b></p> <ul style="list-style-type: none"> <li>• During the breeding season the area regularly supports:</li> <li>• Little Tern (<i>Sterna albifrons</i>) (Eastern Atlantic – breeding) at least 0.9% of the GB breeding population five year mean, 1992-1996</li> <li>• Over winter the area regularly supports:</li> <li>• Hen Harrier (<i>Circus cyaneus</i>) up to 2.5% of the GB population five year mean, 1987/8-1991/2</li> </ul> <p><b>Article 4.2 Qualification (79/409/EEC)</b></p> <ul style="list-style-type: none"> <li>• During the breeding season the area regularly supports:</li> <li>• Common Pochard (<i>Aythya ferina</i>) (North-western/North-eastern Europe) up to 6% of the population in Great Britain five year mean, 1987-1991</li> <li>• Ringed Plover (<i>Charadrius hiaticula</i>) (Europe/Northern Africa – wintering) up to 1.6% of the population in Great Britain five year mean, 1987-1991</li> <li>• Over winter the area regularly supports:</li> <li>• Brant Goose (<i>Branta bernicla bernicla</i>) (Western Siberia/Western Europe) 5.1% of the population five year peak mean 1991/92-1995/96</li> </ul>

4 Crouch and Roach Estuaries SPA

<b>Site Name: Crouch and Roach Estuaries SPA</b> <b>Location (Lat and Long):</b> 51 38 23 N 00 43 06 E <b>JNCC Site Code: UK9009244</b> <b>Size (ha): 1735.58</b> <b>Designation: SPA</b>	<b>Habitats Regulations Assessment: Data Proforma</b>
<b>Site Description</b>	<p>The Crouch and Roach Estuaries are located on the coast of south Essex in eastern England. The River Crouch occupies a shallow valley between two ridges of London Clay, whilst the River Roach is set predominantly between areas of brick earth and loams with patches of sand and gravel. The intertidal zone along the Rivers Crouch and Roach is 'squeezed' between the sea walls along both banks and the river channel. Unlike more extensive estuaries elsewhere in Essex, this leaves a relatively narrow strip of tidal mud which, nonetheless, is used by significant numbers of birds. The site is of importance for wintering waterbirds, especially Dark-bellied Brent Goose. The Crouch and Roach Estuary is an integral component of the phased Mid-Essex Coast SPA.</p>
<b>Qualifying Features</b>	<p><b>Article 4.1 Qualification (79/409/EEC)</b>  Over winter the area regularly supports:</p> <ul style="list-style-type: none"> <li>• Hen Harrier (<i>Circus cyaneus</i>) up to 2.5% of the GB population five year mean, 1987-1991</li> </ul> <p><b>Article 4.2 Qualification (79/409/EEC)</b>  Over winter the area regularly supports:</p> <ul style="list-style-type: none"> <li>• Dark-bellied brent goose (<i>Branta bernicla bernicla</i>) 1% of the population five year peak mean 1991/92-1995/96 (Western Siberia/Western Europe)</li> </ul> <p><b>Article 4.2 Qualification (79/409/EEC): An Internationally Important Assemblage of Birds</b>  Over winter the area regularly supports:</p> <ul style="list-style-type: none"> <li>• 18607 waterfowl (five year peak mean 30/06/1999) including: Brent Goose (<i>Branta bernicla bernicla</i>)</li> </ul>

<p>Site Name: Crouch and Roach Estuaries SPA          Location (Lat and Long):          51 38 23 N          00 43 06 E          JNCC Site Code: UK9009244          Size (ha): 1735.58          Designation: SPA</p>	<p style="text-align: center;"><b>Habitats Regulations Assessment: Data Proforma</b></p>
<p>HRA/AA Studies undertaken that address this site</p>	<p><b>East of England Plan – Habitats Regulations Assessment in response to the Further Proposed Changes consultation May 2008</b></p> <p>The HRA concluded that water levels and water quality of the Essex Estuaries SAC, and the Crouch and Roach Estuaries SPA/Ramsar Site will not be adversely affected as a result of the growth proposed for the catchment area of the Essex Estuaries SAC, the Crouch and Roach Estuaries SPA/Ramsar, and that policies SS3, H1, WAT2, ETG1, ETG4, ETG5 and CH1 of the draft East of England RSS will have no effect on the integrity of the Essex Estuaries SAC, the Crouch and Roach Estuaries SPA/Ramsar.</p> <p><b>The HRA (including AA) of proposed changes to Southend-on-Sea Core Strategy DPD July 2007</b></p> <p>The HRA found that two Core Strategy Policies have the potential for likely significant effects and would benefit from strengthening. Amendments to policy wording were proposed and considered to be sufficient to address the identified likely significant effects. These revised policies have been reassessed and it is considered that if the recommended changes to the Core Strategy Policies are adopted within the Core Strategy DPD then no further Appropriate Assessment of this document is required.</p> <p>The assessment concluded that if the recommendations were incorporated then the Core Strategy will not have adverse effects on the integrity of the following European sites either alone or in-combination:</p> <ul style="list-style-type: none"> <li>• Benfleet and Southend Marshes SPA</li> <li>• Foulness SPA and</li> <li>• Essex Estuaries SAC</li> <li>• Crouch and Roach Estuaries SPA</li> <li>• Thames Estuary and Marshes SPA</li> </ul>

Rochford District Council – Habitats Regulations Assessment Report  
 Rochford Area Action Plan Submission Document

<p>Site Name: Crouch and Roach Estuaries SPA          Location (Lat and Long):          51 38 23 N          00 43 06 E          JNCC Site Code: UK9009244          Size (ha): 1735.58          Designation: SPA</p>	<p style="text-align: center;"><b>Habitats Regulations Assessment: Data Proforma</b></p>
	<p><b>Castle Point Core Strategy Supporting Paper 3: Habitats Regulations Assessment for the Publication Document July 2009</b></p> <p>The HRA identified the supply of water and the treatment of waste water and sewage as key issues in relation to the identified European sites. It recommends additional policies and requirements to ensure that development is aligned more closely with the delivery of water infrastructure and that the need for water infrastructure has been fully assessed through a Water Cycle Study.</p> <p>The HRA concludes that there will be no adverse effects on the integrity of the Crouch and Roach Estuaries SPA.</p> <p><b>Southend Airport Runway Extension and Associated Development: Stage 1 Screening Report – Habitats Regulations Assessment August 2009</b></p> <p>The HRA identifies that the construction and operation of the proposal has the potential to result in the following impacts:</p> <ul style="list-style-type: none"> <li>• Construction/operational noise and disturbance;</li> <li>• Increase in atmospheric pollutants as a result of increased flight numbers; and</li> <li>• Change to surface run-off and hydrology resulting from increase in area of hard surfaces.</li> </ul> <p>The HRA Screening identified that the project has the potential to increase disturbance of the qualifying bird species and assemblages of the Crouch and Roach Estuaries SPA/Ramsar. It concluded that this impact however, is likely to be temporary as typical altitude of flights would remain unchanged from that currently employed, and taking into account the ability of most birds to become habituated to regularly-occurring noise disturbance the increased frequency of these flights would pose little disturbance to the bird species and assemblages. This conclusion was supported by Natural England in their consultation response to the JAAP.</p> <p>The HRA concluded that no significant effects are likely on the qualifying features of the Crouch and Roach Estuaries SPA as a result of the proposed airport runway extension and associated infrastructure developments, nor will the conservation objectives be compromised.</p>

<p>Site Name: Crouch and Roach Estuaries SPA                  Location (Lat and Long):                  51 38 23 N                  00 43 06 E                  JNCC Site Code: UK9009244                  Size (ha): 1735.58                  Designation: SPA</p>	<p style="text-align: center;"><b>Habitats Regulations Assessment: Data Proforma</b></p>
	<p><b>Essex County Council Minerals Development Documents: Issues and Options: Appropriate Assessment Screening Report January 2009</b></p> <p><b>The HRA identified the following potential impacts for each Option:</b></p> <ul style="list-style-type: none"> <li>• <b>Aggregate Recycling</b> <ul style="list-style-type: none"> <li>- Habitat Loss</li> <li>- Emissions</li> <li>- Human Disturbance</li> </ul> </li> <li>• <b>Option 1 – Predominantly Extensions to Existing Extraction Sites</b> <ul style="list-style-type: none"> <li>- Habitat Loss</li> <li>- Emissions</li> <li>- Flooding and Water Use</li> <li>- Human Disturbance</li> </ul> </li> <li>• <b>Option 2 – Dispersed Spread of Sites Across the County</b> <ul style="list-style-type: none"> <li>- Habitat Loss</li> <li>- Emissions</li> <li>- Flooding and Water Use</li> <li>- Human Disturbance</li> </ul> </li> <li>• <b>Option 3 – Concentrated Supply of Sites with Some Dispersed Sites</b> <ul style="list-style-type: none"> <li>- Flooding and Water Use</li> </ul> </li> </ul> <p>The screening report concluded that due to the large number of European sites and the potential impact of minerals and waste sites, the screening stage of the Appropriate Assessment should be carried out again, with greater site-specific detail, as the Preferred Options for site allocations are determined.</p>

5 Dengie SPA

<b>Site Name: Dengie</b> <b>Location Grid Ref</b> <b>(Lat and Long): 51 41 26 N</b> <b>00 57 34 E</b> <b>JNCC Site Code: UK9009242</b> <b>Size: 3127.23</b> <b>Designation: SPA</b>	<b>Habitats Regulations Assessment: Data Proforma</b>
<b>Site Description</b>	Dengie is located on the coast of Essex in eastern England. It is a large and remote area of tidal mud-flats and saltmarshes at the eastern end of the Dengie peninsula, between the adjacent Blackwater and Crouch Estuaries. The saltmarsh is the largest continuous example of its type in Essex. Foreshore, saltmarsh and beaches support an outstanding assemblage of rare coastal flora. It is of importance for wintering populations of Hen Harrier <i>Circus cyaneus</i> , wildfowl and waders.
<b>Qualifying Features</b>	<p><b>Article 4.1 Qualification (79/409/EEC)</b>  <b>Over winter the area regularly supports:</b></p> <ul style="list-style-type: none"> <li>• Hen Harrier (<i>Circus cyaneus</i>) up to 2.5% of the GB population five year mean, 1987-1991</li> </ul> <p><b>Article 4.2 Qualification (79/409/EEC)</b>  <b>Over winter the area regularly supports:</b></p> <ul style="list-style-type: none"> <li>• Brant Goose (<i>Branta bernicla bernicla</i>) (Western Siberia/Western Europe) 0.8% of the population five year peak mean 1991/92-1995/96</li> <li>• Red Knot (<i>Calidris canutus</i>) (North-eastern Canada/Greenland/Iceland/Northwestern Europe)</li> <li>• Grey Plover <i>Pluvialis squatarola</i> (Eastern Atlantic – wintering) 1.4% of the population five year peak mean 1991/92-1995/96</li> </ul> <p><b>Article 4.2 Qualification (79/409/EEC): an Internationally Important Assemblage of Birds</b>  <b>Over winter the area regularly supports:</b></p> <ul style="list-style-type: none"> <li>• 31454 waterfowl (five year peak mean 01/04/1998) including: <i>Branta bernicla bernicla</i>, <i>Pluvialis squatarola</i>, <i>Calidris canutus</i>.</li> </ul>

