Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).."reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) “we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists
Para.5.4 "Rochford district has unique character...stems from traditional buildings...still dominate towns and villages”.
Para.5.17 “Council believes many buildings...are of local distinctiveness...part of...cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process". In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people..to have their voices heard”.

Re Public Meetings: “Consideration will be had to timing and venue to ensure meeting is as accessible as possible”.

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA’s responsibility to RDC’s job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: “Core Strategies should be flexible and able to show how they handle contingencies”. Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: “the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities”. So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:
Policy T3 CLT1 Appendix CLT1 T1 & T2

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkhill is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:
Peter Kneen BSc (Hons) MSc MRTPI  
Planner

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify...
those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council’s SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council’s policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place:

Policy CP1 - Design
CHAPTER 9

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT6 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport:
Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13’s maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development:
Policies ED3 - Existing Employment Land
ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary: Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-side basis, assessing the
individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Introduction

The requirements of Core Strategies are enshrined in the 2004 Planning and Compensation Act, the Town & Country Planning (Local Development) England (Regulations) 2004 and the 2008 policy guidance in PPS12. The requirements of Core Strategies are clear. And they are legal requirements. The Core Strategy must comply with the Local Development Scheme, Statement of Community Involvement and the Regulations. The Core Strategy must be subject to a sustainability appraisal, have regard to national guidance, conform generally with the Regional Spatial Strategy and have regard to any Sustainable Community Strategy. A Core strategy must be sound - justified, effective and consistent with national policy. The following representations therefore focus on these legal requirements.

HOUSING

Paragraph 4.6 - Evidence Base

To meet the soundness test Submission Core Strategies (SCS) must be justified, that is to say it must be founded on robust and credible evidence base and comprise the most appropriate strategy when considered against reasonable alternatives. The housing strategy in as far as it identifies a need for Green belt sites is sound, however, there are other elements which are unsound.

Paragraph 4.6 notes that the Strategic Housing Land Availability Assessment (SHLAA) has examined the supply of housing. It is presumed that the Table at paragraph 4.6 is the outcome of this examination. Whilst the SHLAA has some legitimacy in that it identifies various sites that are apparently available, we are concerned that because the SHLAA was only published in November 2009 it post dates the SCS. This implies that the SCS is driving the SHLAA exercise rather than the other way round. Whilst this may have no real practical effect on the outcome of the SCS and the identified need for Green Belt sites, the Inspector will be mindful of the advice in paragraphs 33 and 54 of PPS3 that SCS draw on the evidence in SHLAA. It may be that the SCS should explain how the evidence base has been used to justify the strategy.

PPS12 explains at paragraph 4.37 that Core Strategies are based on thorough evidence. Since the SHLAA has only recently been published it is considered that the SCS is unsound as it is not justifiable. This, together with other comments on the SCS, indicates that the process should be delayed to ensure that a more robust document is placed in front of the EiP Inspector.

Table at Paragraph 4.6 - Evidence base

From our review of the available evidence it would appear that the housing land supply is insufficient and that Green Belt release are required. From the wider strategy being promoted we note that some of the sites that the District Council consider to be 'appropriate' are likely to relate to existing employment areas. As set out elsewhere in our representations, we maintain sever reservations that the redevelopment of existing employment sites for alternative uses and particularly the Eldon Way Industrial Estate is unsustainable. We will make reference to the effectiveness of this strategy in relation to sustainability, whether it is justified in the context of National Policy and the deliverability of such a strategy elsewhere.

In particular, paragraph 11.32 of the SCS refers to existing employment land and sites within the UCS. It does not refer the SHLAA and as such it appears that an evidence base to support the re-use of employment land for residential is not reported in the SCS.

Having reviewed the 2008 Annual Monitoring Report, as we did when commenting on the 2008 Preferred Options Core Strategy, we maintain severe doubts as to the appropriateness of some of the previously developed sites identified as potential housing sites and their expected housing yield. Whilst we cannot at this stage ascertain whether the SHLAA...
sites referred to in this table correlate with the Annual Monitoring Report and indeed the 2007 Urban Capacity Study, it is our view that there will be some commonality and so the reliance on these sites is likely to be at odds with Government Policy. We shall elaborate on this objection in relation to the specific housing policy below.

We note that the last two rows in the Table at paragraph 4.6 set out figures with and without Green Belt releases. The text to this section of the Core Strategy should, for reasons of clarity, explain that Green belt review will be necessary in order to deliver the required housing.

Paragraph 4.9
The table on page 40, which sets out the settlement tiers, is supported. Rayleigh, Rochford/Ashingdon, Hockley/Hawkwell are clearly the largest settlements in the District and they benefit from good employment, housing, leisure, community and public transport provision. These settlements are the most sustainable ones with the greatest mix of uses. Consequently, it is sensible that the Core Strategy identifies these as top tier settlements and is able to target them with growth accordingly. This component of the strategy is justified by reference to sustainability data and is effective, since targeting development at these locations will ensure a more sustainable pattern of development.

Paragraph 4.14
We maintain that the strategy for redeveloping the Eldon Way Industrial Estate for housing and other alternative uses to employment is unsound. It is neither justified nor effective. The Industrial Land Availability Study 2008 sets out on page 7 strategic objectives. The 3rd objective seeks to Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive. Clearly the strategy as currently drafted envisages major changes to existing industrial estates, including alternative uses. This strategy is not consistent with other strategies and evidence based studies and so cannot be justified in the context of the tests set out in PPS12. It is also an ineffective strategy since the new employment locations that would free up the Eldon Way site for redevelopment relies on transport infrastructure that has no certainty of being delivered. Principally, the erosion of employment uses at Eldon Way could make the settlement of Hockley/Hawkwell less sustainable and thus conflict with the tiered approach on page 40, paragraph 4.9.

Policy H1
Prioritising the use of previously developed land ("pdf") is supported in principle. It is a justified strategy in the context of PPS3 and effective as sequential choices can be made by implementing the policy. However, the District Council is also promoting a strategy which seeks the redevelopment of existing employment locations to alternative uses and by consequence is identifying green field sites for new employment development elsewhere (Policy ED4 refers). This 'land swapping' is not considered consistent with PPS3, nor is it considered to be justified or effective in delivering the desired strategy. This is particularly the case as most of the existing employment sites are occupied and therefore unavailable for redevelopment. In addition, the new Greenfield sites are in an arguably less sustainable locations away from the top tier settlements identified on page 40 of the Submission Core Strategy. Clearly this element of the strategy is inconsistent with the wider strategy.

The Industrial Land Availability Study 2008 is included as an evidence base by the District Council. It includes an introductory section, which explains that the authority wishes to make Rochford the place of choice for new business. It includes several strategic objectives on page 7 including “Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive.” It reviews existing employment areas and identifies vacant land, including land available from allocations. It does not include any assessment of new sites or potential opportunities for new sites that might have been expected to feed into the Core Strategy. The strategy for identifying Green Belt site employment allocation does not appear to be based on any evidence in this document and in that context cannot be justified. The strategy being promoted potentially conflicts with Government policy in PPG13, PPG2 and emerging PPS4.

The Employment Land Study 2008 is a much later document. It has a key recommendation on page ii “we recommend that Rochford District Council adopts strong policies to protect existing employment land.” Furthermore under recommendations for existing sites on page iii-iv of that document it states “In our view, Hockley Trading Centre is a strategically well placed employment location. However, we recognise the ambitions of the Hockley Town Centre masterplan and that within this the Council should consider it to be allocated for other uses. However, we recommend that this reallocation happen only if provision is made within the masterplan for office use within Hockley Town Centre as part of a mixed use scheme.” The view of the writers of this document is clear - the Eldon Way Industrial estate (Hockley Trading Centre) is a good employment site and that it is for other reasons that alternative uses are being considered and only then if office development is supported. This supports our representations that new future uses at the Eldon Way site should be employment dominated and that alternative uses should relate to the objectives of the Town Centre which is to enhance the shopping and leisure facilities. Residential is not an appropriate alternative.

This document recommends the use of land to the west of Rayleigh for employment and envisages Green belt release. However, the SCS does not explain through the evidence base why existing employment sites should be ‘deallocated’ and Green belt land unnecessarily used.
In addition to these key issues we have some specific concerns. As a consequence we maintain an objection to the second paragraph of Policy H1. This policy states that the Council will seek the redevelopment of various industrial estates including Eldon Way. The Policy says that alternative uses will be sought (presumably alternative to the existing employment offer) and that new land will be allocated elsewhere. This policy statement, in relation to Eldon Way in particular, is unsound for a number of reasons:

The emerging Hockley Area Action Plan consulted upon in 2008 states that the Eldon Way Industrial Estate is strategically well placed. In a sense this statement underplays the true importance of this highly sustainable employment location and only major employment area in Hockley/Hawkwell. The employment area is adjacent to the railway station and located a short distance from the main bus routes that run along Spa Road. Some of the residential areas of the town are also within walking distance of this commercial area, thus providing a potential for sustainable travel by employees. The Eldon Way Industrial Estate is therefore right at the heart of the settlement of Hockley/Hawkwell and provides an opportunity to meet sustainable transport objectives by reducing the need to travel by car. Consequently, this employment area should be highlighted as a premier employment site in sustainability terms, both in the context of PPG13, PPG4 and PPS6. To encourage alternative uses as set out in Policy H1 implies the removal of the majority of employment based activity at Hockley/Hawkwell and this would be contrary to National policy, would not be the most appropriate strategy when considered against alternatives and is therefore unsound.

Whilst it is acknowledged that improvement to the Eldon Way Industrial Estate can and should take place, the extent to which the mix of employment uses should be altered in favour of alternative land uses requires careful consideration. It is our view that a mix of existing or indeed new employment land uses with some Town Centre type uses should dominate the Eldon Way site. A mix of employment types between offices, light industry and other high technology industries should be encouraged as this will provide many locational advantages to the firms that agglomerate together.

The Council says that the existing uses on this site are harmful to amenity. However, the site has operated for many years without any significant issues and if renewal for B1 type uses are encouraged then the employment area can be maintained without harm to amenity. Renewal of the employment stock can help develop and improve trade, improve the sustainability of businesses as a whole and make for a more flexible labour market as skill levels are varied. A singularly different use altogether or a variety of uses which excludes employment could undermine the long term sustainability of businesses as a whole and make for a more flexible labour market as skill levels are varied. This relationship helps sustain the critical mass of a centre and provides a platform for new retail and leisure growth. It is important to have a balanced centre with a variety of uses. Policy H1, as currently drafted, implies the removal of employment related development and this is likely to harm the viability and viability of Hockley Town Centre. The Council has presented no evidence to suggest that this is not the case.

Importantly, the 2008 Retail Study explains that there is a need for additional retail and office space. In principle we would support additional office and other B1 type uses plus retail but employment uses should always dominate for the sustainability reasons given above. Retail and office development are likely to present a viable alternative to some of the more industrial type uses.

Consequently, we do not support the phrasing of the third paragraph of Policy H1 and maintain that the most appropriate strategy is to seek renewal of the employment stock with employment based uses and with some new retail development. Removal of employment land uses completely as currently implied-which was the approach adopted in the emerging Hockley Area Action Plan - is not a justifiable strategy.

One of the key tests of a Core Strategy is consistency between policies in the emerging Plan and this strikes at the heart of demonstrating an effective strategy. Policy H1 implies alternative uses to employment and the relocation of Eldon Way to a site identified under Policy ED4. However, Policy RT6 sets out a suite of policy criteria for Hockley Town Centre which includes employment and commercial activities. In addition Policy ED3 seeks the protection of sustainable employment sites (Eldon Way) and notes that some reallocation of existing employment sites will include a proportion of employment. It notes that in the case of Eldon Way employment development will form a component. The policies appear at odds with one another. The third paragraph of Policy H1 should be deleted as the second paragraph is sufficient to set a strategic context for delivering new housing development. The employment policies and Hockley specific policies should be left to consider the type and quantum of land uses appropriate in the area. If the third paragraph of H1 is to be retained then it should be in more with Policy RT6 and in our view explain that employment uses should dominate any redevelopment proposals for the Eldon Way site and that retail and leisure uses should be a supporting proportion.

Implementation, Monitoring and Delivery - page 132 onwards

One of the key tests of soundness is that the Core Strategy should be effective - it should be able to deliver its strategy. The Implementation strategy set out at page 132 onwards of the Core Strategy does not explain how Policy H1, RT6 and the strategy for redeveloping Eldon Way (Policy ED2 and ED3) will be delivered. The comment at Policy ED3 on
Core Strategy Submission Document

16929 Support
CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

page 161 identifies it as a potential risk and alludes to land assembly difficulties and the choices to be made by owner/occupiers. In order to deliver the strategy there should be a clear understanding as to whether the new land use values being promoted are sufficient to encourage relocation voluntarily. Secondly there is a need for more information to be gathered and presented to show that current occupiers and landowners are willing to relocate and the timescales likely for this. For example, do the building lease contracts enable early review or are there any break out clauses. There should be some commentary on whether the Council will engage in compulsory purchase orders to pursue their strategy should the ‘encouragement’ route fail. As currently drafted there is no clear path to deliver the strategy and the danger is that despite reallocation, the sites identified for redevelopment will not come forward in the plan period. In this regard, evidence to satisfy the test of soundness is not provided.

Policy H2 - General Locations

We support the strategy that new housing growth should be targeted at land South of Hawkwell. This area is suitably located to the urban area of Hockley/Hawkwell and to lie in with the settlement tiers on page 40 of the Submission Core Strategy the same terminology for settlement should be used. This ensures a consistency within the SCS. The choice of this location as a housing growth area is appropriate as it would not contribute to the coalescence of the urban area with Ashingdon (there is existing development between this identified housing area at Rectory Road and Ashingdon and moreover, Rectory Road can form a natural physical boundary for the new Green belt boundary. This area is also well located to the existing road network. Cherry Orchard Way has recently been improved and provides much better accessiblity to the proposed housing growth area than any other location around Hockley/Hawkwell. The existing bus routes along Rectory Road also make this location sustainable and the additional housing proposed will help underpin the financial viability of bus routes in this area. Locally there are employment opportunities, including the small commercial estate off Main Road. The Eldon Way Industrial Estate adjacent to the Town Centre also provides the opportunity for employment locally. Extensive public open space, play pitches and built leisure facilities are located just to the north of this area and a community hall is located off Briar Close, nearby. The area to the south of Hockley/Hawkwell is close to local shops on the corner of Heycroft Road and Main Road and there are numerous footpath links between this area and the local community including links via Thorpe Road, Thorpe Close, Briar Close, Hawkwell Park and Park Gardens. The area therefore provides the opportunity to enhance existing links, including cycle links, and contribute towards community integration - more so than other sites on the south side of this settlement. The site is also in the control of one house builder and deliverable.

However, we find that the Policy is not fully consistent with national policy and furthermore needs to be reviewed in order to be justified and effective. We have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with this policy and feel that Green Belt review should be more explicit throughout the SCS. We note that it is only Policy H3 which indicates the need for a Green Belt land review. In fact Policy H3 only pays lip service to the need for a Green Belt land review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes onto talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H2 and certainly Policy H3 and Policy GB1 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains “this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term”. 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary.

Policy H2 - Phasing and Quantum

The 2008 Preferred Core Strategy document indicated that the area south of Hawkwell should deliver 330 dwellings over a phasing period to post 2021 (see Policy H2 and H3 of that document). The SCS reduces the quantum of housing in this area to 175 but expects delivery by 2015. At a broader level the Preferred Options Core Strategy of 2008, (Policy H2) required 1,450 dwellings to 2015 and a further 1,050 by 2021. In the SCS the figures are now 775 and 1,010 respectively.

Since the SHLAA post dates the publication of the SCS, we are uncertain as to the reason why such a significant reduction in quantum of housing and extensions to the residential envelope is considered necessary. Presumably it is the ‘new’ strategy to redevelop existing employment areas within the settlements that has led to this change. Our representations on this strategy and specifically the Eldon Way Industrial Estate are included elsewhere within our representations. Previously we have commented on the Table at paragraph 4.6 of the Submission Core Strategy and the lack of evidence to underpin that table. It seems odd that in the space of a year the expected requirement for Greenfield sites has effectively halved on the basis of a SHLAA exercise. The community is therefore not able to effectively

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
comment on the housing land supply and at this stage the Submission Core Strategy is legally unsound.

That said, we are of the view that the quantum of housing envisaged south of Hockley/Hawkwell should be more than the 175 currently envisage. In coming to this view we have reviewed the Urban Capacity Study and the latest housing figures in the Annual Monitoring Report 2008. We conclude that the shortfall in housing land supply is such that 330 dwellings in this location is appropriate.

The recently published SHLAA is based upon the data obtained from the Urban Capacity Study 2007, a call for sites exercise and data from the Annual Monitoring Report 2008.

The 2007 Urban Capacity Study (UCS)

1. 2007 is widely recognised as being the peak level of house prices in the UK and it was acknowledged by Government and practitioners alike that 2007 house prices were at an unsustainable level. It is our view that utilising the 2007 UCS as an evidence base without reference to the market does not pick up the depressed demand that is likely to now exist. Recent corrections to the housing market now mean that housing land prices are at a much lower and arguably more affordable level than before. The implications are that some pdl may not be viable for housing development. Often brownfield sites have much higher development costs than Greenfield sites and so the yield from urban capacity will be much lower than anticipated in the 2007 study. One example is the employment allocation of the Adopted Local Plan located at 76-92 Main Road, Hawkwell. This site has been allocated for several years and has been available during the most recent rises in residential property prices during 2006-07. As a consequence the lack of progress on the site can only be described by its current occupancy and perhaps it comprises high value uses that do not encourage redevelopment. Despite this the site is identified as having high potential for alternative use and high potential demand. The SHLAA form notes that there is no information on legal constraints (e.g., tenancy agreements) As a consequence it is difficult to see how this could continue to be a potential site and as a consequence the allowance for green field releases should be increased.

2. There are considered to be other instances in the UCS and the recently published SHLAA where the assumptions and calculations would indicate that the 1301 urban capacity figure is over optimistic and the SHLAA assessment is limited. In the assessment of 'non-residential sites in appropriate locations' within the UCS assumptions are made as to the probability of sites coming forward for new housing. 68-72 West Street, Rochford is identified as a high probability site but we note that it has been subject to 7 refusals of planning permission/conservation consent. There is a significant gap between the urban capacity identified as being suitable by the Council and the capacity applied for by the owners. Given its alternate use value, it is debatable whether the two capacity figures can be reconciled. No 247 London Road is another example of a site allocated in the Local Plan but which hasn't come forward. This is now the subject of a proposal for a care home and if approved would further limit the scope for market/affordable housing capacity on the site. A striking example of how the urban capacity study has underestimated is also evidence by 2-4 Alderman's Hill, Hockley - described as a disused service station. There has been no residential development application on this site since 2004 and most recent applications have sought commercial use of the site. Rather than being evidence of housing land deliverability, this particular site evidences the need for commercial uses in the area.

There are therefore deliverability doubts over these 'high probability' categories which amount to some 40 units.

3. In relation to the assessment in the UCS entitled 'intensification of existing residential uses' we note that the assessment is premised on an assessment of recent trends taking into account net completions between 2001-2006 and 2005-06. This is effectively an assessment of windfall trends and not an approach that PPS3 encourages. Importantly Table 3-12 in the urban capacity study seeks to project forward urban capacity from residential redevelopment - a period that benefited from high house prices and PPG3 guidance encouraging redevelopment. These two circumstances have markedly changed and so the assumptions and conclusions drawn would also have changed. Even taking into account the UCS discounting, the reliability of the 404 units from this source must be questioned and in our view the 1301 figure cannot be a sound basis for urban capacity and further Greenfield releases are necessary.

4. In the section of the UCS entitled 'subdivision of dwellings' and 'living above the shop' it is estimated that recent trends would result in 7 and 15 units. Our concerns with using trends as a basis for urban capacity are detailed above - PPS3 does not encourage this. Rather, local authorities are charged with surveying their areas, identifying which areas may yield urban capacity and how much and developing policies to achieve that. Government guidance does not encourage the estimation of windfalls in the way the UCS does.

5. Redevelopment of established employment land is a separate section within the UCS. At 1 above we identify the low probability of the Main Road residential allocation coming forward. This remaining section of the UCS considers 11 further employment sites which were first identified in the 2000 UCS. Three of these are considered to have a high probability of coming forward. We have looked at these three sites and can find no evidence that they are likely to come forward. In the 8 years between 2000 and 2008 the three identified high probability employment sites have not been developed and there is no reason to assume that the next 5-10 years will be any different. For example the Rawreth Industrial Estate is identified as being well used in the UCS and although it has some unneighbourly uses there is no indication that the site is available, suitable or deliverable for residential. Land between 39-69 Lower Lambricks, Rayleigh is identified as having a high probability of residential uses. Yet there is no...
evidence of any pre-application advice or planning applications for this area. Stambridge Mills, Mill Lane, Stambridge is a further example. This site is separated from the urban area, in a flood risk zone and protected in the 2006 Replacement Local Plan by Policy EB9 which promotes B1 uses. Against this background there is only two relevant planning applications affecting this area both date from the early 1990's and relate to a plant room and loading bay. There is no evidence that this is likely to come forward for residential purposes in the next 5-10 years.

6. In the UCS extant permissions are identified as 856 dwellings. It is important to note that this figure needs to be continually reassessed so that from the point of adoption of the Core Strategy a 5 and 10 year housing land supply is available. The SHLAA notes extant permissions for 2009-14 being 106. As noted below extant permissions do not necessarily translate into deliverable sites. There is therefore a contingency that needs to be built in. Further allocations on greenfield land need to be increased and as such the quantum of housing in the area south of Hockley/Hawkwell should be increased to 330 dwellings in order to begin to meet the shortfall identified.

The District Council's 5 year housing supply assessment

7. The District Council's Annual Monitoring Report ("AMR") 2008 purports to demonstrate a 5 year housing land supply. The preamble to Table 4.10 in the AMR 2008 explains that Rochford District Council ("RDC") has included units under construction, units with full permission, units with outline permission, units with a resolution to grant, units subject to preapplication discussion/Urban Capacity Assessment and land allocations in its trajectory. The reader is referred to Appendix B which breaks down the sites in more detail. The recently published SHLAA also includes a table showing a potential 1273 dwellings deliverable. However, it refers to "appropriate brownfield sites." Since these 'appropriate sites' are do not benefit from an application or a planning permission it is difficult to programme them into the housing delivery trajectory.

8. In the full planning permission category of the AMR 2008 where work has not yet started there can be no guarantee that all these sites will be delivered in the 5 years. This comment relates to the one above in relation to the recently published SHLAA. It is not uncommon for permissions to be obtained to provide a means for valuing a site where the owner has no immediate plans to sell the site or develop housing. Delivery may also be hampered by funding constraints, or site assembly problems (where sites are in an alternative use or relocation constraints). Appendix B of the AMR 2008 does not set out the intentions of the landowner or whether the sites are truly achievable in the 5 year period as per PPS3 requirements. The SHLAA purports to show developer intentions at Appendix C but the assessment by the local authority into the legitimacy of some of the claims is not presented. The evidence base is not as full as it should be to demonstrate the robustness of Table 4.6 of the SCS. It is also unclear the extent to which this table is based on either the UCS 2007, AMR 2008, SHLAA 2009 or a combination of all three. This should be set out clearly.

9. In addition, to the 'non delivery' of a proportion of new homes in the AMR 2008, there is concern at the timings of delivery in that data set, for example, 10 units in 2008-2009 relates to outline planning permissions and it is doubtful whether reserved matters can be turned round quick enough to begin delivering housing in this year period. There could well be examples in that set of data where the delivery of units in the first year of the 5 is unlikely, thus delivery is reduced for that period and pushed back and this process is then compounded throughout the data set up to and beyond year 5. Statistical evidence from the Department of Communities and Local Government ("CLG") reveals that building starts are 43% down on the quarter to March 2009 compared with March 2008. It is not clear whether the recently published SHLAA has taken this into account and unless it does the data in the Table at Paragraph 4.6 of the SCS cannot be relied upon, particularly given the current recessionary circumstances. In relation to the Table at Paragraph 4.6 a refinement is therefore needed to take into account this effect on phasing.

10. This problem is compounded for other units relied upon where permission has been granted but no start on site has been made; this accounts for a considerable number of sites in 2009-10 period (100 dwellings) which is (year 2 of the 5 year period). A delay in these will require more Greenfield sites to be identified in order to meet the shortfall.

11. Finally we note that the East of England Plan expresses its land supply requirement as a minimum. This strategy is not reflected in the
Submission version of the Core Strategy policy H2.

12. In summary since neither the UCS nor the Annual Monitoring Report form a SHLAA, reservations are maintained about the degree to which sufficient housing land has been identified.

Policy H3

In the Preferred Options Core Strategy 2008 more locations were identified for housing growth in the post 2021 phase. Whilst it is our view that land south of Hockley/Hawkwell should benefit from a greater number of dwellings than the 175 currently identified (330) in order to make the strategy effective. We are concerned at the significant change in strategy between the Preferred Option Core Strategy and the Submission version, which has significantly less housing growth on green field sites. This change in strategy is so significant that we would question whether it is appropriate in the context of soundness and the consultation processes that have taken place so far.

We also have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with other policies in the SCS and feel that Green Belt review should be more explicit throughout the SCS. As it currently stands there is a potential conflict with national policies and limited justification for the Green belt strategy. We note that in Policy H3, which indicates the need for Green Belt land review, the advice is limited and unclear. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes onto talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H3 and Policy GB1/H2 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that a review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary. Not to do so is unsound for justification and effectiveness reasons.

Policy H4 - Affordable Housing

As currently drafted we feel that the policy is not concise enough and that the policy does not reflect current guidance. The phrase 'at least' would indicate that in most cases affordable housing above 35% will be sought. Our understanding is that the 35% figure is recommended in the SHMA and that to provide a policy framework which seeks to go beyond that figure would potentially be unworkable as many sites could not financially bare the burden of over a third of the net developable area not yielding a value. The policy should be redrafted so that "a target of 35% affordable housing shall be provided on all developments of 15 or more units..."

The last policy paragraph provides some scope to relax this policy, if there are clear site constraints that make on site provision impossible. The policy, though, is not particularly clear on what would constitute exceptional circumstances. For example, physical site constraints, which unusually raise development costs, would be one such reason and this should be specified. There may be other reasons including the nature of housing needs in the part of the District the site is located which justify affordable housing below the 35% target. Design reasons may also have a bearing on how provision is made and in what form, particularly if the site is in an historic area where design might override housing need argument. It is therefore recommended that the policy expand on the type of circumstances where affordable housing may be relaxed and the type of information that will be sought of applicant's who have a need to invoke this part of the policy.

Policy H5

In support of the policy, it is advantageous that no percentages requiring a specific mix are included. This flexibility will enable developers and the Council to respond directly to changing circumstances in the local housing market. In the past some authorities have set out a percentage for the type of housing they require only to find that after a few years of strict implementation there is an oversupply of property of that type and no flexibility in the policy to address the problem.

Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford’s main settlements to what essentially
would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Policy ED3

We fully support the first sentence of the Policy and note the apparent contradiction with the statements in Policy H1 and elsewhere which seeks to develop on alternative uses at industrial estates such as Eldon Way.

This contradiction is evidence in the second paragraph of Policy ED3. In our representations on Policy H1 we have explained why it is not sound to diminish the employment stock at Eldon Way and the importance of maintaining a dominance of employment type uses at this estate. These arguments are not repeated here.

We note the sentiments of the third paragraph and in accordance with our representations elsewhere are of the view that this sentence should be revised to explain that Eldon Way will accommodate principally employment type uses. As noted elsewhere uses which are an alternative to employment would diminish this highly sustainable employment site and this is unsound when assessed against National Policy.

Policy ED4 - Future Employment Allocations

In part, the de-allocation strategy is not supported as it is considered unsound when set against sustainability criteria. In relation to the Eldon Way Industrial Estate it is considered critical to the ongoing sustainability of this settlement that employment uses are maintained at this location. It is close to the railway station, bus routes and local residential areas from which the opportunity exists for employees to walk or cycle to work. Its location adjacent to the Town Centre offers opportunity for some retail and leisure development to complement the centre and to maintain a supporting function. These sustainable benefits would not occur with the deallocation of Eldon Way or the significant erosion of its employment floorspace. Whilst redevelopment of the employment site to achieve new employment is supported, the dominant land use should continue to be employment use. As a consequence, the 18ha of land required for employment in this policy is considered to be excessive and the policy should be reviewed to explain that redevelopment of existing employment sites for primarily new employment development will be encouraged.

Policy T4

It is noted that the South Essex Rapid Transit policy, as elaborated upon at paragraph 10.16 notes that Rochford is not served but may be served in future phases. This uncertainty is contrary to the delivery principles of soundness and directly puts at issue the employment land supply strategy in the District which is founded on sustainable access to new sites. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley, Rochford and Rayleigh is unsound.

Appendix H1, CTL1 - Infrastructure

It is recognised that necessary infrastructure provision is an important part of creating a sustainable development and in that context appendix H1 is supported. The supporting text notes that the table at Appendix H1 is not exhaustive and in that context it is very important that the framework properly distinguishes between what should be provided as part of new development schemes and what shouldn't. It is therefore essential that the framework acknowledges the importance of Circular 05/05 and the tests which say that provision of infrastructure and/or contributions should be:

* Relevant to planning
* Necessary to make the proposed development acceptable in planning terms
* Directly related to the proposed development
* Fairly and reasonably related in scale and kind to the proposed development
* Reasonable in all other respects

As is made clear (Paragraph B9 of Circular 5/05) contributions should not be used to make good existing deficiencies in infrastructure provision. Nor are they to be used to secure contributions to the achievement of wider planning objectives that are not necessary for consent to be granted. In that context the Core Strategy should set this out as its policy framework.

Policy GB1 - Green Belt

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The objectives of this policy are supported, although as noted in other representations the SCS is unsound as it does not meet the tests in relation to justification, compliance with national policy or effectiveness of strategy.

Policy GB1 mentions the objective to allocate the minimum amount of Green Belt land necessary. The policy should link to the requirements of PPG2 and RSS which are discussed in relation to the representations on Policy H2 and H3. The policy should set out a timeframe for the review and why Rochford requires a Green Belt review (what the exceptional circumstances are in this District that justify a review of local boundaries. The policy should be amended to set out a 2031 time frame and this may require the SCS to have an extended life span beyond 2021.

We would recommend the deletion of the word character since Green Belt designation is not related to landscape character as currently drafted. For clarity we would also recommend that the Policy or its supporting text explain that a Green Belt review will take place in support of an allocations document (paragraph 6.6) in order to identify an appropriate new boundary. This is particularly necessary given the commitment to a Green belt review in the adopted Local Development Scheme.

Policy CLT1 - Planning Obligations and Standard Charges

In view of the need to test fully the basis on which standard charges are based it is important that any document produced in a development plan document that enables an examination in public. The policy should explain this in order that when the document is produced it accords with Policy and is based on sound evidence.

ENV9 - Code for Sustainable Homes

Object. The advice from the Department of Communities and Local Government is that the new requirement to have a rating against the Code does not make it mandatory to build a Code home or to have each new home assessed against the Code. It does however mean that all buyers of new homes be given clear information about the sustainability of the new home. A house builder can do this in one of two ways:

- they can chose to build a Code home, have that home assessed against the Code and provide the home buyer with a Code certificate stating the star rating the home has achieved
- or, they can chose to build to current building regulations standards, not to pay for an assessment and instead download a nil-rated certificate of non-assessment (also referred to as a nil-rating) to provide to the home buyer.

As such the Rochford policy requirement that coding 3 be achieved by 2010 and Code 6 by 2013 is out of step with Government advice. The policy wording should explain that it is just the coding that is a requirement of new homes and not necessarily that new homes should be constructed to achieve a standard.

The current Government objectives are for the code to be introduced over a reasonable period with development to be code 3 by 2010, code level 4 by 2013 and code level by 2016. In this regard the policy, as drafted, seeks to achieve code 6 by 2013 and consequently compresses the code requirements into a shorter time scale with the costs associated expected to be subsumed within the housing market though higher prices. This is not a realistic strategy for the delivery of sustainable homes and we consider that the policy should be revised to extend the period of compliance but to also make it more flexible based on local circumstances.

Research undertaken on behalf of the Housing Corporation and English Partnerships, published in February 2007 ‘A cost review of the code for sustainable homes’ reveals that code 6 is unlikely to be unattainable given existing technologies and that achieving code 5 could result in a 12% to 20% increase in costs that would have to be passed onto the consumer. Given the variability of the housing market with peaks and troughs, it is unlikely that the housing market would be able to subsume this level of price increase.

The code system policy as currently drafted does not have regard to site circumstances and so many of the requirements could be difficult to meet. For example, micro electricity generation on site may be difficult to achieve where local circumstances deter the capture of wind or solar power. If more expensive technologies are required to generate power than is the norm then costs will rise. There may be other competing reasons why designs cannot include certain sustainability measures if housing sites are in sensitive landscape and historic locations. Alternatively there may be significant development costs associated with site specific circumstances and so viability of the site’s development becomes a valid consideration. By insisting on the code for sustainable homes other policy objectives such as affordable housing at particular rates and other contributions may need to be reconsidered. Consequently, we are of the view that this policy should be drafted in a manner which enables site specific circumstances to be taken into account. As noted above the Government explains that the code is a certification requirement and does not necessarily mean that buildings are constructed in accordance with a code level.

It is also important to note that it is not the purpose of planning legislation to duplicate other legislation. In this regard, the policy should accept that the Building Regulations will be the main vehicle for implementing this policy and that unless the coding requires external development then there will be no need to specify what is to be carried out in a planning application.

CHAPTER 9  Policy CLT1 - Planning Obligations and Standard Charges

Summary: Policy CLT1 - Planning Obligations and Standard Charges

In view of the need to test fully the basis on which standard charges are based it is important that any document produced is in a development plan document that enables an examination in public. The policy should explain this in order that when the document is produced it accords with Policy and is based on sound evidence.

Change to Plan  N/A

By building in the proposed London Road Rayleigh, a new school will have to be built - at a cost, this is unnecessary when there is adequate education facilities elsewhere.

Change the preferred site, as shown by the previous application Land at Bull Lane, Rayleigh allows children to attend ALL local schools without the high development costs other sites will bring.

No

Soundness Tests  i, ii, iii
The production of travel plans for schools is regarded as essential as this should help to relieve traffic congestion for the movement of goods and services during the morning peak travel time. Research by the British Chambers of Commerce has consistently shown that the "school run" is the main cause of traffic congestion with the resultant extra costs to business.
Concerns regarding the capacity of the current primary school on the village.

Summary:

Disagree with primary school allocation in West Rochford - also see our comments under URV1. Parking facilities for cars and public transport have in the past been badly thought out. We must ensure better provision in future.
HPPG believes that there is not enough availability of school places with the proposed redevelopments of Eldon Way for residential purposes.

Summary:
HPPG believes that there is not enough availability of school places with the proposed redevelopments of Eldon Way for residential purposes.

Change to Plan:
Eldon Way redevelopment for housing was not included in the 2008 version.
There has recently been a relocation of a primary school onto the park site with provision for expansion. Essex County Council predict a surplus of primary school provision in Rayleigh even after the predicted population increase. This suggests that provision will be in the wrong place and that an existing school in the east may well be closed. This is a waste of resources better to relocate some of the housing in the east.

Proper consultation with County Education Authority is necessary. Wherever possible development should be spread through the town and Rawreth village itself to reduce the necessity to develop the high grade agricultural land.
Whilst we do not object to the allocation of a 1.1 ha site on land to the west of Rayleigh for a Primary school, it must be made clear that the level of contribution we make towards such a facility should be reasonably related to the impact of any development of the land. Circular 5/05 and the emerging/published DCLG guidance on the use of CIL, makes it clear that new developments/contributions from new development can not be used to resolve existing deficiencies (only, proportionally, those deficiencies made worse by new development).

1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.
The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a ‘saved’ policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, ‘Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.’

Core Strategy Policy ENV2 should be revised to include specific reference to,

* Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
* the application of the most stringent restrictions on development within the rural and undeveloped coastline;
* any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

* Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with,
  The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. Recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health needs.

The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should support the approach to the Historic Environment.

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. Access to Housing schemes, against the Commission for Architecture and the Built Environment's (CABE) Building for Life principles, have been included in the Core Strategy. The Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) Building for Life principles.

The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

In addition, it should be noted that, * Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.
* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/ Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.
* The Core Strategy should make specific reference to, o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;
  o Policy CLT2, final sentence: insert after the words 'primary schools' the words 'and Early Years and Childcare facilities'; o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended, * Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.
* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, 'The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment's (CABE) Building for Life principles.'

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the
Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends.

**Summary:** The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council’s document should fully reflect the County Council’s own approach to this matter as set out in the County Council’s ‘Developer’s Guide to Infrastructure Contributions’.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.

* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

The Core Strategy should make specific reference to,

Parking facilities for cars and public transport have in the past been badly thought out. We must ensure better provision in future.
HPPG believes that there are not adequate school places with redevelopment of Eldon Way for housing

Eldon Way development was not included in October 2008 version
In order to facilitate the additional residential units proposed for Ashingdon, it is important that King Edmund School can be expanded in order to accommodate the additional children generated by the new housing.
Policy CLT3 - Secondary Education

Summary: The Respondent finds the document to be unsound in its present form, however were the amendments set out in these representations to be incorporated then it is considered that the document will be sound. No objection is raised to the principle of extending the size of the King Edmund School grounds, subject to the provision of robust evidence as to the need and scale of the extension.

Full Text: The respondent owns the majority of the available land surrounding the school and is thus in the best position to facilitate the expansion. However, it is not clear how the land will be acquired, or whether it will form part of a much wider, mixed use allocation in the Allocations DPD. The CS refers to the Essex Schools Organisation Plan, which identifies a need to increase secondary school places in line with housing growth. It is accepted that housing growth and school places are inextricably linked and that the King Edmund School is at capacity and will require extension in the future. What is not clear from the evidence base is where the identified need for 3 hectares has come from. Reference is made to the Essex Schools Organisation Plan; however, this document does not look beyond 2013 and does not consider the residential allocations presently proposed in this CS.

The respondent has substantial interests in the land identified in the broad locations set out in H2 and H3. It is considered that the school expansion should be part and parcel of the development that comes through in the Ashingdon allocations. An indicative masterplan is attached to these representations, which illustrates a growth option combining urban extensions with the enhancement of King Edmund School.

Amendment to Policy CLT3:
Reference to the need for 3 hectares should only be included if this area can be properly demonstrated.

Masterplan/Facilities plan Council ref AE22

Summary: The Respondent finds the document to be unsound in its present form, however were the amendments set out in these representations to be incorporated then it is considered that the document will be sound. No objection is raised to the principle of extending the size of the King Edmund School grounds, subject to the provision of robust evidence as to the need and scale of the extension.

We write on behalf of our client, Sainsbury's Supermarkets Ltd, in respect of the recently published Rochford Core Strategy Submission consultation document. Sainsbury's does not currently have any stores in Rochford but are interested in pursuing future opportunities to develop their retail offer in the area. As such, they are keen to be involved in the Local Development Framework process.