6 Foulness SPA

<b>Site Name: Foulness</b> <b>Location (Lat and Long):</b> <b>51 34 26 N</b> <b>00 55 17 E</b> <b>JNCC Site Code: UK9009246</b> <b>Size (ha): 10968.9</b> <b>Designation: SPA</b>	<b>Habitats Regulations Assessment: Data Proforma</b>
<b>Site Description</b>	<p>Foulness is located on the coast of Essex, on the east coast of England north of the mouth of the Thames estuary. The site is part of an open coast estuarine system comprising grazing marsh, saltmarsh, intertidal mud-flats, cockle-shell banks and sand-flats. It includes one of the three largest continuous sand-silt flats in the UK. The diversity of high quality coastal habitats present support important populations of breeding, migratory and wintering waterbirds, notably very important concentrations of Dark-bellied Brent Goose <i>Branta bernicla bernicla</i>.</p>
<b>Qualifying Features</b>	<p><b>Article 4.1 Qualification (79/409/EEC)</b></p> <p>During the breeding season the area regularly supports:</p> <ul style="list-style-type: none"> <li>• Avocet (<i>Recurvirostra avosetta</i>) up to 5.8% of the GB breeding population five year mean, 1987-1991</li> <li>• Little Tern (<i>Sterna albifrons</i>) at least 1% of the GB breeding population five year mean, 1992-1996</li> <li>• Common Tern (<i>Sterna hirundo</i>) up to 1.8% of the GB breeding population Count, as at 1996</li> <li>• Sandwich Tern (<i>Sandwich Tern</i>) up to 2.3% of the GB breeding population five year mean, 1992-1996</li> </ul> <p>Over winter the area regularly supports:</p> <ul style="list-style-type: none"> <li>• Hen Harrier (<i>Circus cyaneus</i>) up to 2.5% of the GB population five year mean, 1987/8-1991/2</li> <li>• Bar-tailed Godwit (<i>Limosa lapponica</i>) 14.6% of the GB population five year peak mean 1991/92-1995/96</li> <li>• Avocet (<i>Recurvirostra avosetta</i>) 7.9% of the GB population five year peak mean 1991/92-1995/96</li> </ul> <p><b>Article 4.2 Qualification (79/409/EEC)</b></p> <p>During the breeding season the area regularly supports:</p> <ul style="list-style-type: none"> <li>• Ringed Plover (<i>Charadrius hiaticula</i>) up to 1.6% of the population in Great Britain five year mean, 1987/8-1991/2</li> </ul>

7 Medway Estuary and Marches SPA

<b>Site Name: Medway Estuary and Marshes</b> <b>Location Grid Ref (Lat and Long): 51 24 02 N 00 40 38 E</b> <b>JNCC Site Code: UK9012031</b> <b>Size: 4684.36</b> <b>Designation: SPA</b>	<b>Habitats Regulations Assessment: Data Proforma</b>
<b>Site Description</b>	<p>The Medway Estuary feeds into and lies on the south side of the outer Thames Estuary in Kent, south-east England. It forms a single tidal system with the Swale and joins the Thames Estuary between the Isle of Grain and Sheerness. It has a complex arrangement of tidal channels, which drain around large islands of saltmarsh and peninsulas of grazing marsh. The mud-flats are rich in invertebrates and also support beds of Enteromorpha and some Eelgrass <i>Zostera</i> spp. Small shell beaches occur, particularly in the outer part of the estuary. Grazing marshes are present inside the sea walls around the estuary. The complex and diverse mixes of coastal habitats support important numbers of waterbirds throughout the year. In summer, the estuary supports breeding waders and terns, whilst in winter it holds important numbers of geese, ducks, grebes and waders. The site is also of importance during spring and autumn migration periods, especially for waders.</p>
<b>Qualifying Features</b>	<p><b>Article 4.1 Qualification (79/409/EEC)</b></p> <p><b>During the breeding season the area regularly supports:</b></p> <ul style="list-style-type: none"> <li>• Avocet (<i>Recurvirostra avosetta</i>) (Western Europe/Western Mediterranean – breeding) 6.2% of the GB breeding population five year mean, 1988-1992</li> <li>• Little Tern (<i>Sterna albifrons</i>) (Eastern Atlantic – breeding) 1.2% of the GB breeding population five year mean, 1991-1995</li> <li>• <i>Sterna hirundo</i> (Northern/Eastern Europe – breeding) 0.6% of the GB breeding population Count, as at 1994</li> </ul> <p><b>Over winter the area regularly supports:</b></p> <ul style="list-style-type: none"> <li>• Bewick's swan (<i>Cygnus columbianus bewickii</i>) (Western Siberia/North-eastern and North-western Europe) 0.2% of the GB population five year peak mean 1991/92-1995/96</li> </ul> <p>Avocet (<i>Recurvirostra avosetta</i>) (Western Europe/Western Mediterranean – breeding) 24.7% of the GB population five year peak mean 1991/92-1995/96</p>

8 Thames Estuary and Marches SPA

<b>Site Name: Thames Estuary and Marshes</b> <b>Location Grid Ref (Lat and Long): 51 29 08 N 00 35 47 E</b> <b>JNCC Site Code: UK9012021</b> <b>Size: 4838.94</b> <b>Designation: SPA</b>	<b>Habitats Regulations Assessment: Data Proforma</b>
<b>Site Description</b>	<p>The Thames Estuary and Marshes SPA is located on the south side of the Thames Estuary in southern England. The marshes extend for about 15 km along the south side of the estuary and also include intertidal areas on the north side of the estuary. To the south of the river, much of the area is brackish grazing marsh, although some of this has been converted to arable use. At Cliffe, there are flooded clay and chalk pits, some of which have been infilled with dredgings. Outside the sea wall, there is a small extent of saltmarsh and broad intertidal mud-flats. The estuary and adjacent grazing marsh areas support an important assemblage of wintering waterbirds including grebes, geese, ducks and waders. The site is also important in spring and autumn migration periods.</p>
<b>Qualifying Features</b>	<p><b>Article 4.1 Qualification (79/409/EEC)</b>  <b>Over winter the area regularly supports:</b></p> <ul style="list-style-type: none"> <li>• Hen Harrier (<i>Circus cyaneus</i>) 1% of the population in Great Britain five year peak mean for 1993/94 to 1997/98</li> <li>• Avocet (<i>Recurvirostra avosetta</i>) (Western Europe/Western Mediterranean – breeding)</li> </ul> <p><b>Article 4.2 Qualification (79/409/EEC)</b>  <b>Over winter the area regularly supports:</b></p> <ul style="list-style-type: none"> <li>• Dunlin (<i>Calidris alpina alpina</i>) (Northern Siberia/Europe/Western Africa) 2.1% of the population five year peak mean for 1993/94 to 1997/98</li> <li>• Red Knot (<i>Calidris canutus</i>) (North-eastern Canada/Greenland/Iceland/Northwestern Europe) 1.4% of the population five year peak mean for 1993/94 to 1997/98</li> <li>• Black-tailed Godwit (<i>Limosa limosa islandica</i>) (Iceland – breeding) 2.4% of the population five year peak mean for 1993/94 to 1997/98</li> </ul>

<b>Vulnerabilities (includes existing pressures and trends)</b>	<b>Habitat fragmentation/loss</b>					
	<p>There is evidence of coastal squeeze and erosion of intertidal habitat within the site. English Nature is in discussion with the port authority on the role of port dredging in intertidal habitat loss.</p> <p>The terrestrial part of the site depends on appropriate grazing and management of water. The availability of livestock may be affected by changes in agricultural markets. Evidence suggests that the water supply to grazing marsh has decreased. A water level management plan may address this.</p> <p><b>Disturbance</b></p> <p>The intertidal area is also vulnerable to disturbance from water borne recreation. This is being addressed by information dissemination as part of an estuary management plan.</p> <p>Development pressure can lead to both direct landtake from the site and indirect disturbance and hydrological effects. These effects will be addressed through the Habitats Regulations 1994.</p>

<p><b>Site Name: Thames Estuary and Marshes</b>  <b>Location Grid Ref (Lat and Long): 51 29 08 N 00 35 47 E</b>  <b>JNCC Site Code: UK9012021</b>  <b>Size: 4838.94</b>  <b>Designation: SPA</b></p>	<p><b>Habitats Regulations Assessment: Data Proforma</b></p>
	<p><b>Water Pollution</b>          Studies by the Environment Agency indicate that the waters in the Thames estuary are hyper-nitrified for nitrogen and phosphorus.</p>
<p><b>HRA/AA Studies undertaken that address this site</b></p>	<p><b>Appropriate Assessment of the Draft South East Plan, 2006</b>          Proposed development could lead to:</p> <ul style="list-style-type: none"> <li>• Increased recreational pressure lead to increased atmospheric pollution and nitrogen enrichment, resulting in changes to the habitats for on which the species of European importance depend.</li> <li>• Result in loss of valuable off-site foraging habitat designated species.</li> <li>• Contribute to coastal squeeze and thus, loss of habitat.</li> </ul>
	<p><b>The HRA (including AA) of proposed changes to Southend-on-Sea Core Strategy DPD July 2007</b>          The HRA found that two Core Strategy Policies have the potential for likely significant effects and would benefit from strengthening. Amendments to policy wording were proposed and considered to be sufficient to address the identified likely significant effects. These revised policies have been reassessed and it is considered that if the recommended changes to the Core Strategy Policies are adopted within the Core Strategy DPD then no further Appropriate Assessment of this document is required.          The assessment concluded that if the recommendations were incorporated then the Core Strategy will not have adverse effects on the integrity of the following European sites either alone or in-combination:</p> <ul style="list-style-type: none"> <li>• Benfleet and Southend Marshes SPA</li> <li>• Foulness SPA and</li> <li>• Essex Estuaries SAC</li> <li>• Crouch and Roach Estuaries SPA</li> <li>• Thames Estuary and Marshes SPA</li> </ul>