Our representations to earlier consultation stages of the Core Strategy supported the Council's housing strategy. Whilst we re-iterate this support, we consider that the Core Strategy does not sufficiently provide for future retail requirements across the District to support this housing strategy. The Council should adopt a flexible approach to identifying floorspace capacity, particularly in light of the findings of the Retail Study that Rochford suffers from significant expenditure leakage.

This flexible approach to floorspace capacity would allow for improved competition and an improvement to the quality of goods and services provision in the District. It is important for the Council to acknowledge the important contribution retail development makes in achieving and maintaining vital and viable communities and, thus, the Core Strategy and other Local Development Framework documents should allow for appropriate additions to the retail offer in the District.

In relation to the specific policies of the document, we object to Policy CLT4, and the requirement for new non-residential development of over 1,000 square meters to be accompanied by a Health Impact Assessment. This policy is too restrictive on certain developments, such as retail, which will clearly not have an adverse impact on local health facilities. The Council should be encouraging development in the District and not imposing additional requirements on developer's who are aiming to deliver important local facilities.

Sainsbury's wish to continue to work with the Council to improve Rochford's convenience retail offer and we always welcome the opportunity of meeting with officers to discuss Sainsbury's aspirations in the District.
Full Text: Not sound because no up-to-date evidence base on open space needs - does not meet justified or according with national policy criteria for following reasons:
- evidence base does not include an audit/assessment of open space, sport and recreation needs as required by PPG17 (paragraph 1-5)
- existing playing pitch assessment (2002) is out-of-date and would not be able to fully consider existing/future outdoor sports needs
- without needs assessment to support this policy it will be difficult to strategically plan for new open space in the core strategy, justifying protection of existing open or require new development to make provision

Summary: Not sound because no up-to-date evidence base on open space needs - does not meet justified or according with national policy criteria for following reasons:
- evidence base does not include an audit/assessment of open space, sport and recreation needs as required by PPG17 (paragraph 1-5)
- existing playing pitch assessment (2002) is out-of-date and would not be able to fully consider existing/future outdoor sports needs
- without needs assessment to support this policy it will be difficult to strategically plan for new open space in the core strategy, justifying protection of existing open or require new development to make provision

Change to Plan: An assessment of open space, sport and recreation needs should be undertaken which accords with guidance in PPG17 in order to ensure this policy is underpinned by a robust evidence base in order to justify its requirements. Further advice can be provided upon request.
Would not be sound in terms of meeting the effective and national policy accordance criteria for following reasons:
- no criteria for assessing proposals affecting open space as certain types of development on open space may be acceptable e.g. ancillary facilities, sports facilities - PPG17 paragraphs 10-18 provide guidance but this is not reflected in policy
- ambiguous as the word 'usually' open to misinterpretation - criteria should be used to set out exceptions where open space will not be protected and no guidance for assessing proposals for new open space as reference only made to open space being promoted

Policy or supporting text to provide criteria for assessing proposals for new open space or for proposals affecting open space using PPG17 guidance in order to ensure effectiveness when used for development control and to ensure consistency with government policy.

Residential development should not only ensure that it does not remove existing open spaces, but makes provision compatible with the scale of development proposed.

CHAPTER 9 Policy CLT5 - Open Space

Respondent: Countryside Properties (Southern) Ltd (Mr Steve Price) [8650]
Countryside Properties (Southern) Ltd
Countryside House
The Drive
Brentwood
Essex
CM13 3AT
01277260000

Full Text: Whilst we do not object to the requirement of public open space on land to the west of Rayleigh, it must be made clear that the level of provision we make, or extent of financial contribution towards its provision and maintenance, be reasonably related to the impact of the development of the land. Circular 5/05 and the emerging/published DCLG guidance on the use of CIL, makes it clear that new developments/contributions from new development can not be used to resolve existing deficiencies (only, proportionally, those deficiencies made worse by new development).

The policy should state that the extent of public open space to the west of Rayleigh should be determined via a master plan or development brief for the site.

Summary: Whilst we do not object to the requirement of public open space on land to the west of Rayleigh, it must be made clear that the level of provision we make, or extent of financial contribution towards its provision and maintenance, be reasonably related to the impact of the development of the land.

CHAPTER 9

Full Text:

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify
CHAPTER 9

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those
general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the
removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of
this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a
more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land
South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of
Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing
employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further,
Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic
housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development
in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of
sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out
for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the
October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy
H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead
of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and
achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as
a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth
in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations
have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable
agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as
South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the
loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the
Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the
ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core
Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan
Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the
publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable
housing for new residential developments. The Policy accords with the advice of National Policy and is therefore
considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy
represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities.
The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the
Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that
seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly
when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more
schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through
negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place:

Policy CP1 - Design
CHAPTER 9

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertaken an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of
open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport:
Policy T1 - Highways
7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport
7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking
7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards
7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development:
Policies ED3 - Existing Employment Land
ED4 - Future Employment Allocations
8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary: Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children’s play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of open space and recreation facilities required in the ‘standard charge’ should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

If a need for community facilities is identified for the land we promote, it must be made clear that the scale and nature of the facility or level of contribution we make towards such a facility should be reasonably related to the impact of any development of the land. Circular 5/05 and the emerging/published DCLG guidance on the use of CIL, makes it clear that new developments/contributions from new development can not be used to resolve existing deficiencies (only, proportionally, those deficiencies made worse by new development).

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Thank you for your email of 21 September consulting The Theatres Trust on the Core Strategy Submission.

The Theatres Trust is the national advisory public body for theatres and a statutory consultee on planning applications affecting land on which there is a theatre. This applies to all theatre buildings, old and new, in current use, in other uses, or disused. Established by The Theatres Trust Act 1976 'to promote the better protection of theatres', our main objective is to safeguard theatre use, or the potential for such use but we also provide expert advice on design, conservation, property and planning matters to theatre operators, local authorities and official bodies.

Due to the specific nature of the Trust’s remit we are concerned with the protection and promotion of theatres and therefore anticipate policies relating to cultural facilities.

Tests of Soundness

We do not find this document to be sound as it does not reflect your Cultural Strategy which is listed as a District Strategy on page 23, nor do we believe it will be effective.

Reasons

The Core Strategy does not address the issues raised in the Cultural Strategy:

Cultural Strategy page 5 - We have already mentioned that culture effects us all on a daily basis, so it is essential that we do not leave future developments to chance. By creating this strategy and continuing the evaluation and development of the action plans, we can ensure that all gaps in provision, opportunities, demands and aspirations, priorities and partners, are identified and acted upon.

Cultural Strategy page 12 - Lack of cultural facilities in the district was also highlighted, including no specific museum or live music and performance focused space, as well as a frustration regarding the lack of cohesive communication about all opportunities in the district.

Policy CLT9 Leisure Facilities only deals with sport and recreation, according to the accompanying text. Policy CLT6 Community Facilities does not include a description of what facilities are included in the policy and there is not Glossary for the document. It is therefore unclear where the issue of the lack of cultural facilities is attended to in the document. The most likely location for cultural facilities would be Rayleigh Town Centre but its Policy RTC4 only states that an Area Action Plan will provide a range of evening uses. The deferring of development implementations to subsequent planning documents places the reliance on these other documents to make the important decisions. The Core Strategy will set the scene for more detailed guidance but should be able to stand on its own.

The document lacks a clear spatial focus and there are few specifics as to the scale of development, the range and mix of uses, how they relate to each other and the infrastructure necessary to achieve this.
The policies seem to be a set of generalities lacking any real analysis of the area and the key challenges facing the District. The wording of policies needs to be robust and clear because of the way they determine whether or not, and how development can take place.

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify...
those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place:

Policy CP1 - Design

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT6 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport:
Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development:
Policies ED3 - Existing Employment Land
ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary: Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children’s play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of open space and recreation facilities required in the ‘standard charge’ should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify
those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those
general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the
removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of
this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a
more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land
South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of
Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing
employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further,
Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic
housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development
in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of
sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out
for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the
October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy
H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead
of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and
achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as
a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth
in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations
have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable
agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as
South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the
loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the
Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the
ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core
Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan
Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the
publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable
housing for new residential developments. The Policy accords with the advice of National Policy and is therefore
considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy
represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities.
The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the
Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that
seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly
when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more
schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through
negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place:
Policy CP1 - Design

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support -
Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of
open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport:
Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer’s role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer’s responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13’s maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development:

Policy ED3 - Existing Employment Land
ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publicly available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary:

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of open space and recreation facilities required in the ‘standard charge’ should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.
National Playing Field status should be sought where possible for playing pitches and recreation grounds.
Policy is not considered to meet justified or national policy consistency criteria for following reasons:
Lack of robust evidence base to underpin policy. The Rochford Retail and Leisure Study is not considered to accord with guidance in PPG17 with respect to leisure/sports facilities as lack of detailed quantitative audits/assessments of all facilities in district as advocated in PPG17 guidance and assessment dependent on general household survey results rather than local consultation and use of strategic sports/leisure planning tools. Without such evidence base, difficult to justify protection of existing facilities, provision of new facilities and developer contributions.

Revised assessment of sports/leisure needs to be undertaken which fully accords with PPG17 guidance and incorporates adequate consultation with stakeholders and use of established assessment tools. Sport England can provide further advice.
While the content of this policy is partially supported, there is a concern that no guidance is provided on the criteria for assessing proposals involving new leisure facilities or development affecting existing facilities. Therefore not considered to accord with the soundness criteria relating to effectiveness as difficult to use in development control. Also guidance in PPG17 sets out the considerations for assessing new leisure facilities and proposals affecting existing facilities.

Change to Plan
The policy or supporting text to incorporate guidance for assessing proposals involving new leisure facilities or proposals affecting existing facilities in order to ensure that the policy is effective when used for development control.

Soundness Tests N/A
Thank you for your email of 21 September consulting The Theatres Trust on the Core Strategy Submission.

The Theatres Trust is the national advisory public body for theatres and a statutory consultee on planning applications affecting land on which there is a theatre. This applies to all theatre buildings, old and new, in current use, in other uses, or disused. Established by The Theatres Trust Act 1976 'to promote the better protection of theatres', our main objective is to safeguard theatre use, or the potential for such use but we also provide expert advice on design, conservation, property and planning matters to theatre operators, local authorities and official bodies.

Due to the specific nature of the Trust's remit we are concerned with the protection and promotion of theatres and therefore anticipate policies relating to cultural facilities.

Tests of Soundness

We do not find this document to be sound as it does not reflect your Cultural Strategy which is listed as a District Strategy on page 23, nor do we believe it will be effective.

Reasons

The Core Strategy does not address the issues raised in the Cultural Strategy:

Cultural Strategy page 5 - We have already mentioned that culture effects us all on a daily basis, so it is essential that we do not leave future developments to chance. By creating this strategy and continuing the evaluation and development of the action plans, we can ensure that all gaps in provision, opportunities, demands and aspirations, priorities and partners, are identified and acted upon.

Cultural Strategy page 12 - Lack of cultural facilities in the district was also highlighted, including no specific museum or live music and performance focused space, as well as a frustration regarding the lack of cohesive communication about all opportunities in the district.

Policy CLT9 Leisure Facilities only deals with sport and recreation, according to the accompanying text. Policy CLT6 Community Facilities does not include a description of what facilities are included in the policy and there is not Glossary for the document. It is therefore unclear where the issue of the lack of cultural facilities is attended to in the document. The most likely location for cultural facilities would be Rayleigh Town Centre but its Policy RTC4 only states that an Area Action Plan will provide a range of evening uses. The deferring of development implementations to subsequent planning documents places the reliance on these other documents to make the important decisions. The Core Strategy will set the scene for more detailed guidance but should be able to stand on its own.

The document lacks a clear spatial focus and there are few specifics as to the scale of development, the range and mix of uses, how they relate to each other and the infrastructure necessary to achieve this.
16563 Object
CHAPTER 9 Policy CLT9 - Leisure Facilities

The policies seem to be a set of generalities lacking any real analysis of the area and the key challenges facing the District. The wording of policies needs to be robust and clear because of the way they determine whether or not, and how development can take place.

Summary:
The Core Strategy does not address the issues raised in the Cultural Strategy:

Cultural Strategy page 5 - We have already mentioned that culture effects us all on a daily basis, so it is essential that we do not leave future developments to chance. By creating this strategy and continuing the evaluation and development of the action plans, we can ensure that all gaps in provision, opportunities, demands and aspirations, priorities and partners, are identified and acted upon.

Cultural Strategy page 12 - Lack of cultural facilities in the district was also highlighted, including no specific museum or live music and performance focused space, as well as a frustration regarding the lack of cohesive communication about all opportunities in the district.

Policy CLT9 Leisure Facilities only deals with sport and recreation, according to the accompanying text. Policy CLT6 Community Facilities does not include a description of what facilities are included in the policy and there is not Glossary for the document. It is therefore unclear where the issue of the lack of cultural facilities is attended to in the document.

The most likely location for cultural facilities would be Rayleigh Town Centre but its Policy RTC4 only states that an Area Action Plan will provide a range of evening uses. The deferring of development implementations to subsequent planning documents places the reliance on these other documents to make the important decisions. The Core Strategy will set the scene for more detailed guidance but should be able to stand on its own.

The document lacks a clear spatial focus and there are few specifics as to the scale of development, the range and mix of uses, how they relate to each other and the infrastructure necessary to achieve this.

The policies seem to be a set of generalities lacking any real analysis of the area and the key challenges facing the District. The wording of policies needs to be robust and clear because of the way they determine whether or not, and how development can take place.

Full Text: Does not accord with soundness criteria relating to accordance with national policy as criteria for playing pitch provision in Green Belt does not accord with PPG2. Paragraph 1.6 of PPG2 advises that providing opportunities for outdoor sport is one of the objectives of use of land in the Green Belt. Consequently, no requirement to demonstrate a need for additional playing pitches as it is not inappropriate development in Green Belt.

Summary: Does not accord with soundness criteria relating to accordance with national policy as criteria for playing pitch provision in Green Belt does not accord with PPG2. Paragraph 1.6 of PPG2 advises that providing opportunities for outdoor sport is one of the objectives of use of land in the Green Belt. Consequently, no requirement to demonstrate a need for additional playing pitches as it is not inappropriate development in Green Belt.

Change to Plan: Omit the requirement for a need for additional playing pitches to be demonstrated as thus does not accord with Government policy.

Appear at exam? No  Soundness Tests iii

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Full Text: Does not meet effective or accordance with national policy soundness criteria. This is because reference is made to it being acceptable for playing fields to be developed if it can be demonstrated that the site is not viable for use as playing pitch. However this is ambiguous as unclear what is meant by viable for use and does not accord with PPG17 (para 15) on development affecting playing fields which does not include any criteria relating to viability. This has potential to be misinterpreted by developers e.g. any former playing field could be claimed to be unviable.

Summary: Does not meet effective or accordance with national policy soundness criteria. This is because reference is made to it being acceptable for playing fields to be developed if it can be demonstrated that the site is not viable for use as playing pitch. However this is ambiguous as unclear what is meant by viable for use and does not accord with PPG17 (para 15) on development affecting playing fields which does not include any criteria relating to viability. This has potential to be misinterpreted by developers e.g. any former playing field could be claimed to be unviable.

Change to Plan: Delete reference to the loss of existing playing pitches being resisted unless it can be clearly demonstrated that the site is not viable for use as a playing pitch. Suggest that this is replaced with unless an assessment of playing pitch needs has been undertaken which has clearly shown the playing pitch to be surplus to requirements because this would accord with PPG17 and Sport England playing fields policy and may have been what was intended.

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is Instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify
those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those
general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the
removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of
this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a
more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land
South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of
Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing
employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further,
Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic
housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development
in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of
sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out
for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the
October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy
H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead
of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and
achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as
a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth
in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations
have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable
agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as
South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the
loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the
Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the
ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core
Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan
Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the
publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable
housing for new residential developments. The Policy accords with the advice of National Policy and is therefore
considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy
represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities.
The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the
Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that
seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly
when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more
schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through
negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place:
Policy CP1 - Design
3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of
open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport:
Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13’s maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development:
Policies ED3 - Existing Employment Land
ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publicly available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary:
Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

Summary: We support this policy. We need to see more bed and breakfast and hotels in the area. Tourists will not visit if there is nowhere to stay. We would like to see a realistic approach to this item rather than an idealistic one

Change to Plan: N/A

Appear at exam? Not Specified

Soundness Tests: N/A

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Not sound in terms of national policy consistency as standard charges for open space and leisure facilities only sought from residential developments. However, employment, tourism etc development also generates open space/leisure needs and PPG17 requires the needs of those working in and visiting areas to be included in assessments and planning permissions do not only apply to housing. This could result in new non-residential developments not making any provision for additional needs that they generate. Also standard charges towards open space should be expected from residential developments as not appropriate to always provide on-site e.g. playing pitches.

Change to Plan
Change appendix CLT1 to allow the principle of standard charges being sought from employment developments and principle of residential developments paying standard charges towards open space. An SPD can then set out detail of what types of development charges will be sought from and what types of open space/leisure provision should be made for. Other authorities have taken this approach.

Summary
Not sound in terms of national policy consistency as standard charges for open space and leisure facilities only sought from residential developments. However, employment, tourism etc development also generates open space/leisure needs and PPG17 requires the needs of those working in and visiting areas to be included in assessments and planning permissions do not only apply to housing. This could result in new non-residential developments not making any provision for additional needs that they generate. Also standard charges towards open space should be expected from residential developments as not appropriate to always provide on-site e.g. playing pitches.

1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.
The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a ‘saved’ policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, ‘Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.’

Core Strategy Policy ENV2 should be revised to include specific reference to,
* Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
* the application of the most stringent restrictions on development within the rural and undeveloped coastline;
* any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,
* Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with, The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

* Page 16 (Sustainable Community Strategy Priority: Promoting a Greener District) should be amended to further support the approach to the Historic Environment. The fourth bullet of the Key Section/Policies of the Core Strategy should be amended to include the word ‘historic’, so that the first sentence of the bullet would read, The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council’s document should fully reflect the County Council’s own approach to this matter as set out in the County Council’s ‘Developer’s Guide to Infrastructure Contributions’.

In addition, it should be noted that,
* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.
* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.
* The Core Strategy should make specific reference to,
  o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;
  o Policy CLT2, final sentence: insert after the words 'primary schools' the words 'and Early Years and Childcare facilities';
  o Appendix CLT1. Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,
* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.
* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, 'The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment's (CABE) Building for Life principles.'

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the
Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends.

**Summary:**
The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.
* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

The Core Strategy should make specific reference to,

Appendix CLT1, Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

**Change to Plan**
The Core Strategy should make specific reference to,

**Appear at exam?** Not Specified

**Soundness Tests** i

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1
Para 4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 you discarded N.E. Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road...renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009
June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential..." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport
Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "...highway improvements serving new developments...in a timely manner...ensuring developments delivered alongside necessary infrastructure". These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009
Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development
Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Para. 1.25, Para. 11.32  Note CH.1 Introduction to CS Submission 2009 para. 1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "..alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4  Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents’ views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii) "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para. 12.38  The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".
2) (10.28) "There is no immediate capacity for additional floorspace".
3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.
One doesn't perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists
Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systematically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, façade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area[]!". (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane; others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people.to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsletter had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley...

is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?
Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential..." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1
T1 & T2 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3  Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32
Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. ".alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)"reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6  Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6  The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists
Para.5.4 “Rochford district has unique character..stems from traditional buildings..still dominate towns and villages”.
Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process”. In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people.to have their voices heard”.

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible”.

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA’s responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: “Core Strategies should be flexible and able to show how they handle contingencies”. Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: “the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities”. So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary: Policy T3 CLT1 Appendix CLT1 T1 & T2

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Change to Plan

Appear at exam? Not Specified Soundness Tests i, iii

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:
EC7.3C "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5.1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):
"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is
also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

• the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates. The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Objections to RDC's Core Strategy Submission DPD

Reason Unsound

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

CHAPTER 10

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) “out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The ”Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

“Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
CHAPTER 10

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to
the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which doe not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29 "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.

Transport CHAPTER 10

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

The site selected for the new industrial estate also contravenes PPS4 which states: 

EC7.3C "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres."

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.
Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been
given to the implications for highways across the District. Many roads across the District are at or near capacity but no
modeling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry
Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of
improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and
costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund
infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to
identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the
District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are
proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the
railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific
development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and
costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail
is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard
Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy
acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal
is therefore unsound.

Previous consultations ignored by RDC:
- The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing
development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open
spaces, and no large housing estate developments. It was also stated that any developments must be matched by the
appropriate levels of infrastructure.
- The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP)
Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the
adjacent Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation
(2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry
Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
- The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the
industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
- The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment
to the Core Strategy states this omission was due to a typing error!
- The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
- The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the
industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support -
Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study states Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

CHAPTER 10  Transport

Appear at exam?  Not Specified  Soundness Tests  i
Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; 

EC7.3C "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 viii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc. The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Essex Chambers of Commerce (Mr John Dallaway) strongly supports the vision for transport and the development of a Transport Strategy SPD which must be subject to meaningful consultation with stakeholders. It is vitally important for the efficient movement of goods and services that significant improvements to the existing highway infrastructure will be required during the plan period. The existing levels of congestion are considered to be unacceptable, so further provision is essential to cope with the traffic generation to be created by more housing and employment. Consideration must also be given to a better east-west route linking east Rochford to the A130/A127.

As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

- * (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

- * EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

*Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local
Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.*

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

* The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned; The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant.

Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Change to Plan

Soundness Tests i
Full Text: Please find the following objections: -

1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC: The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC not consulted on proposals to relocate the Eldon Way and Foundry Industrial Estates

EW; CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" absolutely no consultation on concept of moving EW businesses entirely

FIE; has never even been previously mentioned in any plan version; CS states omission was due to typing error!

Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus proposals are not founded on a robust and credible evidence base and are unsound.

8. The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.
Core Strategy Submission Document

16298 Object
CHAPTER 10 Introduction

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The CS misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The CS states "The R&LS states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS actually states:

1) "does not lend itself to a food store capable of retaining a significant proportion of main food shopping expenditure.
2) "there is no immediate capacity for additional floor space."
3) "recommend that focus be maintained on developing Hockley's existing strengths."
4) "the Council may wish to consider reclassifying Hockley from a town center, to a district center".

Summary:

1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Change to Plan

Appear at exam? Not Specified Soundness Tests i

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1
Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road...renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential..." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport
Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "..highway improvements serving new developments...in a timely manner...ensuring developments delivered alongside necessary infrastructure". These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Para.1.25, Para.11.32 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized."..alternative land will be required to accommodate employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009
Remove compulsory relocation

Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Move to new industrial site near airport contravenes PPPS4:
- EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and...close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".
- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).."reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres
The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para.12.38 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".
2) (10.28) "There is no immediate capacity for additional floorspace".
3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider recategorizing Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.
The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.
One doesn’t perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists
Para.5.4 "Rochford district has unique character...stems from traditional buildings...still dominate towns and villages".

Para.5.17 "Council believes many buildings...are of local distinctiveness...part of...cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, façade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area![]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane., others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people.to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Para.10.5 "...highway improvements serving new developments...in a timely manner...ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road
Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Change to Plan

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
CHAPTER 10

Ch. 4 Housing: Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2 N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential." to be decided by HAAP (issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1 T1 & T2 *.highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure*.

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32
Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. ".alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPPS1 (27vii)"reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) “we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists
Para.5.4 “Rochford district has unique character..stems from traditional buildings..still dominate towns and villages”.
Para.5.17 “Council believes many buildings..are of local distinctiveness..part of..cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process”. In Statement of Community Involvement 2006 Rochford RDC “recognises need to enable people..to have their voices heard”.

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible”.

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA’s responsibility to RDC’s job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn’t exist. In PPS 12, Ch.4.6 states: “Core Strategies should be flexible and able to show how they handle contingencies”. Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: “the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities”. So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary: Para 10.5 “..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure”.

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Change to Plan

Appeal at exam? Not Specified

Soundness Tests
The aspiration to reduce car dependency is welcome.
Policy T1 - Highways states  "Developments will be required to be located and designed in such a way as to reduce reliance on the private car. However, some impact on the highway network is inevitable and the Council will work with developers and the Highway Authority to ensure that appropriate improvements are carried out. The Council will work with the Highways Authority to deliver online improvements to the east to west road network".

Policy T1 - Highways (extracts) Policy states:
1. "Developments will be required to be located and designed in such a way as to reduce reliance on the private car. However, some impact on the highway network is inevitable and the Council will work with developers and the Highway Authority to ensure that appropriate improvements are carried out".

This is an UNSOUND Statement. Development of Rawreth will not reduce the reliance on the private car because it is too remote from principal towns and schools. Public transport is poor and infrequent. Bus companies keep saying it is not commercially viable.

2. "The Council will work with the Highways Authority to deliver online improvements to the east to west road network". Rawreth Lane forms part of the East to West road network but has no mention in T2 - Highway Improvements. This road already suffers severe congestion at commuter and school run periods. Regular gridlock happens now and will only get worse if a massive development, linked to Rawreth Lane, is approved.

This is also UNSOUND as Rawreth Lane is not identified as part of the East to West road network

Summary: Development in Rawreth will not reduce the reliance on cars, because it is too remote from principal towns and schools. Not mentioned in T2. Rawreth Lane forms part of the East to West network. Presumably this means no delivery of online improvements. *** I disagree with these summaries, please read the full submission.

Change to Plan Include Rawreth Lane when considering any improvements to the East to West road network. Do not ignore the fact that such development will cause additional pressure on an already inadequate road.

We support this policy and note that you make special reference to the Rayleigh Weir junction, where the present roundabout structure over the A127 is unable to cope with dispersing the large volume of traffic efficiently at peak periods which, particularly in the evening, result in considerable tailbacks from Rayleigh Weir, along the A127 towards Basildon, creating congestion on the roundabout under the A127 where the A130 feeds in.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc. The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

Soundness Tests
i, ii, iii
Are the hopes outlined here realistic? It is a lost cause to try to cut down the use of the private car. Section 106 Agreements would appear unlikely to cover the cost of adequate improvements. If this is not carried out, we will have serious problems with the increase in development planned.
I quote from this section. "A considerable impact on the highway network is inevitable". So if this is the case, are RDC failing to address the problem by merely stating "we will work with developers and the Highway Authority to ensure that the requisite improvements are carried out"?

Pro-active plans are essential and RDC are failing drastically in this, as they cannot envisage a solution. What is meant by their stated objective "To deliver online improvements on the east to west road networks in partnership with the Highways Authority, Essex County Council?"

To me this is an unsound and meaningless statement. Rochford District residents have continually raised the question of how the east to west road networks can be improved and we are always told that they cannot due to the nature and topography of the area.

RDC and ECC Highways should be instructed to provide details of a structured and achievable plan to overcome the fact that "A considerable impact on the highway network is inevitable". Highways infrastructure, and in particular the East-West road network, should be in place before any further building is allowed.
In the not to distant future the potentially massive development London Southend Airport will have a dramatic impact on the existing road networks. This will not only result in an increase of passenger and freight traffic on our overcrowded roads, there will also have to be capacity for the 7000 personnel entering new jobs that will be created.

Can anything be so unsound as this! To enter such a period of expansion in people, and ultimately road traffic, without a structured and achievable plan is absolutely ludicrous.

Linked to the subject of 7000 new jobs at the airport, I raise again the proposal for 1020 new dwellings in Rawreth. It has been suggested by RDC that many of the new employees will need new accommodation and to achieve low levels of car use it would be sensible to provide dwellings in close proximity to the workplace thus enabling employees to walk or cycle to work.

This being the case, the proposed 'North of London Road' Rawreth site is eight miles from the airport and I would suggest that in general the car would be the method of commuting. Here again commuters would have to use the inadequate west to east routes.

Surely workforce dwellings should be within about two miles radius of the workplace to reduce traffic capacity and currently there are a number of areas to the north and north east of the airport to accommodate this. It may mean that some farmland and plotlands in the areas of Rochford and Ashingdon would have to be used but these are better suited to minimise traffic problems and could spare the need to erode the natural green belt between Rayleigh and the A130 trunk road at Rawreth.

Summary: 7000 new jobs at Southend Airport and more than 50% of the houses in the west of the district. Probably little walking or cycling to work. Poor public transport and an inadequate east/west route. Workers houses should be within a 2 mile radius of airport, to north or north east.

Change to Plan  Reduce the road traffic on the East/West route by locating more houses to the north or north east of the airport, Rochford west or Ashingdon, and reduce the amount in Rawreth.

Appearing at Exam? Not Specified Soundness Tests N/A
HPPG believes the plan is unsustainable in and around Hockley due to insufficient highway networks to support additional population numbers and traffic volumes with the majority of additional housing planned east of Hockley. Roads into Hockley are already highly congested at peak times. The Hockley Parish Plan published October 2007 states that Hockley roads cannot support additional vehicles without expensive improvements such as a bypass. A Resident Survey October 2009 concludes that traffic flow through Hockley will be at gridlock, especially, at the Spa roundabout, following Core Strategy housing proposals, Airport expansion proposals and Eldon Way redevelopment proposals.

Infrastructure proposals related to highways are not enough to support the additional traffic, especially now that Eldon Way redevelopment is included in the Core Strategy with a reported 150-200 additional dwellings.
The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

CHAPTER 10

Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions, reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

*Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local
Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.*

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?
Thus the proposals are not founded on a robust and credible evidence base and are unsound

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
* the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
the Foundry Industrial Estate has never even been previously mentioned;
The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a “village green, introducing a significant area of public open space”. There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither define its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and “should be able to show how they will handle contingencies”. Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley’s existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace”. Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley’s existing strengths.” 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Summary: Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

CHAPTER 10

Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions, reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

* "EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* "EC7.5.1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions, reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Plan.
CHAPTER 10

Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.  

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?
Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

* The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry
Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of
improvements required is both unknown and not funded and the proposal is unsound.

Please find the following objections:

10 off Unsound Reasons.

1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC not consulted on proposals to relocate the Eldon Way and Foundry Industrial Estates

EW; CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" absolutely no consultation on concept of moving EW businesses entirely

FIE; has never even been previously mentioned in any plan version; CS states omission was due to typing error!

Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus proposals are not founded on a robust and credible evidence base and are unsound.

8. The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.
There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The CS misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The CS states "The R&LS states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS actually states:

1) "does not lend itself to a food store capable of retaining a significant proportion of main food shopping expenditure."
2) "there is no immediate capacity for additional floor space."
3) "recommend that focus be maintained on developing Hockley's existing strengths."
4) "the Council may wish to consider reclassifying Hockley from a town center, to a district center."

Summary:

1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Full Text: Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; â€“ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€“ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC are proposing to scatter housing across the district in around 12 sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question): "Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is
also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:
• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.
• The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
CHAPTER 10

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposes pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant.

Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states"The Retail & Leisure Study states Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and
16438 Object

providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the District, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; ä€¿ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

ä€¿ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary: Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question): “Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is unclear what improvements will be required and whether they can be physically achieved.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
• the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant.

Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley’s existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

EC7.3C “out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5.1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question): "Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc. The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is
also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Objections to RDC's Core Strategy Submission DP

Reason Unsound

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3 services an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”
It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor especially costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with
PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

(* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges."

The Core Strategy also contravenes its own policy T1 and is unsound.

CHAPTER 10 Policy T1 - Highways

Full Text:
Please find enclosed my objection to the Core Strategy Submission DPD. Please kindly acknowledge receipt of this objection and duly register it.

Objections to RDC's Core Strategy Submission DPD
Reason Unsound
1. Highway & Traffic Implications
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:
(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs not, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

The Foundry Industrial Estates has never even been previously mentioned in any plan version: A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which doe not indicate how such applications will be handled and does not comply with
PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29 "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to
the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.
Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Summary:

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

CHAPTER 10

Full Text:

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.
Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Summary: Proposals for moving employment to of town locations, at either end of the district, with no existing public transport inks, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

CHAPTER 10

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) “out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres."

EC7.5 1 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport inks, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in
the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only “potential” to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.
7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant.

Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which doe not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure."
2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) (10.31) "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Summary: 2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.
1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport inks, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard
Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy
acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal
is therefore unsound.

Previous consultations ignored by RDC:
• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing
development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open
spaces, and no large housing estate developments. It was also stated that any developments must be matched by the
appropriate levels of infrastructure.
• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP)
Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the
adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation
(2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry
Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the
industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
• The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment
to the Core Strategy states this omission was due to a typing error!
• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the
industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

The Foundry Industrial Estate has never even been previously mentioned; The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate. Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential. Hockley has been identified as needing additional convenience floorspace".

Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:
Proposal for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; à€œ (EC7.3C) “out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres. à€œ EC7.5 1 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

“Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; &E (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres. &E (EC7.5) "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 viii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Full Text:

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; £EC7.3C "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

£EC7.5 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.
Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
- The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
- The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
- The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
- The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
- The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

CHAPTER 10 Policy T1 - Highways

• the Foundry Industrial Estate has never even been previously mentioned;
• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre."

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; £C7.3C “out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres. £C7.5 I “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 viii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
- The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
- The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
- The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
- The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
- The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
- The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
- The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
the Foundry Industrial Estate has never even been previously mentioned;
The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate
Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.
Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.
Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?
There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.
If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.
Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.
There are also inconsistencies between the Core Strategy & HAAP.
If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.
PPS12, 4.6, states that Core Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.
THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.
The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace". Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
The Core Strategy is inaccurate, misleading and unsound.
Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts
It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Change to Plan

Appear at exam? Not Specified Soundness Tests i

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1
Para 4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road...renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to CS Preferred Options 2008 and HAAP 2009
June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential..." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport
Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para 10.5 "...highway improvements serving new developments...in a timely manner...ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009
Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No7 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development
Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Para 1.25, Para 11.32 Note CH.1 Introduction to CS Submission 2009 para 1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodate employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Move to new industrial site near airport contravenes PPPS4:
- EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and...close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".
- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii) .."reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres
The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para 12.38 The Core Strategy states (para 12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
One doesn’t perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists
Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conserved items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, façade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area![]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane; others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion
Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people.to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:
Ch.10: Highways and Transport
Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP,
Contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Soundness Tests  i
Thank you for inviting the Highways Agency (HA) to comment on the Rochford Core Strategy (CS) Submission Document and Rochford Area Action plan (AAP) prepared by Rochford District Council

As you are aware the HA is an executive agency of the Department for Transport (DfT). We are responsible for operating, maintaining and improving England's motorway and all-purpose trunk road network, collectively known as the Strategic Road Network (SRN), on behalf of the Secretary of State for Transport.

In spatial planning and development control terms, we have a duty to safeguard the operation of the motorway and trunk road network as set out in the Department for Transport Circular: 02/2007: Planning and the Strategic Road Network. http://www.dft.gov.uk/pgr/regional/strategy/policy/circular207planningandstrategic. The circular encourages the HA to work co-operatively with Local Planning Authorities within the framework of the Government's policies for planning, growth areas, regeneration, integrated transport and sustainability. We look to your Council's Local Development Framework to promote strategies, policies and land allocations which would support alternatives to the private car.

In the case of Rochford there are no trunk roads within the District although there are two strategic corridors namely the A13 and A127/A1159 which connect into the M25 motorway network at Junctions 30 and 29 respectively. Sections of these areas are currently heavily congested, particularly during peak periods, and operate under considerable levels of network stress. Therefore it is important to the HA that the impact of major development proposals in the Rochford area is considered within the context of future impact on the M25 and the A13 Trunk Road.

Please see below some general comments regarding the soundness of the CS and SSA from a transport perspective, referring to specific proposed submission policies as necessary. This response has been completed with reference to paragraph 4.52 of PPS12 (2008) PPS12, paragraph 4.52 - To be 'sound' a core strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY.

**CORE STRATEGY**

**Policy GB1 - Green Belt Protection**

The HA acknowledges that only the minimum amount of Green Belt land will be allocated to meet the District's housing and employment needs as necessary. However, the HA is concerned that any proposed redevelopment of greenbelt sites could result in development in areas with limited access to sustainable transport modes therefore resulting in higher levels of car usage and subsequent impact on the SRN. Although the HA recognizes that new public transport hubs that would facilitate the use of non-car modes could be developed over time, this process is likely to require very substantial investment.

It is therefore important that an appropriate assessment of infrastructure requirements is performed for development sites on Green Belt land. Funding towards the necessary public transport infrastructure improvements must be sought and secured prior to occupation of any new development on greenbelt land. Furthermore, the occupation of such developments should be phased in line with necessary transport infrastructure. This will help the CS meet the PPS12 requirement that a sound DPD should be 'justified' and 'effective' and hence deliverable.

**Policy T1 - Highways**

Policy T1 highlights the need to reduce reliance on the private car but also observes that 'some impact on the highway network is inevitable'. In a District with such high levels of private car ownership and a limited public transport network, as stated in paragraph 10.2, it will be important to assess the potential impacts to the highway network and ensure that mitigation measures are proposed and implemented where necessary.

An emphasis should be placed on the provision and improvement of sustainable transport infrastructure, particularly where high trip-generating developments such as offices are proposed. In line with the DfT's Guidance on Transport Assessment (2007) - DfT GTA, paragraph 4.51 - 'The key issue is the need to ensure that development proposals strive to achieve nil detriment ('no worse off') to the strategic network, for the opening year and appropriate horizon year'. This emphasis will assist in mitigating potential increases in private vehicle trips and hence help ensure that there is a nil-detriment effect on the SRN.

**Policy T3 - Public Transport**
The recent Planning Inspectorate ‘LDF - Learning from Experience’ document (September 2009) suggests that a Core Strategy should identify a clear source of funding for infrastructure for at least the first 5 years of the plan – The Planning Inspectorate, LDF: Examining DPDs: Learning from experience, September 2009, Paragraph 22 - ‘For at least the first 5 years of the plan it should be clear what infrastructure is required, who is going to fund and provide it and how it is to relate to the rate of development’. Paragraph 10.15 of the CS highlights the importance of public transport links for new developments and implies that developers may be required to contribute towards public transport provision. However, it is noted that developer contributions cannot be expected to pay for all transport improvements and as such, in line with the recent Planning Inspectorate document outlined above additional sources of funding should be identified. It is recommended that alternative sources of funding for public transport improvements are clearly outlined within the CS to ensure that adequate infrastructure provision is made.

Policy T4 - South Essex Rapid Transit

As mentioned in our response to the Core Strategy Issues and options consultation the HA is supportive of this policy and the need to progress the route through South Essex. This has the potential to reduce the impact on the SRN (A13).

Policy T5 - Travel Plans

The HA welcomes the requirement for a travel plan for developments involving both destination and origin trips. However it is noted that no threshold for employment sites have been specified. Essex County Council requires the production of a workplace travel plan for developments with over 50 employees or where there will be a significant impact on the local road network. To avoid ambiguity for developers, the HA recommends that the Rochford District Core Strategy specifies a similar threshold within Policy T5. This will ensure the Core Strategy is in line with PPG13 paragraph 87 - PPG13 - ‘Local authorities are expected to consider setting local targets for the adoption of travel plans by local businesses and other organizations.’