## Marine Special Protection Areas (SPA)

### 9 Outer Thames Estuary SPA

<b>Site Name: Outer Thames Estuary</b> <b>Location (Lat and Long):</b> 51 54 58 N 00 32 41 E <b>JNCC Site Code: UK9020309</b> <b>Size (ha): 379264.14</b> <b>Designation: SPA</b>	<b>Habitats Regulations Assessment: Data Proforma</b>
<b>Site Description</b>	<p>The Thames Estuary is located in the southern part of the North Sea on the east coast of England, between the counties of Essex (on the north side) and Kent (on the south) and extends as a broad opening into the North Sea.</p> <p>The Outer Thames Estuary SPA consists of areas of shallow and deeper water, high tidal current streams and a range of mobile sediments. Large areas of mud, silt and gravelly sediments form the deeper water channels, the main ones of which form the approach route to the ports of London and as such are continually disturbed by shipping and maintenance dredging. Sand in the form of sandbanks separated by troughs predominates in the remaining areas and the crests of some of the banks are exposed at mean low water. In the northern part of the site the main sandbanks are (north to south) Middle Cross Sand, Scroby Sands, Helm Sand, Newcombe Sand, Aldeburgh Napes, Aldeburgh Ridge, North Ship Head and Bawdsey Bank; in the southern part of the site the main sandbanks are Red Sand, Kentish Flats, West and East Barrow, Sunk Sand, Shingles, Long Sand, Margate Sand and Kentish Knock.</p>
<b>Qualifying Features</b>	<p><b>Article 4.1 Qualification (79/409/EEC)</b></p> <p>Over winter the area regularly supports:</p> <ul style="list-style-type: none"> <li>• <i>Gavia stellata</i> (North-western Europe – wintering) 38% of the population in Great Britain peak mean over the period 1989-2006/7</li> </ul>

Rochford Area Action Plan Submission Document

<b>Site Name: Outer Thames Estuary</b> <b>Location (Lat and Long):</b> 51 54 58 N 00 32 41 E <b>JNCC Site Code: UK9020309</b> <b>Size (ha): 379264.14</b> <b>Designation: SPA</b>	<b>Habitats Regulations Assessment: Data Proforma</b>
<b>Conservation Objectives</b>	<b>Draft Conservation Objectives</b> Subject to natural change, maintain in favourable condition the <b>internationally important populations of the regularly occurring Birds Directive Annex I species:</b> <ul style="list-style-type: none"> <li>• <b>red-throated diver</b> (<i>Gavia stellata</i>) and its supporting habitats and prey species</li> </ul> Relevant habitats include shallow coastal waters and areas in the vicinity of sub-tidal sandbanks
<b>Component SSSIs</b>	None
<b>SAC Condition Assessment</b>	No condition assessment is currently available for the Outer Thames Estuary.
<b>Vulnerabilities (includes existing pressures and trends)</b>	Red-throated Divers in the Outer Thames Estuary are sensitive to the following: <b>Physical loss of supporting habitat</b> (for example, offshore development, disposal of dredge spoil) <ul style="list-style-type: none"> <li>• Physical loss by removal or smothering of any of the habitats on which Red-throated Divers depend may result in the loss of foraging sites and, therefore, the reduction of a food resource for the overwintering population.</li> </ul> <b>Physical damage to habitat</b> (for example, siltation, abrasion, selective extraction) <ul style="list-style-type: none"> <li>• Red-throated Divers are known to associate with sandbank features and, although benthic sandbank communities are in general relatively resilient to physical damage, repeated damage to the habitats on which the species depends may result in a reduction in their value as foraging sites for the overwintering population.</li> </ul>

<p>Site Name: Outer Thames Estuary                  Location (Lat and Long):                  51 54 58 N                  00 32 41 E                  JNCC Site Code: UK9020309                  Size (ha): 379264.14                  Designation: SPA</p>	<p style="text-align: center;"><b>Habitats Regulations Assessment: Data Proforma</b></p>
	<p><b>Non physical disturbance</b></p> <ul style="list-style-type: none"> <li>Red-throated Divers are highly sensitive to non-physical disturbance by noise and visual presence during the winter. Feeding can be disturbed by movements of objects (for example, boats, wind turbine rotors) and increases in noise disturbance displacing birds from their feeding grounds. This can cause birds to cease feeding or fly away and, in response, they could a) increase their energy requirements at their present (disturbed) feeding sites or b) move to an alternative less favoured feeding or roosting site. Such a response affects energy budgets and food intake and possibly survival. Over-wintering birds, which are frequently subject to harsh weather conditions and must lay down fat reserves in order to migrate to breeding grounds, are particularly susceptible to adverse effects resulting from disturbance.</li> </ul> <p><b>Toxic contamination of Red-throated Divers and their supporting habitats</b></p> <ul style="list-style-type: none"> <li>A number of operators will discharge effluent upstream into the Thames Estuary and into the adjacent coastal waters (including low levels of radionuclides and heavy metals). Significant dilution of these low inputs together with high energy environments associated with sandbanks mean that the habitat has a moderate sensitivity to toxic contamination from these sources.</li> <li>In the case of the Red-throated Diver, the sensitivity to synthetic chemicals such as PCBs is moderate. PCBs accumulate through the food chain in the tissues of marine organisms and could be considerable once they reach the fish on which Red-throated Divers feed. If marine pollution were to occur there is the potential for exposure to PCBs to change.</li> <li>Large oil and chemical spills affecting shallow sandbank habitats can have a detrimental effect on bird populations by significantly affecting food sources and presenting a threat to diving and feeding seabirds.</li> </ul>

Rochford District Council – Habitats Regulations Assessment Report  
 Rochford Area Action Plan Submission Document

<p>Site Name: Outer Thames Estuary          Location (Lat and Long):          51 54 58 N          00 32 41 E          JNCC Site Code: UK9020309          Size (ha): 379264.14          Designation: SPA</p>	<p style="text-align: center;"><b>Habitats Regulations Assessment: Data Proforma</b></p>
	<ul style="list-style-type: none"> <li>Birds are particularly vulnerable when moulting. Dispersants used to disperse the oil may also be harmful to the species. Princes Channel, which runs through the southern area of the Outer Thames SPA, carries a significant amount of vessel traffic in and out of the ports of the Thames Estuary. In addition, Fisherman’s Gat is an active commercial shipping channel and smaller vessels use the shallower inshore channels across the site. The risk of contamination by accidental spillages of fuel or cargo is therefore increased and a small level of contamination will exist as a result of normal shipping activities. Large ports in the area also increase the risk of exposure.</li> </ul> <p><b>Non-toxic contamination of Red-Throated Divers and their supporting habitats</b></p> <ul style="list-style-type: none"> <li>Non-toxic contamination through nutrient loading, organic loading and changes to thermal regime could impact upon prey species and distribution. Non toxic contamination through the impact from an oil spill could be significant. Oil on the feathers of birds could lead to loss of insulation, reduced buoyancy and possible drowning.</li> </ul> <p><b>Selective extraction of prey species</b></p> <ul style="list-style-type: none"> <li>Removal of fish species and larger molluscs, for example, can have significant impacts upon the structure and functioning of benthic communities over and above the physical effects of fishing methods, particularly as some fish species fill upper roles in the trophic web. In addition, it has the potential to directly remove prey species. The mechanisms for these pressures to impact upon Red-throated Divers may be a direct or indirect reduction in food availability for the overwintering population.</li> </ul>

**Rochford District Council – Habitats Regulations Assessment Report

<p><b>Site Name: Outer Thames Estuary</b>  <b>Location (Lat and Long):</b>  <b>51 54 58 N</b>  <b>00 32 41 E</b>  <b>JNCC Site Code: UK9020309</b>  <b>Size (ha): 379264.14</b>  <b>Designation: SPA</b></p>	<p><b>Habitats Regulations Assessment: Data Proforma</b></p>
	<p><b>Non-selective extraction of Red-throated Divers</b></p> <ul style="list-style-type: none"> <li>• Non-selective extraction can occur through entanglement in nets or through bird strike. Static nets can be considered a significant risk to the species through entanglement and reduction of food availability. Entanglement in static nets is a major cause of known mortality in Red-throated Divers.</li> </ul> <p>Impacts may also occur from collision with wind turbines if birds fly at a height above 20m. However, it has been observed that they generally fly below this height.</p>
<p><b>HRA/AA Studies undertaken that address this site</b></p>	<p>No specific HRA/AA studies have been found in relation to the effects of development plans or projects on the Outer Thames Estuary SPA designation.</p>

## Ramsar Sites

### 10 Benfleet and Southend Marshes Ramsar

Site Name: Benfleet and Southend Marshes Location (Lat and Long): 51 31 42 N 00 41 00 E JNCC Site Code: UK11006 Size (ha): 2251.31 Designation: Ramsar	Habitats Regulations Assessment: Data Proforma
<b>Site Description</b>	Benfleet and Southend Marshes are located on the north shore of the outer Thames Estuary in southern England. The site comprises an extensive series of saltmarshes, cockle shell banks, mud-flats, and grassland that supports a diverse flora and fauna. The productive mud-flats, cockle shell banks and diverse saltmarsh communities provide a wide range of feeding and roosting opportunities for internationally important numbers of wintering wildfowl and waders.
	<ul style="list-style-type: none"> <li>• Red knot (<i>Calidris canutus islandica</i>) W and Southern Africa (wintering) 6307 individuals, representing an average of 1.4% of the population (five year peak mean 1998/9-2002/3)</li> </ul> <p><b>Species/populations identified subsequent to designation for possible future consideration under criterion 6.</b></p> <p><b>Species with peak counts in winter:</b></p> <p><b>Dunlin (<i>Calidris alpina alpina</i>) W Siberia/W Europe 17591 individuals, representing an average of 1.3% of the population (five year peak mean 1998/9-2002/3)</b></p>
<b>Conservation Objectives</b>	<ul style="list-style-type: none"> <li>• None available, however, please refer to the conservation objectives for the Benfleet and Southend Marshes SPA.</li> </ul>

11 Blackwater Estuary Ramsar

<b>Site Name: Blackwater Estuary</b> <b>Location (Lat and Long):</b> 51 45 13 N 00 51 59 E <b>JNCC Site Code: UK11007</b> <b>Size: 4395.15</b> <b>Designation: Ramsar</b>	<b>Habitats Regulations Assessment: Data Proforma</b>
<b>Site Description</b>	<p>The Blackwater Estuary is a large estuary between the Dengie peninsula and Mersea Island on the Essex coast. It stretches from immediately adjacent to Maldon and about 8 km south of Colchester. The Blackwater Estuary is the largest estuary in Essex north of the Thames and, is one of the largest estuarine complexes in East Anglia. Its mudflats, fringed by saltmarsh on the upper shores, support internationally and nationally important numbers of overwintering waterfowl. Shingle and shell banks and offshore islands are also a feature of the tidal flats. The surrounding terrestrial habitats; the sea wall, ancient grazing marsh and its associated fleet and ditch systems, plus semi-improved grassland are also of high conservation interest. This rich mosaic of habitats supports an outstanding assemblage of nationally scarce plants and a nationally important assemblage of rare invertebrates. There are 16 British Red Data Book species and 94 notable and local species.</p>
<b>Qualifying Features</b>	<p><b>Ramsar criterion 1</b></p> <p>Qualifies by virtue of the extent and diversity of saltmarsh habitat present. This site, and the four others in the Mid-Essex Coast complex, includes a total of 3,237 ha that represent 70% of the saltmarsh habitat in Essex and 7% of the total area of saltmarsh in Britain.</p> <p><b>Ramsar criterion 2</b></p> <p>The invertebrate fauna is well represented and includes at least 16 British Red Data Book species. In descending order of rarity these are: Endangered: a water beetle <i>Paracymus aeneus</i>; Vulnerable: a damselfly <i>Lestes dryas</i>, the flies <i>Aedes flavescens</i>, <i>Erioptera bivittata</i>, <i>Hybomitra expollicata</i> and the spiders <i>Heliophanus auratus</i> and <i>Trichopterna cito</i>; Rare: the beetles <i>Baris scolopacea</i>, <i>Philonthus punctus</i>, <i>Graptodytes bilineatus</i> and <i>Malachius vulneratus</i>, the flies <i>Campsicemus magius</i> and <i>Myopites eximia</i>, the moths <i>Idaea ochrata</i> and <i>Malacosoma castrensis</i> and the spider <i>Euophrys</i>.</p> <p><b>Ramsar criterion 3</b></p> <p>This site supports a full and representative sequences of saltmarsh plant communities covering the range of variation in Britain.</p>

Site Name: Blackwater Estuary Location (Lat and Long): 51 45 13 N 00 51 59 E JNCC Site Code: UK11007 Size: 4395.15 Designation: Ramsar	Habitats Regulations Assessment: Data Proforma
	<p><b>Essex County Council Minerals Development Documents: Issues and Options: Appropriate Assessment Screening Report January 2009</b></p> <p>The HRA identified the following potential impacts for each Option:</p> <ul style="list-style-type: none"> <li>• <b>Aggregate Recycling</b> <ul style="list-style-type: none"> <li>- Habitat Loss</li> <li>- Emissions</li> <li>- Human Disturbance</li> </ul> </li> <li>• <b>Option 1 – Predominantly Extensions to Existing Extraction Sites</b> <ul style="list-style-type: none"> <li>- Habitat Loss</li> <li>- Emissions</li> <li>- Flooding and Water Use</li> <li>- Human Disturbance</li> </ul> </li> <li>• <b>Option 2 – Dispersed Spread of Sites Across the County</b> <ul style="list-style-type: none"> <li>- Habitat Loss</li> <li>- Emissions</li> <li>- Flooding and Water Use</li> <li>- Human Disturbance</li> </ul> </li> <li>• <b>Option 3 – Concentrated Supply of Sites with Some Dispersed Sites</b> <ul style="list-style-type: none"> <li>- Flooding and Water Use</li> </ul> </li> </ul> <p>The screening report concluded that due to the large number of European sites and the potential impact of minerals and waste sites, the screening stage of the Appropriate Assessment should be carried out again, with greater site-specific detail, as the Preferred Options for site allocations are determined.</p>

12 Crouch and Roach Estuaries Ramsar

<b>Site Name: Crouch and Roach Estuaries</b> <b>Location (Lat and Long):</b> 51 38 16 N 00 40 10 E <b>JNCC Site Code: UK11058</b> <b>Size (ha): 1735.58</b> <b>Designation: Ramsar</b>	<b>Habitats Regulations Assessment: Data Proforma</b>
<b>Site Description</b>	<p>The Rivers Crouch and Roach are situated in South Essex. The River Crouch occupies a shallow valley between two ridges of London Clay, whilst the River Roach is set predominantly between areas of brick earth and loams with patches of sand and gravel. The intertidal zone along the Rivers Crouch and Roach is 'squeezed' between the sea walls of both banks and the river channel. This leaves a relatively narrow strip of tidal mud unlike other estuaries in the county, which, nonetheless, is used by significant numbers of birds. One species is present in internationally important numbers, and three other species of wader and wildfowl occur in nationally important numbers. Additional interest is provided by the aquatic and terrestrial invertebrates and by an outstanding assemblage of nationally scarce plants.</p>
<b>Qualifying Features</b>	<p><b>Ramsar criterion 2</b></p> <p>Supports an appreciable assemblage of rare, vulnerable or endangered species or subspecies of plant and animal including 13 nationally scarce plant species: slender hare's ear <i>Bupleurum tenuissimum</i>, divided sedge <i>Carex divisa</i>, sea barley <i>Hordeum marinum</i>, golden-samphire <i>Inula crithmoides</i>, laxflowered sea-lavender <i>Limonium humile</i>, curved hard-grass <i>Parapholis incurva</i>, Borrer's saltmarsh grass <i>Puccinellia fasciculata</i>, stiff saltmarsh grass <i>Puccinellia rupestris</i>, spiral tasselweed <i>Ruppia cirrhosa</i>, one-flowered glasswort <i>Salicornia pusilla</i>, small cord-grass <i>Spartina maritima</i>, shrubby seablite <i>Suaeda vera</i> and sea clover <i>Trifolium squamosum</i>. Several important invertebrate species are also present on the site, including scarce emerald damselfly <i>Lestes dryas</i>, the shorefly <i>Parydroptera disco-myzina</i>, the rare soldier fly <i>Stratiomys singularior</i>, the large horsefly <i>Hybomitra expollicata</i>, the beetles <i>Graptodytes bilineatus</i> and <i>Malachius vulneratus</i>, the ground lackey moth <i>Malacosoma castrensis</i> and <i>Eucosoma catoprana</i>.</p>

<p>HRA/AA Studies undertaken that address this site</p>	<p><b>East of England Plan – Habitats Regulations Assessment in response to the Further Proposed Changes consultation May 2008</b></p> <p>The HRA concluded that water levels and water quality of the Essex Estuaries SAC, and the Crouch and Roach Estuaries SPA/Ramsar Site will not be adversely affected as a result of the growth proposed for the catchment area of the Essex Estuaries SAC, the Crouch and Roach Estuaries SPA/Ramsar, and that policies SS3, H1, WAT2, ETG1, ETG4, ETG5 and CH1 of the draft East of England RSS will have no effect on the integrity of the Essex Estuaries SAC, the Crouch and Roach Estuaries SPA/Ramsar.</p> <p><b>The HRA (including AA) of proposed changes to Southend-on-Sea Core Strategy DPD July 2007</b></p> <p>The HRA found that two Core Strategy Policies have the potential for likely significant effects and would benefit from strengthening. Amendments to policy wording were proposed and considered to be sufficient to address the identified likely significant effects. These revised policies have been reassessed and it is considered that if the recommended changes to the Core Strategy Policies are adopted within the Core Strategy DPD then no further Appropriate Assessment of this document is required.</p> <p>The assessment concluded that if the recommendations were incorporated then the Core Strategy will not have adverse effects on the integrity of the following European sites either alone or in-combination:</p> <ul style="list-style-type: none"> <li>• Benfleet and Southend Marshes SPA</li> <li>• Foulness SPA and</li> <li>• Essex Estuaries SAC</li> <li>• Crouch and Roach Estuaries SPA</li> <li>• Thames Estuary and Marshes SPA</li> </ul>

**Rochford District Council – Habitats Regulations Assessment Report  
Rochford Area Action Plan Submission Document**

<p><b>Site Name: Crouch and Roach Estuaries</b>  <b>Location (Lat and Long):</b>  <b>51 38 16 N</b>  <b>00 40 10 E</b>  <b>JNCC Site Code: UK11058</b>  <b>Size (ha): 1735.58</b>  <b>Designation: Ramsar</b></p>	<p style="text-align: center;"><b>Habitats Regulations Assessment: Data Proforma</b></p>
	<p><b>Castle Point Core Strategy Supporting Paper 3: Habitats Regulations Assessment for the Publication Document July 2009</b></p> <p>The HRA identified the supply of water and the treatment of waste water and sewage as key issues in relation to the identified European sites. It recommends additional policies and requirements to ensure that development is aligned more closely with the delivery of water infrastructure and that the need for water infrastructure has been fully assessed through a Water Cycle Study.</p> <p>The HRA concludes that there will be no adverse effects on the integrity of the Crouch and Roach Estuaries SPA.</p> <p><b>Southend Airport Runway Extension and Associated Development: Stage 1 Screening Report – Habitats Regulations Assessment August 2009</b></p> <p>The HRA identifies that the construction and operation of the proposal has the potential to result in the following impacts:</p> <ul style="list-style-type: none"> <li>• Construction/operational noise and disturbance;</li> <li>• Increase in atmospheric pollutants as a result of increased flight numbers; and</li> <li>• Change to surface run-off and hydrology resulting from increase in area of hard surfaces.</li> </ul> <p>The HRA Screening identified that the project has the potential to increase disturbance of the qualifying bird species and assemblages of the Crouch and Roach Estuaries SPA/Ramsar. It concluded that this impact however, is likely to be temporary as typical altitude of flights would remain unchanged from that currently employed, and taking into account the ability of most birds to become habituated to regularly-occurring noise disturbance the increased frequency of these flights would pose little disturbance to the bird species and assemblages. This conclusion was supported by Natural England in their consultation response to the JAAP.</p> <p>The HRA concluded that no significant effects are likely on the qualifying features of the Crouch and Roach Estuaries SPA as a result of the proposed airport runway extension and associated infrastructure developments, nor will the conservation objectives be compromised.</p>