Policy ED2 - London Southend Airport

The HA previously responded to the London Southend and Environs Joint Area Action Plan Preferred Options Document (March 2009). As such, we have not repeated our comments here but instead refer you to our consultation response dated 31 March 2009.

Summary:

Policy T1 - Highways

Policy T1 highlights the need to reduce reliance on the private car but also observes that ‘some impact on the highway network is inevitable’. In a District with such high levels of private car ownership and a limited public transport network, as stated in paragraph 10.2, it will be important to assess the potential impacts to the highway network and ensure that mitigation measures are proposed and implemented where necessary.

An emphasis should be placed on the provision and improvement of sustainable transport infrastructure, particularly where high trip-generating developments such as offices are proposed. In line with the DfT’s Guidance on Transport Assessment (2007) - DfT GTA, paragraph 4.51 - ‘The key issue is the need to ensure that development proposals strive to achieve nil detriment (‘no worse off’) to the strategic network, for the opening year and appropriate horizon year’. This emphasis will assist in mitigating potential increases in private vehicle trips and hence help ensure that there is a nil-detriment effect on the SRN.

CHAPTER 10  Policy T1 - Highways

Respondent: Hockley Under Threat (J Abbey) [14229]
Agent: N/A

Hockley Under Threat
None provided

Full Text:

Ch. 4 Housing; Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 ".highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32
Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. ".alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites...well served by choice of..transport and...close to centre and...high likelihood of forming centre with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPPS1 (27vii) "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) “we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”.

4) 10.31 “the current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists
Para.5.4 “Rochford district has unique character...stems from traditional buildings...still dominate towns and villages”.

Para.5.17 “Council believes many buildings...are of local distinctiveness...part of...cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protest. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process”. In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people...to have their voices heard”.

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible”.

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA’s responsibility to RDC’s job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: “Core Strategies should be flexible and able to show how they handle contingencies”. Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: “the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities”. So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs”. Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
16744 Object
CHAPTER 10 Policy T1 - Highways

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Change to Plan Establish like motorways with wholesale demolition.

Full Text: Ch. 4 Housing; Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential...to be decided by HAAP (issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1
T1 & T2 "...highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".
These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. ".alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming centre with centre". There is no current public transport and links with centres is unlikely".  

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)"reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists
Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".
Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protest. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1
T1 & T2 *.highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure*. These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3  Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32 Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "..alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPPS1 (27vii)"reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
CHAPTER 10

shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) “we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 “Rochford district has unique character...stems from traditional buildings...still dominate towns and villages”.

Para.5.17 “Council believes many buildings...are of local distinctiveness...part of...cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protest. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 “Community involvement is an essential part of the plan making process”. In Statement of Community Involvement 2006 Rochford RDC “recognises need to enable people...to have their voices heard”.

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible”.

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA’s responsibility to RDC’s job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn’t exist. In PPS 12, Ch.4.6 states: “Core Strategies should be flexible and able to show how they handle contingencies”. Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: “the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities”. So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary: Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents’ views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

CHAPTER 10 Policy T1 - Highways

Respondent: Swan Hill Homes Limited [8329]  
Charles Planning Associates Ltd (Mr P Kneen) [5040]

Full Text:

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify
those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place:
Policy CP1 - Design

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT6 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of
CHAPTER 10

open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport:
Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development:
Policies ED3 - Existing Employment Land
ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary:
Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help
achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer’s role should not be seen as a means to meet existing shortfalls in provision.

 CHAPTER 10

Policy T2 - Highways Improvements

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Response to Plan

Review whole strategy of scaterring houses around the district.

Soundness Tests

i, ii, iii

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc. The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

**Summary:**
Housing will be scattered across the district but no detailed consideration has been given to the implications for highways. Many roads are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary: The policy stated here is not the same as published in the PDF version or made available through the local library. The PDF version includes improvements Spa Road/Main Road roundabout. There may be other variances between documents. It is important to be clear what the policies are that are being proposed.

Change to Plan: Clarify what policy is being proposed. Check the on-line system and PDF versions to ensure there are no other inconsistencies. At the very least advise anyone who has commented on the constulation of discrepancies found.

Appear at exam? No  Soundness Tests i

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

CHAPTER 10 Policy T2 - Highways Improvements

Respondent: Mr Brian Guyett [11793]  
Agent: N/A
2 Tonbridge Road,  
Hockley  
SS55HL  
United Kingdom  
07736211248

Full Text: RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts. It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary: RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts. It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Are the hopes outlined here realistic? It is a lost cause to try to cut down the use of the private car. Section 106 Agreements would appear unlikely to cover the cost of adequate improvements. If this is not carried out, we will have serious problems with the increase in development planned.
CHAPTER 10
Policy T2 - Highways Improvements

"The Council will work with Essex County Council Highways Authority to ensure that highway improvements are implemented to address issues of congestion".

In this section Ashingdon Road, Rectory Road, Spa Road and Main Road are highlighted as having congestion issues. During the Local Development Framework consultations, residents were invited to submit suggestions to be considered for the Core Strategy Document and I replied with a proposal which would reduce congestion in these areas. My suggestion also included links to Hall Road and the B1013 east to west road network, which also have congested sections.

The proposal was to extend Cherry Orchard Way (adjacent London Southend Airport) northward some 2.5 miles to north Ashingdon linking to points in Hall Road, Rectory Road and Ashingdon Road. By doing this, better access to the A127 would be provided and traffic flows through Ashington, Rochford, Hawkwell and Hockley could all be drastically reduced. I even submitted drawings of the proposal to assist explanation.

Unfortunately the response from RDC was very disappointing, their only comment being that it could not be justified as it included passing over a railway line.

I feel that RDC's statement to "address issues of congestion" is unsound because it does not portray the major improvements needed to solve the congestion problems in the whole of the district.

I wish to participate at the oral part of the examination and present my suggestion.

Include positive suggestions from residents in the submission document in order that the Planning Inspectorate can make an assessment of what is being presented by the public and not just the views of the council.
CHAPTER 10

Policy T2 - Highways Improvements

Full Text:

There is reference to The Spa/Main Road, Ashingdon/Rectory Road junctions, and enhancement of the B1013 as possible traffic improvements (which will be needed if the developments in Hockley and Hawkwell go ahead), but no specific explanation how these will be implemented. Installing traffic lights will not help to cut down tailbacks in rush hour, as shown by those on the Plumberow Ave/Greensward Lane junction - And these are not on the B1013!

Change to Plan

A) Straighten out and widen existing winding (ex country) roads such as the B1013, or build a bypass for Hockley and Hawkwell. In both cases this is unrealistic economically (properties which have to be compulsory purchased, and where are the displaced residents going to go?), or taking the bypass through open spaces (such as Hockley Woods/Jubilee Park).

B) Discourage people from using cars. One way of doing this is by drastically improving public transport (again, not realistic - Proof of which is the deterioration of Arriva Bus Service 7&8). SERT has been mentioned (Policy T4) as the only specific plan, but it does not touch Hawkwell nor Hockley.

Another way to discourage car use is to improve and build more connecting, properly sign-posted cycle paths and walkways (most existing cycle paths and walkways don't connect with each other and need local knowledge to know that they even exist) that are designed to be used safely by both cyclists and pedestrians (rather than a half-hearted way to get cyclists off the roads), while encouraging the use and sale of bicycles (for example by using the Cycle2Work tax-exempt scheme).

Such a scheme would certainly be necessary to encourage the new residents of the proposed 330 home Housing Estate in Hawkwell to walk/cycle to Hockley Station. At present the most direct route would take them through the grounds of Clements Hall, possibly encountering badly-policed anti-social behaviour (from the types of people who loiter there), and along the main road up a steep hill, making the walk/cycle ride extremely unpleasant. The only specific Greenways mentioned in the document (policy T7) are not planned in Hawkwell, nor Hockley.

Summary:

There is reference to The Spa/Main Road, Ashingdon/Rectory Road junctions, and enhancement of the B1013 as possible traffic improvements (which will be needed if the developments in Hockley and Hawkwell go ahead), but no specific explanation how these will be implemented. Installing traffic lights will not help to cut down tailbacks in rush hour, as shown by those on the Plumberow Ave/Greensward Lane junction - And these are not on the B1013!
CHAPTER 10

Full Text:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Soundness Tests  i, ii, iii
Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.*

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC: The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

* The Foundry Industrial Estate has never even been previously mentioned in any plan version. A recent amendment to the Core Strategy states this omission was due to a typing error!

* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre”.

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace”. Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space.” 3) "we recommend that focus be maintained on developing Hockley's existing strengths.” 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Summary:
The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Change to Plan

Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

*Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local
Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.*

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?
Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.
   * The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.
   * The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
   * The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation. Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley’s existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Full Text: Please find the following objections: -

1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs"). Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC not consulted on proposals to relocate the Eldon Way and Foundry Industrial Estates

EW; CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" absolutely no consultation on concept of moving EW businesses entirely

FIE; has never even been previously mentioned in any plan version; CS states omission was due to typing error

Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus proposals are not founded on a robust and credible evidence base and are unsound.

8. The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.
There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Full Text: Re: Core Strategy for Hockley Redevelopment

I object to the Core Strategy for the following reasons;

You are ignoring the views of the local residents, who have overwhelmingly stated via the Hockley Parish Plan that they do not want any large-scale housing development in Hockley, but if there has to be some additional housing, there must be no loss of greenbelt or open spaces and any developments must be matched by the appropriate levels of infrastructure.

Our village needs improvements to build on what we have now rather than a long drawn out proposal, which, by the time it is agreed and completed will have seen Hockley become just a huge housing estate without a thriving centre, because many local businesses will have disappeared due to the dreadfully inadequate transport links.

Our roads simply cannot cope with the existing traffic volumes let alone the massive increase in traffic, which will result from the relocation of businesses and numerous housing developments. Our village is surrounded by some of the most beautiful countryside in the district which we do not want to see disappear forever.

Listed below are some of the technical points as to why I object to the Core Strategy and why I believe it to be inaccurate, misleading and unsound.

By proposing to move employment at Hockley's two business estates to a green field site near the airport, which has no existing public transport links and being 2-3 miles from the nearest railway station, is contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions by placing a reliance on car transport as a means of getting to work.

Though RDC are proposing to upgrade the nearest road to a dual carriageway, the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway. This road is already horrendously busy and virtually grid locked at peak times, so this is quite unbelievable that with the predicted expansion of the airport and new industrial estate, there is no provision for the improvement of the B1013 through Hockley. The proposed development of the business estates for housing (and additional housing proposed for Hawkwell) also means an increase in the volume of traffic in the Hockley area with no provision for improvement or expansion to cope with the higher volume.

The site selected for the new industrial estate contravenes PPS4, which states that for "out-of-centre sites, preference is given to sites which are or will be well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car and which are close to the centre and have a high likelihood of forming links with the centre. As there is no existing public transport, there is no obvious likelihood of forming links with any existing centres. In addition, because of its remote location, accessed by the narrow, busy B1013; it is not suitable for access by cycle or on foot."

It also contravenes PPS1, which states reducing the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

PPS12 4.9 states the infrastructure planning process should identify, as far as possible: infrastructure needs and costs. Neither needs nor, especially, costs have been identified. The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned. No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation. Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. There no cross-referencing between concurrent plans affecting the exact same piece of land.

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a “village green, introducing a significant area of public open space”. There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent, which HAAP will need to follow, and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. It states "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floor space".

What the R&LS actually states is:

1) (10.26) “the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) “There is no immediate capacity for additional floor space.”
3) (10.29) "we recommend that focus be maintained on developing Hockley’s existing strengths, rather than retail expansion"
4) 10.31 “The current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Invest in what we already have rather than forcing upon us something none of us have asked for. Most people would agree that Hockley needs a facelift but it does not need changing beyond all recognition. This strategy does not propose to deal with the issues that affect this area now, and does not propose to deal with these same issues that will be exacerbated further by the proposals that are being made. Attached are some ideas for relatively quickly achievable solutions, which would enhance the village and deal with some of the traffic problems, without losing “Hockley”. We live here because we like it - if we didn’t we would have moved!

Make the Spa Pub the roundabout, which would greatly reduce the junction exit combinations that exist at the current mini roundabout.

Traffic will still be able to flow when the brewery lorry parks up - it is very dangerous trying to manoeuvre round it onto that mini roundabout, as you cannot see vehicles coming the other way.
Hockley Ideas:

Demolish the "Alldays" building and use that space to create the "village square", which could be landscaped or used in the way the Rayleigh Market car park is used - farmers markets, market days, parking on non market days. This would maintain the existing focal point of Hockley, the High Street, therefore not being detrimental to the shops on the other side of the road. It would also provide a possible link to the Leisure facilities in Eldon Way.

Summary:
Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned. No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; 
EC7.3C “out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5.1 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges.”

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question): "Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is
also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
- The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
- The proposals also ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
- The proposals ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
- The previous CS Strategy stated “we will look at opportunities for more valuable and appropriate uses of the industrial land” with absolutely no consultation at all on concept of moving existing EW businesses entirely
- the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
- The Urban Capacity study stated a “low probability” of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.
The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.28) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) (10.31) "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy states the Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace. Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths. 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre."

Summary:
The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.
Thus the proposals are not founded on a robust and credible evidence base and are unsound

Change to Plan

Appear at exam? Not Specified Soundness Tests i
Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3 minutes per hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; &quot;EC7.3C &quot;out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres. 

EC7.5.1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car&quot;. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 26 June 2009, RDC stated (in response to a question): "Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc. The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is
Also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
- The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
- The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Objections to RDC's Core Strategy Submission DPD

Reason Unsound

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."
It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs not, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only “potential” to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated “we will look at opportunities for more valuable and appropriate uses of the industrial land” with absolutely no consultation at all on concept of moving existing EW businesses entirely

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which doe not indicate how such applications will be handled and does not comply with
PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Change to Plan

Appear at exam? Not Specified Soundness Tests i
1. **Highway & Traffic Implications**

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to
the Core Strategy acknowledges this omission was due to a typing error!
The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate
Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.
Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.
The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial
land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.
The Foundry Industrial Estate has never even been previously mentioned.
The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.
Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.
8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core
Strategy proposals pre-empt the next stage of the HAAP consultation.
Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and
subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of
land?
There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the
two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village
green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy
is again pre-empting the ongoing HAAP.
If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will
set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant.
Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely
undemocratic and unsound.
Summary
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to
the other plan and subsequent priorities.
There are also inconsistencies between the Core Strategy & HAAP.
If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a
legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly
given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic
and unsound.
9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle
contingencies". Several large planning applications have already been submitted to RDC proposing developments
outside the Core Strategy which do not indicate how such applications will be handled and does not comply with
PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.
10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.
The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been
identified as having a need for additional convenience floorspace".
Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail
expansion".
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support -
Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre”.

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states “The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace”. Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space.“ 3) “we recommend that focus be maintained on developing Hockley’s existing strengths.” 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Summary:

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.
1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) “out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

“Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.
Summary:

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre."

Summary: 2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

CHAPTER 10

Full Text:

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport inks, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in
the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.
7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant.

Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) *"the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.}
2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre."

The Core Strategy is inaccurate, misleading and unsound.

Summary:

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29 "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Full Text:

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; 

â€¢ EC7.3C “out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

â€¢ EC7.5 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 viii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

“Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
• The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

CHAPTER 10 Policy T2 - Highways Improvements

Change to Plan

Appear at exam? Not Specified Soundness Tests 1
Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1
Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road...renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009
June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential..." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport
Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "...highway improvements serving new developments...in a timely manner...ensuring developments delivered alongside necessary infrastructure". These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009
Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No7 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development
Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Para. 1.25, Para. 11.32 Note CH.1 Introduction to CS Submission 2009 para. 1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way - Foundry estate is planned to be more suitably utilized. " .. alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009
Remove compulsory relocation

Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Move to new industrial site near airport contravenes PPS4:
- - EC7.3C "out of centre sites, with preference given to sites.. well served by choice of.. transport and.. close to centre and.. high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".
- - EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii). "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport.. Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres
The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para. 12.38 The Core Strategy states (para. 12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".
2) (10.28) "There is no immediate capacity for additional floorspace."
3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre."

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.
The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.
One doesn't perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists
Para.5.4 "Rochford district has unique character...stems from traditional buildings...still dominate towns and villages".

Para.5.17 "Council believes many buildings...are of local distinctiveness...part of...cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservative items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, façade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area[!]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane), others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion
Core Strategy Submission DPD is basically unsound in many respects
Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:
Ch.10: Highways and Transport
Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
16713 Object
CHAPTER 10 Policy T2 - Highways Improvements

contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Change to Plan
Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

Appear at exam? Not Specified

Soundness Tests
Ch. 4 Housing: Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential." to be decided by HAAP (issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1
T1 & T2 *.highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure*. These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3  Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32
Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. ".alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)"reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6  Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6  The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) “we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists
Para.5.4 “Rochford district has unique character..stems from traditional buildings..still dominate towns and villages”. Para.5.17 “Council believes many buildings..are of local distinctiveness..part of..cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protest. This is for supposed need for housing. In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn’t exist. In PPS 12, Ch.4.6 states: “Core Strategies should be flexible and able to show how they handle contingencies”. Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: “the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities”. So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:
Policy T3 CLT1 Appendix CLT1 T1 & T2

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

CHAPTER 10

Full Text:

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2 N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravene PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 "highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32
Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)"reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
CHAPTER 10

shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) “we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists
Para.5.4 “Rochford district has unique character...stems from traditional buildings...still dominate towns and villages”.
Para.5.17 “Council believes many buildings...are of local distinctiveness...part of...cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process”. In Statement of Community Involvement 2006 Rochford RDC “recognises need to enable people...to have their voices heard”.

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible”.

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA’s responsibility to RDC’s job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn’t exist. In PPS 12, Ch.4.6 states: “Core Strategies should be flexible and able to show how they handle contingencies”. Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: “the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities”. So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Change to Plan  N/A

Appear at exam?  Not Specified  Soundness Tests  N/A
The intention of the policy is clear however, in its current form, it could be argued that development that is not accessible by public transport must also not be accessible by private car.
The concept is good but would not appear sustainable. Public transport providers will only operate where there is sufficient demand and revenue. The type of vehicles may change in the future - they may become more "green". Therefore more emphasis should be put on the private car making shorter and less journeys. More adequate parking etc. Attention should be paid to a system of integrated interchange of transport - cars/trains/buses/planes.

Change to Plan

see above
We agree with the requirement that large scale residential developments will be required to be integrated with public transport and designed in a way that encourages the use of alternative forms of transport to the private car.

However, the scale of any public transport initiatives or requirements (or contributions towards such initiatives) should of course reasonably relate to the impact of the development of the land. Circular 5/05 and the emerging/published DCLG guidance on the use of CIL, makes it clear that new developments/contributions from new development can not be used to resolve existing deficiencies (only, proportionally, those deficiencies made worse by new development).

The scale of any public transport initiatives or requirements (or contributions towards such initiatives) should of course reasonably relate to the impact of the development of the land. Circular 5/05 and the emerging/published DCLG guidance on the use of CIL, makes it clear that new developments/contributions from new development can not be used to resolve existing deficiencies (only, proportionally, those deficiencies made worse by new development).
Developments should be well related to public transport, and/or accessible by means other than the private car, in order to encourage the use of public transport, together with cycling and walking.

Change to Plan: N/A

Appear at exam? No

Soundness Tests: N/A
Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1
Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley..along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to CS Preferred Options 2008 and HAAP 2009
June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport
Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure". These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009

Policy T3, CLT1 Appendix CLT1  Public transport  RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No7 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3  Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Para. 1.25, Para. 11.32: Note CH.1 Introduction to CS Submission 2009 para. 1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodate employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4: Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites...well served by choice of...transport and...close to centre and...high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii) "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport...Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para. 12.38: The Core Strategy states (para. 12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.
CHAPTER 10

One doesn’t perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists
Para.5.4 "Rochford district has unique character...stems from traditional buildings...still dominate towns and villages".

Para.5.17 "Council believes many buildings...are of local distinctiveness...part of...cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, façade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area!"). (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane), others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people.to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this.- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependent. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed
planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Change to Plan

Appear at exam?  Not Specified  Soundness Tests  i
Thank you for inviting the Highways Agency (HA) to comment on the Rochford Core Strategy (CS) Submission Document and Rochford Area Action plan (AAP) prepared by Rochford District Council.

As you are aware the HA is an executive agency of the Department for Transport (DfT). We are responsible for operating, maintaining and improving England's motorway and all-purpose trunk road network, collectively known as the Strategic Road Network (SRN), on behalf of the Secretary of State for Transport.

In spatial planning and development control terms, we have a duty to safeguard the operation of the motorway and trunk road network as set out in the Department for Transport Circular: 02/2007: Planning and the Strategic Road Network. http://www.dft.gov.uk/pgr/regional/strategy/policy/circular207planningandstrategic. The circular encourages the HA to work co-operatively with Local Planning Authorities within the framework of the Government's policies for planning, growth areas, regeneration, integrated transport and sustainability. We look to your Council's Local Development Framework to promote strategies, policies and land allocations which would support alternatives to the private car.

In the case of Rochford there are no trunk roads within the District although there are two strategic corridors namely the A13 and A127/A1159 which connect into the M25 motorway network at Junctions 30 and 29 respectively. Sections of these areas are currently heavily congested, particularly during peak periods, and operate under considerable levels of network stress. Therefore it is important to the HA that the impact of major development proposals in the Rochford area is considered within the context of future impact on the M25 and the A13 Trunk Road.

Please see below some general comments regarding the soundness of the CS and SSA from a transport perspective, referring to specific proposed submission policies as necessary. This response has been completed with reference to paragraph 4.52 of PPS12 (2008) PPS12, paragraph 4.52 - To be 'sound' a core strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY.

**CORE STRATEGY**

**Policy GB1 - Green Belt Protection**

The HA acknowledges that only the minimum amount of Green Belt land will be allocated to meet the District's housing and employment needs as necessary. However, the HA is concerned that any proposed redevelopment of greenbelt sites could result in development in areas with limited access to sustainable transport modes therefore resulting in higher levels of car usage and subsequent impact on the SRN. Although the HA recognizes that new public transport hubs that would facilitate the use of non-car modes could be developed over time, this process is likely to require very substantial investment.

It is therefore important that an appropriate assessment of infrastructure requirements is performed for development sites on Green Belt land. Funding towards the necessary public transport infrastructure improvements must be sought and secured prior to occupation of any new development on greenbelt land. Furthermore, the occupation of such developments should be phased in line with necessary transport infrastructure. This will help the CS meet the PPS12 requirement that a sound DPD should be 'justified' and 'effective' and hence deliverable.

**Policy T1 - Highways**

Policy T1 highlights the need to reduce reliance on the private car but also observes that 'some impact on the highway network is inevitable'. In a District with such high levels of private car ownership and a limited public transport network, as stated in paragraph 10.2, it will be important to assess the potential impacts to the highway network and ensure that mitigation measures are proposed and implemented where necessary.

An emphasis should be placed on the provision and improvement of sustainable transport infrastructure, particularly where high trip-generating developments such as offices are proposed. In line with the DfT’s Guidance on Transport Assessment (2007) - DfT GTA, paragraph 4.51 - ‘The key issue is the need to ensure that development proposals strive to achieve nil detriment (‘no worse off’) to the strategic network, for the opening year and appropriate horizon year’. This emphasis will assist in mitigating potential increases in private vehicle trips and hence help ensure that there is a nil-detriment effect on the SRN.

**Policy T3 - Public Transport**
The recent Planning Inspectorate ‘LDF - Learning from Experience’ document (September 2009) suggests that a Core Strategy should identify a clear source of funding for infrastructure for at least the first 5 years of the plan - The Planning Inspectorate, LDF: Examining DPDs: Learning from experience, September 2009, Paragraph 22 - ‘For at least the first 5 years of the plan it should be clear what infrastructure is required, who is going to fund and provide it and how it is to relate to the rate of development’. Paragraph 10.15 of the CS highlights the importance of public transport links for new developments and implies that developers may be required to contribute towards public transport provision. However, it is noted that developer contributions cannot be expected to pay for all transport improvements and as such, in line with the recent Planning Inspectorate document outlined above additional sources of funding should be identified. It is recommended that alternative sources of funding for public transport improvements are clearly outlined within the CS to ensure that adequate infrastructure provision is made.

Policy T4 - South Essex Rapid Transit

As mentioned in our response to the Core Strategy Issues and options consultation the HA is supportive of this policy and the need to progress the route through South Essex. This has the potential to reduce the impact on the SRN (A13).

Policy T5 - Travel Plans

The HA welcomes the requirement for a travel plan for developments involving both destination and origin trips. However it is noted that no threshold for employment sites have been specified. Essex County Council requires the production of a workplace travel plan for developments with over 50 employees or where there will be a significant impact on the local road network. To avoid ambiguity for developers, the HA recommends that the Rochford District Core Strategy specifies a similar threshold within Policy T5. This will ensure the Core Strategy is in line with PPG13 paragraph 87 - PPG13 - 'Local authorities are expected to consider setting local targets for the adoption of travel plans by local businesses and other organizations.'

Policy ED2 - London Southend Airport

The HA previously responded to the London Southend and Environs Joint Area Action Plan Preferred Options Document (March 2009). As such, we have not repeated our comments here but instead refer you to our consultation response dated 31 March 2009.

Summary: Policy T3 - Public Transport

The recent Planning Inspectorate 'LDF - Learning from Experience' document (September 2009) suggests that a Core Strategy should identify a clear source of funding for infrastructure for at least the first 5 years of the plan - The Planning Inspectorate, LDF: Examining DPDs: Learning from experience, September 2009, Paragraph 22 - ‘For at least the first 5 years of the plan it should be clear what infrastructure is required, who is going to fund and provide it and how it is to relate to the rate of development’. Paragraph 10.15 of the CS highlights the importance of public transport links for new developments and implies that developers may be required to contribute towards public transport provision. However, it is noted that developer contributions cannot be expected to pay for all transport improvements and as such, in line with the recent Planning Inspectorate document outlined above additional sources of funding should be identified. It is recommended that alternative sources of funding for public transport improvements are clearly outlined within the CS to ensure that adequate infrastructure provision is made.
**Full Text:**

Ch. 4 Housing; Ch. 10 Transport, Highways; Ch. 11 Economic Development; Ch. 12 Retail/town centres; Ch. 5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14  Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2
N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential... to be decided by HAAP (issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1  Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch. 10: Highways and Transport

Policy T1, T2  RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1
T1 & T2 /*.highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure*.

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32
Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized.. Alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPPS1 (27vii)."reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) "we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 “Rochford district has unique character...stems from traditional buildings...still dominate towns and villages”.

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protest. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process”. In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people..to have their voices heard”.

Re Public Meetings: ”Consideration will be had to timing and venue to ensure meeting is as accessible as possible”.

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA’s responsibility to RDC’s job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: ”Core Strategies should be flexible and able to show how they handle contingencies”. Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: “the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities”. So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary: Policy T3 CLT1 Appendix CLT1 T1 & T2

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkhill is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Change to Plan

Appearing at Exam? Not Specified

Soundness Tests i, iii

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify
those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those
general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the
removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of
this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a
more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land
South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of
Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing
employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further,
Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic
housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development
in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of
sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out
for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the
October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy
H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead
of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and
achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as
a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth
in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations
have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable
agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as
South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the
loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the
Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the
ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core
Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan
Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the
publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable
housing for new residential developments. The Policy accords with the advice of National Policy and is therefore
considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy
represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities.
The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the
Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that
seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly
when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more
schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through
negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place:
Policy CP1 - Design
3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT6 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of
open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport:
Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development:
Policies ED3 - Existing Employment Land
ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary: Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in
provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.
SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

CHAPTER 10

Full Text:

Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

*         (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres."

*          EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

*Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
CHAPTER 10

Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.*

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?
Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

* The Foundry Industrial Estate has never even been previously mentioned in any plan version. A recent amendment to the Core Strategy states this omission was due to a typing error!

* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core Strategies should be flexible and “should be able to show how they will handle contingencies”. Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "We recommend that focus be maintained on developing Hockley’s existing strengths, rather than retail expansion."

4) 10.31 "The current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre."

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace."

Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space.” 3) "We recommend that focus be maintained on developing Hockley’s existing strengths." 4) "The Council may wish to consider reclassifying Hockley from a town centre to a district centre."

Summary: SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

Full Text: Please find the following objections: -

10 off Unsound Reasons.
1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC not consulted on proposals to relocate the Eldon Way and Foundry Industrial Estates

EW; CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" absolutely no consultation on concept of moving EW businesses entirely

FIE; has never even been previously mentioned in any plan version; CS states omission was due to typing error!

Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus proposals are not founded on a robust and credible evidence base and are unsound.

8. The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The CS misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The CS states "The R&LS states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS actually states:

1) "does not lend itself to a food store capable of retaining a significant proportion of main food shopping expenditure.
2) "there is no immediate capacity for additional floor space."
3) "recommend that focus be maintained on developing Hockley's existing strengths."
4) "the Council may wish to consider reclassifying Hockley from a town center, to a district center".

Summary: SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Change to Plan

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; â€“ EC7.3C) “out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€“ EC7.5 1 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question): "Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc. The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is
also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley’s existing strengths, rather than retail expansion"

4) (10.31) "The current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) "There is no immediate capacity for additional floor space."

3) "we recommend that focus be maintained on developing Hockley’s existing strengths."

4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace".

Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley’s existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:
SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.
CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

Change to Plan

**Appeal at exam?**  Not Specified  **Soundness Tests**  i
1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) “out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

“Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to
the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6."
Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre”.

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". CHAPTER 10

Full Text:

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
- The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
- The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
- The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
- The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
- The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
- The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

chap 10

the Foundry Industrial Estate has never even been previously mentioned;
The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.
Moveover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths."
4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary: SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Change to Plan

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Thank you for inviting the Highways Agency (HA) to comment on the Rochford Core Strategy (CS) Submission Document and Rochford Area Action plan (AAP) prepared by Rochford District Council.

As you are aware the HA is an executive agency of the Department for Transport (DfT). We are responsible for operating, maintaining and improving England's motorway and all-purpose trunk road network, collectively known as the Strategic Road Network (SRN), on behalf of the Secretary of State for Transport.

In spatial planning and development control terms, we have a duty to safeguard the operation of the motorway and trunk road network as set out in the Department for Transport Circular: 02/2007: Planning and the Strategic Road Network. http://www.dft.gov.uk/pgr/regional/strategy/policy/circular207planningandstrategic. The circular encourages the HA to work co-operatively with Local Planning Authorities within the framework of the Government's policies for planning, growth areas, regeneration, integrated transport and sustainability. We look to your Council's Local Development Framework to promote strategies, policies and land allocations which would support alternatives to the private car.

In the case of Rochford there are no trunk roads within the District although there are two strategic corridors namely the A13 and A127/A1159 which connect into the M25 motorway network at Junctions 30 and 29 respectively. Sections of these areas are currently heavily congested, particularly during peak periods, and operate under considerable levels of network stress. Therefore it is important to the HA that the impact of major development proposals in the Rochford area is considered within the context of future impact on the M25 and the A13 Trunk Road.

Please see below some general comments regarding the soundness of the CS and SSA from a transport perspective, referring to specific proposed submission policies as necessary. This response has been completed with reference to paragraph 4.52 of PPS12 (2008) PPS12, paragraph 4.52 - To be 'sound' a core strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY.

**CORE STRATEGY**

**Policy GB1 - Green Belt Protection**

The HA acknowledges that only the minimum amount of Green Belt land will be allocated to meet the District's housing and employment needs as necessary. However, the HA is concerned that any proposed redevelopment of greenbelt sites could result in development in areas with limited access to sustainable transport modes therefore resulting in higher levels of car usage and subsequent impact on the SRN. Although the HA recognizes that new public transport hubs that would facilitate the use of non-car modes could be developed over time, this process is likely to require very substantial investment.

It is therefore important that an appropriate assessment of infrastructure requirements is performed for development sites on Green Belt land. Funding towards the necessary public transport infrastructure improvements must be sought and secured prior to occupation of any new development on greenbelt land. Furthermore, the occupation of such developments should be phased in line with necessary transport infrastructure. This will help the CS meet the PPS12 requirement that a sound DPD should be 'justified' and 'effective' and hence deliverable.

**Policy T1 - Highways**

Policy T1 highlights the need to reduce reliance on the private car but also observes that 'some impact on the highway network is inevitable'. In a District with such high levels of private car ownership and a limited public transport network, as stated in paragraph 10.2, it will be important to assess the potential impacts to the highway network and ensure that mitigation measures are proposed and implemented where necessary.

An emphasis should be placed on the provision and improvement of sustainable transport infrastructure, particularly where high trip-generating developments such as offices are proposed. In line with the DfT’s Guidance on Transport Assessment (2007) - DfT GTA, paragraph 4.51 - 'The key issue is the need to ensure that development proposals strive to achieve nil detriment ('no worse off') to the strategic network, for the opening year and appropriate horizon year'. This emphasis will assist in mitigating potential increases in private vehicle trips and hence help ensure that there is a nil-detriment effect on the SRN.

**Policy T3 - Public Transport**
The recent Planning Inspectorate ‘LDF - Learning from Experience’ document (September 2009) suggests that a Core Strategy should identify a clear source of funding for infrastructure for at least the first 5 years of the plan - The Planning Inspectorate, LDF: Examining DPDs: Learning from experience, September 2009, Paragraph 22 - ‘For at least the first 5 years of the plan it should be clear what infrastructure is required, who is going to fund and provide it and how it is to relate to the rate of development’.. Paragraph 10.15 of the CS highlights the importance of public transport links for new developments and implies that developers may be required to contribute towards public transport provision. However, it is noted that developer contributions cannot be expected to pay for all transport improvements and as such, in line with the recent Planning Inspectorate document outlined above additional sources of funding should be identified. It is recommended that alternative sources of funding for public transport improvements are clearly outlined within the CS to ensure that adequate infrastructure provision is made.

Policy T4 - South Essex Rapid Transit

As mentioned in our response to the Core Strategy Issues and options consultation the HA is supportive of this policy and the need to progress the route through South Essex. This has the potential to reduce the impact on the SRN (A13).

Policy T5 - Travel Plans

The HA welcomes the requirement for a travel plan for developments involving both destination and origin trips. However it is noted that no threshold for employment sites have been specified. Essex County Council requires the production of a workplace travel plan for developments with over 50 employees or where there will be a significant impact on the local road network. To avoid ambiguity for developers, the HA recommends that the Rochford District Core Strategy specifies a similar threshold within Policy T5. This will ensure the Core Strategy is in line with PPG13 paragraph 87 - PPG13 - 'Local authorities are expected to consider setting local targets for the adoption of travel plans by local businesses and other organizations.'

Policy ED2 - London Southend Airport

The HA previously responded to the London Southend and Environs Joint Area Action Plan Preferred Options Document (March 2009). As such, we have not repeated our comments here but instead refer you to our consultation response dated 31 March 2009.

Summary:

Policy T4 - South Essex Rapid Transit

As mentioned in our response to the Core Strategy Issues and options consultation the HA is supportive of this policy and the need to progress the route through South Essex. This has the potential to reduce the impact on the SRN (A13).

Local Development Framework

Representations on the Core Strategy Submission Document, November 2009
On behalf of Barratts Eastern Counties

Introduction

The requirements of Core Strategies are enshrined in the 2004 Planning and Compensation Act, the Town & Country Planning (Local Development) England (Regulations) 2004 and the 2008 policy guidance in PPS12. The requirements of Core Strategies are clear. And they are legal requirements. The Core Strategy must comply with the Local Development Scheme, Statement of Community Involvement and the Regulations. The Core Strategy must be subject to a sustainability appraisal, have regard to national guidance, conform generally with the Regional Spatial Strategy and have regard to any Sustainable Community Strategy. A Core strategy must be sound - justified, effective and consistent with national policy. The following representations therefore focus on these legal requirements.

HOUSING

Paragraph 4.6 - Evidence Base

To meet the soundness test Submission Core Strategies (SCS) must be justified, that is to say it must be founded on robust and credible evidence base and comprise the most appropriate strategy when considered against reasonable alternatives. The housing strategy in as far as it identifies a need for Green belt sites is sound, however, there are other elements which are unsound.

Paragraph 4.6 notes that the Strategic Housing Land Availability Assessment (SHLAA) has examined the supply of housing. It is presumed that the Table at paragraph 4.6 is the outcome of this examination. Whilst the SHLAA has some legitimacy in that it identifies various sites that are apparently available, we are concerned that because the SHLAA was only published in November 2009 it post dates the SCS. This implies that the SCS is driving the SHLAA exercise rather than the other way round. Whilst this may have no real practical effect on the outcome of the SCS and the identified need for Green Belt sites, the Inspector will be mindful of the advice in paragraphs 33 and 54 of PPS3 that SCS draw on the evidence in SHLAA. It may be that the SCS should explain how the evidence base has been used to justify the strategy.

PPS12 explains at paragraph 4.37 that Core Strategies are based on thorough evidence. Since the SHLAA has only recently been published it is considered that the SCS is unsound as it is not justifiable. This, together with other comments on the SCS, indicates that the process should be delayed to ensure that a more robust document is placed in front of the EiP Inspector.

Table at Paragraph 4.6 - Evidence base

From our review of the available evidence it would appear that the housing land supply is insufficient and that Green Belt release are required. From the wider strategy being promoted we note that some of the sites that the District Council consider to be ‘appropriate’ are likely to relate to existing employment areas. As set out elsewhere in our representations, we maintain sever reservations that the redevelopment of existing employment sites for alternative uses and particularly the Eldon Way Industrial Estate is unsustainable. We will make reference to the effectiveness of this strategy in relation to sustainability, whether it is justified in the context of National Policy and the deliverability of such a strategy elsewhere.

In particular, paragraph 11.32 of the SCS refers to existing employment land and sites within the UCS. It does not refer the SHLAA and as such it appears that an evidence base to support the re-use of employment land for residential is not reported in the SCS.

Having reviewed the 2008 Annual Monitoring Report, as we did when commenting on the 2008 Preferred Options Core Strategy, we maintain severe doubts as to the appropriateness of some of the previously developed sites identified as potential housing sites and their expected housing yield. Whilst we cannot at this stage ascertain whether the SHLAA...
sites referred to in this table correlate with the Annual Monitoring Report and indeed the 2007 Urban Capacity Study, it is our view that there will be some commonality and so the reliance on these sites is likely to be at odds with Government Policy. We shall elaborate on this objection in relation to the specific housing policy below.

We note that the last two rows in the Table at paragraph 4.6 set out figures with and without Green Belt releases. The text to this section of the Core Strategy should, for reasons of clarity, explain that Green belt review will be necessary in order to deliver the required housing.

Paragraph 4.9

The table on page 40, which sets out the settlement tiers, is supported. Rayleigh, Rochford/Ashingdon, Hockley/Hawkwell are clearly the largest settlements in the District and they benefit from good employment, housing, leisure, community and public transport provision. These settlements are the most sustainable ones with the greatest mix of uses. Consequently, it is sensible that the Core Strategy identifies these as top tier settlements and is able to target them with growth accordingly. This component of the strategy is justified by reference to sustainability data and is effective, since targeting development at these locations will ensure a more sustainable pattern of development.

Paragraph 4.14

We maintain that the strategy for redeveloping the Eldon Way Industrial Estate for housing and other alternative uses to employment is unsound. It is neither justified nor effective. The Industrial Land Availability Study 2008 sets out on page 7 strategic objectives. The 3rd objective seeks to Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive. Clearly the strategy as currently drafted envisages major changes to existing industrial estates, including alternative uses. This strategy is not consistent with other strategies and evidence based studies and so cannot be justified in the context of the tests set out in PPS12. It is also an ineffective strategy since the new employment locations that would free up the Eldon Way site for redevelopment relies on transport infrastructure that has no certainty of being delivered. Principally, the erosion of employment uses at Eldon Way could make the settlement of Hockley/Hawkwell less sustainable and thus conflict with the tiered approach on page 40, paragraph 4.9.

Policy H1

Prioritising the use of previously developed land ("pdf") is supported in principle. It is a justified strategy in the context of PPS3 and effective as sequential choices can be made by implementing the policy. However, the District Council is also promoting a strategy which seeks the redevelopment of existing employment locations to alternative uses and by consequence is identifying green field sites for new employment development elsewhere (Policy ED4 refers). This 'land swapping' is not considered consistent with PPS3, nor is it considered to be justified or effective in delivering the desired strategy. This is particularly the case as most of the existing employment sites are occupied and therefore unavailable for redevelopment. In addition, the new Greenfield sites are in an arguably less sustainable locations away from the top tier settlements identified on page 40 of the Submission Core Strategy. Clearly this element of the strategy is inconsistent with the wider strategy.

The Industrial Land Availability Study 2008 is included as an evidence base by the District Council. It includes an introductory section, which explains that the authority wishes to make Rochford the place of choice for new business. It includes several strategic objectives on page 7 including "Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive." It reviews existing employment areas and identifies vacant land, including land available from allocations. It does not include any assessment of new sites or potential opportunities for new sites that might have been expected to feed into the Core Strategy. The strategy for identifying Green Belt site employment allocation does not appear to be based on any evidence in this document and in that context cannot be justified. The strategy being promoted potentially conflicts with Government policy in PPG13, PPG2 and emerging PPS4.

The Employment Land Study 2008 is a much later document. It has a key recommendation on page ii "we recommend that Rochford District Council adopts strong policies to protect existing employment land." Furthermore under recommendations for existing sites on page ii-iv of that document it states "In our view, Hockley Trading Centre is a strategically well placed employment location. However, we recognise the ambitions of the Hockley Town Centre masterplan and that within this the Council should consider it to be allocated for other uses. However, we recommend that this reallocation happen only if provision is made within the masterplan for office use within Hockley Town Centre as part of a mixed use scheme." The view of the writers of this document is clear - the Eldon Way Industrial estate (Hockley Trading Centre) is a good employment site and that it is for other reasons that alternative uses are being considered and only then if office development is supported. This supports our representations that new future uses at the Eldon Way site should be employment dominated and that alternative uses should relate to the objectives of the Town Centre which is to enhance the shopping and leisure facilities. Residential is not an appropriate alternative.

This document recommends the use of land to the west of Rayleigh for employment and envisages Green belt release. However, the SCS does not explain through the evidence base why existing employment sites should be 'deallocated' and Green belt land unnecessarily used.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
In addition to these key issues we have some specific concerns. As a consequence we maintain an objection to the second paragraph of Policy H1. This policy states that the Council will seek the redevelopment of various industrial estates including Eldon Way. The Policy says that alternative uses will be sought (presumably alternative to the existing employment offer) and that new land will be allocated elsewhere. This policy statement, in relation to Eldon Way in particular, is unsound for a number of reasons:

The emerging Hockley Area Action Plan consulted upon in 2008 states that the Eldon Way Industrial Estate is strategically well placed. In a sense this statement underplays the true importance of this highly sustainable employment location and only major employment area in Hockley/Hawkwell. The employment area is adjacent to the railway station and located a short distance from the main bus routes that run along Spa Road. Some of the residential areas of the town are also within walking distance of this commercial area, thus providing a potential for sustainable travel by employees. The Eldon Way Industrial Estate is therefore right at the heart of the settlement of Hockley/Hawkwell and provides an opportunity to meet sustainable transport objectives by reducing the need to travel by car. Consequently, this employment area should be highlighted as a premier employment site in sustainability terms, both in the context of PPG13, PPG4 and PPS6. To encourage alternative uses as set out in Policy H1 implies the removal of the majority of employment based activity at Hockley/Hawkwell and this would be contrary to National policy, would not be the most appropriate strategy when considered against alternatives and is therefore unsound.

Whilst it is acknowledged that improvement to the Eldon Way Industrial Estate can and should take place, the extent to which the mix of employment uses should be altered in favour of alternative land uses requires careful consideration. It is our view that a mix of existing or indeed new employment land uses with some Town Centre type uses should dominate the Eldon Way site. A mix of employment types between offices, light industry and other high technology industries should be encouraged as this will provide many locational advantages to the firms that agglomerate together. The Council says that the existing uses on this site are harmful to amenity. However, the site has operated for many years without any significant issues and if renewal for B1 type uses are encouraged then the employment area can be maintained without harm to amenity. Renewal of the employment stock can help develop and improve trade, improve the sustainability of businesses as a whole and make for a more flexible labour market as skill levels are varied. A singularly different use altogether or a variety of uses which excludes employment could undermine the long term sustainability of the area and Town Centre. As such Policy H1 is not an effective strategy and should be amended to acknowledge the importance of Eldon Way and the need to renew the employment stock to ensure that the site maintains its important role as an employment site, albeit with some ancillary alternative use development where appropriate.

The 2008 Retail Study notes that Hockley Town Centre is not strong and there is trade leakage. Eldon Way Industrial Estate provides a customer base for existing town centre uses. Weekday spending within town centres is an important contributor to the viability of many retail and leisure businesses either through expenditure by employees during the lunchtime trade or expenditure by employers, on necessary goods and services. This relationship helps sustain the critical mass of a centre and provides a platform for new retail and leisure growth. It is important to have a balanced centre with a variety of uses. Policy H1, as currently drafted, implies the removal of employment related development and this is likely to harm the viability and sustainability of Hockley Town Centre. The Council has presented no evidence to suggest that this is not the case. Importantly, the 2008 Retail Study explains that there is a need for additional retail and office space. In principle we would support additional office and other B1 type uses plus retail but employment uses should always dominate for the sustainability reasons given above. Retail and office development are likely to present a viable alternative to some of the more industrial type uses.

Consequently, we do not support the phrasing of the third paragraph of Policy H1 and maintain that the most appropriate strategy is to seek renewal of the employment stock with employment based uses and with some new retail development. Removal of employment land uses completely as currently implied – which was the approach adopted in the emerging Hockley Area Action Plan - is not a justifiable strategy.

One of the key tests of a Core Strategy is consistency between policies in the emerging Plan and this strikes at the heart of demonstrating an effective strategy. Policy H1 implies alternative uses to employment and the relocation of Eldon Way to a site identified under Policy ED4. However, Policy RTC6 sets out a suite of policy criteria for Hockley Town Centre which includes employment and commercial activities. In addition Policy ED3 seeks the protection of sustainable employment sites (Eldon Way) and notes that some reallocation of existing employment sites will include a proportion of employment. It notes that in the case of Eldon Way employment development will form a component. The policies appear at odds with one another. The third paragraph of Policy H1 should be deleted as the second paragraph is sufficient to set a strategic context for delivering new housing development. The employment policies and Hockley specific policies should be left to consider the type and quantum of land uses appropriate in the area. If the third paragraph of H1 is to be retained then it should lie in more with Policy RTC6 and in our view explain that employment uses should dominate any redevelopment proposals for the Eldon Way site and that retail and leisure uses should be a supporting proportion.

Implementation, Monitoring and Delivery - page 132 onwards

One of the key tests of soundness is that the Core Strategy should be effective - it should be able to deliver its strategy. The Implementation strategy set out at page 132 onwards of the Core Strategy does not explain how Policy H1, RTC6 and the strategy for redeveloping Eldon Way (Policy ED2 and ED3) will be delivered. The comment at Policy ED3 on
Policy H2 - General Locations

We support the strategy that new housing growth should be targeted at land South of Hawkwell. This area is suitably located to the urban area of Hockley/Hawkwell and to tie in with the settlement tiers on page 40 of the Submission Core Strategy the same terminology for settlement should be used. This ensures a consistency within the SCS. The choice of this location as a housing growth area is appropriate as it would not contribute to the coalescence of the urban area with Ashingdon (there is existing development between this identified housing area at Rectory Road and Ashingdon and moreover, Rectory Road can form a natural physical boundary for the new Green belt boundary. This area is also well located to the existing road network. Cherry Orchard Way has recently been improved and provides much better accessibility to the proposed housing growth area than any other location around Hockley/Hawkwell. The existing bus routes along Rectory Road also make this location sustainable and the additional housing proposed will help underpin the financial viability of bus routes in this area. Locally there are employment opportunities, including the small commercial estate off Main Road. The Eldon Way Industrial Estate adjacent to the Town Centre also provides the opportunity for employment locally. Extensive public open space, play pitches and built leisure facilities are located just to the north of this area and a community hall is located off Briar Close, nearby. The area to the south of Hockley/Hawkwell is close to local shops on the corner of Heycroft Road and Main Road and there are numerous footpath links between this area and the local community including links via Thorpe Road, Thorpe Close, Briar Close, Hawkwell Park and Park Gardens. The area therefore provides the opportunity to enhance existing links, including cycle links, and contribute towards community integration - more so than other sites on the south side of this settlement. The site is also in the control of one house builder and deliverable.

However, we find that the Policy is not fully consistent with national policy and furthermore needs to be reviewed in order to be justified and effective. We have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with this policy and feel that Green Belt review should be more explicit throughout the SCS. We note that it is only Policy H3 which indicates the need for Green Belt land review. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes onto talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H2 and certainly Policy H3 and Policy GB1 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains “this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term”. 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary.

Policy H2 - Phasing and Quantum

The 2008 Preferred Core Strategy document indicated that the area south of Hawkwell should deliver 330 dwellings over a phasing period to post 2021 (see Policy H2 and H3 of that document). The SCS reduces the quantum of housing in this area to 175 but expects delivery by 2015. At a broader level the Preferred Options Core Strategy of 2008, (Policy H2) required 1,450 dwellings to 2015 and a further 1,050 by 2021. In the SCS the figures are now 775 and 1,010 respectively.

Since the SHLAA post dates the publication of the SCS, we are uncertain as to the reason why such a significant reduction in quantum of housing and extensions to the residential envelope is considered necessary. Presumably it is the 'new' strategy to redevelop existing employment areas within the settlements that has led to this change. Our representations on this strategy and specifically the Eldon Way Industrial Estate are included elsewhere within our representations. Previously we have commented on the Table at paragraph 4.6 of the Submission Core Strategy and the lack of evidence to underpin that table. It seems odd that in the space of a year the expected requirement for Greenfield sites has effectively halved on the basis of a SHLAA exercise. The community is therefore not able to effectively

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
comment on the housing land supply and at this stage the Submission Core Strategy is legally unsound.

That said, we are of the view that the quantum of housing envisaged south of Hockley/Hawkwell should be more than the 175 currently envisage. In coming to this view we have reviewed the Urban Capacity Study and the latest housing figures in the Annual Monitoring Report 2008. We conclude that the shortfall in housing land supply is such that 330 dwellings in this location is appropriate.

The recently published SHLAA is based upon the data obtained from the Urban Capacity Study 2007, a call for sites exercise and data from the Annual Monitoring Report 2008.

The 2007 Urban Capacity Study (UCS)

1. 2007 is widely recognised as being the peak level of house prices in the UK and it was acknowledged by Government and practitioners alike that 2007 house prices were at an unsustainable level. It is our view that utilising the 2007 UCS as an evidence base without reference to the market does not pick up the depressed demand that is likely to now exist. Recent corrections to the housing market now mean that housing land prices are at a much lower and arguably more affordable level than before. The implications are that some pdl may not be viable for housing development. Often brownfield sites have much higher development costs than Greenfield sites and so the yield from urban capacity will be much lower than anticipated in the 2007 study. One example is the employment allocation of the Adopted Local Plan located at 76-92 Main Road, Hawkwell. This site has been allocated for several years and has been available during the most recent rises in residential property prices during 2006-07. As a consequence the lack of progress on the site can only be described by its current occupancy and perhaps it comprises high value uses that do not encourage redevelopment. Despite this the site is identified as having high potential for alternative use and high potential demand. The SHLAA form notes that there is no information on legal constraints (e.g., tenancy agreements) As a consequence it is difficult to see how this could continue to be a potential site and as a consequence the allowance for green field releases should be increased.

2. There are considered to be other instances in the UCS and the recently published SHLAA where the assumptions and calculations would indicate that the 1301 urban capacity figure is over optimistic and the SHLAA assessment is limited. In the assessment of 'non-residential sites in appropriate locations' within the UCS assumptions are made as to the probability of sites coming forward for new housing. 68-72 West Street, Rochford is identified as a high probability site but we note that it has been subject to 7 refusals of planning permission/conservation consent. There is a significant gap between the urban capacity identified as being suitable by the Council and the capacity applied for by the owners. Given its alternate use value, it is debateable whether the two capacity figures can be reconciled. No 247 London Road is another example of a site located in the Local Plan but which hasn't come forward. This is now the subject of a proposal for a care home and if approved would further limit the scope for market/affordable housing capacity on the site. A striking example of how the urban capacity study has underestimated is also evidence by 2-4 Alderman's Hill, Hockley - described as a disused service station. Although it has some unneighbourly uses there is no indication that the site is available, suitable or deliverable for residential. Land agreements) As a consequence it is difficult to see how this could continue to be a potential site and as a consequence the allowance for green field releases should be increased.

3. In relation to the assessment in the UCS entitled 'intensification of existing residential uses' we note that the assessment is premised on an assessment of recent trends taking into account net completions between 2001-2006 and 2005-06. This is effectively an assessment of windfall trends and not an approach that PPS3 encourages. Importantly Table 3-12 in the urban capacity study seeks to project forward urban capacity from residential redevelopment - a period that benefited from high house prices and PPG3 guidance encouraging redevelopment. These two circumstances have markedly changed and so the assumptions and conclusions drawn would also have changed. Even taking into account the UCS discounting, the reliability of the 404 units from this source must be questioned and in our view the 1301 figure cannot be a sound basis for urban capacity and further Greenfield releases are necessary.

4. In the section of the UCS entitled 'subdivision of dwellings' and 'living above the shop' it is estimated that recent trends would result in 7 and 15 units. Our concerns with using trends as a basis for urban capacity are detailed above - PPS3 does not encourage this. Rather, local authorities are charged with surveying their areas, identifying which areas may yield urban capacity and how much and developing policies to achieve that. Government guidance does not encourage the estimation of windfalls in the way the UCS does.

5. Redevelopment of established employment land is a separate section within the UCS. At 1 above we identify the low probability of the Main Road residential allocation coming forward. This remaining section of the UCS considers 11 further employment sites which were first identified in the 2000 UCS. Three of these are considered to have a high probability of coming forward. We have looked at these three sites and can find no evidence that they are likely to come forward. In the 8 years between 2000 and 2008 the three identified high probability employment sites have not been developed and there is no reason to assume that the next 5-10 years will be any different. For example the Rawreth Industrial Estate is identified as being well used in the UCS and although it has some unneighbourly uses there is no indication that the site is available, suitable or deliverable for residential. Land between 39-69 Lower Lamburds, Rayleigh is identified as having a high probability of residential uses. Yet there is no
evidence of any pre-application advice or planning applications for this area. Stambridge Mills, Mill Lane, Stambridge is a further example. This site is separated from the urban area, in a flood risk zone and protected in the 2006 Replacement Local Plan by Policy EB9 which promotes B1 uses. Against this background there is only two relevant planning applications affecting this area both date from the early 1990's and relate to a plant room and loading bay. There is no evidence that this is likely to come forward for residential purposes in the next 5-10 years.

6. In the UCS extant permissions are identified as 856 dwellings. It is important to note that this figure needs to be continually reassessed so that from the point of adoption of the Core Strategy a 5 and 10 year housing land supply is available. The SHLAA notes extant permissions for 2009-14 being 106. As noted below extant permissions do not necessarily translate into deliverable sites. There is therefore a contingency that needs to be built in. Further allocations on greenfield land need to be increased and as such the quantum of housing in the area south of Hockley/Hawkwell should be increased to 330 dwellings in order to begin to meet the shortfall identified.

The District Council's 5 year housing supply assessment

7. The District Council's Annual Monitoring Report ("AMR") 2008 purports to demonstrate a 5 year housing land supply. The preamble to Table 4.10 in the AMR 2008 explains that Rochford District Council ("RDC") has included units under construction, units with full permission, units with outline permission, units with a resolution to grant, units subject to preapplication discussion/Urban Capacity Assessment and land allocations in its trajectory. The reader is referred to Appendix B which breaks down the sites in more detail. The recently published SHLAA also includes a table showing a potential 1273 dwellings deliverable. However, it refers to "appropriate brownfield sites." Since these 'appropriate sites' are do not benefit from an application or a planning permission it is difficult to programme them into the housing delivery trajectory.

8. In the full planning permission category of the AMR 2008 where work has not yet started there can be no guarantee that all these sites will be delivered in the 5 years. This comment relates to the one above in relation to the recently published SHLAA. It is not uncommon for permissions to be obtained to provide a means for valuing a site where the owner has no immediate plans to sell the site or develop housing. Delivery may also be hampered by funding constraints, or site assembly problems (where sites are in an alternative use or relocation constraints). Appendix B of the AMR 2008 does not set out the intentions of the landowner or whether the sites are truly achievable in the 5 year period as per PPS3 requirements. The SHLAA purports to show developer intentions at Appendix C but the assessment by the local authority into the legitimacy of some of the claims is not presented. The evidence base is not as full as it should be to demonstrate the robustness of Table 4.6 of the SCS. It is also unclear the extent to which this table is based on either the UCS 2007, AMR 2008, SHLAA 2009 or a combination of all three. This should be set out clearly.

9. In addition, to the 'non delivery' of a proportion of new homes in the AMR 2008, there is concern at the timings of delivery in that data set, for example, 10 units in 2008-2009 relates to outline planning permissions and it is doubtful whether reserved matters can be turned round quick enough to begin delivering housing in this year period. There could well be examples in that set of data where the delivery of units in the first year of the 5 is unlikely, thus delivery is reduced for that period and pushed back and this process is then compounded throughout the data set up to and beyond year 5. Statistical evidence from the Department of Communities and Local Government ("CLG") reveals that building starts are 43% down on the quarter to March 2009 compared with March 2008. It is not clear whether the recently published SHLAA has taken this into account and unless it does the data in the Table at 4.6 of the SCS cannot be relied upon, particularly given the current recessionary circumstances. In relation to the Table at Paragraph 4.6 a refinement is therefore needed to take into account this effect on phasing.

10. This problem is compounded for other units relied upon where permission has been granted but no start on site has been made; this accounts for a considerable number of sites in 2009-10 period (100 dwellings) which is (year 2 of the 5 year period). A delay in these will require more Greenfield sites to be identified in order to meet the shortfall.

11. Finally we note that the East of England Plan expresses its land supply requirement as a minimum. This strategy is not reflected in the
Submission version of the Core Strategy policy H2.

12. In summary since neither the UCS nor the Annual Monitoring Report form a SHLAA, reservations are maintained about the degree to which sufficient housing land has been identified.

Policy H3

In the Preferred Options Core Strategy 2008 more locations were identified for housing growth in the post 2021 phase. Whilst it is our view that land south of Hockley/Hawkwell should benefit from a greater number of dwellings than the 175 currently identified (330) in order to make the strategy effective. We are concerned at the significant change in strategy between the Preferred Option Core Strategy and the Submission version, which has significantly less housing growth on green field sites. This change in strategy is so significant that we would question whether it is appropriate in the context of soundness and the consultation processes that have taken place so far.

We also have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with other policies in the SCS and feel that Green Belt review should be more explicit throughout the SCS. As it currently stands there is a potential conflict with national policies and limited justification for the Green belt strategy. We note that in Policy H3, which indicates the need for Green Belt land review, the advice is limited and unclear. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes onto talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H3 and Policy GB1/H2 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary. Not to do so is unsound for justification and effectiveness reasons.

Policy H4 - Affordable Housing

As currently drafted we feel that the policy is not concise enough and that the policy does not reflect current guidance. The phrase ‘at least’ would indicate that in most cases affordable housing above 35% will be sought. Our understanding is that the 35% figure is recommended in the SHMA and that to provide a policy framework which seeks to go beyond that figure would potentially be unworkable as many sites could not financially bare the burden of over a third of the net developable area not yielding a value. The policy should be redrafted so that “a target of 35% affordable housing shall be provided on all developments of 15 or more units...”

The last policy paragraph provides some scope to relax this policy, if there are clear site constraints that make on site provision impossible. The policy, though, is not particularly clear on what would constitute exceptional circumstances. For example, physical site constraints, which unusually raise development costs, would be one such reason and this should be specified. There may be other reasons including the nature of housing needs in the part of the District the site is located which justify affordable housing below the 35% target. Design reasons may also have a bearing on how provision is made and in what form, particularly if the site is in an historic area where design might override housing need argument. It is therefore recommended that the policy expand on the type of circumstances where affordable housing may be relaxed and the type of information that will be sought of applicant’s who have a need to invoke this part of the policy.

Policy H5

In support of the policy, it is advantageous that no percentages requiring a specific mix are included. This flexibility will enable developers and the Council to respond directly to changing circumstances in the local housing market. In the past some authorities have set out a percentage for the type of housing they require only to find that after a few years of strict implementation there is an oversupply of property of that type and no flexibility in the policy to address the problem.

Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford’s main settlements to what essentially
would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Policy ED3

We fully support the first sentence of the Policy and note the apparent contradiction with the statements in Policy H1 and elsewhere which seeks to develop on alternative uses at industrial estates such as Eldon Way.

This contradiction is evidence in the second paragraph of Policy ED3. In our representations on Policy H1 we have explained why it is not sound to diminish the employment stock at Eldon Way and the importance of maintaining a dominance of employment type uses at this estate. These arguments are not repeated here.

We note the sentiments of the third paragraph and in accordance with our representations elsewhere are of the view that this sentence should be revised to explain that Eldon Way will accommodate principally employment type uses. As noted elsewhere uses which are an alternative to employment would diminish this highly sustainable employment site and this is unsound when assessed against National Policy.

Policy ED4 - Future Employment Allocations

In part, the de-allocation strategy is not supported as it is considered unsound when set against sustainability criteria. In relation to the Eldon Way Industrial Estate it is considered critical to the ongoing sustainability of this settlement that employment uses are maintained at this location. It is close to the railway station, bus routes and local residential areas from which the opportunity exists for employees to walk or cycle to work. Its location adjacent to the Town Centre offers opportunity for some retail and leisure development to complement the centre and to maintain a supporting function. These sustainable benefits would not occur with the deallocation of Eldon Way or the significant erosion of its employment floorspace. Whilst redevelopment of the employment site to achieve new employment is supported, the dominant land use should continue to be employment use. As a consequence, the 18ha of land required for employment in this policy is considered to be excessive and the policy should be reviewed to explain that redevelopment of existing employment sites for primarily new employment development will be encouraged.

Policy T4

It is noted that the South Essex Rapid Transit policy, as elaborated upon at paragraph 10.16 notes that Rochford is not served but may be served in future phases. This uncertainty is contrary to the delivery principles of soundness and directly puts at issue the employment land supply strategy in the District which is founded on sustainable access to new sites. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley, Rochford and Rayleigh is unsound.

Appendix H1, CTL1 - Infrastructure

It is recognised that necessary infrastructure provision is an important part of creating a sustainable development and in that context appendix H1 is supported. The supporting text notes that the table at Appendix H1 is not exhaustive and in that context it is very important that the framework properly distinguishes between what should be provided as part of new development schemes and what shouldn’t. It is therefore essential that the framework acknowledges the importance of Circular 05/05 and the tests which say that provision of infrastructure and/or contributions should be:

* Relevant to planning
* Necessary to make the proposed development acceptable in planning terms
* Directly related to the proposed development
* Fairly and reasonably related in scale and kind to the proposed development
* Reasonable in all other respects

As is made clear (Paragraph B9 of Circular 5/05) contributions should not be used to make good existing deficiencies in infrastructure provision. Nor are they to be used to secure contributions to the achievement of wider planning objectives that are not necessary for consent to be granted. In that context the Core Strategy should set this out as its policy framework.

Policy GB1 - Green Belt

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The objectives of this policy are supported, although as noted in other representations the SCS is unsound as it does not meet the tests in relation to justification, compliance with national policy or effectiveness of strategy.

Policy GB1 mentions the objective to allocate the minimum amount of Green Belt land necessary. The policy should link to the requirements of PPG2 and RSS which are discussed in relation to the representations on Policy H2 and H3. The policy should set out a timeframe for the review and why Rochford requires a Green Belt review (what the exceptional circumstances are in this District that justify a review of local boundaries. The policy should be amended to set out a 2031 time frame and this may require the SCS to have an extended life span beyond 2021.

We would recommend the deletion of the word character since Green Belt designation is not related to landscape character as currently drafted. For clarity we would also recommend that the Policy or its supporting text explain that a Green Belt review will take place in support of an allocations document (paragraph 6.6) in order to identify an appropriate new boundary. This is particularly necessary given the commitment to a Green Belt review in the adopted Local Development Scheme.

Policy CLT1 - Planning Obligations and Standard Charges

In view of the need to test fully the basis on which standard charges are based it is important that any document produced is in a development plan document that enables an examination in public. The policy should explain this in order that when the document is produced it accords with Policy and is based on sound evidence.

ENV9 - Code for Sustainable Homes

Object. The advice from the Department of Communities and Local Government is that the new requirement to have a rating against the Code does not make it mandatory to build a Code home or to have each new home assessed against the Code. It does however mean that all buyers of new homes be given clear information about the sustainability of the new home. A house builder can do this in one of two ways:

- they can chose to build a Code home, have that home assessed against the Code and provide the home buyer with a Code certificate stating the star rating the home has achieved
- or, they can chose to build to current building regulations standards, not to pay for an assessment and instead download a nil-rated certificate of non-assessment (also referred to as a nil-rating) to provide to the home buyer.

As such the Rochford policy requirement that coding 3 be achieved by 2010 and Code 6 by 2013 is out of step with Government advice. The policy wording should explain that it is just the coding that is a requirement of new homes and not necessarily that new homes should be constructed to achieve a standard.

The current Government objectives are for the code to be introduced over a reasonable period with development to be code 3 by 2010, code level 4 by 2013 and code level by 2016. In this regard the policy, as drafted, seeks to achieve code 6 by 2013 and consequently compresses the code requirements into a shorter time scale with the costs associated expected to be subsumed within the housing market though higher prices. This is not a realistic strategy for the delivery of sustainable homes and we consider that the policy should be revised to extend the period of compliance but to also make it more flexible based on local circumstances.

Research undertaken on behalf of the Housing Corporation and English Partnerships, published in February 2007 ‘A cost review of the code for sustainable homes’ reveals that code 6 is unlikely to be unattainable given existing technologies and that achieving code 5 could result in a 12% to 20% increase in costs that would have to be passed onto the consumer. Given the variability of the housing market with peaks and troughs, it is unlikely that the housing market would be able to subsume this level of price increase.

The code system policy as currently drafted does not have regard to site circumstances and so many of the requirements could be difficult to meet. For example, micro electricity generation on site may be difficult to achieve where local circumstances deter the capture of wind or solar power. If more expensive technologies are required to generate power than is the norm then costs will rise. There may be other competing reasons why designs cannot include certain sustainability measures if housing sites are in sensitive landscape and historic locations. Alternatively there may be significant development costs associated with site specific circumstances and so viability of the site’s development becomes a valid consideration. By insisting on the code for sustainable homes other policy objectives such as affordable housing at particular rates and other contributions may need to be reconsidered. Consequently, we are of the view that this policy should be drafted in a manner which enables site specific circumstances to be taken into account. As noted above the Government explains that the code is a certification requirement and does not necessarily mean that buildings are constructed in accordance with a code level.

It is also important to note that it is not the purpose of planning legislation to duplicate other legislation. In this regard, the policy should accept that the Building Regulations will be the main vehicle for implementing this policy and that unless the coding requires external development then there will be no need to specify what is to be carried out in a planning application.

CHAPTER 10  Policy T4 - South Essex Rapid Transit (SERT)

Summary:
Policy T4

It is noted that the South Essex Rapid Transit policy, as elaborated upon at paragraph 10.16 notes that Rochford is not served but may be served in future phases. This uncertainty is contrary to the delivery principles of soundness and directly puts at issue the employment land supply strategy in the District which is founded on sustainable access to new sites. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley, Rochford and Rayleigh is unsound.

Change to Plan

This is an unnecessary piece of bureaucracy. Who will produce (and pay for) them - the developer, the prospective owner? At what stage will they be developed? Will they be maintained as circumstances change? Who will monitor their effectiveness?

Change to Plan
Remove this policy

Appear at exam? No

Soundness Tests i, ii
We agree this is a very laudable policy, but is it practical and workable?
Thank you for inviting the Highways Agency (HA) to comment on the Rochford Core Strategy (CS) Submission Document and Rochford Area Action plan (AAP) prepared by Rochford District Council.

As you are aware the HA is an executive agency of the Department for Transport (DfT). We are responsible for operating, maintaining and improving England's motorway and all-purpose trunk road network, collectively known as the Strategic Road Network (SRN), on behalf of the Secretary of State for Transport.

In spatial planning and development control terms, we have a duty to safeguard the operation of the motorway and trunk road network as set out in the Department for Transport Circular: 02/2007: Planning and the Strategic Road Network. http://www.dft.gov.uk/pgr/regional/strategy/policy/circular207planningandstrategic. The circular encourages the HA to work co-operatively with Local Planning Authorities within the framework of the Government's policies for planning, growth areas, regeneration, integrated transport and sustainability. We look to your Council's Local Development Framework to promote strategies, policies and land allocations which would support alternatives to the private car.

In the case of Rochford there are no trunk roads within the District although there are two strategic corridors namely the A13 and A127/A1159 which connect into the M25 motorway network at Junctions 30 and 29 respectively. Sections of these areas are currently heavily congested, particularly during peak periods, and operate under considerable levels of network stress. Therefore it is important to the HA that the impact of major development proposals in the Rochford area is considered within the context of future impact on the M25 and the A13 Trunk Road.

Please see below some general comments regarding the soundness of the CS and SSA from a transport perspective, referring to specific proposed submission policies as necessary. This response has been completed with reference to paragraph 4.52 of PPS12 (2008) PPS12, paragraph 4.52 - To be 'sound' a core strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY.

**CORE STRATEGY**

**Policy GB1 - Green Belt Protection**

The HA acknowledges that only the minimum amount of Green Belt land will be allocated to meet the District's housing and employment needs as necessary. However, the HA is concerned that any proposed redevelopment of greenbelt sites could result in development in areas with limited access to sustainable transport modes therefore resulting in higher levels of car usage and subsequent impact on the SRN. Although the HA recognizes that new public transport hubs that would facilitate the use of non-car modes could be developed over time, this process is likely to require very substantial investment.

It is therefore important that an appropriate assessment of infrastructure requirements is performed for development sites on Green Belt land. Funding towards the necessary public transport infrastructure improvements must be sought and secured prior to occupation of any new development on greenbelt land. Furthermore, the occupation of such developments should be phased in line with necessary transport infrastructure. This will help the CS meet the PPS12 requirement that a sound DPD should be 'justified' and 'effective' and hence deliverable.

**Policy T1 - Highways**

Policy T1 highlights the need to reduce reliance on the private car but also observes that 'some impact on the highway network is inevitable'. In a District with such high levels of private car ownership and a limited public transport network, as stated in paragraph 10.2, it will be important to assess the potential impacts to the highway network and ensure that mitigation measures are proposed and implemented where necessary.

An emphasis should be placed on the provision and improvement of sustainable transport infrastructure, particularly where high trip-generating developments such as offices are proposed. In line with the DfT's Guidance on Transport Assessment (2007) - DfT GTA, paragraph 4.51 - 'The key issue is the need to ensure that development proposals strive to achieve nil detriment ('no worse off') to the strategic network, for the opening year and appropriate horizon year'. This emphasis will assist in mitigating potential increases in private vehicle trips and hence help ensure that there is a nil-detriment effect on the SRN.

**Policy T3 - Public Transport**
The recent Planning Inspectorate ‘LDF - Learning from Experience’ document (September 2009) suggests that a Core Strategy should identify a clear source of funding for infrastructure for at least the first 5 years of the plan - The Planning Inspectorate, LDF: Examining DPDs: Learning from experience, September 2009, Paragraph 22: ‘For at least the first 5 years of the plan it should be clear what infrastructure is required, who is going to fund and provide it and how it is to relate to the rate of development’. Paragraph 10.15 of the CS highlights the importance of public transport links for new developments and implies that developers may be required to contribute towards public transport provision. However, it is noted that developer contributions cannot be expected to pay for all transport improvements and as such, in line with the recent Planning Inspectorate document outlined above additional sources of funding should be identified. It is recommended that alternative sources of funding for public transport improvements are clearly outlined within the CS to ensure that adequate infrastructure provision is made.

Policy T4 - South Essex Rapid Transit

As mentioned in our response to the Core Strategy Issues and options consultation the HA is supportive of this policy and the need to progress the route through South Essex. This has the potential to reduce the impact on the SRN (A13).

Policy T5 - Travel Plans

The HA welcomes the requirement for a travel plan for developments involving both destination and origin trips. However it is noted that no threshold for employment sites have been specified. Essex County Council requires the production of a workplace travel plan for developments with over 50 employees or where there will be a significant impact on the local road network. To avoid ambiguity for developers, the HA recommends that the Rochford District Core Strategy specifies a similar threshold within Policy T5. This will ensure the Core Strategy is in line with PPG13 paragraph 87 - PPG13 - ‘Local authorities are expected to consider setting local targets for the adoption of travel plans by local businesses and other organizations.’

Policy ED2 - London Southend Airport

The HA previously responded to the London Southend and Environs Joint Area Action Plan Preferred Options Document (March 2009). As such, we have not repeated our comments here but instead refer you to our consultation response dated 31 March 2009.

Summary: Policy T5 - Travel Plans

The HA welcomes the requirement for a travel plan for developments involving both destination and origin trips. However it is noted that no threshold for employment sites have been specified. Essex County Council requires the production of a workplace travel plan for developments with over 50 employees or where there will be a significant impact on the local road network.

Change to Plan

To avoid ambiguity for developers, the HA recommends that the Rochford District Core Strategy specifies a similar threshold within Policy T5. This will ensure the Core Strategy is in line with PPG13 paragraph 87 - PPG13 - ‘Local authorities are expected to consider setting local targets for the adoption of travel plans by local businesses and other organizations.’

CHAPTER 10

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify...
CHAPTER 10

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those
general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the
removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of
this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a
more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land
South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of
Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing
employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further,
Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic
housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development
in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of
sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out
for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the
October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy
H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead
of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and
achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as
a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth
in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations
have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable
agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as
South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the
loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the
Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the
ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core
Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan
Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the
publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable
housing for new residential developments. The Policy accords with the advice of National Policy and is therefore
considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy
represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities.
The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the
Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that
seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly
when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more
schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through
negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place:
Policy CP1 - Design

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support -
Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT6 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of
open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport:
Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development:
Policies ED3 - Existing Employment Land
ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publicly available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary:

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the
event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.
when making these consideration, would you please also remember the people who use mobility scooters, the new development on the old hospital grounds, from the new library to the main road, can be difficult to use, as only one side has pavement and dropped curb.
The residents of Hockley have already requested the provision of cycle lanes and appropriate access points - Hockley to Rayleigh and Hockley to Rochford and to all schools in Hockley. The response is that there is no space for continuous stretches. Space will not magically appear so it is not possible for this part of the Core Strategy to be implemented.
More thought needs to be put to provision of cycling and walking. For example it states that watery lane and beeches road are to be improved to take extra traffic from hullbridge this will be in direct conflict with the stated intention to direct cyclists down these roads on a sustrans network. It is already too dangerous to cycle safely down there. There is also conflict with pedestrians as there is no path or refuge leading from a footpath from hullbridge to battlesbridge until the seawall is open for access under new legislation.

Summary:

CHAPTER 10  Policy T6 - Cycling and Walking

Respondent: Pond Chase Nurseries Ltd [5322]
Agent: Boyer Planning Ltd (Mr R Ricks) [8313]

We support this policy since the provision of facilities for cycling and walking would be consistent with proposals for the development of Pond Chase Nursery site. The developer of the site will work with the relevant authorities including Sustrans to make provision for cycle routes through the site to link to existing and proposed cycling facilities within the West Hockley area.

Summary: We support this policy since the provision of facilities for cycling and walking would be consistent with proposals for the development of Pond Chase Nursery site. The developer of the site will work with the relevant authorities including Sustrans to make provision for cycle routes through the site to link to existing and proposed cycling facilities within the West Hockley area.

We agree with the principles of this policy. However, the scale of any contributions towards such initiatives should of course reasonably relate to the impact of the development of the land in question. Circular 5/05 and the emerging/published DCLG guidance on the use of CIL, makes it clear that new developments/contributions from new development can not be used to resolve existing deficiencies (only, proportionally, those deficiencies made worse by new development).

The extent of contributions should be determined at the time at which a masterplan or development brief is prepared for a site.

We agree. There must be adequate parking spaces per dwelling in new developments - not just the minimum required - they need to be realistic. To apply the minimum will cause congestion and frustration to residents.
We strongly support what is a commonsense approach to the provision of minimum parking standards to residential developments.

Another important factor not addressed in this document is commuter parking near railway stations. This totally overburdens streets up to a mile from the station and must be controlled. Commuter parking should be banned, usually by banning parking at certain hours such as 10 to 11 am which makes it impossible for commuters. It would be necessary to provide better public transport from areas such as Ashingdon which do not have a railway connection. In many cases the regulations are there but not regularly enforced.

ROCHFORD DISTRICT COUNCIL - LOCAL DEVELOPMENT FRAMEWORK CORE STRATEGY SUBMISSION SEPTEMBER 2009

Iceni Projects Ltd (Iceni) has been instructed by Colonnade Land LLP (Colonnade) to submit representations to the Rochford Local Development Framework Core Strategy Submission (CSS).

a) Overview

It is our conclusion that the CSS is not justified, effective or consistent with national policy, as required by Planning Policy Statement 12: Creating Strong Safe and Prosperous Communities through Local Spatial Planning (PPS12) and is therefore vulnerable to being found unsound by an Inspector through the Examination in Public.

b) Background and Summary

These representations follow those made by Iceni on behalf of Colonnade to the Preferred Options Core Strategy, submitted via letter dated 17 December 2008. In this regard, we would request that the Council confirms that the representations made to the Preferred Options Core Strategy will be taken into account alongside the current representations, particularly as there are a number of cross references between the two sets of representations.