13 Dengie Ramsar

Site Name: Dengie Location Grid Ref: 51 41 26 N 00 57 34 E JNCC Site Code: UK11018 Size: 3127.23 Designation: Ramsar	Habitats Regulations Assessment: Data Proforma
<b>Site Description</b>	Dengie is a large and remote area of tidal mudflat and saltmarsh at the eastern end of the Dengie Peninsula, between the Blackwater and Crouch Estuaries in Essex. The saltmarsh is the largest continuous example of its type in Essex. Foreshore, saltmarsh and beaches support an outstanding assemblage of rare coastal flora. It hosts internationally and nationally important wintering populations of wildfowl and waders, and in summer supports a range of breeding coastal birds including rarities. The formation of cockleshell spits and beaches is of geomorphological interest.
<b>Qualifying Features</b>	<p><b>Ramsar criterion 1</b>  Qualifies by virtue of the extent and diversity of saltmarsh habitat present. Dengie, and the four other sites in the Mid-Essex Coast Ramsar site complex, includes a total of 3,237 ha, that represent 70% of the saltmarsh habitat in Essex and 7% of the total area of saltmarsh in Britain.</p> <p><b>Ramsar criterion 2</b>  Dengie supports a number of rare plant and animal species. The Dengie has 11 species of nationally scarce plants: sea kale <i>Crambe maritima</i>, sea barley <i>Hordeum marinum</i>, golden samphire <i>Inula crithmoides</i>, lax flowered sea lavender <i>Limonium humile</i>, the glassworts <i>Sarcocornia perennis</i> and <i>Salicornia pusilla</i>, small cord-grass <i>Spartina maritima</i>, shrubby sea-blite <i>Suaeda vera</i>, and the eelgrasses <i>Zostera angustifolia</i>, <i>Z. marina</i> and <i>Z. noltei</i>. The invertebrate fauna includes the following Red Data Book species: a weevil <i>Baris scolopacea</i>, a horsefly <i>Atylotus latistriatus</i> and a jumping spider <i>Euophrys browni</i>.</p> <p><b>Ramsar criterion 3</b>  This site supports a full and representative sequences of saltmarsh plant communities covering the range of variation in Britain.</p>

15 Medway Estuary and Marches Ramsar

<p><b>Site Name: Medway Estuary and Marshes</b>  <b>Location Grid Ref (Lat and Long):</b>  51 24 02 N  00 40 38 E  <b>JNCC Site Code: UK11040</b>  <b>Size: 4684.36</b>  <b>Designation: Ramsar</b></p>	<p><b>Habitats Regulations Assessment: Data Proforma</b></p>
<p><b>Site Description</b></p>	<p>Medway Estuary and Marshes is located on the north coast of Kent, within the Greater Thames estuary. It is a complex of rain-fed, brackish, floodplain grazing marsh with ditches, and intertidal saltmarsh and mudflat. These habitats together support internationally important numbers of wintering waterfowl. Rare wetland birds breed in important numbers. The saltmarsh and grazing marsh are of international importance for their diverse assemblages of wetland plants and invertebrates.</p>
<p><b>Qualifying Features</b></p>	<p><b>Ramsar criterion 2</b></p> <p>The site supports a number of species of rare plants and animals. The site holds several nationally scarce plants, including sea barley <i>Hordeum marinum</i>, curved hard-grass <i>Parapholis incurva</i>, annual beard-grass <i>Polypogon monspeliensis</i>, Borrer's saltmarsh-grass <i>Puccinellia fasciculata</i>, slender hare`s-ear <i>Bupleurum tenuissimum</i>, sea clover <i>Trifolium squamosum</i>, saltmarsh goose-foot <i>Chenopodium chenopodioides</i>, golden samphire <i>Inula crithmoides</i>, perennial glasswort <i>Sarcocornia perennis</i> and one-flowered glasswort <i>Salicornia pusilla</i>.</p> <p>A total of at least twelve British Red Data Book species of wetland invertebrates have been recorded on the site. These include a ground beetle <i>Polistichus connexus</i>, a fly <i>Cephalops perspicuus</i>, a dancefly <i>Poecilobothrus ducalis</i>, a fly <i>Anagnota collini</i>, a weevil <i>Baris scolopacea</i>, a water beetle <i>Berosus spinosus</i>, a beetle <i>Malachius vulneratus</i>, a rove beetle <i>Philonthus punctus</i>, the ground lackey moth <i>Malacosoma castrensis</i>, a horsefly <i>Atylotus latistriatus</i>, a fly <i>Campsicnemus magius</i>, a soldier beetle, <i>Cantharis fusca</i>, and a crane fly <i>Limonia danica</i>. A significant number of non-wetland British Red Data Book species also occur.</p>

### 1 East of England Plan – The Revision to the Regional Spatial Strategy for the East of England 2008<sup>1</sup>

<b>Plan Type</b>	<b>Regional Spatial Strategy</b>
<b>Plan Owner/Competent Authority</b>	<b>East of England Regional Assembly</b>
<b>Currency</b>	<b>2001 – 2021</b>
<b>Region/Geographic Coverage</b>	<b>Government Office for the East of England</b>
<b>Sector</b>	<b>Planning</b>
<b>Related work HRA/AA</b>	<b>Habitats Regulations Assessment in response to the Further Proposed Changes consultation May 2008</b>
<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p>Draft spatial strategy to guide development in the East of England for at least the next 20 years to sustain and improve the quality of life for all people who live in, work in, or visit the region, by developing a more sustainable, prosperous and outward-looking region, while respecting its diversity and enhancing its assets.</p> <ul style="list-style-type: none"> <li>60% of development to be on previously developed land.</li> <li>regeneration, extension and diversification of the region’s tourist industry.</li> <li>support is given to the expansion of Southend Airport to meet local demand and contribute to local economic development.</li> <li>facilitate the delivery of at least 508,000 net additional dwellings over the period 2001 to 2021. Taking account of completions of 105,550 between 2001 and 2006 the minimum regional housing target 2006 to 2021 is 402,540.</li> </ul>	<ul style="list-style-type: none"> <li><b>Disturbance</b> – as a result of development near/adjacent to European sites, including: <ul style="list-style-type: none"> <li>Recreation</li> <li>Light Pollution</li> <li>Noise Pollution</li> </ul> </li> <li><b>Atmospheric Pollution</b> – generated as a result of housing, employment and transport growth.</li> <li><b>Water Pollution</b> – increased pressure on sewerage capacity and an increase in non-permeable surfaces.</li> <li><b>Water Abstraction</b> – as a result of proposed development, potential for reduced water levels.</li> <li><b>Land Take</b> – as a result of proposed development. <ul style="list-style-type: none"> <li>Coastal Squeeze</li> </ul> </li> <li><b>Modified Drainage</b> – as a result of proposed development altering surface and groundwater flow.</li> </ul>

<sup>1</sup> The East of England Plan was revoked on 3 January 2013.

**Rochford District Council – Habitats Regulations Assessment Report  
Development Management DPD**

Document Details	Potential impacts that could cause 'in-combination' effects
<ul style="list-style-type: none"> <li>• provide a minimum of 127,000 dwellings in Essex, Thurrock and Southend between 2001 and 2021.</li> <li>• improvements to the strategic road network including the A130 and A127.</li> <li>• access to the region's airports should be managed and enhanced to support development and enable them to contribute to national and regional objectives for economic growth and regeneration</li> <li>• Essex and Southend should plan for the following quantity of waste during the life of the plan – 9,120 annual tonnages of waste (thousand tonnes).</li> <li>• Essex, Southend and Thurrock should maintain 4.55 million tonnes pa of sand and gravel during the life of the plan.</li> </ul>	<p>The HRA concluded that water levels and water quality of the Essex Estuaries SAC, and the Crouch and Roach Estuaries SPA/Ramsar Site will not be adversely affected as a result of the growth proposed for the catchment area of the Essex Estuaries SAC, the Crouch and Roach Estuaries SPA/Ramsar, and that policies SS3, H1, WAT2, ETG1, ETG4, ETG5 and CH1 of the draft East of England RSS will have no effect on the integrity of the Essex Estuaries SAC, the Crouch and Roach Estuaries SPA/Ramsar.</p>

## Sub-Regional/County

### 2 Essex Transport Strategy: the Local Transport Plan for Essex (June 2011)

<b>Plan Type</b>	<b>Local Transport Plan</b>
<b>Plan Owner/Competent Authority</b>	<b>Essex County Council</b>
<b>Currency</b>	<b>2011 – 2026</b>
<b>Region/Geographic Coverage</b>	<b>Essex County Council’s administrative boundary</b>
<b>Sector</b>	<b>Transport</b>
<b>Related work HRA/AA</b>	<b>None</b>
<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p>The Strategy sets out the Council’s vision for transport the outcomes they aim to achieve over a fifteen year period, policies for transport and the broad approach to implementing these.</p> <p><b>Transport priorities:</b></p> <p><b>Strategic transport priorities</b></p> <ul style="list-style-type: none"> <li>Identifying an agreed and deliverable solution to address congestion at the Thames Crossing and adjacent M25 junction 30/31;</li> <li>Lobbying Government for enhancements to the A12;</li> <li>Lobbying Government for enhancements to the A120 to access Harwich port and between the A12 and Braintree;</li> <li>Lobbying Government for additional capacity on the Great Eastern Main Line and West Anglia mainline to accommodate growing commuter demand, the provision of competitive journey times for Essex Thameside services, and an enhanced local role in the rail franchise process.</li> </ul>	<ul style="list-style-type: none"> <li><b>Disturbance</b> – as a result of development near/adjacent to European sites, including: <ul style="list-style-type: none"> <li>– Recreation</li> <li>– Light Pollution</li> <li>– Noise Pollution</li> </ul> </li> <li><b>Atmospheric Pollution</b> – generated as a result of increased traffic.</li> <li><b>Water Pollution</b> – through increased atmospheric pollution.</li> <li><b>Land Take</b> – as a result of proposed development. <ul style="list-style-type: none"> <li>– Coastal Squeeze</li> </ul> </li> <li><b>Modified Drainage</b> – as a result of proposed development altering surface and groundwater flow.</li> </ul>