It is not considered necessary to reiterate the content of the previous representations, as they were made at the appropriate stage and will be considered by the Planning Inspectorate in due course, but it is inevitable that certain elements will require restating where it is not clear that they have been taken into account in the production of the CSS. For clarity, therefore, Colonnade feel that it is appropriate to clarify the 'in-principle' issues that were raised in the representations to the Preferred Options Core Strategy, recognising that these issues were raised in the context of a wider and more coherent justification made within the representations:

• Further cross-referencing of the recommendations made within the evidence base is required;
• Greater focus should be placed on promoting Rochford as the principal settlement within the District;
• Coombes Farm is the most logical location for residential development abutting the urban area of Rochford and as such warrants recognition as a general location for residential development;
• The allocation of Three Ashes Farm for employment generating uses will be pursued;
• Recognition that it is not realistic to expect residential allocations to be met mainly on Brownfield sites, nor should the intensification of smaller sites in residential areas be pursued;
• Many of the sites identified as suitable for residential development will not be viable and will not come forward for development within the timescales anticipated;
• The failure to provide the necessary justification for the proposed infrastructure improvements sought in Appendix H1;
• The inclusion of an affordable housing exception policy was sought; and
• The need to identify sites capable of delivering employment growth in the short term.

Following assessment of the CSS presented by the Council for consultation prior to submission to the Secretary of State, Colonnade considers the Plan to be 'unsound' as the document consistently fails to meet the tests of soundness set out in the table following Paragraph 4.52 of PPS12. For clarity, PPS12 confirms that to be 'sound' a Core Strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY and defines 'justified' as "founded on a robust and credible evidence base" and "the most appropriate strategy when considered against the reasonable alternatives" and 'effective' as "deliverable", "flexible" and "able to be monitored".

The rationale for the above is identified in the remainder of these representations, which are provided in the interests of ensuring the Council delivers a strong, robust and logical Core Strategy that guides the future development of the District in a justified and effective manner.

b) Colonnade

As the Council is aware from previous submissions to the Local Development Framework, Colonnade is a strategic land company with a particular interest in the future development of the District as a consequence of a number of sites that it controls, particularly around Rochford.

The Council will also be aware that Colonnade has recently submitted an outline planning application for the residential development of the land at Coombes Farm, Rochford to provide a sustainable urban extension comprising up to 326...
residential dwellings, with associated accesses and community uses. Whilst the planning application process is clearly separate from the Local Development Framework production process, Colonnade wishes to continue the promotion of the site as a suitable location for residential development.

Accordingly, these representations focus on the legal requirements and tests of soundness associated principally with the Housing and Employment chapters of the CSS, with reference where appropriate to the sites that are controlled by Colonnade, the outline planning application at Coombes Farm and other issues where relevant.

c) Housing

i. Date of Adoption

The CSS assumes an adoption date of 2010 and plans for the provision of housing to 2025.

Taking account of the potential delays to the adoption of the Plan, including the Examination process, it would be more appropriate for the CSS to provide sufficient flexibility to allow for delays in its adoption. Colonnade considers an adoption date of 2011 for the CSS is a more realistic target.

Taking account of the advice in Paragraph 4.13 of PPS12, which states that the time horizon for the Core Strategy should be "at least 15 years from the date of adoption" it would be appropriate for the CSS to plan for the provision of housing to 2026 at the earliest. As such, Colonnade does not consider the CSS to be 'flexible' in the context of the tests of soundness in the table following Paragraph 4.52 of PPS12.

ii. Housing Delivery

However, setting the above aside, the Housing Chapter identifies the minimum housing delivery target for the period 2001 to 2021 of 4,600 dwellings as set out in the East of England Plan, with the annual average requirement of 250 dwellings per annum to extend provision from 2021 to 2025. It also confirms that the residual target for the period 2006 to 2021 is 3,790 dwellings, taking account of the delivery of 810 dwellings in the period 2001 to 2006, and a further 618 dwellings have been completed between 2006 and 2008.

This leaves a residual housing provision target of a minimum of 3,172 dwellings in the period 2008 to 2021. Taking into account the required provision beyond 2021, the residual housing provision target in the period 2008 to 2025 is a minimum of 4,172 dwellings. The disparity between these figures and those provided within the CSS are explained by the rounding down of the annual average delivery requirement in the period 2006 to 2025 by 250 dwellings per annum, compared with the actual figure of 252.67.

The table at Paragraph 4.6 of the CSS identifies the source of housing provision that will meet the identified minimum requirements and includes figures for 'Extant Planning Permissions' and 'Existing allocations/other appropriate sites identified in Strategic Housing Land Availability Assessment'. These figures, along with the actual completions within the period are combined to produce the figure for the 'Total without Green Belt release' figure.

Setting aside the concern regarding under-provision associated with the rounding down of the annual average delivery requirement in the period 2006 to 2021, the CSS fails to identify the sites that will contribute to the 'Extant Planning Permissions' provision. The identification of the sites that will contribute to the 'Extant Planning Permissions' should be provided in the context of the findings of the Inspector in the appeal by Asprey Homes [APP/G5180/A/07/2043219/NWF] who determined that the reliance on a delivery rate of 100% is unsafe [IR287].

Furthermore, at the time of writing these representations, the Strategic Housing Land Availability Assessment 2009 has not been published. It is impossible therefore for a full assessment of the proposed housing provision to be undertaken to confirm whether the CSS is 'founded on a robust and credible evidence base' [test of soundness in the table following Paragraph 4.52 of PPS12].

iii. Redevelopment of Employment Sites

Paragraph 4.14 of the CSS refers to the identification of the four employment sites that are considered by the Council to be suitable for redevelopment to residential use. However, the failure to publish the Strategic Housing Land Availability Assessment 2009 either before or alongside the publication of the CSS means that the assumptions made by the Council as to the suitability, availability, viability and deliverability of the sites cannot be assessed.

It has been necessary, therefore, to review the assumptions made in the Rochford Urban Capacity Study 2007 (UCS) regarding the sites. Within the section of the UCS entitled 'Redevelopment of Established Employment Land' [pages 22 & 23] includes a list of those sites assessed, their indicative capacities and the probability of residential development coming forward at the sites within the plan period (identified elsewhere as 2001 - 2021). The list includes the four sites identified in the CSS of Eldon Way/Foundry Estate, Hockley; Rawreth Lane Industrial Estate, Rayleigh; Stambridge Mills; and Star Lane Industrial Estate, Great Wakering.

In total, the UCS identifies an indicative residential redevelopment capacity of 486 units on the four sites (118, 220, 60 and 88 respectively). Of these, it identifies the Rawreth Lane Industrial Estate and Stambridge Mills as having a 'high'
CH 10

probability of coming forward for development in the Plan period (2001 - 2021), which would deliver 280 residential
dwellings using the Council's own figures. The Star Lane Industrial Estate (referred to in the UCS as the Star Lane
Brickworks) is identified as having a 'medium' probability of coming forward for development in the Plan period, with
capacity to deliver 88 residential dwellings. It is unclear, therefore, where the figure for 'Existing allocations/other
appropriate sites identified in Strategic Housing Land Availability Assessment'.

Set against this is the identification of these four sites in the CSS as being capable of delivery for residential
development within the Plan period, with 671 units delivered between 2006 and 2015 and a further 506 units between
2015 and 2021.

The UCS also states in the same section that:

"There are considerable areas of land in the district that are currently allocated for, and in use as, employment land. The
redevelopment of such sites for residential use would reduce demand for residential development on greenfield sites,
but would at the same time create a need for alternative sites to be found for employment. Such an approach, which
would be likely to require the decontamination of existing employment land to make it fit for residential use, together with
development of a greenfield site and implementation of additional infrastructure to serve the new employment area, may
well be unsustainable." [our emphasis]

The UCS appears to confirm therefore, that not only would the redevelopment of the four sites listed in the CSS be
unlikely within the Plan period, but also potentially unsustainable. In this regard, it is notable that the promoters of
Stambridge Mills sought the Screening Opinion of the Council as to whether Environmental Impact Assessment of the
planning application for the redevelopment of the site for residential use was required in 2007, but to date are yet to
submit a planning application for the redevelopment of the site.

In light of this, Colonnade does not consider the CSS is 'the most appropriate strategy when considered against the
reasonable alternatives' [test of soundness in the table following Paragraph 4.52 of PPS12], which include the provision
of residential development in East Rochford.

iv. Strategic Housing Growth to the East of Rochford

Furthermore, whilst paragraph 2.62 of the CSS identifies concern relating to the identification of locations to the east of
Rochford for development on the basis that 'vehicular movements would inevitably be directed through Rochford's
historic core', the CSS later identifies Stambridge Mills as a suitable site for residential redevelopment.

In light of the evident conflicts between the evidence base provided in support of the CSS and the absence of other
evidence, the CSS is not considered 'sound' in the context of the tests of soundness in the table following Paragraph
4.52 of PPS12.

v. Housing Trajectory

Paragraph 4.28 of the CSS confirms that policies H1, H2 and H3 of the CSS will deliver housing supply as illustrated in
the Housing Trajectory at Appendix H2. This Housing Trajectory is transposed from the 2008 Annual Monitoring Report
(AMR).

Whilst on the face of it, the Housing Trajectory appears to confirm that the Council can meet its requirement to identify a
five year housing supply, many of the sites identified within the AMR do not conform to the guidance issued by CLG in
August 2008, on the assessment of a five year land supply. The guidance identifies sites that can be included within the
five year assessment of housing supply as:

"those that are allocated for housing in the Development Plan, sites that have planning permission (outline or full
planning permission that has not been implemented) and specific, unallocated brownfield sites that have the potential to
make a significant contribution to housing delivery during the 5 year period".

Table 4.10: Projected Net Completions of the AMR confirms that the five year housing land supply figure includes sites
from 'other land allocated for residential purposes', which are based on land allocations outside existing settlements.
However, it should be clarified that these land allocations are not currently allocated for housing development in an
adopted Development Plan. As such, these unallocated greenfield sites that are yet to make significant progress through
the planning system should be discounted and the five year housing land supply recalculated.

The table below has been prepared to confirm the extent of the shortfall should the sites from 'other land allocated for
residential purposes' be removed from the calculation of the Rochford five year housing land supply, in accordance with
the guidance issued by CLG:

Recalculated Five Year Housing Land Supply (2009 - 2014):

Year
1st April 2009 to 31st March 2010
Predicted Delivery (A)

**TOTAL**

Predicted Delivery (A)  
1,562 dwellings

Allocations on ‘other land allocated for residential purposes’ (B)  
1,125 dwellings

Residual delivery (A-B)  
437 dwellings

Delivery Shortfall  
1,125 dwellings

The above table confirms that the removal of the ‘other land allocated for residential purposes’ from the calculation of the Rochford five year housing land supply leaves the Council with a minimum net additional housing delivery of 437 dwellings, which equates to a supply of 1.7 years based on the adjusted annual delivery target of a minimum of 255 net dwellings.
additional dwellings per annum. As such, the Council is failing to meet its requirement to demonstrate a five year housing land supply in accordance with PPS3 and the supporting guidance provided by CLG. It is notable that the recent application by David Wilson Homes at Land between Main Road and Rectory Road and Clements Hall Way, Hawkwell identifies an even greater shortfall in the Council's five year housing land supply.

In addition to the above, the AMR does not include a commentary on how deliverability has been assessed against the requirements of paragraph 54 of PPS3.

Furthermore, the guidance from CLG confirms that the windfall sites cannot be relied upon in demonstrating a five year supply unless a Local Planning Authority can demonstrate genuine local circumstances exist to allow this exception. However, the second paragraph of the section entitled 'Housing Trajectory and Five Year Housing Supply' confirms that the estimated completions in the years 2008 to 2013 includes estimated yields through 'intensification' coming forward in future years. With reference to the definition of 'intensification' on page 13 of the AMR, it appears that the 'Housing Trajectory and Five Year Housing Supply' also includes provision for windfall sites. As such, the Council is required to demonstrate the 'genuine local circumstances exist to allow this exception'.

The pressures on delivery and need for additional sites are more acute when it is considered that an average delivery rate of 204 dwellings per annum was achieved during a strong period of housing market growth. In view of the current economic downturn, and significant problems faced within the housing market, the Council should seek to identify appropriate and deliverable sites to meet its regional housing target provision commitments. Suitable sites would include Coombes Farm, which has been positively promoted for development through the LDF process.

It may, therefore, be more appropriate for the Council not merely to allocate sufficient sites to meet the minimum targets set down by the East of England Plan, but to identify a reservoir of land capable of coming forward for development should the sites identified through the CSS and Allocations Development Plan Documents (DPD) fail to come forward for development within the anticipated timescales.

vi. Appendix H1

As set out in the representations to the Preferred Options Core Strategy, there is continuing concern that the list of improvements to infrastructure required in support of residential development as set out in Appendix H1 fails to provide the necessary justification for its inclusion. Whilst the preamble seeks to clarify why the infrastructure is sought, the inclusion of this list should be fully justified, otherwise it is of little value. Furthermore, it would be of benefit to provide further details of the existing community infrastructure provision and capacity within the evidence base.

The failure to provide the necessary justification for its inclusion means that the CSS will not be 'founded on a robust and credible evidence base' [test of soundness in the table following Paragraph 4.52 of PPS12].

d) Character of Place

As set out in the representations to the Preferred Options Core Strategy, Colonnade considers that, with respect to the requirement to produce and adhere to Development Briefs for large residential developments, as set out in Policy CP1, the Council should not seek to impose further demands on developers where existing regulations provide sufficient requirements regarding design. In this instance, Design and Access Statements provide sufficient design guidelines for developments and there is no additional information provided in the policy or supporting text that clearly sets out the justification for this requirement.

e) Green Belt

With reference to the comments regarding the redevelopment of employment sites under the 'Housing' section above and the requirement to allocate sufficient land to meet the minimum housing provision targets as required by the East of England Plan, Colonnade considers that the chapter on Green Belt, and policy GB1 in particular, fails to provide the necessary evidence base that will allow it to be monitored effectively.

It is inherent that the proposed redevelopment of previously developed employment sites for residential use in order to reduce the requirement to allocate previously undeveloped land for residential use will displace these employment uses. In turn, therefore, the separate allocation of previously undeveloped Green Belt to accommodate the compensatory employment provision is required. This is accepted in principle at paragraph 11.11 of the CSS.

Without providing clarification of the anticipated quantum of land required to accommodate the provision of housing and compensatory and new employment land, it is not possible to monitor the performance of policy GB1.

However, using the Council's figures in the table setting out the breakdown of the housing provision figures in Chapter 4 of the CSS (assuming that actual completions and extant permissions are all on previously developed land), setting aside the displacement of employment uses referred to above, approximately 42% of the required minimum housing provision target is capable of being accommodated on previously developed land (2,005 units from a total of 4,750). As such, the Council is required to provide at least 58% of the required minimum housing provision target on the Green Belt (2,745 units from a total of 4,750).
If these figures are adjusted to take account of the displacement of employment uses (assuming the provision of an equal quantity of land is required to compensate for the employment land that is redeveloped), this figure changes to 17.5% on previously developed land and 82.5% on Green Belt (828 and 3,922 units from a total of 4,750 respectively). Even allowing for the achievement of higher densities of employment on new developments, the figures above are unlikely to change significantly.

Furthermore, the table in Chapter 4 also confirms that no previously developed land will be available for development beyond 2021, or 2015 if account is taken of the displacement of the employment uses.

In light of this, not only does Chapter 6 fail to provide the necessary evidence base that will allow it to be monitored effectively, it is also necessary to consider whether it presents the most appropriate strategy for addressing the required release of Green Belt land to accommodate the defined housing and employment delivery targets to 2025 and beyond as necessary. Colonnade considers a more robust approach that is flexible and capable of being monitored, would be to clearly identify those sites capable of delivery in the short term, which for the avoidance of doubt includes those sites being promoted by Colonnade, with a reservoir of alternative sites set aside for future growth.

As set out in the representations to the Preferred Options Core Strategy, Colonnade considers that the inclusion of an affordable housing exception policy within the CSS will aid the delivery of community housing within rural areas. However, the CSS does not contain such a policy, or adequately address the issue of community housing within rural areas and the CSS is not considered to provide sufficient flexibility to allow for the delivery of essential rural housing.

f) Environmental Issues

Colonnade has concerns regarding the justification for and effectiveness of a number of the policies contained within the Environmental Issues chapter, as follows:

- Policy ENV1: The Council fails to identify how it will "maintain, restore and enhance" the sites of nature conservation importance that are identified, or how the performance of this policy will be monitored;
- Policy ENV3: In the context of the advice at paragraph 4.32 of PPS12 regarding the reformulation of national policies, Colonnade does not consider that this policy is required; and
- Policy ENV9: As set out in the representations to the Preferred Options Core Strategy, Colonnade does not consider that the necessary evidence base has been provided to justify a policy that seeks to go above and beyond the policy targets for the Code for Sustainable Homes as set out by Central Government.

g) Community Infrastructure, Leisure and Tourism

Policy CLT1 refers to the requirement for residential and employment development to contribute to the infrastructure identified in Appendix CLT1 through Standard Charges.

However, whilst the general principle of securing planning obligations through the application of standard charges is broadly accepted, the list of infrastructure requirements set out in Appendix CLT1 is not supported by sufficient evidence base to identify its robustness and credibility. As such, Colonnade does not consider either policy CLT1 or Appendix CLT1 is justified in the context of PPS12.

It is also noted that, despite the clarification sought by Colonnade at the Core Strategy Preferred Options stage, the CSS fails to confirm what information should be contained within Health Impact Assessments, which are required by policy CLT4. Once again, Colonnade requests further clarification of what is involved in the assessment and the expected outputs, which will provide greater clarity and will allow the policy to be monitored.

h) Transport

Policy T8 confirms that the Council will apply minimum parking standards. As set out in the representations to the Preferred Options Core Strategy, the guidance in Planning Policy Guidance Note 13: Transport (PPG13) is clear regarding the imposition of parking standards.

Paragraphs 52-56 of PPG13 confirm that the Local Planning Authorities should apply maximum not minimum parking standards. In order to satisfy the legal requirements set out in PPS12, the policy must reflect PPG13 to promote sustainable transport choices and further provide incentives for developers to locate further residential land closer to local service centres by requiring maximum parking standards for residential developments.

i) Economic Development

As set out in the representations to the Preferred Options Core Strategy, the land at Three Ashes Farm provides an excellent opportunity to deliver employment growth in the short term and may be a suitable site for the 'Eco-Innovation Centre' that is being promoted by the Council. Its identification as a suitable location for strategic employment growth, or the provision of an Eco-Innovation Centre, would accord with the general principles of the policies contained within Chapter 11.
CHAPTER 10

The identification of Purdeys Industrial Estate as fit for purpose (in paragraph 11.32 and the Council's 2008 Employment Land Study 2008) and therefore it should be maintained and if possible expanded, is welcomed and Colonnade considers that Three Ashes Farm could deliver this expansion, providing a natural extension to Purdeys Industrial Estate and being strategically located close to the Airport.

Three Ashes would address the negative impacts that the nearby residential area experiences from the existing Industrial Estate by providing a buffer between established uses and the residential area with less intensive employment activities. The highways analysis that has been carried out has suggested that it would not have an adverse impact on roads and congestion. Furthermore, there are very few opportunities for businesses to expand and Three Ashes could provide this opportunity.

j) Conclusions

Following the submission of representations to the Preferred Options Core Strategy, Colonnade is disappointed to note that the CSS fails to take account of the majority of the issues raised in their representations.

In addition, Colonnade considers the plan to be 'unsound' as the document consistently fails to meet the tests of soundness set out in the table following Paragraph 4.52 of PPS12 and respectfully requests that the Council notifies Iceni, on behalf of Colonnade, of the future arrangements for the Examination of the Core Strategy. Furthermore, Colonnade wishes to take this opportunity to formally register a request to appear at all stages of the Examination in Public, including the pre-hearing meeting and any planned hearing sessions whereby issues raised in the context of this letter are to be discussed. Please confirm this request, and that the representations made to the Preferred Options Core Strategy will be taken into account alongside the current representations, by way of return to this letter.

Iceni Projects, on behalf of Colonnade Land LLP trusts that the Council will find these representations to be constructive and helpful in taking forward the Core Strategy. Should you wish to discuss any aspect of these representations further, please do not hesitate to contact us.

Summary: Policy T8 confirms that the Council will apply minimum parking standards. As set out in the representations to the Preferred Options Core Strategy, the guidance in Planning Policy Guidance Note 13: Transport (PPG13) is clear regarding the imposition of parking standards.

Paragraphs 52-56 of PPG13 confirm that the Local Planning Authorities should apply maximum not minimum parking standards. In order to satisfy the legal requirements set out in PPS12, the policy must reflect PPG13 to promote sustainable transport choices and further provide incentives for developers to locate further residential land closer to local service centres by requiring maximum parking standards for residential developments.

Appear at exam? Yes

Soundness Tests i

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The use of minimum parking standards for residential developments is not only contrary to the advice contained within PPG13, which states that maximum parking standards should be used, but also contradicts the aim to reduce reliance on private vehicle by encouraging residents to have more cars.

It is not considered to be appropriate to just limit parking at destinations, as residents will drive from their homes to the town centre, work place etc, which have maximum parking standards. This will put undue stress on these spaces and result in people parking elsewhere, including on-street and illegally, which could adversely affect traffic flows and road safety.

Change to Plan

Reword policy as follows:

'Maximum parking standards will be applied to all forms of development, however, within accessible locations (e.g. town centres or areas that have high levels of public transport accessibility), a relaxation of these standards may be appropriate. As part of the overall parking provision, all new developments shall contain conveniently located reserved spaces for disabled persons in accordance with the Council’s adopted car parking standards.

In addition, all developments should provide adequate provision for the parking, turning, loading and unloading of service vehicles.'
Representations on behalf of Fairview New Homes

1. We are instructed by our client, Fairview New Homes, to submit comments on the published Core Strategy Submission Document. For ease specific reference has been made in accordance with the paragraph and policy numbers as contained in the published document. We would like the opportunity to represent our Client at the forthcoming Examination of the Core Strategy DPD and would be grateful for confirmation that this is possible.

2. Fairview New Homes have an interest in a parcel of land to the South West of Rayleigh Town Centre, as indicated on the attached site location plan. This land was previously identified in the Core Strategy Preferred Options documents to provide an urban extension to the south west of Rayleigh. This option has now been withdrawn in the Core Strategy Submission document and it is on this basis these representations are provided to the Council.

3. The Submission Core Strategy has been considered against the requirements set out at Paragraph 4.36 of PPS12 requiring core strategies to be justifiable and effective in order to be found sound, as follows:

Justified:
   i. Founded on a robust and credible evidence base
   ii. The most appropriate strategy when considered against the reasonable alternatives

Effective:
   i. Deliverable - the Core Strategy should show how the vision, objectives and strategy for the area will be delivered and by whom, and when, including who is responsible for implementing different elements of the strategy and when
   ii. Flexible - a strategy is unlikely to be effective if it cannot deal with changing circumstances. Plans should show how they will handle contingencies.
   iii. Able to be monitored - monitoring is essential for an effective strategy and will provide the basis on which the contingency plans within the strategy would be triggered.

4. To summarise our comments, Fairview New Homes strongly object to the Core Strategy as is currently presented on the basis the document is currently unsound for a number of reasons:

   • The lack of robust and credible evidence base
   • Failure to clearly discount reasonable alternatives
   • The effectiveness of the plan is also considered to be flawed and the Council's approach to deliverability and flexibility is questioned.

5. Fundamentally, we question the soundness of the Core Strategy due to the lack of available evidence to support the choices made by the Council. In particular, there is a strong reliance on the findings of the 2009 Strategic Housing Land Availability Assessment (SHLAA) although it is understood this document is not due to be published for consideration alongside the Core Strategy. We, therefore, reserve the right to submit additional comments to the Core Strategy consultation following the publication of the SHLAA.

6. The 2009 SHLAA is clearly listed at Paragraph 1.29 of the submission Core Strategy as one of the evidence base documents the Council have drawn upon when drafting the Core Strategy. The documents listed are all considered to have played an important role in informing the Core Strategy. PPS12 also recognises at Paragraph 4.37 the importance of demonstrating how choices made in the plan are backed up by factual evidence identified in evidence base documents.

7. As a starting point it is important to state it is Fairview New Homes greatest concern there is no background provided within the Core Strategy document, or indeed any of the available evidence base documents, identifying why the Local Planning Authority has chosen to remove some of the sites previously proposed for housing development. In addition, there is also no justification as to why the retained urban extension sites are more suitable than those removed from the draft plan.

8. The following provides specific comments in response to the relevant areas of the Core Strategy.

Housing

9. It is stated at Paragraphs 4.10-4.12 that the Council have adopted a balanced approach when locating new housing between higher tier settlements and lower tier settlements. Although there is no detail provided as to how the Council
intend on implementing this balanced approach or how the strategic allocation of housing contributes to the balance required. Our Client cannot support this approach until further detail is understood as to the proportion of housing being allocated to each settlement tier.

10. The proposed distribution of housing development during the plan period does not appear to be proportionately allocated between the various settlement tiers. We would argue that development should be distributed proportionately in line with the size of the settlement in order to benefit for available services and facilities. Rayleigh recognised as having best access to services within the district at Paragraph 2.68 of the Core Strategy. On this basis it is considered the development should primarily be directed to Rayleigh with a proportionate level of housing to the remaining settlements in the District.

Policy H1 - The efficient use of land for housing

11. In general the use of residential extensions to meet the remaining housing requirement that cannot be delivered through the redevelopment of appropriate previously developed land is supported by Fairview New Homes.

12. It is understood there is a need to prioritise use of brownfield land in line with national policy requirements but this needs to be a carefully balanced and realistic approach in identifying appropriate urban extensions to accommodate the majority of the District’s housing, as identified in the table at Paragraph 4.6 and later at Paragraph 4.15.

13. Policy H1 sets out that the Council will seek the redevelopment of Rawreth Lane Industrial Estate, Foundry Industrial Estate, Stambridge Mills and Star Lane Industrial Estate. Without sight of the 2009 SHLAA it is not possible to understand whether the Council’s choice to release employment land for housing is appropriate and Fairview New Homes cannot, therefore, support this element of Policy H1. This objection is further amplified by the fact additional employment land is required but is yet to be identified.

Policy H2 - Extensions to residential envelopes and phasing

14. The Council’s intention to provide a balanced strategy for housing provision is mentioned again at Paragraph 4.18. The comments made at Paragraphs 9 and 10 above are also relevant in this respect.

15. In comparing the Preferred Options Core Strategy Document and Submission Core Strategy Document there is a significant reduction in the number of housing units being provided in urban extensions pre 2015, from 1450 dwellings to 775. From discussions with the Local Planning Authority it is understood the Council are seeking to provide the District’s housing requirements by increased development densities. From the evidence available in the Submission Core Strategy and summary of SHLAA sites a number of the sites identified as urban extensions have in fact been allocated a reduced number of dwellings, including the land to the north of London Road, Rayleigh. We would, therefore, consider the approach taken by the Local Planning Authority to provide the required level of housing is untenable and unjustified.

16. In discounting preferred options PPS12 makes clear at Paragraph 4.38 the requirement for Local Planning Authorities to consider and evaluate reasonable alternatives. As set out above, the choices the Council have pursued have not been substantiated and without the consideration of reasonable alternatives the Core Strategy cannot be considered justified and therefore unsound.

17. However, this is our opinion based only on discussions with the Local Planning Authority rather than a thorough evidence base and we will consider the evidence in detail when it become available and provide further comment.

18. Paragraph 4.19 of the draft Core Strategy details the Council’s primary factors in determining the location of future urban extensions. It is presumed the Council have assessed each of the proposed urban extension sites against the following criteria and that this information is contained within the SHLAA, although we have not been provided with any evidence of this to assess. It can be demonstrated that the land identified on the attached site location plan meets all of the requirements set out below.

- The proximity and relationship to existing centres, facilities, services
- The availability of infrastructure and/or the potential for additional infrastructure to be provided for development in such areas
- The potential to reduce private car dependency
- The potential to avoid areas of constraint (such as areas at risk of flooding, sites of ecological importance, public safety zone etc)
- The historical, agricultural and ecological value of land
- The impact on highway network (including availability and impact on existing network, as well as potential for improvements to be delivered)
- The relationship of development locations to the District’s area of employment growth
- The potential to create a defensible Green Belt boundary
- The avoidance of coalescence with neighbouring settlements

19. In summary, Fairview's land is sustainably located in particularly close proximity to Rayleigh Town Centre and train station. In addition, the location of the land provides a natural extension and rounding of settlement boundary. An extension to Rayleigh in this location offers no opportunity for coalescence with neighbouring settlements nor does it constitute urban sprawl.
Policy H2 - Extensions to residential envelopes and phasing

20. Although it is stated a flexible approach to the timings of the release of land will be maintained, no explanation is provided as to why some sites are considered suitable for development pre-2015 and others post-2015. Paragraph 4.22 elaborates further to state a number of factors have been considered when determining the phasing of strategic housing sites although this information is not clearly available to assess.

21. As stated above the principle of releasing certain areas of greenbelt land is considered the best approach to meeting the Council's housing provision requirements. However, Fairview New Homes object to the omission of the land to the South West of Rayleigh for housing development as previously identified in the Core Strategy Preferred Options document. The site identified on the attached site location plan has been assessed against the Council's criteria, as set out at Paragraph 18 above and each requirement can be met. Without any clear explanation as to why this site has been discounted and the only other strategic housing site indentified in Rayleigh is located further away from Rayleigh Town Centre and the associated services and facilities including the train station, Fairview New Homes object to Policy H2.

22. As considered at the outset of these representations the draft Core Strategy cannot be considered robust, and therefore sound, without clear justification and evidence base.

Policy H3 - Extension to residential envelopes post-2021

23. Policy H3 is supported on the basis that the release of greenbelt land is required for housing and this is the most appropriate approach to meet the Council's housing requirements, as set out at Paragraph 21 above.

24. However, it is unclear why some of the sites previously identified for housing development pre-2015 up until 2021 in the Preferred Options Core Strategy document have now been allocated for development post-2021, such as South East Ashingdon. It is stated at Paragraph 4.24 of the Submission Core Strategy document those areas identified for post-2021 development may not be immediately deliverable. However, there is no information available to understand why these sites are now no longer considered suitable for pre-2015 development as they were in December 2008. As a result, Fairview New Homes consider Policy H3 to be unjustified and therefore unsound.

Affordable Housing

25. The acute need for additional affordable housing is recognised at Paragraph 4.30. It is unclear from the draft Core Strategy document exactly how much affordable housing is required in the District in the plan period.

26. However, taking the starting point as set out at Paragraph 4.30 that the Thames Gateway South Essex Strategic Housing Market Assessment requires 131 net additional affordable dwellings per year which constitutes 52% of the District's overall annual housing target. In order to achieve this target using the Council's proposed policy requirement that new housing developments are to provide 35% affordable housing, 375 new dwellings would need to be developed each year. This calculation does not account for those developments with fewer than 15 dwellings which have no requirement to provide affordable housing or developments which cannot viably afford to provide non-market housing.

27. An annual requirement of 250 dwellings is identified at Paragraph 4.2 of the Core Strategy which would leave a significant short fall of affordable housing and act to compound the current situation. The approach taken by the Council ultimately accepts there will always be a shortfall in affordable housing provision and does not seek to redress this. We do not, therefore, consider this to be a robust or justified approach to achieving affordable housing in the District.

28. It is, therefore, considered in order to meet the District's affordable housing requirement additional housing land should be identified in order to ensure a wholesale increase in housing provision to address the Council's shortfall in affordable housing and meet the targets set for the plan period. The most appropriate and effective method by which to secure affordable housing provision is through developing large sites that are viably able to offer affordable housing units.

29. During the consultation of the submission Core Strategy the Council's Housing Strategy (2009) was not available and we reserve the right to make further comment on this document following the publication of this evidence.

The Green Belt

30. It is fully accepted by the Council that the Green Belt boundary is currently too tightly drawn and the release of some Green Belt land is necessary to meet the District's development requirements. However, it needs to be demonstrated that the areas of Green Belt land to be lost are justified and located in the most appropriate area and that areas of release land do not undermine the principle of the Green Belt.

31. It is understood from Paragraph 6.7 of the Submission Core Strategy the Council will seek to examine the degree to which current Green Belt land is helping to achieve the purposes of the Green Belt when considering reallocating land. However, areas of Green Belt are proposed to be reallocated for urban extensions prior to this research being undertaken.
32. Fairview New Homes fully support the justified retention of the areas of Green Belt where appropriate and the release of Green Belt land where needed. However, at present the proposed Housing policies and Green Belt policies are not coherent and the reallocation of certain areas of Green Belt is not based on a credible evidence base.

Environmental Issues
Policy ENV4 - Sustainable Drainage Systems (SUDS)
33. Fairview New Homes would like to support the flexibility contained within Policy ENV4 which recognises it is not always viably possible to incorporate SUDS in all developments.

Policy ENV8 - On Site Renewable and Low Carbon Energy Generation
34. We would also like to support Policy ENV8 on the same basis as Policy ENV4 in that it is important that the production of energy from renewable or low carbon sources is only required where it is viably possible so as not to resulting in developments not coming forward.

Transport
Policy T8 - Parking Standards
35. Fairview New Homes object to Policy T8 as it is currently contrary to National Policy requirements as set out in PPG13 which contains maximum parking standards. Indeed, this is recognised at Paragraph 10.27 of the Submission Core Strategy document. Enforcing minimum parking standards is not consistent with local or national sustainability aims and should not be an approach pursued by the Council.

Summary:
Transport
Policy T8 - Parking Standards
35. Fairview New Homes object to Policy T8 as it is currently contrary to National Policy requirements as set out in PPG13 which contains maximum parking standards. Indeed, this is recognised at Paragraph 10.27 of the Submission Core Strategy document. Enforcing minimum parking standards is not consistent with local or national sustainability aims and should not be an approach pursued by the Council.

CHAPTER 10  Policy T8 - Parking Standards

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those
general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the
removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of
this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a
more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land
South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of
Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing
employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further,
Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic
housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development
in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of
sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out
for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the
October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy
H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead
of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and
achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as
a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth
in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations
have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable
agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as
South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the
loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the
Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the
ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core
Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan
Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the
publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable
housing for new residential developments. The Policy accords with the advice of National Policy and is therefore
considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy
represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities.
The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the
Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that
seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly
when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more
schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through
territories with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place:
Policy CP1 - Design
3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt: Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues: Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism: Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT6 - Open Space; CLT7 - Play Space; CLT8 - Youth Facilities; and, CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of
open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport:
Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development:
Policies ED3 - Existing Employment Land
ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary:
Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill
generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13’s maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
In order to reduce the amount of Green Belt land released for residential, the Council are proposing to reallocate a number of existing employment sites for either residential or mixed use proposals.

However, in order to meet the number of jobs required in the RSS, additional employment sites will be required, as the supply of employment land within the District is tight, this will require the release of Green Belt land.

The Employment Land Study recommends that any de-allocations of employment land be compensated for by the allocation of 18 hectares of new employment sites.

The idea of not releasing land for residential and then releasing it for employment purposes is a contradiction, as it still requires the release of Green Belt.

Amend Second Sentence of Paragraph 11.6:

‘...The Council consider it necessary to review some of these allocations, particularly in light of changes to the economy and the decline of the manufacturing sectors. As part of this review existing employment sites, where these sites are in sustainable locations, they will be protected to ensure that they continue to provide employment generated opportunities, including the redevelopment for other employment uses. Only in instances when the site offers both outdated accommodation and is not located in a sustainable location, will it be considered for mixed use, residential development, and/or community uses.’

Reword Paragraph 11.11:

‘In order to address the recommendations of the Employment Land Study an assessment should be made of the existing employment sites, in conjunction with the requirement for new housing to consider whether any of the existing employment land should be de-allocated, and if so whether any new employment sites should be allocated.’

Summary:

In order to reduce the amount of Green Belt land released for residential, the Council are proposing to reallocate a number of existing employment sites for either residential or mixed use proposals.

However, in order to meet the number of jobs required in the RSS, additional employment sites will be required, as the supply of employment land within the District is tight, this will require the release of Green Belt land.

There is a high level of public opposition to the expansion of Southend Airport. It may not therefore go ahead, so it is unsound to base future employment policy on it.
16185 Support
CHAPTER 11 Policy ED1 - Employment Growth

Full Text: The Core Strategy identifies that Rochford has a small but productive and enterprising economy albeit with an employment market of basic and intermediate skills, rather than high skills. A significant proportion of the Rochford workforce commute of the district however the location of Southend Airport has the potential to be a focus and catalyst for economic growth. EEDA support policy ED1 which seeks to diversify and modernise the economy through the growth of existing and new business providing high value employment.

By addressing these key elements of the Regional Economic Strategy, the Core Strategy will provide the context needed to maintain the prosperity of the East of England, enhancing regional competitiveness and giving support to business growth. The Council's aspiration for and Eco Enterprise Centre as a focal point for business in the form of an enterprise or incubation hub would increase the offer for start up businesses within the district. Its aim to be an exemplar in sustainable construction and act as flagship building further enhances this offer both in terms of high specification office space and the benefits relating to this in terms of low energy costs. It should further encourage the inward investment of businesses whilst aiding in the creation of higher value jobs.

Summary: EEDA support Policy ED1 which seeks to diversify and modernise the economy through the growth of existing and new business providing high value employment.

Change to Plan: N/A

Appear at exam? Not Specified Soundness Tests N/A
As it is currently drafted, Policy ED1 is unsound because it is not justified. Specifically, the sixth bullet point should be redrafted to include the words "London Southend Airport and its Environs". This change in wording would acknowledge the relevance of the whole of the defined JAAP area, and will reflect the proposed title of the "London Southend Airport & environs Joint Area Action Plan (JAAP)".

The amended wording will also provide support for the redevelopment of sites, such as the Brickworks site, which is identified within the draft JAAP as an area of change, the redevelopment of which will bring many benefits. The site is previously developed land and currently lies derelict and detracts from the surrounding landscape. Redevelopment will enhance the area and enable the clean up of the site which is likely to incur significant costs.

The amendment to the sixth bullet point to 'London Southend Airport and its Environs' is justified as the growth of both the Airport and its environs are taken into account in the Rochford Employment Land Study and the London Southend Airport & Environs study by Halcrow Group Ltd. (June 2008). Thus this proposed change of wording will make the draft policy sound, whilst enabling the policy to be effective in accordance with paragraphs 4.44 - 4.45 of PPS12.

Summary: As it is currently drafted, Policy ED1 is unsound because it is not justified. Specifically, the sixth bullet point should be redrafted to include the words "London Southend Airport and its Environs".

Change to Plan: Amend the sixth bullet point to include the words "London Southend Airport and its Environs".

Appear at exam? Yes
CHAPTER 11

1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.
The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a ‘saved’ policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, ‘Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.’

Core Strategy Policy ENV2 should be revised to include specific reference to,

* Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
* the application of the most stringent restrictions on development within the rural and undeveloped coastline;
* any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

* Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with, The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.
10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends.