**Rochford District Council – Habitats Regulations Assessment Report  
Development Management DPD**

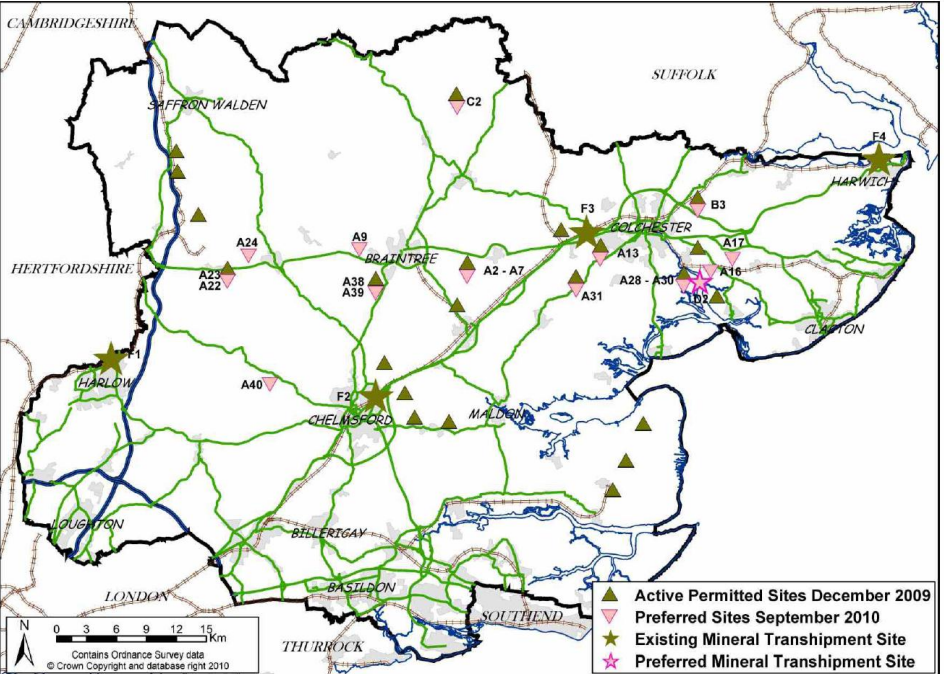

Document Details	Potential impacts that could cause 'in-combination' effects
<p><b>Countywide priorities</b></p> <ul style="list-style-type: none"> <li>• Reducing the number of people killed or seriously injured on Essex roads;</li> <li>• Continuing to work with the Essex Casualty and Congestion Board;</li> <li>• Working with partners to promote a safe and secure travelling environment;</li> <li>• Maintaining the Essex highway network and other transport assets;</li> <li>• Keeping the transport network safe and operational;</li> <li>• Managing the impact of planned works on the highway network.</li> </ul> <p><b>Priorities for Thames Gateway</b></p> <ul style="list-style-type: none"> <li>• Providing for and promoting access by sustainable modes of travel to new development areas;</li> <li>• Improving public transport links within and between the Thames Gateway towns (including the A13 Passenger Transport Corridor and sers schemes);</li> <li>• Improving the availability of sustainable travel choices and raising public awareness of these through travel planning;</li> <li>• Addressing maintenance, signing and broken links in the cycle network to improve conditions for cyclists and create a safer atmosphere for cycling.</li> <li>• Improving the attractiveness and ease of use of public spaces to support regeneration;</li> <li>• Improving journey time reliability on strategic inter-urban routes including the A127, A129, A130 and the A13.</li> </ul> <p>Improving access to London Gateway port and Southend Airport.</p>

Development Management DPD**

**3 Essex County Council Minerals Development Document: Preferred Approach Paper 2010**

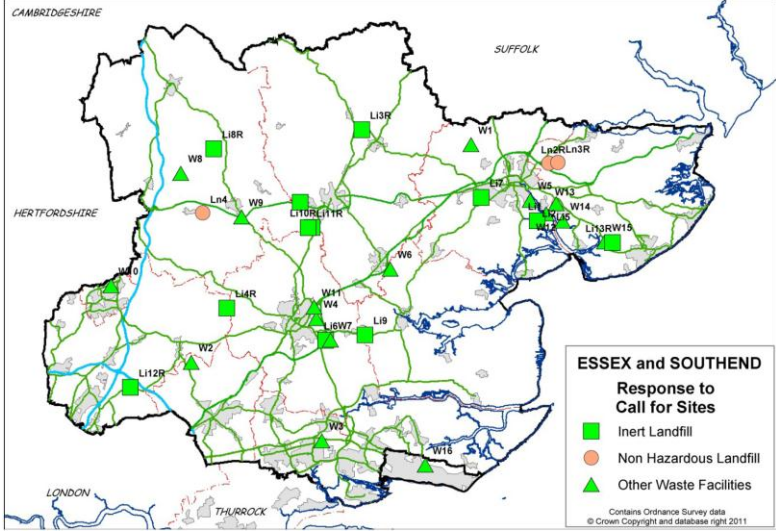

<b>Plan Type</b>	<b>Minerals Development Document</b>
<b>Plan Owner/Competent Authority</b>	<b>Essex County Council</b>
<b>Currency</b>	<b>2028</b>
<b>Region/Geographic Coverage</b>	<b>Essex County Council administrative boundaries</b>
<b>Sector</b>	<b>Minerals</b>
<b>Related work HRA/AA</b>	<b>HRA Appropriate Assessment Report Oct 2010</b>
<b>Document Details</b>	<b>Potential impacts that could cause 'in-combination' effects</b>
<p>Essex County Council is required to produce a Development Plan Document for minerals, which plans for the future provision of minerals setting out how the demand for minerals will be met between now and 2028.</p> <p><b>Strategic Objectives</b></p> <ol style="list-style-type: none"> <li>1. That reliance on primary mineral resources in Essex will be reduced, firstly through the more efficient use of the primary resource and reducing the amount of mineral waste; then the use of recycled aggregates.</li> <li>2. To identify and safeguard the following resources in Essex: <ul style="list-style-type: none"> <li>• Sand and gravel, chalk, silica sand, brickearth and brick clay which have potential future economic and/or conservation value i.e., unnecessary sterilisation should be avoided;</li> <li>• Existing and potential secondary processing and aggregate recycling facilities that are of strategic importance for future mineral supply, to ensure these are not compromised by new development.</li> </ul> </li> <li>3. To identify sites and policy criteria for a steady and adequate supply of minerals to assist in the economic growth of Essex and to meet the agreed sub-regional aggregate apportionment.</li> <li>4. To afford protection to designated sites of landscape, wildlife, geodiversity, cultural and heritage importance, commensurate with their importance, from mineral operators.</li> </ol>	<p>The AA concluded that the MDD Preferred Approach has established a sufficient policy framework to enable the delivery of measures to either avoid or adequately mitigate adverse effects on the integrity of European sites.</p>

# Rochford District Council – Habitats Regulations Assessment Report Development Management DPD

Document Details	Potential impacts that could cause 'in-combination' effects
<p>5. To achieve more sustainable minerals transportation by giving preference to local sources of aggregate, optimise how sites access the strategic highway network and enable the long haul movement of minerals by rail and water.</p> <p>6. To secure high quality restoration of extraction sites with appropriate aftercare to achieve appropriate and beneficial after-uses.</p> <p>7. To maintain and/or enhance landscape, biodiversity and residential amenity for people living in proximity to minerals development. Restoration of mineral workings will deliver tangible benefits to affected local communities.</p>

## 4 Essex County Council Waste Development Document: Preferred Approach Paper 2011

<b>Plan Type</b>	<b>Waste Local Plan</b>
<b>Plan Owner/Competent Authority</b>	<b>Essex County Council and Southend-on-Sea Borough Council</b>
<b>Currency</b>	<b>2031</b>
<b>Region/Geographic Coverage</b>	<b>Essex County Council and Southend-on-Sea Borough Council boundaries</b>
<b>Sector</b>	<b>Waste</b>
<b>Related work HRA/AA</b>	<b>HRA Screening Report September 2011</b>
<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p>The purpose of this WDD: Preferred Approach is to outline the Authorities’ preferred policy approach for managing waste within the Plan area.</p> 	<p>The HRA concluded that no Preferred Policy Approaches are likely to have significant effects on any European sites.</p>

Rochford District Council – Habitats Regulations Assessment Report  
Development Management DPD

5 Essex Thames Gateway Water Cycle Study - Scoping Study Final Report March 2009

<b>Plan Type</b>	<b>Water Cycle Study</b>
<b>Plan Owner/Competent Authority</b>	Basildon District Council; Castle Point Borough Council; Rochford District Council; Southend-on-Sea Borough Council; and Essex County Council.
<b>Currency</b>	2009
<b>Region/Geographic Coverage</b>	South Essex
<b>Sector</b>	Water
<b>Related work HRA/AA</b>	None
<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p>The overall objective is to provide an integrated approach to managing flood risk, water supply, and wastewater infrastructure in the study area, while being mindful of the environmental constraints. This is to ensure that all the elements of the water cycle and water infrastructure can be addressed as part of the delivery of the long term planning provision for growth in the area.</p> <ul style="list-style-type: none"> <li>• The Essex Thames Gateway area does not have sufficient raw water resources to supply existing development;</li> <li>• This means that there is limited water is available for further abstraction from surface or groundwater sources and therefore further transfer of water resources will be required to supply water to new developments within the Essex Thames Gateway area;</li> <li>• Increased storage at Abberton Reservoir is expected to meet future water demand and the commensurate increase in abstraction and transfer from the Ely-Ouse transfer scheme, which if approved will come online in 2014. Until the scheme is in place and operational, there will be a deficit in available water resources during drought years in Essex Thames Gateway area;</li> </ul>	<p>The Water Cycle Study identifies that there is <b>“unlikely to be any increase in existing abstractions from surface or groundwater sources and as such it is possible to screen out impacts to the sites within the study area as a result of water resources.”</b> However, there is still the <b>potential for discharges of wastewater to have an impact</b> on European sites.</p>

**Rochford District Council – Habitats Regulations Assessment Report  
Development Management DPD**

---

Document Details	Potential impacts that could cause 'in-combination' effects
<ul style="list-style-type: none"><li>• There are no immediate limitations on supply infrastructure pipelines, reservoirs, water treatment works or pumping stations.</li><li>• In the majority of cases there is sufficient treatment capacity and capacity in the network to allow planned development in the study area up to 2015. Development beyond this in most cases will require upgrades to the treatment capacity of several of the WWTW and the construction of new strategic sewer mains to service new development; this will need to be defined and assessed in the next stage of the WCS.</li></ul>	

**Rochford District Council – Habitats Regulations Assessment Report  
Development Management DPD**

**6 Anglian River Basin Management Plan September 2009**

<b>Plan Type</b>	<b>River Basin Management Plan</b>
<b>Plan Owner/Competent Authority</b>	<b>Environment Agency</b>
<b>Currency</b>	<b>2009 – 2015</b>
<b>Region/Geographic Coverage</b>	<b>Anglian River Basin District</b>
<b>Sector</b>	<b>Water</b>
<b>Related work HRA/AA</b>	<b>Habitats Regulations Assessment will be available in December 2009<sup>2</sup></b>
<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p>The draft River Basin Management Plan describes the main issues for the Anglian river basin district and highlights some key actions proposed for dealing with them set out in brief the actions the EA propose should be taken. The document sets out detailed proposals for the next six years and beyond.</p> <p>Some key actions for the Combined Essex Catchment:</p> <ul style="list-style-type: none"> <li>• Installation of elver passes to provide habitat improvement in river channel and eel migration. Schemes located at :Kings Mill, Stonham Back Cut, Cuton Back Cut, Barnes Mill, Broomfield Mill, Langleys Weir, Howe ST. Mill, Wickham Place, Blue Mills, Greys Mill, Easterford Mill, Blackwater Mill, Bradwell, Stisted Mill, Convent Lane Wiers, Cooks Mill, Ford ST. Mill, Chappel Mill, Chalkney Mill, Earls Colne Mill, Townsford Mill, Hulls Mill, Alderford Mill.</li> <li>• In response to increasing pesticide concentrations in the Rivers Stour, Chelmer and Blackwater Essex &amp; Suffolk Water has appointed two catchment Officers to work with farmers, growers, landowners and agronomists and other pesticide users in the catchments with the aim of reducing pesticides entering watercourses.</li> <li>• Floating pennywort removal projects.</li> </ul>	<p>The HRA concluded that the River Basin Management Plan is unlikely to have any significant negative effects on any Natura 2000 sites and therefore does not require further assessment under the Habitats Regulations. This conclusion relied upon the fact that before any measures in the plan are implemented they must be subject to the requirements of the Habitats Regulations. Any plans, project or permissions required to implement the measures must undergo an appropriate assessment if they are likely to have a significant effect.</p>

**Rochford District Council – Habitats Regulations Assessment Report  
Development Management DPD**

**7 Essex and Suffolk Water Final Water Resources Management Plan 2010 – 2035**

<b>Plan Type</b>	<b>Water Resource Management Plan</b>
<b>Plan Owner/Competent Authority</b>	<b>Essex and Suffolk Water</b>
<b>Currency</b>	<b>2010 – 2035</b>
<b>Region/Geographic Coverage</b>	<b>Essex and Suffolk Resource Zones</b>
<b>Sector</b>	<b>Water</b>
<b>Related work HRA/AA</b>	<b>Available as part of the Final WRMP</b>
<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p>The Water Resources Management Plan sets out how Essex and Suffolk Water propose to ensure that there is sufficient security of water supplies to meet the anticipated demands of its customers over the 25-year planning period from 2010 to 2035.</p> <p><b>Essex Resource Zone Strategy</b></p> <p><b>Abberton Scheme</b></p> <p>The Company will continue its strategy for implementing the Abberton Scheme. Currently all the necessary planning consents have been obtained and a number of the environmental enhancements around the western section have been completed. ESW will continue to work closely with the Environment Agency and other groups to deliver the scheme.</p> <p><b>Baseline Metering</b></p> <p>ESW is committed to achieving universal metering in Essex by 2020. To do this it intends to apply for powers to compulsory meter from 2015 onwards.</p>	<p>In terms of Essex &amp; Suffolk Water's WRMP Final Planning Solution, only the Abberton Scheme was identified as having the potential to have effects on European sites, namely the Ouse Washes, The Wash, the Stour Estuary and Abberton Reservoir. The HRA concluded that the scheme would not significantly adversely effect the Ouse Washes, The Wash and the Stour Estuary. However, further studies were undertaken to inform an Appropriate Assessment for Abberton Reservoir. Following liaison with Natural England, these studies were also able to conclude that the scheme would not have significant adverse effects on the integrity of the site and so an appropriate assessment was not required. Indeed, Natural England stated that, "In our view, the Abberton Reservoir Scheme is likely to have a significant positive effect on the conservation status of the migratory and wintering waterfowl assemblages in the short-, medium- and long-term future of the statutorily designated site."</p>

**Rochford District Council – Habitats Regulations Assessment Report  
Development Management DPD**

**8 Combined Essex Catchment Abstraction Management Strategy (CAMS) Feb 2007  
Combined Essex Catchment Abstraction Management Strategy Update March 2008**

<b>Plan Type</b>	<b>Catchment Abstraction Management Plan</b>
<b>Plan Owner/Competent Authority</b>	<b>Environment Agency</b>
<b>Currency</b>	<b>2014</b>
<b>Region/Geographic Coverage</b>	<b>Combined Essex Catchment, which includes the South Essex Catchment</b>
<b>Sector</b>	<b>Water</b>
<b>Related work HRA/AA</b>	<b>HRA of the Review of Consents Process</b>
<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p>The document sets out how the Environment Agency Wales will manage water abstraction from the Combined Essex Catchment until 2009. The strategy provides the framework for any decision on an abstraction license application.</p> <p>The South Essex Catchment has been split into 5 Water Resource Management Units (WRMU). The CAMS update assesses:</p> <ul style="list-style-type: none"> <li>• WRMU 1 as ‘water available’</li> <li>• WRMU 2 as ‘water available’</li> <li>• WRMU 3 as ‘water available’</li> <li>• WRMU 4 as ‘no water available’</li> <li>• WRMU 5 as ‘no water available’</li> </ul>	<p>Under the Habitats Regulations the Environment Agency has a duty to assess the effects of existing abstraction licences and any new applications to make sure they are not impacting on internationally important nature conservation sites. Water efficiency is also tested by the EA before a new license is granted. If the assessment of a new application shows that it could have an impact on a SAC/SPA the EA will have to follow strict rules in setting a time limit for that license.</p>

**Rochford District Council – Habitats Regulations Assessment Report  
Development Management DPD**

**9 Exceeding Expectations Tourism Growth Strategy for Essex, March 2007**

<b>Plan Type</b>	<b>Tourism Growth Strategy</b>
<b>Plan Owner/Competent Authority</b>	<b>The Tourism Network</b>
<b>Currency</b>	<b>N/A</b>
<b>Region/Geographic Coverage</b>	<b>Essex</b>
<b>Sector</b>	
<b>Related work HRA/AA</b>	
<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p><b>Vision</b></p> <p>The vision for this Strategy is that over the next five years increased visitor spend within Essex will support a vibrant economy and that an improving and expanding visitor offer will not only make Essex a great place to visit, but also a great place to live and work.</p> <p>Essex will become:</p> <ul style="list-style-type: none"> <li>• An area where people visit rather just travel through;</li> <li>• A destination of choice for people in London and the South East for a high quality short break or weekend away;</li> <li>• Known for its cultural offering, activity and special interest tourism;</li> <li>• Known as an accessible and affordable destination for conferences and meetings and an alternative to London.</li> </ul> <p><b>The Strategic Aims</b></p> <ol style="list-style-type: none"> <li>1. Increase the value of tourism to Essex by 4% per annum to over £2,000,000,000 within 5 years.</li> <li>2. To create an additional 7,000 jobs within 5 years.</li> </ol>	<p>The HRA found that the vision and the strategic aims of the document have the potential for significant effects on the county of Essex. Tourism can lead to a number of in-combination effects which may adversely affect the Natura 2000 sites located in Essex. The increased volume of traffic can decrease air quality, increase light and noise pollution and cause disturbance in the surrounding area. Further disturbance can be caused from visitors entering into protected sites for leisure activities. Tourism can also lead to an increase in development which in turn would lead to habitat loss for species living in settlement peripheries.</p>

<p>Post-2021, the residential envelope of existing settlements will be extended in the following areas (as indicated on the Key Diagram) to deliver the following approximate number of units post-2021.</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="background-color: #D9EAD3;">Area</th> <th style="background-color: #D9EAD3;">Dwellings post-2021</th> </tr> </thead> <tbody> <tr> <td>South East Ashingdon</td> <td style="text-align: center;">500</td> </tr> <tr> <td>South West Hullbridge</td> <td style="text-align: center;">250</td> </tr> <tr> <td>West Great Wakering</td> <td style="text-align: center;">250</td> </tr> <tr> <td style="text-align: right;"><b>Total</b></td> <td style="text-align: center;"><b>1,000</b></td> </tr> </tbody> </table> <p>The Council will support:</p> <ul style="list-style-type: none"> <li>• the development of Cherry Orchard Jubilee County Park;</li> <li>• the development of Wallasea Island Wild Coast Project;</li> <li>• the enhancement of the District's commercial centres;</li> <li>• the development of an Eco-Enterprise Centre;</li> <li>• the development of a skills training academy;</li> <li>• the enhancement of London Southend Airport;</li> <li>• the development and growth of the voluntary sector;</li> <li>• the development and growth of home-working; and</li> <li>• the protection and enhancement of the role of small and medium sized businesses.</li> </ul>	Area	Dwellings post-2021	South East Ashingdon	500	South West Hullbridge	250	West Great Wakering	250	<b>Total</b>	<b>1,000</b>	<p>However the assessment could not conclude with certainty that the level of development proposed in the Core Strategy and surrounding areas will not have likely significant in-combination effects on European sites via reduced water quality and increased water resource demand.</p> <p>This is due to a number of uncertainties, including data limitations and the implementation uncertainty of the proposed development.</p> <p>The assessment makes a number of recommendations to address these uncertainties and mitigate the potential likely significant effects outlined above. The RHA Screening concluded that if the recommendations are incorporated into the Core Strategy and a review of HRA findings is carried out upon completion of the Essex Thames Gateway WCS, the Core Strategy will not have likely significant effects either alone or in-combination on European sites.</p>
Area	Dwellings post-2021										
South East Ashingdon	500										
South West Hullbridge	250										
West Great Wakering	250

**11 Rochford District Council Allocations Submission Document 2013**

<b>Plan Type</b>	<b>Allocations, Development Plan Document</b>
<b>Plan Owner/Competent Authority</b>	<b>Rochford District Council</b>
<b>Currency</b>	<b>N/A</b>
<b>Region/Geographic Coverage</b>	<b>Rochford District Council administrative boundaries</b>
<b>Sector</b>	<b>Planning</b>
<b>Related work HRA/AA</b>	<b>Available</b>
<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p>The Allocations document provides a structure for clear, visible, consistent decision making by ensuring that land allocations for different uses are clearly set out. The document does not just identify land for residential, educational, and employment development, sites across the District are also set out in this document for protection, including the Green Belt, Local Wildlife Sites, open spaces and the Upper Roach Valley.</p> <p>The Allocations Document will contribute to the vision and objectives in conjunction with the Core Strategy. Together, these all contribute to the overall vision for the District. The vision and objectives for the plan period have been adapted from those in the Core Strategy to reflect changing circumstances, emerging initiatives and suggestions from community involvement.</p> <p>The Allocations Submission Document, having regard to proposals and areas identified in the Core Strategy, sets out proposed policies for:</p> <ul style="list-style-type: none"> <li>• Brownfield Residential Land Allocations</li> <li>• Settlement Extension Residential Land Allocations</li> <li>• Existing Employment Land Allocations</li> <li>• New Employment Land Allocations</li> <li>• Ecological and Landscape Allocations</li> <li>• Educational Land Allocations</li> </ul>	<p>The HRA (Screening) Report for the adopted Core Strategy considered the potential for development proposed in Rochford District, which includes development proposed in the Allocations DPD, and the surrounding areas to have likely significant in-combination effects on European sites through increased disturbance, reduced water quality and reduced water levels.</p> <p>The Allocations DPD sits below the Core Strategy in the Local Development Plan and provides further detail on how land will be allocated for development across the District.</p> <p>The screening assessed that the further detail on the location, type and capacity of development does not indicate that there are likely to be any significant in-combination effects outwith those already addressed through the HRA of the Core Strategy.</p> <p>The mitigation provided by policies in the Core Strategy and Allocations DPD as well as current regulatory processes (EA Review of Consents) will ensure that the potential impacts of proposed development on the environment are minimised. It was concluded that none of the policies/allocations in the Pre-Submission Allocations DPD are likely to have significant effects on identified European sites either alone or in-combination.</p>