Summary: The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

I have received no direct correspondence from either Council.

The Councils have deliberately made it difficult for the ordinary man in the street and the elderly to comment on this development.

Think about quality of life.

Change to Plan: Our Councils should look to reduce, not increase, air and noise pollution and air transport.

Why not write to everyone effected and give them a reply envelope? This is the way to ascertain the true feelings of those affected.

The language used e.g. “...the DPD is legally compliant” is confusing - I am not a lawyer, so how can I comment on this?

Full Text: Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

i; (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

i;  EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary: Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 and RDC policy T1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

Summary: This is too difficult a process for many people.
Evaluating how the proposed expansion fits into the national targets for carbon emission reduction.
Please give the people of this area further help to reduce air and noise pollution.

Change to Plan: In my view the development of Southend Airport will adversely impact on the quality of life and general health for a large number of residents in the Rochford and Southend area. The Councils should be trying to reduce air and noise pollution, not increase it. My main objection is that if air traffic is allowed to increase from current levels then an increased amount to current levels of "spent" aviation fuel will be breathed in by the general population. It is my opinion that our general health will suffer. I think that any required increase in air traffic must be from a lowly populated site, not a densely populated area such as Southend and Rochford. I oppose the plan.

CHAPTER 11 Policy ED2 - London Southend Airport

Full Text: Draft Policy ED2 is currently unsound as it is not justified. Specifically, the title of the policy should be amended to read "London Southend Airport and its Environs". This change in wording acknowledges the whole of the defined JAAP area is relevant, and reflects the proposed title of the "London Southend Airport & environs Joint Area Action Plan (JAAP)". The amendment to the title to 'London Southend Airport and its Environs' is justified as the growth of both the Airport and its environs are taken into account in the Rochford Employment Land Study and the London Southend Airport & Environs study by Halcrow Group Ltd. (June 2008). Thus this proposed change of wording is sound, whilst enabling the policy to be effective in accordance with paragraphs 4.44 - 4.45 of PPS12. Overall, the draft policy will provide for the emerging Southend Airport Joint Area Action Plan (JAAP), and will enable the area surrounding London Southend Airport to be appropriately developed, including our clients site.

Summary: Draft Policy ED2 is currently unsound as it is not justified. Specifically, the title of the policy should be amended to read "London Southend Airport and its Environs".

Change to Plan: The title of the policy should be amended to read "London Southend Airport and its Environs".

Appear at exam? Yes Soundness Tests

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
CPRE Essex have already responded in detail to plans for the expansion of the airport. We are concerned that the creation of so many jobs is dependent on expansion of the airport and also at the concentration of employment uses in this area. The proposed employment site to the north of Aviation Way creates a very large area of employment uses concentrated in one area. This could lead to traffic problems both locally and over a wider area.

**Change to Plan**

It is unsound to expect a large number of jobs to be created by possible airport expansion and also to concentrate such a large number of jobs in one place.

Other smaller sites should be found for employment use throughout the District. eg. at Stambridge Mill.
1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.
The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a ‘saved’ policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, ‘Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.’

Core Strategy Policy ENV2 should be revised to include specific reference to,
* Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
* the application of the most stringent restrictions on development within the rural and undeveloped coastline;
* any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

* Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with, The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
* Paragraph 8.15 of the supporting text should be amended to better support the suggested amendment to Policy ENV1. The existing text of Paragraph 8.15 should be deleted in its entirety and replaced by,

The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

* Page 16 (Sustainable Community Strategy Priority: Promoting a Greener District) should be amended to further support the approach to the Historic Environment. The fourth bullet of the Key Section/Policies of the Core Strategy should be amended to include the word 'historic', so that the first sentence of the bullet would read,

The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.
* The Adult Community Learning Centre at Rochewey, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.
* The Core Strategy should make specific reference to,
  o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;
  o Policy CLT2, final sentence: insert after the words 'primary schools' the words 'and Early Years and Childcare facilities';
  o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,

* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality - Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.
* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text,

'The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment's (CABE) Building for Life principles.'

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them.

However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the...
Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends.

**Summary:**
Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported. The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

Local Development Framework

Representations on the Core Strategy
Submission Document, November 2009
On behalf of Barratts Eastern Counties

Introduction

The requirements of Core Strategies are enshrined in the 2004 Planning and Compensation Act, the Town & Country Planning (Local Development) England (Regulations) 2004 and the 2008 policy guidance in PPS12. The requirements of Core Strategies are clear. And they are legal requirements. The Core Strategy must comply with the Local Development Scheme, Statement of Community Involvement and the Regulations. The Core Strategy must be subject to a sustainability appraisal, have regard to national guidance, conform generally with the Regional Spatial Strategy and have regard to any Sustainable Community Strategy. A Core strategy must be sound - justified, effective and consistent with national policy. The following representations therefore focus on these legal requirements.

HOUSING
Paragraph 4.6 - Evidence Base

To meet the soundness test Submission Core Strategies (SCS) must be justified, that is to say it must be founded on robust and credible evidence base and comprise the most appropriate strategy when considered against reasonable alternatives. The housing strategy in as far as it identifies a need for Green belt sites is sound, however, there are other elements which are unsound.

Paragraph 4.6 notes that the Strategic Housing Land Availability Assessment (SHLAA) has examined the supply of housing. It is presumed that the Table at paragraph 4.6 is the outcome of this examination. Whilst the SHLAA has some legitimacy in that it identifies various sites that are apparently available, we are concerned that because the SHLAA was only published in November 2009 it post dates the SCS. This implies that the SCS is driving the SHLAA exercise rather than the other way round. Whilst this may have no real practical effect on the outcome of the SCS and the identified need for Green Belt sites, the Inspector will be mindful of the advice in paragraphs 33 and 54 of PPS3 that SCS draw on the evidence in SHLAA. It may be that the SCS should explain how the evidence base has been used to justify the strategy.

PPS12 explains at paragraph 4.37 that Core Strategies are based on thorough evidence. Since the SHLAA has only recently been published it is considered that the SCS is unsound as it is not justifiable. This, together with other comments on the SCS, indicates that the process should be delayed to ensure that a more robust document is placed in front of the EiP Inspector.

Table at Paragraph 4.6 - Evidence base

From our review of the available evidence it would appear that the housing land supply is insufficient and that Green Belt release are required. From the wider strategy being promoted we note that some of the sites that the District Council consider to be 'appropriate' are likely to relate to existing employment areas. As set out elsewhere in our representations, we maintain sever reservations that the redevelopment of existing employment sites for alternative uses and particularly the Eldon Way Industrial Estate is unsustainable. We will make reference to the effectiveness of this strategy in relation to sustainability, whether it is justified in the context of National Policy and the deliverability of such a strategy elsewhere.

In particular, paragraph 11.32 of the SCS refers to existing employment land and sites within the UCS. It does not refer the SHLAA and as such it appears that an evidence base to support the re-use of employment land for residential is not reported in the SCS.

Having reviewed the 2008 Annual Monitoring Report, as we did when commenting on the 2008 Preferred Options Core Strategy, we maintain severe doubts as to the appropriateness of some of the previously developed sites identified as potential housing sites and their expected housing yield. Whilst we cannot at this stage ascertain whether the SHLAA...
sites referred to in this table correlate with the Annual Monitoring Report and indeed the 2007 Urban Capacity Study, it is our view that there will be some commonality and so the reliance on these sites is likely to be at odds with Government Policy. We shall elaborate on this objection in relation to the specific housing policy below.

We note that the last two rows in the Table at paragraph 4.6 set out figures with and without Green Belt releases. The text to this section of the Core Strategy should, for reasons of clarity, explain that Green belt review will be necessary in order to deliver the required housing.

Paragraph 4.9
The table on page 40, which sets out the settlement tiers, is supported. Rayleigh, Rochford/Ashingdon, Hockley/Hawkwell are clearly the largest settlements in the District and they benefit from good employment, housing, leisure, community and public transport provision. These settlements are the most sustainable ones with the greatest mix of uses. Consequently, it is sensible that the Core Strategy identifies these as top tier settlements and is able to target them with growth accordingly. This component of the strategy is justified by reference to sustainability data and is effective, since targeting development at these locations will ensure a more sustainable pattern of development.

Paragraph 4.14
We maintain that the strategy for redeveloping the Eldon Way Industrial Estate for housing and other alternative uses to employment is unsound. It is neither justified nor effective. The Industrial Land Availability Study 2008 sets out on page 7 strategic objectives. The 3rd objective seeks to Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive. Clearly the strategy as currently drafted envisages major changes to existing industrial estates, including alternative uses. This strategy is not consistent with other strategies and evidence based studies and so cannot be justified in the context of the tests set out in PPS12. It is also an ineffective strategy since the new employment locations that would free up the Eldon Way site for redevelopment relies on transport infrastructure that has no certainty of being delivered. Principally, the erosion of employment uses at Eldon Way could make the settlement of Hockley/Hawkwell less sustainable and thus conflict with the tiered approach on page 40, paragraph 4.9.

Policy H1
Prioritising the use of previously developed land ("pdf") is supported in principle. It is a justified strategy in the context of PPS3 and effective as sequential choices can be made by implementing the policy. However, the District Council is also promoting a strategy which seeks the redevelopment of existing employment locations to alternative uses and by consequence is identifying green field sites for new employment development elsewhere (Policy ED4 refers). This 'land swapping' is not considered consistent with PPS3, nor is it considered to be justified or effective in delivering the desired strategy. This is particularly the case as most of the existing employment sites are occupied and therefore unavailable for redevelopment. In addition, the new Greenfield sites are in an arguably less sustainable locations away from the top tier settlements identified on page 40 of the Submission Core Strategy. Clearly this element of the strategy is inconsistent with the wider strategy.

The Industrial Land Availability Study 2006 is included as an evidence base by the District Council. It includes an introductory section, which explains that the authority wishes to make Rochford the place of choice for new business. It includes several strategic objectives on page 7 including "Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive." It reviews existing employment areas and identifies vacant land, including land available from allocations. It does not include any assessment of new sites or potential opportunities for new sites that might have been expected to feed into the Core Strategy. The strategy for identifying Green Belt site employment allocation does not appear to be based on any evidence in this document and in that context cannot be justified. The strategy being promoted potentially conflicts with Government policy in PPG13, PPG2 and emerging PPS4.

The Employment Land Study 2008 is a much later document. It has a key recommendation on page ii "we recommend that Rochford District Council adopts strong policies to protect existing employment land." Furthermore under recommendations for existing sites on page iii-iv of that document it states "In our view, Hockley Trading Centre is a strategically well placed employment location. However, we recognise the ambitions of the Hockley Town Centre masterplan and that within this the Council should consider it to be allocated for other uses. However, we recommend that this reallocation happen only if provision is made within the masterplan for office use within Hockley Town Centre as part of a mixed use scheme." The view of the writers of this document is clear - the Eldon Way Industrial estate (Hockley Trading Centre) is a good employment site and that it is for other reasons that alternative uses are being considered and only then if office development is supported. This supports our representations that new future uses at the Eldon Way site should be employment dominated and that alternative uses should relate to the objectives of the Town Centre which is to enhance the shopping and leisure facilities. Residential is not an appropriate alternative.

This document recommends the use of land to the west of Rayleigh for employment and envisages Green belt release. However, the SCS does not explain through the evidence base why existing employment sites should be ‘deallocated’ and Green belt land unnecessarily used.
In addition to these key issues we have some specific concerns. As a consequence we maintain an objection to the second paragraph of Policy H1. This policy states that the Council will seek the redevelopment of various industrial estates including Eldon Way. The Policy says that alternative uses will be sought (presumably alternative to the existing employment offer) and that new land will be allocated elsewhere. This policy statement, in relation to Eldon Way in particular, is unsound for a number of reasons:

The emerging Hockley Area Action Plan consulted upon in 2008 states that the Eldon Way Industrial Estate is strategically well placed. In a sense this statement underplays the true importance of this highly sustainable employment location and only major employment area in Hockley/Hawkwell. The employment area is adjacent to the railway station and located a short distance from the main bus routes that run along Spa Road. Some of the residential areas of the town are also within walking distance of this commercial area, thus providing a potential for sustainable travel by employees. The Eldon Way Industrial Estate is therefore right at the heart of the settlement of Hockley/Hawkwell and provides an opportunity to meet sustainable transport objectives by reducing the need to travel by car. Consequently, this employment area should be highlighted as a premier employment site in sustainability terms, both in the context of PPG13, PPG4 and PPS6. To encourage alternative uses as set out in Policy H1 implies the removal of the majority of employment based activity at Hockley/Hawkwell and this would be contrary to National policy, would not be the most appropriate strategy when considered against alternatives and is therefore unsound.

Whilst it is acknowledged that improvement to the Eldon Way Industrial Estate can and should take place, the extent to which the mix of employment uses should be altered in favour of alternative land uses requires careful consideration. It is our view that a mix of existing or indeed new employment land uses with some Town Centre type uses should dominate the Eldon Way site. A mix of employment types between offices, light industry and other high technology industries should be encouraged as this will provide many locational advantages to the firms that agglomerate together. The Council says that the existing uses on this site are harmful to amenity. However, the site has operated for many years without any significant issues and if renewal for B1 type uses are encouraged then the employment area can be maintained without harm to amenity. Renewal of the employment stock can help develop and improve trade, improve the sustainability of businesses as a whole and make for a more flexible labour market as skill levels are varied. A singularly different use altogether or a variety of uses which excludes employment could undermine the long term sustainability of the area and Town Centre. As such Policy H1 is not an effective strategy and should be amended to acknowledge the importance of Eldon Way and the need to renew the employment stock to ensure that the site maintains its important role as an employment site, albeit with some ancillary alternative use development where appropriate.

The 2008 Retail Study notes that Hockley Town Centre is not strong and there is trade leakage. Eldon Way Industrial Estate provides a customer base for existing town centre uses. Weekday spending within town centres is an important contributor to the viability of many retail and leisure businesses either through expenditure by employees during the lunchtime trade or expenditure by employers, on necessary goods and services. This relationship helps sustain the critical mass of a centre and provides a platform for new retail and leisure growth. It is important to have a balanced centre with a variety of uses. Policy H1, as currently drafted, implies the removal of employment related development and this is likely to harm the vitality and viability of Hockley Town Centre. The Council has presented no evidence to suggest that this is not the case. Importantly, the 2008 Retail Study explains that there is a need for additional retail and office space. In principle we would support additional office and other B1 type uses plus retail but employment uses should always dominate for the sustainability reasons given above. Retail and office development are likely to present a viable alternative to some of the more industrial type uses.

Consequently, we do not support the phrasing of the third paragraph of Policy H1 and maintain that the most appropriate strategy is to seek renewal of the employment stock with employment based uses and with some new retail development. Removal of employment land uses completely as currently implied-which was the approach adopted in the emerging Hockley Area Action Plan - is not a justifiable strategy.

One of the key tests of a Core Strategy is consistency between policies in the emerging Plan and this strikes at the heart of demonstrating an effective strategy. Policy H1 implies alternative uses to employment and the relocation of Eldon Way to a site identified under Policy ED4. However, Policy RTC6 sets out a suite of policy criteria for Hockley Town Centre which includes employment and commercial activities. In addition Policy ED3 seeks the protection of sustainable employment sites (Eldon Way) and notes that some reallocation of existing employment sites will include a proportion of employment. It notes that in the case of Eldon Way employment development will form a component. The policies appear at odds with one another. The third paragraph of Policy H1 should be deleted as the second paragraph is sufficient to set a strategic context for delivering new housing development. The employment policies and Hockley specific policies should be left to consider the type and quantum of land uses appropriate in the area. If the third paragraph of H1 is to be retained then it should tie in more with Policy RTC6 and in our view explain that employment uses should dominate any redevelopment proposals for the Eldon Way site and that retail and leisure uses should be a supporting proportion.

Implementation, Monitoring and Delivery - page 132 onwards

One of the key tests of soundness is that the Core Strategy should be effective - it should be able to deliver its strategy. The Implementation strategy set out at page 132 onwards of the Core Strategy does not explain how Policy H1, RTC6 and the strategy for redeveloping Eldon Way (Policy ED2 and ED3) will be delivered. The comment at Policy ED3 on...
page 161 identifies it as a potential risk and alludes to land assembly difficulties and the choices to be made by owner/occupiers. In order to deliver the strategy there should be a clear understanding as to whether the new land use values being promoted are sufficient to encourage relocation voluntarily. Secondly there is a need for more information to be gathered and presented to show that current occupiers and landowners are willing to relocate and the timescales likely for this. For example, do the building lease contracts enable early review or are there any break out clauses. There should be some commentary on whether the Council will engage in compulsory purchase orders to pursue their strategy should the ‘encouragement’ route fail. As currently drafted there is no clear path to deliver the strategy and the danger is that despite reallocation, the sites identified for redevelopment will not come forward in the plan period. In this regard, evidence to satisfy the test of soundness is not provided.

Policy H2 - General Locations

We support the strategy that new housing growth should be targeted at land South of Hawkwell. This area is suitably located to the urban area of Hockley/Hawkwell and to lie in with the settlement tiers on page 40 of the Submission Core Strategy the same terminology for settlement should be used. This ensures a consistency within the SCS. The choice of this location as a housing growth area is appropriate as it would not contribute to the coalescence of the urban area with Ashingdon (there is existing development between this identified housing area at Rectory Road and Ashingdon and moreover, Rectory Road can form a natural physical boundary for the new Green belt boundary. This area is also well located to the existing road network. Cherry Orchard Way has recently been improved and provides much better accessibility to the proposed housing growth area than any other location around Hockley/Hawkwell. The existing bus routes along Rectory Road also make this location sustainable and the additional housing proposed will help underpin the financial viability of bus routes in this area. Locally there are employment opportunities, including the small commercial estate off Main Road. The Eldon Way Industrial Estate adjacent to the Town Centre also provides the opportunity for employment locally. Extensive public open space, play pitches and built leisure facilities are located just to the north of this area and a community hall is located off Briar Close, nearby. The area to the south of Hockley/Hawkwell is close to local shops on the corner of Heycroft Road and Main Road and there are numerous footpath links between this area and the local community including links via Thorpe Road, Thorpe Close, Briar Close, Hawkwell Park and Park Gardens. The area therefore provides the opportunity to enhance existing links, including cycle links, and contribute towards community integration - more so than other sites on the south side of this settlement. The site is also in the control of one house builder and deliverable.

However, we find that the Policy is not fully consistent with national policy and furthermore needs to be reviewed in order to be justified and effective. We have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with this policy and feel that Green Belt review should be more explicit throughout the SCS. We note that it is only Policy H3 which indicates the need for Green Belt land review. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes onto talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H2 and certainly Policy H3 and Policy GB1 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary.

Policy H2 - Phasing and Quantum

The 2008 Preferred Core Strategy document indicated that the area south of Hawkwell should deliver 330 dwellings over a phasing period to post 2021 (see Policy H2 and H3 of that document). The SCS reduces the quantum of housing in this area to 175 but expects delivery by 2015. At a broader level the Preferred Options Core Strategy of 2008, (Policy H2) required 1,450 dwellings to 2015 and a further 1,050 by 2021. In the SCS the figures are now 775 and 1,010 respectively.

Since the SHLAA post dates the publication of the SCS, we are uncertain as to the reason why such a significant reduction in quantum of housing and extensions to the residential envelope is considered necessary. Presumably it is the 'new' strategy to redevelop existing employment areas within the settlements that has led to this change. Our representations on this strategy and specifically the Eldon Way Industrial Estate are included elsewhere within our representations. Previously we have commented on the Table at paragraph 4.6 of the Submission Core Strategy and the lack of evidence to underpin that table. It seems odd that in the space of a year the expected requirement for Greenfield sites has effectively halved on the basis of a SHLAA exercise. The community is therefore not able to effectively
comment on the housing land supply and at this stage the Submission Core Strategy is legally unsound.

That said, we are of the view that the quantum of housing envisaged south of Hockley/Hawkwell should be more than the 175 currently envisage. In coming to this view we have reviewed the Urban Capacity Study and the latest housing figures in the Annual Monitoring Report 2008. We conclude that the shortfall in housing land supply is such that 330 dwellings in this location is appropriate.

The recently published SHLAA is based upon the data obtained from the Urban Capacity Study 2007, a call for sites exercise and data from the Annual Monitoring Report 2008.

The 2007 Urban Capacity Study (UCS)

1. 2007 is widely recognised as being the peak level of house prices in the UK and it was acknowledged by Government and practitioners alike that 2007 house prices were at an unsustainable level. It is our view that utilising the 2007 UCS as an evidence base without reference to the market does not pick up the depressed demand that is likely to now exist. Recent corrections to the housing market now mean that housing land prices are at a much lower and arguably more affordable level than before. The implications are that some pdl may not be viable for housing development. Often brownfield sites have much higher development costs than Greenfield sites and so the yield from urban capacity will be much lower than anticipated in the 2007 study. One example is the employment allocation of the Adopted Local Plan located at 76-92 Main Road, Hawkwell. This site has been allocated for several years and has been available during the most recent rises in residential property prices during 2006-07. As a consequence the lack of progress on the site can only be described by its current occupancy and perhaps it comprises high value uses that do not encourage redevelopment. Despite this the site is identified as having high potential for alternative use and high potential demand. The SHLAA form notes that there is no information on legal constraints (e.g., tenancy agreements) As a consequence it is difficult to see how this could continue to be a potential site and as a consequence the allowance for green field releases should be increased.

2. There are considered to be other instances in the UCS and the recently published SHLAA where the assumptions and calculations would indicate that the 1301 urban capacity figure is over optimistic and the SHLAA assessment is limited. In the assessment of 'non-residential sites in appropriate locations' within the UCS assumptions are made as to the probability of sites coming forward for new housing. 68-72 West Street, Rochford is identified as a high probability site but we note that it has been subject to 7 refusals of planning permission/conservation consent. There is a significant gap between the urban capacity identified as being suitable by the Council and the capacity applied for by the owners. Given its alternate use value, it is debatable whether the two capacity figures can be reconciled. No 247 London Road is another example of a site allocated in the Local Plan but which hasn't come forward. This is now the subject of a proposal for a care home and if approved would further limit the scope for market/affordable housing capacity on the site. A striking example of how the urban capacity study has underestimated is also evidence by 2-4 Alderman's Hill, Hockley - described as a disused service station. There has been no residential development application on this site since 2004 and most recent applications have sought commercial use of the site. Rather than being evidence of housing land deliverability, this particular site evidences the need for commercial uses in the area. There are therefore deliverability doubts over these 'high probability' categories which amount to some 40 units.

3. In relation to the assessment in the UCS entitled 'intensification of existing residential uses' we note that the assessment is premised on an assessment of recent trends taking into account net completions between 2001-2006 and 2005-06. This is effectively an assessment of windfall trends and not an approach that PPS3 encourages. Importantly Table 3-12 in the urban capacity study seeks to project forward urban capacity from residential redevelopment - a period that benefited from high house prices and PPG3 guidance encouraging redevelopment. These two circumstances have markedly changed and so the assumptions and conclusions drawn would also have changed. Even taking into account the UCS discounting, the reliability of the 404 units from this source must be questioned and in our view the 1301 figure cannot be a sound basis for urban capacity and further Greenfield releases are necessary.

4. In the section of the UCS entitled 'subdivision of dwellings' and 'living above the shop' it is estimated that recent trends would result in 7 and 15 units. Our concerns with using trends as a basis for urban capacity are detailed above - PPS3 does not encourage this. Rather, local authorities are charged with surveying their areas, identifying which areas may yield urban capacity and how much and developing policies to achieve that. Government guidance does not encourage the estimation of windfalls in the way the UCS does.

5. Redevelopment of established employment land is a separate section within the UCS. At 1 above we identify the low probability of the Main Road residential allocation coming forward. This remaining section of the UCS considers 11 further employment sites which were first identified in the 2000 UCS. Three of these are considered to have a high probability of coming forward. We have looked at these three sites and can find no evidence that they are likely to come forward. In the 8 years between 2000 and 2008 the three identified high probability employment sites have not been developed and there is no reason to assume that the next 5-10 years will be any different. For example the Rawreth Industrial Estate is identified as being well used in the UCS and although it has some unneighbourly uses there is no indication that the site is available, suitable or deliverable for residential. Land between 39-69 Lower Lambricks, Rayleigh is identified as having a high probability of residential uses. Yet there is no
evidence of any pre-application advice or planning applications for this area. Stambridge Mills, Mill Lane, Stambridge is a further example. This site is separated from the urban area, in a flood risk zone and protected in the 2006 Replacement Local Plan by Policy EB9 which promotes B1 uses. Against this background there is only two relevant planning applications affecting this area both date from the early 1990’s and relate to a plant room and loading bay. There is no evidence that this is likely to come forward for residential purposes in the next 5-10 years.

6. In the UCS extant permissions are identified as 856 dwellings. It is important to note that this figure needs to be continually reassessed so that from the point of adoption of the Core Strategy a 5 and 10 year housing land supply is available. The SHLAA notes extant permissions for 2009-14 being 106. As noted below extant permissions do not necessarily translate into deliverable sites. There is therefore a contingency that needs to be built in. Further allocations on greenfield land need to be increased and as such the quantum of housing in the area south of Hockley/Hawkwell should be increased to 330 dwellings in order to begin to meet the shortfall identified.

7. The District Council's Annual Monitoring Report ("AMR") 2008 purports to demonstrate a 5 year housing land supply. The preamble to Table 4.10 in the AMR 2008 explains that Rochford District Council ("RDC") has included units under construction, units with full permission, units with outline permission, units with a resolution to grant, units subject to pre-application discussion/Urban Capacity Assessment and land allocations in its trajectory. The reader is referred to Appendix B which breaks down the sites in more detail. The recently published SHLAA also includes a table showing a potential 1273 dwellings deliverable. However, it refers to "appropriate brownfield sites." Since these 'appropriate sites' are do not benefit from an application or a planning permission it is difficult to programme them into the housing delivery trajectory.

8. In the full planning permission category of the AMR 2008 where work has not yet started there can be no guarantee that all these sites will be delivered in the 5 years. This comment relates to the one above in relation to the recently published SHLAA. It is not uncommon for permissions to be obtained to provide a means for valuing a site where the owner has no immediate plans to sell the site or develop housing. Delivery may also be hampered by funding constraints, or site assembly problems (where sites are in an alternative use or relocation constraints). Appendix B of the AMR 2008 does not set out the intentions of the landowner or whether the sites are truly achievable in the 5 year period as per PPS3 requirements. The SHLAA purports to show developer intentions at Appendix C but the assessment by the local authority into the legitimacy of some of the claims is not presented. The evidence base is not as full as it should be to demonstrate the robustness of Table 4.6 of the SCS. It is also unclear the extent to which this table is based on either the UCS 2007, AMR 2008, SHLAA 2009 or a combination of all three. This should be set out clearly.

9. In addition, to the 'non delivery' of a proportion of new homes in the AMR 2008, there is concern at the timings of delivery in that data set, for example, 10 units in 2008-2009 relates to outline planning permissions and it is doubtful whether reserved matters can be turned round quick enough to begin delivering housing in this year period. There could well be examples in that set of data where the delivery of units in the first year of the 5 is unlikely, thus delivery is reduced for that period and pushed back and this process is then compounded throughout the data set up to and beyond year 5. Statistical evidence from the Department of Communities and Local Government ("CLG") reveals that building starts are 43% down on the quarter to March 2009 compared with March 2008. It is not clear whether the recently published SHLAA has taken this into account and unless it does the data in the Table at 4.6 of the SCS cannot be relied upon, particularly given the current recessionary circumstances. In relation to the Table at Paragraph 4.6 a refinement is therefore needed to take into account this effect on phasing.

10. This problem is compounded for other units relied upon where permission has been granted but no start on site has been made; this accounts for a considerable number of sites in 2009-10 period (100 dwellings) which is (year 2 of the 5 year period). A delay in these will require more Greenfield sites to be identified in order to meet the shortfall.

11. Finally we note that the East of England Plan expresses its land supply requirement as a minimum. This strategy is not reflected in the

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
12. In summary since neither the UCS nor the Annual Monitoring Report form a SHLAA, reservations are maintained about the degree to which sufficient housing land has been identified.

Policy H3

In the Preferred Options Core Strategy 2008 more locations were identified for housing growth in the post 2021 phase. Whilst it is our view that land south of Hockley/Hawkwell should benefit from a greater number of dwellings than the 175 currently identified (330) in order to make the strategy effective. We are concerned at the significant change in strategy between the Preferred Option Core Strategy and the Submission version, which has significantly less housing growth on green field sites. This change in strategy is so significant that we would question whether it is appropriate in the context of soundness and the consultation processes that have taken place so far.

We also have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with other policies in the SCS and feel that Green Belt review should be more explicit throughout the SCS. As it currently stands there is a potential conflict with national policies and limited justification for the Green belt strategy. We note that in Policy H3, which indicates the need for Green Belt land review, the advice is limited and unclear. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded for the releases noted under Policy H2. Policy H3 then goes on to talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H3 and Policy GB1/H2 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that the review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary. Not to do so is unsound for justification and effectiveness reasons.

Policy H4 - Affordable Housing

As currently drafted we feel that the policy is not concise enough and that the policy does not reflect current guidance. The phrase 'at least' would indicate that in most cases affordable housing above 35% will be sought. Our understanding is that the 35% figure is recommended in the SHMA and that to provide a policy framework which seeks to go beyond that figure would potentially be unworkable as many sites could not financially bare the burden of over a third of the net developable area not yielding a value. The policy should be redrafted so that "a target of 35% affordable housing shall be provided on all developments of 15 or more units..."

The last policy paragraph provides some scope to relax this policy, if there are clear site constraints that make on site provision impossible. The policy, though, is not particularly clear on what would constitute exceptional circumstances. For example, physical site constraints, which unusually raise development costs, would be one such reason and this should be specified. There may be other reasons including the nature of housing needs in the part of the District the site is located which justify affordable housing below the 35% target. Design reasons may also have a bearing on how provision is made and in what form, particularly if the site is in an historic area where design might override housing need argument. It is therefore recommended that the policy expand on the type of circumstances where affordable housing may be relaxed and the type of information that will be sought of applicant's who have a need to invoke this part of the policy.

Policy H5

In support of the policy, it is advantageous that no percentages requiring a specific mix are included. This flexibility will enable developers and the Council to respond directly to changing circumstances in the local housing market. In the past some authorities have set out a percentage for the type of housing they require only to find that after a few years of strict implementation there is an oversupply of property of that type and no flexibility in the policy to address the problem.

Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford's main settlements to what essentially
would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Policy ED3

We fully support the first sentence of the Policy and note the apparent contradiction with the statements in Policy H1 and elsewhere which seeks to develop on alternative uses at industrial estates such as Eldon Way.

This contradiction is evidence in the second paragraph of Policy ED3. In our representations on Policy H1 we have explained why it is not sound to diminish the employment stock at Eldon Way and the importance of maintaining a dominance of employment type uses at this estate. These arguments are not repeated here.

We note the sentiments of the third paragraph and in accordance with our representations elsewhere are of the view that this sentence should be revised to explain that Eldon Way will accommodate principally employment type uses. As noted elsewhere uses which are an alternative to employment would diminish this highly sustainable employment site and this is unsound when assessed against National Policy.

Policy ED4 - Future Employment Allocations

In part, the de-allocation strategy is not supported as it is considered unsound when set against sustainability criteria. In relation to the Eldon Way Industrial Estate it is considered critical to the ongoing sustainability of this settlement that employment uses are maintained at this location. It is close to the railway station, bus routes and local residential areas from which the opportunity exists for employees to walk or cycle to work. Its location adjacent to the Town Centre offers opportunity for some retail and leisure development to complement the centre and to maintain a supporting function. These sustainable benefits would not occur with the deallocation of Eldon Way or the significant erosion of its employment floorspace. Whilst redevelopment of the employment site to achieve new employment is supported, the dominant land use should continue to be employment use. As a consequence, the 18ha of land required for employment in this policy is considered to be excessive and the policy should be reviewed to explain that redevelopment of existing employment sites for primarily new employment development will be encouraged.

Policy T4

It is noted that the South Essex Rapid Transit policy, as elaborated upon at paragraph 10.16 notes that Rochford is not served but may be served in future phases. This uncertainty is contrary to the delivery principles of soundness and directly puts at issue the employment land supply strategy in the District which is founded on sustainable access to new sites. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley, Rochford and Rayleigh is unsound.

Appendix H1, CTL1 - Infrastructure

It is recognised that necessary infrastructure provision is an important part of creating a sustainable development and in that context appendix H1 is supported. The supporting text notes that the table at Appendix H1 is not exhaustive and in that context it is very important that the framework properly distinguishes between what should be provided as part of new development schemes and what shouldn't. It is therefore essential that the framework acknowledges the importance of Circular 05/05 and the tests which say that provision of infrastructure and/or contributions should be:

* Relevant to planning
* Necessary to make the proposed development acceptable in planning terms
* Directly related to the proposed development
* Fairly and reasonably related in scale and kind to the proposed development
* Reasonable in all other respects

As is made clear (Paragraph B9 of Circular 5/05) contributions should not be used to make good existing deficiencies in infrastructure provision. Nor are they to be used to secure contributions to the achievement of wider planning objectives that are not necessary for consent to be granted. In that context the Core Strategy should set this out as its policy framework.

Policy GB1 - Green Belt

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The objectives of this policy are supported, although as noted in other representations the SCS is unsound as it does not meet the tests in relation to justification, compliance with national policy or effectiveness of strategy.

Policy GB1 mentions the objective to allocate the minimum amount of Green Belt land necessary. The policy should link to the requirements of PPG2 and RSS which are discussed in relation to the representations on Policy H2 and H3. The policy should set out a timeframe for the review and why Rochford requires a Green Belt review (what the exceptional circumstances are in this District that justify a review of local boundaries. The policy should be amended to set out a 2031 time frame and this may require the SCS to have an extended life span beyond 2021.

We would recommend the deletion of the word character since Green Belt designation is not related to landscape character as currently drafted. For clarity we would also recommend that the Policy or its supporting text explain that a Green Belt review will takes place in support of an allocations document (paragraph 6.6) in order to identify an appropriate new boundary. This is particularly necessary given the commitment to a Green belt review in the adopted Local Development Scheme.

Policy CLT1 - Planning Obligations and Standard Charges

In view of the need to test fully the basis on which standard charges are based it is important that any document produced is in a development plan document that enables an examination in public. The policy should explain this in order that when the document is produced it accords with Policy and is based on sound evidence.

ENV9 - Code for Sustainable Homes

Object. The advice from the Department of Communities and Local Government is that the new requirement to have a rating against the Code does not make it mandatory to build a Code home or to have each new home assessed against the Code. It does however mean that all buyers of new homes be given clear information about the sustainability of the new home. A house builder can do this in one of two ways:

- they can chose to build a Code home, have that home assessed against the Code and provide the home buyer with a Code certificate stating the star rating the home has achieved
- or, they can chose to build to current building regulations standards, not to pay for an assessment and instead download a nil-rated certificate of non-assessment (also referred to as a nil-rating) to provide to the home buyer.

As such the Rochford policy requirement that coding 3 be achieved by 2010 and Code 6 by 2013 is out of step with Government advice. The policy wording should explain that it is just the coding that is a requirement of new homes and not necessarily that new homes should be constructed to achieve a standard.

The current Government objectives are for the code to be introduced over a reasonable period with development to be code 3 by 2010, code level 4 by 2013 and code level by 2016. In this regard the policy, as drafted, seeks to achieve code 6 by 2013 and consequently compresses the code requirements into a shorter time scale with the costs associated expected to be subsumed within the housing market though higher prices. This is not a realistic strategy for the delivery of sustainable homes and we consider that the policy should be revised to extend the period of compliance but to also make it more flexible based on local circumstances.

Research undertaken on behalf of the Housing Corporation and English Partnerships, published in February 2007 ‘A cost review of the code for sustainable homes’ reveals that code 6 is unlikely to be unattainable given existing technologies and that achieving code 5 could result in a 12% to 20% increase in costs that would have to be passed onto the consumer. Given the variability of the housing market with peaks and troughs, it is unlikely that the housing market would be able to subsume this level of price increase.

The code system policy as currently drafted does not have regard to site circumstances and so many of the requirements could be difficult to meet. For example, micro electricity generation on site may be difficult to achieve where local circumstances deter the capture of wind or solar power. If more expensive technologies are required to generate power than is the norm then costs will rise. There may be other competing reasons why designs cannot include certain sustainability measures if housing sites are in sensitive landscape and historic locations. Alternatively there may be significant development costs associated with site specific circumstances and so viability of the site's development becomes a valid consideration. By insisting on the code for sustainable homes other policy objectives such as affordable housing at particular rates and other contributions may need to be reconsidered. Consequently, we are of the view that this policy should be drafted in a manner which enables site specific circumstances to be taken into account. As noted above the Government explains that the code is a certification requirement and does not necessarily mean that buildings are constructed in accordance with a code level.

It is also important to note that it is not the purpose of planning legislation to duplicate other legislation. In this regard, the policy should accept that the Building Regulations will be the main vehicle for implementing this policy and that unless the coding requires external development then there will be no need to specify what is to be carried out in a planning application.
CHAPTER 11  
Policy ED2 - London Southend Airport

Summary: Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford’s main settlements to what essentially would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Soundness Tests  iii
Previous consultations ignored by RDC:

i. The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

ii. The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Review policy

Summary: Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

No
Stambridge Mills Industrial site will be unsustainable for housing due to flood risk and the potential mitigation costs and therefore should be retained for light industrial use. Alternative site for housing needs to be allocated.

Summary: Stambridge Mills Industrial site will be unsustainable for housing due to flood risk and the potential mitigation costs and therefore should be retained for light industrial use. Alternative site for housing needs to be allocated.

Change to Plan: Do not believe this site is sustainable or deliverable for housing and an alternative site should be allocated. Stambridge Mills should be actively marketed as a light industrial site.

ROCHFORD DISTRICT COUNCIL - LOCAL DEVELOPMENT FRAMEWORK CORE STRATEGY SUBMISSION SEPTEMBER 2009

Iceni Projects Ltd (Iceni) has been instructed by Colonnade Land LLP (Colonnade) to submit representations to the Rochford Local Development Framework Core Strategy Submission (CSS).

a) Overview

It is our conclusion that the CSS is not justified, effective or consistent with national policy, as required by Planning Policy Statement 12: Creating Strong Safe and Prosperous Communities through Local Spatial Planning (PPS12) and is therefore vulnerable to being found unsound by an Inspector through the Examination in Public.

b) Background and Summary

These representations follow those made by Iceni on behalf of Colonnade to the Preferred Options Core Strategy, submitted via letter dated 17 December 2008. In this regard, we would request that the Council confirms that the representations made to the Preferred Options Core Strategy will be taken into account alongside the current representations, particularly as there are a number of cross references between the two sets of representations.

It is not considered necessary to reiterate the content of the previous representations, as they were made at the appropriate stage and will be considered by the Planning Inspectorate in due course, but it is inevitable that certain elements will require restating where it is not clear that they have been taken into account in the production of the CSS.