<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p><b>Local Objectives</b></p> <ul style="list-style-type: none"><li>• Regeneration of Southend by Improving the Economy by promoting and supporting sustainable economic growth in appropriate locations</li><li>• Achieving an Efficient Transport System by ensuring that land use and transport (all modes) planning are integrated.</li><li>• Raising Community Awareness by publicising the effects of continuing traffic growth and the benefits and availability of alternative transport modes.</li><li>• Improving the Highway by pursuing effective maintenance procedures that achieve value for money solutions whilst keeping the quality of life and urban renaissance objectives by improving the street scene.</li></ul>	

**Rochford District Council – Habitats Regulations Assessment Report  
Development Management DPD**

**18 London Southend Airport Runway Extension and Associated Development Oct 2009**

<b>Plan Type</b>	<b>Planning Application</b>
<b>Plan Owner/Competent Authority</b>	<b>London Southend Airport Company Ltd</b>
<b>Currency</b>	<b>N/A</b>
<b>Region/Geographic Coverage</b>	<b>London Southend Airport Boundary</b>
<b>Sector</b>	<b>Planning</b>
<b>Related work HRA/AA</b>	<b>Stage 1 Screening Report - Habitats Regulation Assessment August 2009</b>
<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p>The planning application seeks permission for the following:</p> <ul style="list-style-type: none"> <li>• Runway extension (approx. 300m plus 80m starter strip) and repositioning of landing lights;</li> <li>• Diversion of Eastwoodbury Lane as this currently crosses the site of the proposed runway extension;</li> <li>• Alterations to the pedestrian and vehicular access to St Laurence and All Saints Church, and removal and reinstatement of part of the churchyard wall</li> <li>• Drainage facilities for the extended runway and road diversion;</li> <li>• Demolition of four cottages on the south side of the runway extension area, and an additional two on the north side.</li> </ul>	<p>The HRA Screening identified that the project has the potential to increase disturbance of the qualifying bird species and assemblages of the Crouch and Roach Estuaries SPA/Ramsar. It concluded that this impact however, is likely to be temporary as typical altitude of flights would remain unchanged from that currently employed, and taking into account the ability of most birds to become habituated to regularly-occurring noise disturbance the increased frequency of these flights would pose little disturbance to the bird species and assemblages. This conclusion was supported by Natural England in their consultation response to the JAAP.</p>

**Rochford District Council – Habitats Regulations Assessment Report  
Development Management DPD**

**19 London Southend Airport and Environs Joint Area Action Plan Submission Document 2013**

<b>Plan Type</b>	<b>Area Action Plan</b>
<b>Plan Owner/Competent Authority</b>	<b>Rochford District Council Southend-on-Sea Borough Council</b>
<b>Currency</b>	<b>N/A</b>
<b>Region/Geographic Coverage</b>	<b>London Southend Airport Boundary</b>
<b>Sector</b>	<b>Planning</b>
<b>Related work HRA/AA</b>	
<b>Document Details</b>	<b>Potential impacts that could cause ‘in-combination’ effects</b>
<p>The shared Vision for the future development of London Southend Airport and its environs (i.e. the JAAP) is:</p> <p><i>‘An area that realises its potential as a driver for the sub-regional economy, providing significant employment opportunities and ensuring the quality of life for its residents and workers. To achieve this, the area’s assets and opportunities for employment need to be supported and developed’</i></p> <p>The objectives are:</p> <ul style="list-style-type: none"> <li>• Maximising the economic benefits of a thriving airport and related activity;</li> <li>• Ensuring good connectivity to the development area by all modes of transport, with appropriate improvements to sustainable transport and the highway network;</li> <li>• Ensuring a high quality public realm and environment for residents and workers;</li> <li>• Maximum return on public investment through attracting inward investment; and</li> <li>• Efficient use and upgrading of existing employment land resources.</li> </ul>	<p>Airports can increase disturbance to wildlife in the surrounding area. Considering that Southend airport is in close proximity to the Crouch and Roach estuaries SPA/Ramsar there is the potential for a negative impact from disturbance and also bird strikes. However, the Area Action Plan objectives do not specifically aim to expand the airport, meaning that the impact upon the surrounding wildlife is likely to remain at a similar level to at present.</p>

### Appendix 3 – Screening Matrix

<b>Policy Screening: Categorising the Potential Effects of the Plan (Tyldesley, 2009)</b>	
<b>Criteria Category</b>	<b>Rationale</b>
<b>Category A: No negative effect</b>	
A1	Options/policies that will not themselves lead to development e.g. because they relate to design or other qualitative criteria for development, or they are not a land use planning policy.
A2	Options/policies intended to protect the natural environment, including biodiversity.
A3	Options/policies intended to conserve or enhance the natural, built or historic environment, where enhancement measures will not be likely to have any negative effect on a European site.
A4	Options/policies that positively steer development away from European sites and associated sensitive areas.
A5	Options/policies that would have no effect because no development could occur through the policy itself, the development being implemented through later policies in the same plan, which are more specific and therefore more appropriate to access for their effects on European Sites and associated sensitive areas.
<b>Category B: No significant effect</b>	
B	Options/policies that could have an effect but would not be likely to have a significant (negative) effect on a European site (alone or in-combination with other plans or projects) because the effects are trivial or 'de minimis' even if combined with other effects.
<b>Category C: Likely significant effect alone</b>	
C1	The option, policy could directly affect a European site because it provides for, or steers, a quantity or type of development onto a European site, or adjacent to it.
C2	The option, policy could indirectly affect a European site e.g. because it provides for, or steers, a quantity or type of development that may be very close to it, or ecologically, hydrologically or physically connected to it or it may increase disturbance as a result of increased recreational pressure.
C3	Proposals for a magnitude of development that, no matter where it is located, the development would be likely to have a significant effect on a European site.

<b>Policy Screening: Categorising the Potential Effects of the Plan (Tyldesley, 2009)</b>	
<b>Criteria Category</b>	<b>Rationale</b>
C4	An option, or policy that makes provision for a quantity/ type of development (and may indicate one or more broad locations e.g. a particular part of the plan area), but the effects are uncertain because the detailed location of the development is to be selected following consideration of options in a later, more specific plan. The consideration of options in the later plan will assess potential effects on European Sites, but because the development could possibly affect a European site a significant effect cannot be ruled out on the basis of objective information
C5	Options, policies or proposals for developments or infrastructure projects that could block options or alternatives for the provision of other development or projects in the future, which will be required in the public interest, that may lead to adverse effects on European sites, which would otherwise be avoided.
C6	Options, policies or proposals which depend on how the policies etc. are implemented in due course, for example, through the development management process. There is a theoretical possibility that if implemented in one or more particular ways, the proposal could possibly have a significant effect on a European site
C7	Any other options, policies or proposals that would be vulnerable to failure under the Habitats Regulations at project assessment stage; to include them in the plan would be regarded by the EC as 'faulty planning'.
C8	Any other proposal that may have an adverse effect on a European site, which might try to pass the tests of the Habitats Regulations at project assessment stage by arguing that the plan provides the imperative reasons of overriding public interest to justify its consent despite a negative assessment.
<b>Category D: Likely significant effects in combination</b>	
D1	The option, policy or proposal alone would not be likely to have significant effects but if its effects are combined with the effects of other policies or proposals provided for or coordinated by the Local Development Document (internally) the cumulative effects would be likely to be significant.
D2	Options, policies or proposals that alone would not be likely to have significant effects but if their effects are combined with the effects of other plans and projects and possibly the effects of other developments provided for in the Local Development Document as well, the combined effects are likely to be significant.
D3	Options or proposals that are, or could be, part of a programme or sequence of development delivered over a period, where the implementation of the early stages would not have a significant effect on European sites, but which would dictate the nature, scale, duration, location, timing of the whole project, the later stages of which could have adverse effects on such sites.

## Rochford District Council – Local Development Framework Rochford Area Action Plan Submission Document

Development Management Preferred Options	Assessment Category	Potential Effect	Can the element be changed at screening stage to avoid likely significant effect (LSE)	Is an Appropriate Assessment Required?
Policy 1 – Rochford Area Action Plan framework	B	No – there may be increase in traffic in the surrounding area, but the effect (i.e. disturbance) on the European site would be minimal.	N/A	No
Policy 2 – Rochford's Primary Shopping Frontage	B	No – there may be increase in traffic in the surrounding area, but the effect (i.e. disturbance) on the European site would be minimal.	N/A	No
Policy 3 – Rochford's Secondary Shopping Frontage	B	No – there may be increase in traffic in the surrounding area, but the effect (i.e. disturbance) on the European site would be minimal.	N/A	No
Policy 4 – Locks Hill employment site	B	No – there may be increase in traffic in the surrounding area, but the effect (i.e. disturbance) on the European site would be minimal.	N/A	No
Policy 5 – Rochford's character areas	A3	No	N/A	No
Policy 6 – Character Area A: Central Area	A3/ B	No – but any predictions made in the Sustainability Appraisal should be monitored.	N/A	No
Policy 7 – Character Area B: Northern/ Eastern Approach	A3/ B	No – but any predictions made in the Sustainability Appraisal should be monitored.	N/A	No
Policy 8 – Character Area C: Southern Approach	A3/ B	No – but any predictions made in the Sustainability Appraisal should be monitored.	N/A	No
Policy 9 – Character Area A: Western Approach	A3/ B	No – but any predictions made in the Sustainability Appraisal should be monitored.	N/A	No

**BY EMAIL ONLY**

Dear Ms Wong

**Rochford Area Action Plan Submission Document Habitats Regulations Assessment Consultation**

Thank you for consulting Natural England on the above document in your e-mail dated 2<sup>nd</sup> August 2013.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

We are satisfied that the Habitats Regulations Assessment provides a comprehensive assessment of the effects of the Rochford Area Action Plan on European sites and that this has been undertaken in accordance with the requirements of the Conservation of Habitats and Species Regulations 2010. Natural England supports the conclusion of the assessment that none of the policies in the Plan, based on the scale, nature and location of development they promote, are likely to have a significant effect, either alone or in-combination with other plans, programmes or projects, on European sites.

I hope you will find these comments helpful. For any queries relating to the specific advice in this letter only please contact Janet Nuttall on 0300 060 1239. For any new consultations, or to provide further information on this consultation please send your correspondences to [consultations@naturalengland.org.uk](mailto:consultations@naturalengland.org.uk).

Yours sincerely

Janet Nuttall