For clarity, therefore, Colonnade feel that it is appropriate to clarify the 'in-principle' issues that were raised in the representations to the Preferred Options Core Strategy, recognising that these issues were raised in the context of a wider and more coherent justification made within the representations:

• Further cross-referencing of the recommendations made within the evidence base is required;
• Greater focus should be placed on promoting Rochford as the principal settlement within the District;
• Coombes Farm is the most logical location for residential development abutting the urban area of Rochford and as such warrants recognition as a general location for residential development;
• The allocation of Three Ashes Farm for employment generating uses will be pursued;
• Recognition that it is not realistic to expect residential allocations to be met mainly on Brownfield sites, nor should the intensification of smaller sites in residential areas be pursued;
• Many of the sites identified as suitable for residential development will not be viable and will not come forward for development within the timescales anticipated;
• The failure to provide the necessary justification for the proposed infrastructure improvements sought in Appendix H1;
• The inclusion of an affordable housing exception policy was sought; and
• The need to identify sites capable of delivering employment growth in the short term.

Following assessment of the CSS presented by the Council for consultation prior to submission to the Secretary of State, Colonnade considers the Plan to be 'unsound' as the document consistently fails to meet the tests of soundness set out in the table following Paragraph 4.52 of PPS12. For clarity, PPS12 confirms that to be 'sound' a Core Strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY and defines 'justified' as "founded on a robust and credible evidence base" and "the most appropriate strategy when considered against the reasonable alternatives" and 'effective' as "deliverable", "flexible" and "able to be monitored".

The rationale for the above is identified in the remainder of these representations, which are provided in the interests of ensuring the Council delivers a strong, robust and logical Core Strategy that guides the future development of the District in a justified and effective manner.

b) Colonnade

As the Council is aware from previous submissions to the Local Development Framework, Colonnade is a strategic land company with a particular interest in the future development of the District as a consequence of a number of sites that it controls, particularly around Rochford.

The Council will also be aware that Colonnade has recently submitted an outline planning application for the residential development of the land at Coombes Farm, Rochford to provide a sustainable urban extension comprising up to 326
residential dwellings, with associated accesses and community uses. Whilst the planning application process is clearly separate from the Local Development Framework production process, Colonnade wishes to continue the promotion of the site as a suitable location for residential development.

Accordingly, these representations focus on the legal requirements and tests of soundness associated principally with the Housing and Employment chapters of the CSS, with reference where appropriate to the sites that are controlled by Colonnade, the outline planning application at Coombes Farm and other issues where relevant.

c) Housing

i. Date of Adoption

The CSS assumes an adoption date of 2010 and plans for the provision of housing to 2025.

Taking account of the potential delays to the adoption of the Plan, including the Examination process, it would be more appropriate for the CSS to provide sufficient flexibility to allow for delays in its adoption. Colonnade considers an adoption date of 2011 for the CSS is a more realistic target.

Taking account of the advice in Paragraph 4.13 of PPS12, which states that the time horizon for the Core Strategy should be "at least 15 years from the date of adoption" it would be appropriate for the CSS to plan for the provision of housing to 2026 at the earliest. As such, Colonnade does not consider the CSS to be 'flexible' in the context of the tests of soundness in the table following Paragraph 4.52 of PPS12.

ii. Housing Delivery

However, setting the above aside, the Housing Chapter identifies the minimum housing delivery target for the period 2001 to 2021 of 4,600 dwellings as set out in the East of England Plan, with the annual average requirement of 250 dwellings per annum to extend provision from 2021 to 2025. It also confirms that the residual target for the period 2006 to 2021 is 3,790 dwellings, taking account of the delivery of 810 dwellings in the period 2001 to 2006, and a further 618 dwellings have been completed between 2006 and 2008.

This leaves a residual housing provision target of a minimum of 3,172 dwellings in the period 2008 to 2021. Taking into account the required provision beyond 2021, the residual housing provision target in the period 2008 to 2025 is a minimum of 4,172 dwellings. The disparity between these figures and those provided within the CSS are explained by the rounding down of the annual average delivery requirement in the period 2006 to 2021 to 250 dwellings per annum, compared with the actual figure of 252.67.

The table at Paragraph 4.6 of the CSS identifies the source of housing provision that will meet the identified minimum requirements and includes figures for 'Extant Planning Permissions' and 'Existing allocations/other appropriate sites identified in Strategic Housing Land Availability Assessment'. These figures, along with the actual completions within the period are combined to produce the figure for the 'Total without Green Belt release' figure.

Setting aside the concern regarding under-provision associated with the rounding down of the annual average delivery requirement in the period 2006 to 2021, the CSS fails to identify the sites that will contribute to the 'Extant Planning Permissions' provision. The identification of the sites that will contribute to the 'Extant Planning Permissions' should be provided in the context of the findings of the Inspector in the appeal by Asprey Homes [APP/G5180/A/07/2043219/NWF] who determined that the reliance on a delivery rate of 100% is unsafe [IR287].

Furthermore, at the time of writing these representations, the Strategic Housing Land Availability Assessment 2009 has not been published. It is impossible therefore for a full assessment of the proposed housing provision to be undertaken to confirm whether the CSS is 'founded on a robust and credible evidence base' [test of soundness in the table following Paragraph 4.52 of PPS12].

iii. Redevelopment of Employment Sites

Paragraph 4.14 of the CSS refers to the identification of the four employment sites that are considered by the Council to be suitable for redevelopment to residential use. However, the failure to publish the Strategic Housing Land Availability Assessment 2009 either before or alongside the publication of the CSS means that the assumptions made by the Council as to the suitability, availability, viability and deliverability of the sites cannot be assessed.

It has been necessary, therefore, to review the assumptions made in the Rochford Urban Capacity Study 2007 (UCS) regarding the sites. Within the section of the UCS entitled 'Redevelopment of Established Employment Land' [pages 22 & 23] includes a list of those sites assessed, their indicative capacities and the probability of residential development coming forward at the sites within the plan period (identified elsewhere as 2001 - 2021). The list includes the four sites identified in the CSS of Eldon Way/Foundry Estate, Hockley; Rawreth Lane Industrial Estate, Rayleigh; Stambridge Mills; and Star Lane Industrial Estate, Great Wakering.

In total, the UCS identifies an indicative residential redevelopment capacity of 486 units on the four sites (118, 220, 60 and 88 respectively). Of these, it identifies the Rawreth Lane Industrial Estate and Stambridge Mills as having a 'high'
probability of coming forward for development in the Plan period (2001 - 2021), which would deliver 280 residential dwellings using the Council's own figures. The Star Lane Industrial Estate (referred to in the UCS as the Star Lane Brickworks) is identified as having a 'medium' probability of coming forward for development in the Plan period, with capacity to deliver 88 residential dwellings. It is unclear, therefore, where the figure for 'Existing allocations/other appropriate sites identified in Strategic Housing Land Availability Assessment'.

Set against this is the identification of these four sites in the CSS as being capable of delivery for residential development within the Plan period, with 671 units delivered between 2006 and 2015 and a further 506 units between 2015 and 2021.

The UCS also states in the same section that:

"There are considerable areas of land in the district that are currently allocated for, and in use as, employment land. The redevelopment of such sites for residential use would reduce demand for residential development on greenfield sites, but would at the same time create a need for alternative sites to be found for employment. Such an approach, which would be likely to require the decontamination of existing employment land to make it fit for residential use, together with development of a greenfield site and implementation of additional infrastructure to serve the new employment area, may well be unsustainable." [our emphasis]

The UCS appears to confirm therefore, that not only would the redevelopment of the four sites listed in the CSS be unlikely within the Plan period, but also potentially unsustainable. In this regard, it is notable that the promoters of Stambridge Mills sought the Screening Opinion of the Council as to whether Environmental Impact Assessment of the planning application for the redevelopment of the site for residential use was required in 2007, but to date are yet to submit a planning application for the redevelopment of the site.

In light of this, Colonnade does not consider the CSS is 'the most appropriate strategy when considered against the reasonable alternatives' [test of soundness in the table following Paragraph 4.52 of PPS12], which include the provision of residential development in East Rochford.

iv. Strategic Housing Growth to the East of Rochford

Furthermore, whilst paragraph 2.62 of the CSS identifies concern relating to the identification of locations to the east of Rochford for development on the basis that 'vehicular movements would inevitably be directed through Rochford's historic core', the CSS later identifies Stambridge Mills as a suitable site for residential redevelopment.

In light of the evident conflicts between the evidence base provided in support of the CSS and the absence of other evidence, the CSS is not considered 'sound' in the context of the tests of soundness in the table following Paragraph 4.52 of PPS12.

v. Housing Trajectory

Paragraph 4.28 of the CSS confirms that policies H1, H2 and H3 of the CSS will deliver housing supply as illustrated in the Housing Trajectory at Appendix H2. This Housing Trajectory is transposed from the 2008 Annual Monitoring Report (AMR).

Whilst on the face of it, the Housing Trajectory appears to confirm that the Council can meet its requirement to identify a five year housing supply, many of the sites identified within the AMR do not conform to the guidance issued by CLG in August 2008, on the assessment of a five year land supply. The guidance identifies sites that can be included within the five year assessment of housing supply as:

"those that are allocated for housing in the Development Plan, sites that have planning permission (outline or full planning permission that has not been implemented) and specific, unallocated brownfield sites that have the potential to make a significant contribution to housing delivery during the 5 year period".

Table 4.10: Projected Net Completions of the AMR confirms that the five year housing land supply figure includes sites from 'other land allocated for residential purposes', which are based on land allocations outside existing settlements. However, it should be clarified that these land allocations are not currently allocated for housing development in an adopted Development Plan. As such, these unallocated greenfield sites that are yet to make significant progress through the planning system should be discounted and the five year housing land supply recalculated.

The table below has been prepared to confirm the extent of the shortfall should the sites from 'other land allocated for residential purposes' be removed from the calculation of the Rochford five year housing land supply, in accordance with the guidance issued by CLG:

Recalculated Five Year Housing Land Supply (2009 - 2014):

Year
1st April 2009 to 31st March 2010
Predicted Delivery (A)

**TOTAL**

Predicted Delivery (A) 1,562 dwellings

Allocations on ‘other land allocated for residential purposes’ (B) 1,125 dwellings

Residual delivery (A-B) 437 dwellings

Delivery Shortfall 1,125 dwellings

The above table confirms that the removal of the ‘other land allocated for residential purposes’ from the calculation of the Rochford five year housing land supply leaves the Council with a minimum net additional housing delivery of 437 dwellings, which equates to a supply of 1.7 years based on the adjusted annual delivery target of a minimum of 255 net dwellings.
additional dwellings per annum. As such, the Council is failing to meet its requirement to demonstrate a five year housing land supply in accordance with PPS3 and the supporting guidance provided by CLG. It is notable that the recent application by David Wilson Homes at Land between Main Road and Rectory Road and Clements Hall Way, Hawkhall identifies an even greater shortfall in the Council's five year housing land supply.

In addition to the above, the AMR does not include a commentary on how deliverability has been assessed against the requirements of paragraph 54 of PPS3.

Furthermore, the guidance from CLG confirms that the windfall sites cannot be relied upon in demonstrating a five year supply unless a Local Planning Authority can demonstrate genuine local circumstances exist to allow this exception. However, the second paragraph of the section entitled 'Housing Trajectory and Five Year Housing Supply' confirms that the estimated completions in the years 2008 to 2013 includes estimated yields through 'intensification' coming forward in future years. With reference to the definition of 'intensification' on page 13 of the AMR, it appears that the 'Housing Trajectory and Five Year Housing Supply' also includes provision for windfall sites. As such, the Council is required to demonstrate the 'genuine local circumstances exist to allow this exception'.

The pressures on delivery and need for additional sites are more acute when it is considered that an average delivery rate of 204 dwellings per annum was achieved during a strong period of housing market growth. In view of the current economic downturn, and significant problems faced within the housing market, the Council should seek to identify appropriate and deliverable sites to meet its regional housing target provision commitments. Suitable sites would include Coombes Farm, which has been positively promoted for development through the LDF process.

It may, therefore, be more appropriate for the Council not merely to allocate sufficient sites to meet the minimum targets set down by the East of England Plan, but to identify a reservoir of land capable of coming forward for development should the sites identified through the CSS and Allocations Development Plan Documents (DPD) fail to come forward for development within the anticipated timescales.

vi. Appendix H1

As set out in the representations to the Preferred Options Core Strategy, there is continuing concern that the list of improvements to infrastructure required in support of residential development as set out in Appendix H1 fails to provide the necessary justification for its inclusion. Whilst the preamble seeks to clarify why the infrastructure is sought, the inclusion of this list should be fully justified, otherwise it is of little value. Furthermore, it would be of benefit to provide further details of the existing community infrastructure provision and capacity within the evidence base.

The failure to provide the necessary justification for its inclusion means that the CSS will not be 'founded on a robust and credible evidence base' [test of soundness in the table following Paragraph 4.52 of PPS12].

d) Character of Place

As set out in the representations to the Preferred Options Core Strategy, Colonnade considers that, with respect to the requirement to produce and adhere to Development Briefs for large residential developments, as set out in Policy CP1, the Council should not seek to impose further demands on developers where existing regulations provide sufficient requirements regarding design. In this instance, Design and Access Statements provide sufficient design guidelines for developments and there is no additional information provided in the policy or supporting text that clearly sets out the justification for this requirement.

e) Green Belt

With reference to the comments regarding the redevelopment of employment sites under the 'Housing' section above and the requirement to allocate sufficient land to meet the minimum housing provision targets as required by the East of England Plan, Colonnade considers that the chapter on Green Belt, and policy GB1 in particular, fails to provide the necessary evidence base that will allow it to be monitored effectively.

It is inherent that the proposed redevelopment of previously developed employment sites for residential use in order to reduce the requirement to allocate previously undeveloped land for residential use will displace these employment uses. In turn, therefore, the separate allocation of previously undeveloped Green Belt to accommodate the compensatory employment provision is required. This is accepted in principle at paragraph 11.11 of the CSS.

Without providing clarification of the anticipated quantum of land required to accommodate the provision of housing and compensatory and new employment land, it is not possible to monitor the performance of policy GB1.

However, using the Council's figures in the table setting out the breakdown of the housing provision figures in Chapter 4 of the CSS (assuming that actual completions and extant permissions are all on previously developed land), setting aside the displacement of employment uses referred to above, approximately 42% of the required minimum housing provision target is capable of being accommodated on previously developed land (2,005 units from a total of 4,750). As such, the Council is required to provide at least 58% of the required minimum housing provision target on the Green Belt (2,745 units from a total of 4,750).
If these figures are adjusted to take account of the displacement of employment uses (assuming the provision of an equal quantity of land is required to compensate for the employment land that is redeveloped), this figure changes to 17.5% on previously developed land and 82.5% on Green Belt (828 and 3,922 units from a total of 4,750 respectively). Even allowing for the achievement of higher densities of employment on new developments, the figures above are unlikely to change significantly.

Furthermore, the table in Chapter 4 also confirms that no previously developed land will be available for development beyond 2021, or 2015 if account is taken of the displacement of the employment uses.

In light of this, not only does Chapter 6 fail to provide the necessary evidence base that will allow it to be monitored effectively, it is also necessary to consider whether it presents the most appropriate strategy for addressing the required release of Green Belt land to accommodate the defined housing and employment delivery targets to 2025 and beyond as necessary. Colonnade considers a more robust approach that is flexible and capable of being monitored, would be to clearly identify those sites capable of delivery in the short term, which for the avoidance of doubt includes those sites being promoted by Colonnade, with a reservoir of alternative sites set aside for future growth.

As set out in the representations to the Preferred Options Core Strategy, Colonnade considers that the inclusion of an affordable housing exception policy within the CSS will aid the delivery of community housing within rural areas. However, the CSS does not contain such a policy, or adequately address the issue of community housing within rural areas and the CSS is not considered to provide sufficient flexibility to allow for the delivery of essential rural housing.

f) Environmental Issues

Colonnade has concerns regarding the justification for and effectiveness of a number of the policies contained within the Environmental Issues chapter, as follows:

â€¢ Policy ENV1: The Council fails to identify how it will "maintain, restore and enhance" the sites of nature conservation importance that are identified, or how the performance of this policy will be monitored;

â€¢ Policy ENV3: In the context of the advice at paragraph 4.32 of PPS12 regarding the reformulation of national policies, Colonnade does not consider that this policy is required; and

â€¢ Policy ENV9: As set out in the representations to the Preferred Options Core Strategy, Colonnade does not consider that the necessary evidence base has been provided to justify a policy that seeks to go above and beyond the policy targets for the Code for Sustainable Homes as set out by Central Government.

g) Community Infrastructure, Leisure and Tourism

Policy CLT1 refers to the requirement for residential and employment development to contribute to the infrastructure identified in Appendix CLT1 through Standard Charges.

However, whilst the general principle of securing planning obligations through the application of standard charges is broadly accepted, the list of infrastructure requirements set out in Appendix CLT1 is not supported by sufficient evidence base to identify its robustness and credibility. As such, Colonnade does not consider either policy CLT1 or Appendix CLT1 is justified in the context of PPS12.

It is also noted that, despite the clarification sought by Colonnade at the Core Strategy Preferred Options stage, the CSS fails to confirm what information should be contained within Health Impact Assessments, which are required by policy CLT4. Once again, Colonnade requests further clarification of what is involved in the assessment and the expected outputs, which will provide greater clarity and will allow the policy to be monitored.

h) Transport

Policy T8 confirms that the Council will apply minimum parking standards. As set out in the representations to the Preferred Options Core Strategy, the guidance in Planning Policy Guidance Note 13: Transport (PPG13) is clear regarding the imposition of parking standards.

Paragraphs 52-56 of PPG13 confirm that the Local Planning Authorities should apply maximum not minimum parking standards. In order to satisfy the legal requirements set out in PPS12, the policy must reflect PPG13 to promote sustainable transport choices and further provide incentives for developers to locate further residential land closer to local service centres by requiring maximum parking standards for residential developments.

i) Economic Development

As set out in the representations to the Preferred Options Core Strategy, the land at Three Ashes Farm provides an excellent opportunity to deliver employment growth in the short term and may be a suitable site for the 'Eco-Innovation Centre' that is being promoted by the Council. Its identification as a suitable location for strategic employment growth, or the provision of an Eco-Innovation Centre, would accord with the general principles of the policies contained within Chapter 11.
16259 Object
CHAPTER 11 Existing Employment Land, 11.32

The identification of Purdeys Industrial Estate as fit for purpose (in paragraph 11.32 and the Council's 2008 Employment Land Study 2008) and therefore it should be maintained and if possible expanded, is welcomed and Colonnade considers that Three Ashes Farm could deliver this expansion, providing a natural extension to Purdeys Industrial Estate and being strategically located close to the Airport.

Three Ashes would address the negative impacts that the nearby residential area experiences from the existing Industrial Estate by providing a buffer between established uses and the residential area with less intensive employment activities. The highways analysis that has been carried out has suggested that it would not have an adverse impact on roads and congestion. Furthermore, there are very few opportunities for businesses to expand and Three Ashes could provide this opportunity.

j) Conclusions

Following the submission of representations to the Preferred Options Core Strategy, Colonnade is disappointed to note that the CSS fails to take account of the majority of the issues raised in their representations.

In addition, Colonnade considers the plan to be 'unsound' as the document consistently fails to meet the tests of soundness set out in the table following Paragraph 4.52 of PPS12 and respectfully requests that the Council notifies Iceni, on behalf of Colonnade, of the future arrangements for the Examination of the Core Strategy. Furthermore, Colonnade wishes to take this opportunity to formally register a request to appear at all stages of the Examination in Public, including the pre-hearing meeting and any planned hearing sessions whereby issues raised in the context of this letter are to be discussed. Please confirm this request, and that the representations made to the Preferred Options Core Strategy will be taken into account alongside the current representations, by way of return to this letter.

Iceni Projects, on behalf of Colonnade Land LLP trusts that the Council will find these representations to be constructive and helpful in taking forward the Core Strategy. Should you wish to discuss any aspect of these representations further, please do not hesitate to contact us.

Summary:

As set out in the representations to the Preferred Options Core Strategy, the land at Three Ashes Farm provides an excellent opportunity to deliver employment growth in the short term and may be a suitable site for the 'Eco-Innovation Centre' that is being promoted by the Council. Its identification as a suitable location for strategic employment growth, or the provision of an Eco-Innovation Centre, would accord with the general principles of the policies contained within Chapter 11.

The identification of Purdeys Industrial Estate as fit for purpose (in paragraph 11.32 and the Council's 2008 Employment Land Study 2008) and therefore it should be maintained and if possible expanded, is welcomed and Colonnade considers that Three Ashes Farm could deliver this expansion, providing a natural extension to Purdeys Industrial Estate and being strategically located close to the Airport.

Three Ashes would address the negative impacts that the nearby residential area experiences from the existing Industrial Estate by providing a buffer between established uses and the residential area with less intensive employment activities. The highways analysis that has been carried out has suggested that it would not have an adverse impact on roads and congestion. Furthermore, there are very few opportunities for businesses to expand and Three Ashes could provide this opportunity.

Soundness Tests i

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* (EC7.5 i) "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Plan.
Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.*

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC: The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.
   - The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.
   - The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error.
   - The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned; The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "We recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre."

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.  2) "There is no immediate capacity for additional floor space."  3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Change to Plan

Appear at exam? Not Specified

Soundness Tests i
Please find the following objections: -

1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only “potential” to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC not consulted on proposals to relocate the Eldon Way and Foundry Industrial Estates

EW; CS Strategy stated “we will look at opportunities for more valuable and appropriate uses of the industrial land” absolutely no consultation on concept of moving EW businesses entirely

FIE; has never even been previously mentioned in any plan version; CS states omission was due to typing error!

Urban Capacity study stated a “low probability” of housing and did not even mention the Foundry Estate

Thus proposals are not founded on a robust and credible evidence base and are unsound.

8. The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.
There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The CS misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The CS states "The R&LS states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS actually states:

1) "does not lend itself to a food store capable of retaining a significant proportion of main food shopping expenditure."
2) "there is no immediate capacity for additional floor space."
3) "recommend that focus be maintained on developing Hockley's existing strengths."
4) "the Council may wish to consider reclassifying Hockley from a town center, to a district center".

Summary: 6. Previous consultations ignored by RDC: The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Change to Plan

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; asEc (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question): "Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is
also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been
given to the implications for highways across the District. Many roads across the District are at or near capacity but no
modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry
Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of
improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and
costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund
infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to
identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the
District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are
proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the
railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific
development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and
costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail
is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard
Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy
acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal
is therefore unsound.

Previous consultations ignored by RDC:
â€¢ The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing
development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open
spaces, and no large housing estate developments. It was also stated that any developments must be matched by the
appropriate levels of infrastructure.

â€¢ The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP)
Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the
adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP)
Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the
adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence baseand are unsound

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

â€¢ The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the
industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

â€¢ the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment
to the Core Strategy states this omission was due to a typing error!

â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
CHAPTER 11

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary: The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.28) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) (10.31) "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary: The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential. Objections to RDC's Core Strategy Submission DPD

Reason Unsound

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs not, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which doe not indicate how such applications will be handled and does not comply with...
PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace.”

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space.”

3) (10.29) “we recommend that focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”.

4) 10.31 “The current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre”.

The Core Strategy is inaccurate, misleading and unsound.

Summary:

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

CHAPTER 11

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.
CHAPTER 11  

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to
the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29 "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion."

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6."
Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states “The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace”. Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley’s existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Summary: Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Change to Plan

Appear at exam? Not Specified Soundness Tests
1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport inks, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in
16550 Object

CHAPTER 11 Existing Employment Land, 11.32

the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.
7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates. The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned. The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate. Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a “village green, introducing a significant area of public open space”. There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core Strategies shoule be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which doe not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace". Whereas, the R&LS actually states:

1) (10.26) “the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
1) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; &gt; EC7.3C “out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres. &gt; EC7.5 1 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”. The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The ”Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

“Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.
Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
• The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The Foundry Industrial Estate has never even been previously mentioned; the Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate. Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) (10.31) "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:
Previous consultations ignored by RDC:

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1
Para 4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road...renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009
June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential..." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport
Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para 10.5 "...highway improvements serving new developments...in a timely manner...ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009
Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No7 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.)
Para.1.25, Para.11.32  Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii) "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres
The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para.12.38  The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace”.

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.
The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.
One doesn’t perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists
Para. 5.4 "Rochford district has unique character...stems from traditional buildings...still dominate towns and villages".

Para. 5.17 "Council believes many buildings are of local distinctiveness...part of...cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, façade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area[i]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane:); others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion
Core Strategy Submission DPD is basically unsound in many respects
Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people...to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary: Para.1.25, Para.11.32 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized...alternative land will be required to

Full Text: Ch. 4 Housing; Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable”. Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential...” to be decided by HAAP (issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1
T1 & T2 ".highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. ",alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of../transport and...close to centre and...high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)"reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character...stems from traditional buildings...still dominate towns and villages". Para.5.17 "Council believes many buildings...are of local distinctiveness...part of...cherished local scene".

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process". In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people...to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible". Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed at JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary: Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Our main concern is the re-development of industrial areas where this is out of town and means more travel for employees. We do not want to see industrial areas move away from towns because of the pressure of housing policy.

Full Text: The proposed re-allocation of the existing employment uses identified in the DPD is unsound. Having undertaken an assessment of their suitability and deliverability for residential or alternative uses, the sites at Hockley, Rawreth and Wakering are occupied by multiple users which would be difficult to relocate. Rawreth is characterised by a number of heavy industrial users which is likely to have caused significant contamination, which may prove unviable to remediate. Stambridge Mills whilst vacant, is highly unsustainable for a residential use, and is within Flood Risk Zone 3b, and therefore unlikely to pass the Exceptions Test.

Summary: The proposed re-allocation of the existing employment uses identified in the DPD is unsound. Having undertaken an assessment of their suitability and deliverability for residential or alternative uses, the sites at Hockley, Rawreth and Wakering are occupied by multiple users which would be difficult to relocate. Rawreth is characterised by a number of heavy industrial users which is likely to have caused significant contamination, which may prove unviable to remediate. Stambridge Mills whilst vacant, is highly unsustainable for a residential use, and is within Flood Risk Zone 3b, and therefore unlikely to pass the Exceptions Test.

Change to Plan: The four employment sites which have been identified for re-allocation should be deleted from the DPD. They are not deliverable in the timeframe identified in the housing trajectory. Additional broad locations to accommodate future housing growth involving a Green Belt review should be identified in the Plan period.

Previous consultations and public opinion ignored by RDC and HAAP pre-empted:
As well as ignoring the Parish Plan and the 95% rejection rate of the HAAP proposals, the Core Strategy proposals pre-empt the next round of the HAAP.

Public opinion in Hockley is strongly against both the HAAP and Core Strategy proposals for Hockley Village Centre. A survey undertaken in October 2009 had 972 responses (over 20% of households) and the key results were:
- shops: only 5% in favour of major redevelopment (43% supported moderate redevelopment and 52% only wanted minor improvements)
- Eldon Way & Foundry Industrial Estates: just 13% wanted major change with a youth centre suggested as the most popular improvement.
- Roads: nearly 2/3rds wanted to retain a roundabout at the Spa Junction instead of traffic lights proposed by RDC.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC and HAAP pre-empted:
The proposals ignore both the Parish Plan and the 95% rejection rate of respondents to RDC's own HAAP Consultation (2009), which included specific proposals for Eldon Way (but did not even mention the Foundry Industrial Estate).
A survey completed by 972 residents in October 2009 also confirmed the public’s rejection with only 5% in favour of redeveloping the shops and only 13% supporting redevelopment of the industrial estate.
Thus the proposals are not founded on a robust and credible evidence base and are unsound.

The re-allocation of the sites at Stambridge Mills and Star Lane Industrial Estate is supported. Both Stambridge Mills and the former brickworks site at Star Lane (part of the Star Lane Industrial Estate site) have long been vacant. The redevelopment of these sites will minimise the need to release Green Belt land, and will allow for the removal of contamination, the re-use of existing on-site materials, and the environmental and ecological enhancement of the land and surrounding areas.
As we have suggested in our representations regarding Housing, we question the ability to deliver all of the 4 employment sites identified for redevelopment in the Core Strategy (within the plan period). This is particularly the case for the Rawreth Lane Industrial Estate, Rayleigh.

We have serious doubts that the Rawreth Industrial Estate (identified for 220 units 2017/18 to 2019/20) will come forward for residential development. As we understand it, there are a considerable number of different landownerships involved. There are also many different tenants/occupiers. This suggests that land assembly, to enable a comprehensive development (the only way, we suggest, that development of this estate could take place) will be more than problematic and will take a considerable number of years to achieve (if at all). Even if other/alternative site/land is identified for the possible relocation of existing occupiers, there is no guarantee that occupiers would want to relocate, with the possibility of incurring greater costs in new premises. Occupiers may be happy to stay where they are unless they wish to expand or upgrade premises.

We also think that there could be serious contamination issues at this site, further affecting delivery of a housing scheme/affecting development costs.

We are not aware that the council would have the will or the finances to undertake compulsory purchase to enable the sites redevelopment.

We are not aware that the council has contacted all or any of these landowners or occupiers to ascertain the potential to assemble land and deliver the redevelopment of this site.

Whilst we understand that the site gives rise to amenity nuisance to local residents, we are surprised that the council want to redevelop a successful commercial site that provides many jobs. The Employment Land Study (Oct 08) clearly states that buildings on this site are generally of good quality and that there is no vacant land or buildings at the time of survey. This indicates much success, and its proposed redevelopment could therefore result in the loss of important jobs.

This is just one example where we believe delivery of housing numbers on brownfield sites will be affected by land assembly or other constraints.

The council needs to demonstrate how they intend to deliver the 4 redevelopment sites identified in this policy, and put forward evidence they believe shows that such redevelopment can take place. If there are serious questions over delivery, such sites should not be identified for redevelopment. In any case, we question the wisdom of the identification of the Rawreth Lane site as it provides jobs and is well used, perhaps a site that complies with the first statement of the first part of Policy ED3. In the current climate, this seems an inappropriate strategy, as existing jobs should be retained rather than run the risk of losing existing employment opportunities.

Summary:
We argue that there are serious delivery issues with some of the redevelopment sites identified in this policy, particularly the Rawreth Lane industrial site. To ensure housing numbers are delivered/housing targets will be met and ensure the plan is flexible, we argue that the council should:

(a) Bring forward one/some of the greenfield sites identified for 2015 onwards
(b) Ensure that there is the ability to provide additional housing numbers at one or more of the identified Greenfield sites.
(c) The Rawreth Lane Industrial estate be dropped from this policy/not allocated for residential development.

Change to Plan
As put forward in our representations to Policies H1 and H2 of the Core Strategy, we believe that as these employment redevelopment sites can not be relied upon to deliver housing during the plan period. We suggest that either the sites are dropped because of the serious constraints in delivery, or that if they remain identified, greater flexibility should be built into the Core Strategy to cover the likelihood that some of these sites (particularly Rawreth Lane) do not come forward in the time periods specified. To achieve this flexibility, there is a direct implication for the identified Greenfield sites. The plan should:

(a) Bring forward those greenfield sites identified for 2015 onwards to provide some certainty that national/regional housing targets and annual build rates/5 year land supply can be met/achieved.
(b) Ensure that there is the ability to provide additional housing numbers at one or more of the identified Greenfield sites. Housing numbers specified in Policy H2 should be minimums in any case, and a statement should be added to that
policy which says something along the lines that "there may be a possible requirement for greater housing numbers on some sites should other sources of housing, such as that on identified appropriate brownfield sites, not come forward as anticipated".

OR

(c) As we suggest, the Rawreth Lane site will be particularly difficult to deliver. Whether it is dropped from this policy, or retained, an appropriate strategy would be to allocate additional housing numbers on the land we promote, north of London Road, Rayleigh, to cover the possibility of failing to deliver housing on the Rawreth Lane site/in Rayleigh. We believe that the land we promote can accommodate a greater number of housing units than that specified in Policy H2. We cover this matter further in our representations to Policy H2.

We believe these approaches to be sensible and flexible. This will allow for appropriate flexibility in the plan, and we contest would make the plan sound.

This strategy would not, we believe, prejudice the aim of developing brownfield or previously developed land as such land will come forward as a result of interest in such sites/the market, notwithstanding the development of Greenfield sites.

Appear at exam? Yes

Soundness Tests i, ii
In order to meet the 3,000 new jobs required in the RSS, additional employment sites will be required, as the supply of employment land within the District is tight, any new sites will be require the release of Green Belt land. As these sites will be outside of the existing urban areas, it is unlikely that these sites will be in as sustainable locations as the existing employment sites.

The Employment Land Study recommends that any de-allocations of employment land be compensated for by the allocation of circa 18 hectares of land for new employment sites in the District.

The idea of not releasing land for residential and then releasing it for employment purposes is a contradiction, as it still requires the release of Green Belt.

With regards the site at Stambridge Mill, it is considered that this site should be safeguarded for light industrial use, instead of being redeveloped for housing; particularly, as this site is subject to a high risk of flood risk (Zone 3), and its redevelopment for residential would replace a less vulnerable use (employment) being replaced with a more vulnerable use (residential).

Reword first two paragraphs of the policy:

‘Existing employment sites, which are sustainable, will be protected to ensure that they continue to provide employment generated opportunities, including the redevelopment for other employment uses.

As part of the review of existing employment sites, the Council will consider the reallocation of land at Star Land Industrial Estate, Eldon Way/ Foundry Industrial Estate and Rawreth Industrial Estate for appropriate uses, which should include a proportion of employment uses. Land capable of accommodating the business and industries that currently occupy these sites but would not be appropriate to be incorporated into their redevelopment will be allocated in new locations in accordance with Policy ED4.’

Summary:
In order to meet the 3,000 new jobs required in the RSS, additional employment sites will be required, as the supply of employment land within the District is tight, any new sites will be require the release of Green Belt land. As these sites will be outside of the existing urban areas, it is unlikely that these sites will be in as sustainable locations as the existing employment sites.

Land capable of accommodating the business and industries that currently occupy these sites but would not be appropriate to be incorporated into their redevelopment will be allocated in new locations in accordance with Policy ED4.’
I object to the Core Strategy for the following reasons:

You are ignoring the views of the local residents, who have overwhelmingly stated via the Hockley Parish Plan that they do not want any large-scale housing development in Hockley, but if there has to be some additional housing, there must be no loss of greenbelt or open spaces and any developments must be matched by the appropriate levels of infrastructure.

Our village needs improvements to build on what we have now rather than a long drawn out proposal, which, by the time it is agreed and completed will have seen Hockley become just a huge housing estate without a thriving centre, because many local businesses will have disappeared due to the dreadfully inadequate transport links.

Our roads simply cannot cope with the existing traffic volumes let alone the massive increase in traffic, which will result from the relocation of businesses and numerous housing developments. Our village is surrounded by some of the most beautiful countryside in the district which we do not want to see disappear forever.

Listed below are some of the technical points as to why I object to the Core Strategy and why I believe it to be inaccurate, misleading and unsound.

By proposing to move employment at Hockley's two business estates to a green field site near the airport, which has no existing public transport links and being 2-3 miles from the nearest railway station, is contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions by placing a reliance on car transport as a means of getting to work.

Though RDC are proposing to upgrade the nearest road to a dual carriageway, the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway. This road is already horrendously busy and virtually grid locked at peak times, so this is quite unbelievable that with the predicted expansion of the airport and new industrial estate, there is no provision for the improvement of the B1013 through Hockley. The proposed development of the business estates for housing (and additional housing proposed for Hawkwell) also means an increase in the volume of traffic in the Hockley area with no provision for improvement or expansion to cope with the higher volume.

The site selected for the new industrial estate contravenes PPS4, which states that for "out-of-centre sites, preference is given to sites which are or will be well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car and which are close to the centre and have a high likelihood of forming links with the centre. As there is no existing public transport, there is no obvious likelihood of forming links with any existing centres. In addition, because of its remote location, accessed by the narrow, busy B1013; it is not suitable for access by cycle or on foot.

It also contravenes PPS1, which states reducing the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

PPS12 4.9 states the infrastructure planning process should identify, as far as possible: infrastructure needs and costs. Neither needs nor, especially, costs have been identified. The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.
Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned. No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation. Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. There no cross-referencing between concurrent plans affecting the exact same piece of land.

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent, which HAAP will need to follow, and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. It states "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floor space".

What the R&LS actually states is:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure."
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Invest in what we already have rather than forcing upon us something none of us have asked for. Most people would agree that Hockley needs a facelift but it does not need changing beyond all recognition. This strategy does not propose to deal with the issues that affect this area now, and does not propose to deal with these same issues that will be exacerbated further by the proposals that are being made. Attached are some ideas for relatively quickly achievable solutions, which would enhance the village and deal with some of the traffic problems, without losing "Hockley". We live here because we like it - if we didn't we would have moved!

Make the Spa Pub the roundabout, which would greatly reduce the junction exit combinations that exist at the current mini roundabout.

Traffic will still be able to flow when the brewery lorry parks up - it is very dangerous trying to manoeuvre round it onto that mini roundabout, as you cannot see vehicles coming the other way.
Hockley Ideas:

Demolish the "Alldays" building and use that space to create the "village square", which could be landscaped or used in the way the Rayleigh Market car park is used - farmers markets, market days, parking on non market days. This would maintain the existing focal point of Hockley, the High Street, therefore not being detrimental to the shops on the other side of the road. It would also provide a possible link to the Leisure facilities in Eldon Way.

Summary:

By proposing to move employment at Hockley's two business estates to a green field site near the airport, which has no existing public transport links and being 2-3 miles from the nearest railway station, is contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions by placing a reliance on car transport as a means of getting to work.

Though RDC are proposing to upgrade the nearest road to a dual carriageway, the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway. This road is already horrendously busy and virtually grid locked at peak times, so this is quite unbelievable that with the predicted expansion of the airport and new industrial estate, there is no provision for the improvement of the B1013 through Hockley. The proposed development of the business estates for housing (and additional housing proposed for Hawkwell) also means an increase in the volume of traffic in the Hockley area with no provision for improvement or expansion to cope with the higher volume.

The site selected for the new industrial estate contravenes PPS4, which states that for "out-of-centre sites, preference is given to sites which are or will be well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car and which are close to the centre and have a high likelihood of forming links with the centre. As there is no existing public transport, there is no obvious likelihood of forming links with any existing centres. In addition, because of its remote location, accessed by the narrow, busy B1013; it is not suitable for access by cycle or on foot.

It also contravenes PPS1, which states reducing the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

PPS12 4.9 states the infrastructure planning process should identify, as far as possible: infrastructure needs and costs. Neither needs nor, especially, costs have been identified. The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Change to Plan

Appear at exam? Not Specified Soundness Tests i
Paragraph 11.32 states that 18.1h of employment land will be de-allocated. However, Policy ED3 states that ‘other appropriate uses’ may include a proportion of employment uses. This means that the net loss of employment land could be less than 18.1h. If the net area is less, and the potential alternative uses are wider than just residential, the potential residential yield of 795 units (see Breakdown of Trajectory by Source p57) may be significantly less.

The Core Strategy does not deal with the issue of the timing inter-relationship between Policy ED3 and Policy ED4. There are a range of outcomes, the most extreme of which are

(a) the ED3 ‘deallocated’ sites are redeveloped for other uses very quickly, but the new ED4 employment sites come forward more slowly. In these circumstances, there could be a severe reduction in the availability of employment land in the District with associated adverse affects on the local economy

(b) the ED3 ‘deallocated’ sites are not redeveloped for other uses but the new ED4 sites come forward quickly. In these circumstances there could be an excess supply of employment land in the District.

The Core Strategy should explicitly recognise these potential outcomes and include the contingencies that would be put in place to avoid either an over supply or under supply of employment land.

Policy ED4 also does not consider the nature of the employment sectors which the deallocated ED3 sites serve compared to those which the new ED4 sites will serve. By definition, the employment sites proposed to be deallocated are poor quality industrial areas containing low grade premises. However, this also means these are inexpensive premises which are well suited to new start up firms or those types of firms which cannot afford high rental premises. In contrast, the new ED4 employment sites will be newly built premises which will inevitably command a much higher rental which most of the firms displaced from the ED3 sites will not be able to afford. The Core Strategy should deal with this issue by providing evidence that there are sufficient other low rental premises available in Rochford District to accommodate displaced businesses. There is a danger that the Core Strategy proposals will have unintentional adverse consequences in removing a tier of low value employment accommodation and providing no viable replacement for the displaced occupiers.

Policies ED3 and ED4 need to be reassessed
- to deal with the timing inter-relationship between Policies ED3 and ED4
- to confirm that sufficient low value employment premises remain in the District to accommodate the firms displaced from the deallocated ED3 sites. If insufficient land remains, the sites proposed to be deallocated will need to be reassessed to see whether some would be more appropriately retained in low value employment use. This in turn, could impact on the housing yield anticipated from the ED3 sites.

It is considered that our participation at the oral part of the public examination would assist the Inspector for two main reasons
- Sellwood Planning has a detailed knowledge of the Rochford area, appeared at the last Local Plan Inquiry and was a participant at the RSS public examination. This direct knowledge of the local area and the statutory Development Plan may be of assistance to the Inspector
- Sellwood Planning has experience in promoting major schemes through Core Strategies (eg. 7,000 dwellings in Ashford, 5,750 dwellings in Dover, 2,500 dwellings in Horsham and 1,200 dwellings in Newmarket) and the emerging body of evidence of what constitutes a sound Core Strategy and what is unsound. Our experience indicates that, in a number of respects, the submitted Core Strategy is unsound in its present form.

Summary:

Paragraph 11.32 states that 18.1h of employment land will be de-allocated. However, Policy ED3 states that ‘other appropriate uses’ may include a proportion of employment uses. This means that the net loss of employment land could be less than 18.1h. If the net area is less, and the potential alternative uses are wider than just residential, the potential residential yield of 795 units (see Breakdown of Trajectory by Source p57) may be significantly less.

The Core Strategy does not deal with the issue of the timing inter-relationship between Policy ED3 and Policy ED4. There are a range of outcomes, the most extreme of which are

(a) the ED3 ‘deallocated’ sites are redeveloped for other uses very quickly, but the new ED4 employment sites come forward more slowly. In these circumstances, there could be a severe reduction in the availability of employment land in the District with associated adverse affects on the local economy
Change to Plan

Policies ED3 and ED4 need to be reassessed
- to deal with the timing interrelationship between Policies ED3 and ED4
- to confirm that sufficient low value employment premises remain in the District to accommodate the firms displaced from the deallocated ED3 sites. If insufficient land remains, the sites proposed to be deallocated will need to be reassessed to see whether some would be more appropriately retained in low value employment use. This in turn, could impact on the housing yield anticipated from the ED3 sites.

(b) the ED3 ‘deallocated’ sites are not redeveloped for other uses but the new ED4 sites come forward quickly. In these circumstances there could be an excess supply of employment land in the District.

The Core Strategy should explicitly recognise these potential outcomes and include the contingencies that would be put in place to avoid either an over supply or under supply of employment land.

Policy ED4 also does not consider the nature of the employment sectors which the deallocated ED3 sites serve compared to those which the new ED4 sites will serve. By definition, the employment sites proposed to be deallocated are poor quality industrial areas containing low grade premises. However, this also means these are inexpensive premises which are well suited to new start up firms or those types of firms which cannot afford high rental premises. In contrast, the new ED4 employment sites will be newly built premises which will inevitably command a much higher rental which most of the firms displaced from the ED3 sites will not be able to afford. The Core Strategy should deal with this issue by providing evidence that there are sufficient other low rental premises available in Rochford District to accommodate displaced businesses. There is a danger that the Core Strategy proposals will have unintentional adverse consequences in removing a tier of low value employment accommodation and providing no viable replacement for the displaced occupiers.

1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.
The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a ‘saved’ policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads,

* ‘Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.’

Core Strategy Policy ENV2 should be revised to include specific reference to,

* Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
* the application of the most stringent restrictions on development within the rural and undeveloped coastline;
* any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

* Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with,

The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
**Core Strategy Submission Document**

**16692 Support**

**CHAPTER 11  Policy ED3 - Existing Employment Land**

* Paragraph 8.15 of the supporting text should be amended to better support the suggested amendment to Policy ENV1. The existing text of Paragraph 8.15 should be deleted in its entirety and replaced by,

The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

* Page 16 (Sustainable Community Strategy Priority: Promoting a Greener District) should be amended to further support the approach to the Historic Environment. The fourth bullet of the Key Section/Policies of the Core Strategy should be amended to include the word ‘historic’, so that the first sentence of the bullet would read,

The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council’s document should fully reflect the County Council’s own approach to this matter as set out in the County Council’s ‘Developer’s Guide to Infrastructure Contributions’.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.
* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.
* The Core Strategy should make specific reference to,
  - o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;
  - o Policy CLT2, final sentence: insert after the words ‘primary schools’ the words ‘and Early Years and Childcare facilities’;
  - o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add ‘Land to be allocated within new residential areas, as appropriate’.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,

* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality - Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.
* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment’s (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, ‘The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment’s (CABE) Building for Life principles.’

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the
Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends.

**Summary:**
The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

CHAPTER 11 Policy ED3 - Existing Employment Land

Respondent: Ms G Yeadell [7834]  Agent: N/A
6 Southend Road
Hockley
Essex
SS5 4QQ
01702 205450

Full Text:

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1
Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road...renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential..." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport
Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "..highway improvements serving new developments...in a timely manner...ensuring developments delivered alongside necessary infrastructure". These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No7 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Para. 1.25, Para. 11.32  Note CH.1 Introduction to CS Submission 2009 para. 1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way—Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodate employment uses so displaced"—ie jobs sent to eg new site near Southend Airport—not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4  Policy states Council will allocate 18ha of land to make up for de-allocations in ED3—that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Move to new industrial site near airport contravenes PPPS4:

- EC7.3C "out of centre sites, with preference given to sites...well served by choice of...transport and...close to centre and...high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii). "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport...Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres
The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para. 12.38  The Core Strategy states (para. 12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure."

2) (10.28) "There is no immediate capacity for additional floorspace."

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre."

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.
The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.
One doesn’t perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists
Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".
Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, façade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area![]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane:, others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion
Core Strategy Submission DPD is basically unsound in many respects
Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.
Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".
In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people to have their voices heard".
Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".
Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.
In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.
Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.
Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

CHAPTER 11 Policy ED3 - Existing Employment Land

Respondent: Hockley Under Threat (J Abbey) [14229] Agent: N/A
Hockley Under Threat
None provided

Full Text: Ch. 4 Housing; Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2
N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential." to be decided by HAAP (issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1
T1 & T2 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3  Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32
Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumabily to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. ".alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii) "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges”. Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) "we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists
Para.5.4 “Rochford district has unique character...stems from traditional buildings...still dominate towns and villages”. Para.5.17 “Council believes many buildings...are of local distinctiveness...part of...cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protest. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process”. In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people...to have their voices heard”.

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible”.

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA’s responsibility to RDC’s job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies”. Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: “the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities”. So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:
Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Change to Plan

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously developed land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify
those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those
general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the
removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of
this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a
more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land
South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of
Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing
employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further,
Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic
housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development
in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of
sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out
for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the
October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy
H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead
of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and
achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as
a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth
in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations
have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable
agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as
South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the
loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the
Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the
ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core
Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan
Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the
publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable
housing for new residential developments. The Policy accords with the advice of National Policy and is therefore
considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy
represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities.
The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the
Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that
seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly
when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more
schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through
negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place:
Policy CP1 - Design
3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT6 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport:
Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development:
Policies ED3 - Existing Employment Land
ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary: Policies ED3 - Existing Employment Land
ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document.
CHAPTER 11 Policy ED3 - Existing Employment Land

Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.
Local Development Framework

Representations on the Core Strategy
Submission Document, November 2009
On behalf of Barratts Eastern Counties

Introduction

The requirements of Core Strategies are enshrined in the 2004 Planning and Compensation Act, the Town & Country Planning (Local Development) England (Regulations) 2004 and the 2008 policy guidance in PPS12. The requirements of Core Strategies are clear. And they are legal requirements. The Core Strategy must comply with the Local Development Scheme, Statement of Community Involvement and the Regulations. The Core Strategy must be subject to a sustainability appraisal, have regard to national guidance, conform generally with the Regional Spatial Strategy and have regard to any Sustainable Community Strategy. A Core strategy must be sound - justified, effective and consistent with national policy. The following representations therefore focus on these legal requirements.

HOUSING

Paragraph 4.6 - Evidence Base

To meet the soundness test Submission Core Strategies (SCS) must be justified, that is to say it must be founded on robust and credible evidence base and comprise the most appropriate strategy when considered against reasonable alternatives. The housing strategy in as far as it identifies a need for Green belt sites is sound, however, there are other elements which are unsound.

Paragraph 4.6 notes that the Strategic Housing Land Availability Assessment (SHLAA) has examined the supply of housing. It is presumed that the Table at paragraph 4.6 is the outcome of this examination. Whilst the SHLAA has some legitimacy in that it identifies various sites that are apparently available, we are concerned that because the SHLAA was only published in November 2009 it post dates the SCS. This implies that the SCS is driving the SHLAA exercise rather than the other way round. Whilst this may have no real practical effect on the outcome of the SCS and the identified need for Green Belt sites, the Inspector will be mindful of the advice in paragraphs 33 and 54 of PPS3 that SCS draw on the evidence in SHLAA. It may be that the SCS should explain how the evidence base has been used to justify the strategy.

PPS12 explains at paragraph 4.37 that Core Strategies are based on thorough evidence. Since the SHLAA has only recently been published it is considered that the SCS is unsound as it is not justifiable. This, together with other comments on the SCS, indicates that the process should be delayed to ensure that a more robust document is placed in front of the EiP Inspector.

Table at Paragraph 4.6 - Evidence base

From our review of the available evidence it would appear that the housing land supply is insufficient and that Green Belt release are required. From the wider strategy being promoted we note that some of the sites that the District Council consider to be 'appropriate' are likely to relate to existing employment areas. As set out elsewhere in our representations, we maintain sever reservations that the redevelopment of existing employment sites for alternative uses and particularly the Eldon Way Industrial Estate is unsustainable. We will make reference to the effectiveness of this strategy in relation to sustainability, whether it is justified in the context of National Policy and the deliverability of such a strategy elsewhere.

In particular, paragraph 11.32 of the SCS refers to existing employment land and sites within the UCS. It does not refer the SHLAA and as such it appears that an evidence base to support the re-use of employment land for residential is not reported in the SCS.

Having reviewed the 2008 Annual Monitoring Report, as we did when commenting on the 2008 Preferred Options Core Strategy, we maintain severe doubts as to the appropriateness of some of the previously developed sites identified as potential housing sites and their expected housing yield. Whilst we cannot at this stage ascertain whether the SHLAA...
sites referred to in this table correlate with the Annual Monitoring Report and indeed the 2007 Urban Capacity Study, it is our view that there will be some commonality and so the reliance on these sites is likely to be at odds with Government Policy. We shall elaborate on this objection in relation to the specific housing policy below.

We note that the last two rows in the Table at paragraph 4.6 set out figures with and without Green Belt releases. The text to this section of the Core Strategy should, for reasons of clarity, explain that Green belt review will be necessary in order to deliver the required housing.

Paragraph 4.9

The table on page 40, which sets out the settlement tiers, is supported. Rayleigh, Rochford/Ashingdon, Hockley/Hawkwell are clearly the largest settlements in the District and they benefit from good employment, housing, leisure, community and public transport provision. These settlements are the most sustainable ones with the greatest mix of uses. Consequently, it is sensible that the Core Strategy identifies these as top tier settlements and is able to target them with growth accordingly. This component of the strategy is justified by reference to sustainability data and is effective, since targeting development at these locations will ensure a more sustainable pattern of development.

Paragraph 4.14

We maintain that the strategy for redeveloping the Eldon Way Industrial Estate for housing and other alternative uses to employment is unsound. It is neither justified nor effective. The Industrial Land Availability Study 2006 sets out on page 7 strategic objectives. The 3rd objective seeks to Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive. Clearly the strategy as currently drafted envisages major changes to existing industrial estates, including alternative uses. This strategy is not consistent with other strategies and evidence based studies and so cannot be justified in the context of the tests set out in PPS12. It is also an ineffective strategy since the new employment locations that would free up the Eldon Way site for redevelopment relies on transport infrastructure that has no certainty of being delivered. Principally, the erosion of employment uses at Eldon Way could make the settlement of Hockley/Hawkwell less sustainable and thus conflict with the tiered approach on page 40, paragraph 4.9.

Policy H1

Prioritising the use of previously developed land ("pdf") is supported in principle. It is a justified strategy in the context of PPS3 and effective as sequential choices can be made by implementing the policy. However, the District Council is also promoting a strategy which seeks the redevelopment of existing employment locations to alternative uses and by consequence is identifying green field sites for new employment development elsewhere (Policy ED4 refers). This 'land swapping' is not considered consistent with PPS3, nor is it considered to be justified or effective in delivering the desired strategy. This is particularly the case as most of the existing employment sites are occupied and therefore unavailable for redevelopment. In addition, the new Greenfield sites are in an arguably less sustainable locations away from the top tier settlements identified on page 40 of the Submission Core Strategy. Clearly this element of the strategy is inconsistent with the wider strategy.

The Industrial Land Availability Study 2006 is included as an evidence base by the District Council. It includes an introductory section, which explains that the authority wishes to make Rochford the place of choice for new business. It includes several strategic objectives on page 7 including "Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive." It reviews existing employment areas and identifies vacant land, including land available from allocations. It does not include any assessment of new sites or potential opportunities for new sites that might have been expected to feed into the Core Strategy. The strategy for identifying Green Belt site employment allocation does not appear to be based on any evidence in this document and in that context cannot be justified. The strategy being promoted potentially conflicts with Government policy in PPG13, PPG2 and emerging PPS4.

The Employment Land Study 2008 is a much later document. It has a key recommendation on page ii "we recommend that Rochford District Council adopts strong policies to protect existing employment land." Furthermore under recommendations for existing sites on page iii-iv of that document it states "In our view, Hockley Trading Centre is a strategically well placed employment location. However, we recognise the ambitions of the Hockley Town Centre masterplan and that within this the Council should consider it to be allocated for other uses. However, we recommend that this reallocation happen only if provision is made within the masterplan for office use within Hockley Town Centre as part of a mixed use scheme." The view of the writers of this document is clear - the Eldon Way Industrial estate (Hockley Trading Centre) is a good employment site and that it is for other reasons that alternative uses should be considered and only then if office development is supported. This supports our representations that new future uses at the Eldon Way site should be employment dominated and that alternative uses should relate to the objectives of the Town Centre which is to enhance the shopping and leisure facilities. Residential is not an appropriate alternative.

This document recommends the use of land to the west of Rayleigh for employment and envisages Green belt release. However, the SCS does not explain through the evidence base why existing employment sites should be 'deallocated' and Green belt land unnecessarily used.
In addition to these key issues we have some specific concerns. As a consequence we maintain an objection to the second paragraph of Policy H1. This policy states that the Council will seek the redevelopment of various industrial estates including Eldon Way. The Policy says that alternative uses will be sought (presumably alternative to the existing employment offer) and that new land will be allocated elsewhere. This policy statement, in relation to Eldon Way in particular, is unsound for a number of reasons:

The emerging Hockley Area Action Plan consulted upon in 2008 states that the Eldon Way Industrial Estate is strategically well placed. In a sense this statement underplays the true importance of this highly sustainable employment location and only major employment area in Hockley/Hawkwell. The employment area is adjacent to the railway station and located a short distance from the main bus routes that run along Spa Road. Some of the residential areas of the town are also within walking distance of this commercial area, thus providing a potential for sustainable travel by employees. The Eldon Way Industrial Estate is therefore right at the heart of the settlement of Hockley/Hawkwell and provides an opportunity to meet sustainable transport objectives by reducing the need to travel by car. Consequently, this employment area should be highlighted as a premier employment site in sustainability terms, both in the context of PPG13, PPG4 and PPS6. To encourage alternative uses as set out in Policy H1 implies the removal of the majority of employment based activity at Hockley/Hawkwell and this would be contrary to National policy, would not be the most appropriate strategy when considered against alternatives and is therefore unsound.

Whilst it is acknowledged that improvement to the Eldon Way Industrial Estate can and should take place, the extent to which the mix of employment uses should be altered in favour of alternative land uses requires careful consideration. It is our view that a mix of existing or indeed new employment land uses with some Town Centre type uses should dominate the Eldon Way site. A mix of employment types between offices, light industry and other high technology industries should be encouraged as this will provide many locational advantages to the firms that agglomerate together. The Council says that the existing uses on this site are harmful to amenity. However, the site has operated for many years without any significant issues and if renewal for B1 type uses are encouraged then the employment area can be maintained without harm to amenity. Renewal of the employment stock can help develop and improve trade, improve the sustainability of businesses as a whole and make for a more flexible labour market as skill levels are varied. A singularly different use altogether or a variety of uses which excludes employment could undermine the long term sustainability of the area and Town Centre. As such Policy H1 is not an effective strategy and should be amended to acknowledge the importance of Eldon Way and the need to renew the employment stock to ensure that the site maintains its important role as a employment site, albeit with some ancillary alternative use development where appropriate.

The 2008 Retail Study notes that Hockley Town Centre is not strong and there is trade leakage. Eldon Way Industrial Estate provides a customer base for existing town centre uses. Weekday spending within town centres is an important contributor to the viability of many retail and leisure businesses either through expenditure by employees during the lunchtime trade or expenditure by employers, on necessary goods and services. This relationship helps sustain the critical mass of a centre and provides a platform for new retail and leisure growth. It is important to have a balanced centre with a variety of uses. Policy H1, as currently drafted, implies the removal of employment related development and this is likely to harm the vitality and viability of Hockley Town Centre. The Council has presented no evidence to suggest that this is not the case. Importantly, the 2008 Retail Study explains that there is a need for additional retail and office space. In principle we would support additional office and other B1 type uses plus retail but employment uses should always dominate for the sustainability reasons given above. Retail and office development are likely to present a viable alternative to some of the more industrial type uses.

Consequently, we do not support the phrasing of the third paragraph of Policy H1 and maintain that the most appropriate strategy is to seek renewal of the employment stock with employment based uses and with some new retail development. Removal of employment land uses completely as currently implied-which was the approach adopted in the emerging Hockley Area Action Plan - is not a justifiable strategy.

One of the key tests of a Core Strategy is consistency between policies in the emerging Plan and this strikes at the heart of demonstrating an effective strategy. Policy H1 implies alternative uses to employment and the relocation of Eldon Way to a site identified under Policy ED4. However, Policy RTC6 sets out a suite of policy criteria for Hockley Town Centre which includes employment and commercial activities. In addition Policy ED3 seeks the protection of sustainable employment sites (Eldon Way) and notes that some reallocation of existing employment sites will include a proportion of employment. It notes that in the case of Eldon Way employment development will form a component. The policies appear at odds with one another. The third paragraph of Policy H1 should be deleted as the second paragraph is sufficient to set a strategic context for delivering new housing development. The employment policies and Hockley specific policies should be left to consider the type and quantum of land uses appropriate in the area. If the third paragraph of H1 is to be retained then it should tie in more with Policy RTC6 and in our view explain that employment uses should dominate any redevelopment proposals for the Eldon Way site and that retail and leisure uses should be a supporting proportion.

Implementation, Monitoring and Delivery - page 132 onwards

One of the key tests of soundness is that the Core Strategy should be effective - it should be able to deliver its strategy. The Implementation strategy set out at page 132 onwards of the Core Strategy does not explain how Policy H1, RTC6 and the strategy for redeveloping Eldon Way (Policy ED2 and ED3) will be delivered. The comment at Policy ED3 on
page 161 identifies it as a potential risk and alludes to land assembly difficulties and the choices to be made by
owner/occupiers. In order to deliver the strategy there should be a clear understanding as to whether the new land use
values being promoted are sufficient to encourage relocation voluntarily. Secondly there is a need for more information
to be gathered and presented to show that current occupiers and landowners are willing to relocate and the timescales likely for this. For example, do the building lease contracts enable early review or are there any break out clauses. There should be some commentary on whether the Council will engage in compulsory purchase orders in order to pursue their strategy should the ‘encouragement’ route fail. As currently drafted there is no clear path to deliver the strategy and the danger is that despite reallocation, the sites identified for redevelopment will not come forward in the plan period. In this regard, evidence to satisfy the test of soundness is not provided.

Policy H2 - General Locations

We support the strategy that new housing growth should be targeted at land South of Hawkwell. This area is suitably
located to the urban area of Hockley/Hawkwell and to lie in with the settlement tiers on page 40 of the Submission Core
Strategy the same terminology for settlement should be used. This ensures a consistency within the SCS. The choice of
this location as a housing growth area is appropriate as it would not contribute to the coalescence of the urban area with
Ashingdon (there is existing
development between this identified housing area at Rectory Road and Ashingdon and moreover, Rectory Road can
form a natural physical boundary for the new Green belt boundary. This area is also well located to the existing road
network. Cherry Orchard Way has recently been improved and provides much better accessibility to the proposed
housing growth area than any other location around Hockley/Hawkwell. The existing bus routes along Rectory Road also
make this location sustainable and the additional housing proposed will help underpin the financial viability of bus routes
in this area. Locally there are employment opportunities, including the small commercial estate off Main Road. The
Eldon Way Industrial Estate adjacent to the Town Centre also provides the opportunity for employment locally. Extensive
public open space, play pitches and built leisure facilities are located just to the north of this area and a community hall
is located off Briar Close, nearby. The area to the south of Hockley/Hawkwell is close to local shops on the corner of
Heycroft Road and Main Road and there are numerous footpath links between this area and the local community
including links via Thorpe Road, Thorpe Close, Briar Close, Hawkwell Park and Park Gardens. The area therefore
provides the opportunity to enhance existing links, including cycle links, and contribute towards community integration - more so than other sites on the south side of this settlement. The site is also
in the control of one house builder and deliverable.

However, we find that the Policy is not fully consistent with national policy and furthermore needs to be reviewed in order to be justified and effective. We have concerns as to how the Green Belt
review strategy set out at Policy H3 and in the Local Development Scheme integrates with this policy and feel that Green
Belt review should be more explicit throughout the SCS. We note that it is only Policy H3 which indicates the need for
Green Belt land review. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best,
loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under
Policy H2. Policy H3 then goes onto talk about land release for development after 2021 but no time period is set out to
provide a framework for any Green Belt review in this latter period. In our view Policy H2 and certainly Policy H3 and
Policy GB1 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious
matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt
should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan
explains “this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term”. 2026 is
therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5
year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks
about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that
existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that
these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy
for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary.

Policy H2 - Phasing and Quantum

The 2008 Preferred Core Strategy document indicated that the area south of Hawkwell should deliver 330 dwellings over
a phasing period to post 2021 (see Policy H2 and H3 of that document). The SCS reduces the quantum of housing in this
area to 175 but expects delivery by 2015. At a broader level the Preferred Options Core Strategy of 2008, (Policy
H2) required 1,450 dwellings to 2015 and a further 1,050 by 2021. In the SCS the figures are now 775 and 1,010
respectively.

Since the SHLAA post dates the publication of the SCS, we are uncertain as to the reason why such a significant
reduction in quantum of housing and extensions to the residential envelope is considered necessary. Presumably it is the ‘new’ strategy to redevelop existing employment areas within the settlements that has led to this change. Our
representations on this strategy and specifically the Eldon Way Industrial Estate are included elsewhere within our
representations. Previously we have commented on the Table at paragraph 4.6 of the Submission Core Strategy and the
lack of evidence to underpin that table. It seems odd that in the space of a year the expected requirement for Greenfield
sites has effectively halved on the basis of a SHLAA exercise. The community is therefore not able to effectively

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
comment on the housing land supply and at this stage the Submission Core Strategy is legally unsound.

That said, we are of the view that the quantum of housing envisaged south of Hockley/Hawkwell should be more than the 175 currently envisage. In coming to this view we have reviewed the Urban Capacity Study and the latest housing figures in the Annual Monitoring Report 2008. We conclude that the shortfall in housing land supply is such that 330 dwellings in this location is appropriate.

The recently published SHLAA is based upon the data obtained from the Urban Capacity Study 2007, a call for sites exercise and data from the Annual Monitoring Report 2008.

The 2007 Urban Capacity Study (UCS)

1. 2007 is widely recognised as being the peak level of house prices in the UK and it was acknowledged by Government and practitioners alike that 2007 house prices were at an unsustainable level. It is our view that utilising the 2007 UCS as an evidence base without reference to the market does not pick up the depressed demand that is likely to now exist. Recent corrections to the housing market now mean that housing land prices are at a much lower and arguably more affordable level than before. The implications are that some pdl may not be viable for housing development. Often brownfield sites have much higher development costs than Greenfield sites and so the yield from urban capacity will be much lower than anticipated in the 2007 study. One example is the employment allocation of the Adopted Local Plan located at 76-92 Main Road, Hawkwell. This site has been allocated for several years and has been available during the most recent rises in residential property prices during 2006-07. As a consequence the lack of progress on the site can only be described by its current occupancy and perhaps it comprises high value uses that do not encourage redevelopment. Despite this the site is identified as having high potential for alternative use and high potential demand. The SHLAA form notes that there is no information on legal constraints (e.g., tenancy agreements) As a consequence it is difficult to see how this could continue to be a potential site and as a consequence the allowance for green field releases should be increased.

2. There are considered to be other instances in the UCS and the recently published SHLAA where the assumptions and calculations would indicate that the 1301 urban capacity figure is over optimistic and the SHLAA assessment is limited.

3. In relation to the assessment in the UCS entitled 'intensification of existing residential uses' we note that the assessment is premised on an assessment of recent trends taking into account net completions between 2001-2006 and 2005-06. This is effectively an assessment of windfall trends and not an approach that PPS3 encourages. Importantly Table 3-12 in the urban capacity study seeks to project forward urban capacity from residential redevelopment - a period that benefited from high house prices and PPG3 guidance encouraging redevelopment. These two circumstances have markedly changed and so the assumptions and conclusions drawn would also have changed. Even taking into account the UCS discounting, the reliability of the 404 units from this source must be questioned and in our view the 1301 figure cannot be a sound basis for urban capacity and further Greenfield releases are necessary.

4. In the section of the UCS entitled 'subdivision of dwellings' and 'living above the shop' it is estimated that recent trends would result in 7 and 15 units. Our concerns with using trends as a basis for urban capacity are detailed above - PPS3 does not encourage this. Rather, local authorities are charged with surveying their areas, identifying which areas may yield urban capacity and how much and developing policies to achieve that. Government guidance does not encourage the estimation of windfalls in the way the UCS does.

5. Redevelopment of established employment land is a separate section within the UCS. At 1 above we identify the low probability of the Main Road residential allocation coming forward. This remaining section of the UCS considers 11 further employment sites which were first identified in the 2000 UCS. Three of these are considered to have a high probability of coming forward. We have looked at these three sites and can find no evidence that they are likely to come forward. In the 8 years between 2000 and 2008 the three identified high probability employment sites have not been developed and there is no reason to assume that the next 5-10 years will be any different. For example the Rawreth Industrial Estate is identified as being well used in the UCS and although it has some unneighbourly uses there is no indication that the site is available, suitable or deliverable for residential. Land between 39-69 Lower Lambricks, Rayleigh is identified as having a high probability of residential uses. Yet there is no
Evidence of any pre-application advice or planning applications for this area. Stambridge Mills, Mill Lane, Stambridge is a further example. This site is separated from the urban area, in a flood risk zone and protected in the 2006 Replacement Local Plan by Policy EB9 which promotes B1 uses. Against this background there is only two relevant planning applications affecting this area both date from the early 1990’s and relate to a plant room and loading bay. There is no evidence that this is likely to come forward for residential purposes in the next 5-10 years.

6. In the UCS extant permissions are identified as 856 dwellings. It is important to note that this figure needs to be continually reassessed so that from the point of adoption of the Core Strategy a 5 and 10 year housing land supply is available. The SHLAA notes extant permissions for 2009-14 being 106. As noted below extant permissions do not necessarily translate into deliverable sites. There is therefore a contingency that needs to be built in. Further allocations on greenfield land need to be increased and as such the quantum of housing in the area south of Hockley/Hawkwell should be increased to 330 dwellings in order to begin to meet the shortfall identified.

The District Council’s 5 year housing supply assessment

7. The District Council’s Annual Monitoring Report (“AMR”) 2008 purports to demonstrate a 5 year housing land supply. The preamble to Table 4.10 in the AMR 2008 explains that Rochford District Council (“RDC”) has included units under construction, units with full permission, units with outline permission, units with a resolution to grant, units subject to preapplication discussion/Urban Capacity Assessment and land allocations in its trajectory. The reader is referred to Appendix B which breaks down the sites in more detail. The recently published SHLAA also includes a table showing a potential 1273 dwellings deliverable. However, it refers to “appropriate brownfield sites.” Since these ‘appropriate sites’ are do not benefit from an application or a planning permission it is difficult to programme them into the housing delivery trajectory.

8. In the full planning permission category of the AMR 2008 where work has not yet started there can be no guarantee that all these sites will be delivered in the 5 years. This comment relates to the one above in relation to the recently published SHLAA. It is not uncommon for permissions to be obtained to provide a means for valuing a site where the owner has no immediate plans to sell the site or develop housing. Delivery may also be hampered by funding constraints, or site assembly problems (where sites are in an alternative use or relocation constraints). Appendix B of the AMR 2008 does not set out the intentions of the landowner or whether the sites are truly achievable in the 5 year period as per PPS3 requirements. The SHLAA purports to show developer intentions at Appendix C but the assessment by the local authority into the legitimacy of some of the claims is not presented. The evidence base is not as full as it should be to demonstrate the robustness of Table 4.6 of the SCS. It is also unclear the extent to which this table is based on either the UCS 2007, AMR 2008, SHLAA 2009 or a combination of all three. This should be set out clearly.

9. In addition, to the 'non delivery' of a proportion of new homes in the AMR 2008, there is concern at the timings of delivery in that data set, for example, 10 units in 2008-2009 relates to outline planning permissions and it is doubtful whether reserved matters can be turned round quick enough to begin delivering housing in this year period. There could well be examples in that set of data where the delivery of units in the first year of the 5 is unlikely, thus delivery is reduced for that period and pushed back and this process is then compounded throughout the data set up to and beyond year 5. Statistical evidence from the Department of Communities and Local Government (“CLG”) reveals that building starts are 43% down on the quarter to March 2009 compared with March 2008. It is not clear whether the recently published SHLAA has taken this into account and unless it does the data in the Table at 4.6 of the SCS cannot be relied upon, particularly given the current recessionary circumstances. In relation to the Table at Paragraph 4.6 a refinement is therefore needed to take into account this effect on phasing.

10. This problem is compounded for other units relied upon where permission has been granted but no start on site has been made; this accounts for a considerable number of sites in 2009-10 period (100 dwellings) which is (year 2 of the 5 year period). A delay in these will require more Greenfield sites to be identified in order to meet the shortfall.

11. Finally we note that the East of England Plan expresses its land supply requirement as a minimum. This strategy is not reflected in the.
Submission version of the Core Strategy policy H2.

12. In summary since neither the UCS nor the Annual Monitoring Report form a SHLAA, reservations are maintained about the degree to which sufficient housing land has been identified.

Policy H3

In the Preferred Options Core Strategy 2008 more locations were identified for housing growth in the post 2021 phase. Whilst it is our view that land south of Hockley/Hawkwell should benefit from a greater number of dwellings than the 175 currently identified (330) in order to make the strategy effective. We are concerned at the significant change in strategy between the Preferred Option Core Strategy and the Submission version, which has significantly less housing growth on green field sites. This change in strategy is so significant that we would question whether it is appropriate in the context of soundness and the consultation processes that have taken place so far.

We also have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with other policies in the SCS and feel that Green Belt review should be more explicit throughout the SCS. As it currently stands there is a potential conflict with national policies and limited justification for the Green belt strategy. We note that in Policy H3, which indicates the need for Green Belt land review, the advice is limited and unclear. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes on to talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H3 and Policy GB1/H2 should explain fully the need for a Green belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3.

Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary. Not to do so is unsound for justification and effectiveness reasons.

Policy H4 - Affordable Housing

As currently drafted we feel that the policy is not concise enough and that the policy does not reflect current guidance. The phrase 'at least' would indicate that in most cases affordable housing above 35% will be sought. Our understanding is that the 35% figure is recommended in the SHMA and that to provide a policy framework which seeks to go beyond that figure would potentially be unworkable as many sites could not financially bare the burden of over a third of the net developable area not yielding a value. The policy should be redrafted so that "a target of 35% affordable housing shall be provided on all developments of 15 or more units..."

The last policy paragraph provides some scope to relax this policy, if there are clear site constraints that make on site provision impossible. The policy, though, is not particularly clear on what would constitute exceptional circumstances. For example, physical site constraints, which unusually raise development costs, would be one such reason and this should be specified. There may be other reasons including the nature of housing needs in the part of the District the site is located which justify affordable housing below the 35% target. Design reasons may also have a bearing on how provision is made and in what form, particularly if the site is in an historic area where design might override housing need argument. It is therefore recommended that the policy expand on the type of circumstances where affordable housing may be relaxed and the type of information that will be sought of applicant's who have a need to invoke this part of the policy.

Policy H5

In support of the policy, it is advantageous that no percentages requiring a specific mix are included. This flexibility will enable developers and the Council to respond directly to changing circumstances in the local housing market. In the past some authorities have set out a percentage for the type of housing they require only to find that after a few years of strict implementation there is an oversupply of property of that type and no flexibility in the policy to address the problem.

Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford's main settlements to what essentially
would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Policy ED3

We fully support the first sentence of the Policy and note the apparent contradiction with the statements in Policy H1 and elsewhere which seeks to develop on alternative uses at industrial estates such as Eldon Way.

This contradiction is evidence in the second paragraph of Policy ED3. In our representations on Policy H1 we have explained why it is not sound to diminish the employment stock at Eldon Way and the importance of maintaining a dominance of employment type uses at this estate. These arguments are not repeated here.

We note the sentiments of the third paragraph and in accordance with our representations elsewhere are of the view that this sentence should be revised to explain that Eldon Way will accommodate principally employment type uses. As noted elsewhere uses which are an alternative to employment would diminish this highly sustainable employment site and this is unsound when assessed against National Policy.

Policy ED4 - Future Employment Allocations

In part, the de-allocation strategy is not supported as it is considered unsound when set against sustainability criteria. In relation to the Eldon Way Industrial Estate it is considered critical to the ongoing sustainability of this settlement that employment uses are maintained at this location. It is close to the railway station, bus routes and local residential areas from which the opportunity exists for employees to walk or cycle to work. Its location adjacent to the Town Centre offers opportunity for some retail and leisure development to complement the centre and to maintain a supporting function. These sustainable benefits would not occur with the deallocation of Eldon Way or the significant erosion of its employment floorspace. Whilst redevelopment of the employment site to achieve new employment is supported, the dominant land use should continue to be employment use. As a consequence, the 18ha of land required for employment in this policy is considered to be excessive and the policy should be reviewed to explain that redevelopment of existing employment sites for primarily new employment development will be encouraged.

Policy T4

It is noted that the South Essex Rapid Transit policy, as elaborated upon at paragraph 10.16 notes that Rochford is not served but may be served in future phases. This uncertainty is contrary to the delivery principles of soundness and directly puts at issue the employment land supply strategy in the District which is founded on sustainable access to new sites. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley, Rochford and Rayleigh is unsound.

Appendix H1, CTL1 - Infrastructure

It is recognised that necessary infrastructure provision is an important part of creating a sustainable development and in that context appendix H1 is supported. The supporting text notes that the table at Appendix H1 is not exhaustive and in that context it is very important that the framework properly distinguishes between what should be provided as part of new development schemes and what shouldn't. It is therefore essential that the framework acknowledges the importance of Circular 05/05 and the tests which say that provision of infrastructure and/or contributions should be:

* Relevant to planning
* Necessary to make the proposed development acceptable in planning terms
* Directly related to the proposed development
* Fairly and reasonably related in scale and kind to the proposed development
* Reasonable in all other respects

As is made clear (Paragraph B9 of Circular 5/05) contributions should not be used to make good existing deficiencies in infrastructure provision. Nor are they to be used to secure contributions to the achievement of wider planning objectives that are not necessary for consent to be granted. In that context the Core Strategy should set this out as its policy framework.

Policy GB1 - Green Belt
The objectives of this policy are supported, although as noted in other representations the SCS is unsound as it does not meet the tests in relation to justification, compliance with national policy or effectiveness of strategy.

Policy GB1 mentions the objective to allocate the minimum amount of Green Belt land necessary. The policy should link to the requirements of PPG2 and RSS which are discussed in relation to the representations on Policy H2 and H3. The policy should set out a timeframe for the review and why Rochford requires a Green Belt review (what the exceptional circumstances are in this District that justify a review of local boundaries. The policy should be amended to set out a 2031 time frame and this may require the SCS to have an extended life span beyond 2021.

We would recommend the deletion of the word character since Green Belt designation is not related to landscape character as currently drafted. For clarity we would also recommend that the Policy or its supporting text explain that a Green Belt review will takes place in support of an allocations document (paragraph 6.6) in order to identify an appropriate new boundary. This is particularly necessary given the commitment to a Green belt review in the adopted Local Development Scheme.

Policy CLT1 - Planning Obligations and Standard Charges

In view of the need to test fully the basis on which standard charges are based it is important that any document produced is in a development plan document that enables an examination in public. The policy should explain this in order that when the document is produced it accords with Policy and is based on sound evidence.

ENV9 - Code for Sustainable Homes

Object. The advice from the Department of Communities and Local Government is that the new requirement to have a rating against the Code does not make it mandatory to build a Code home or to have each new home assessed against the Code. It does however mean that all buyers of new homes be given clear information about the sustainability of the new home. A house builder can do this in one of two ways:

- they can chose to build a Code home, have that home assessed against the Code and provide the home buyer with a Code certificate stating the star rating the home has achieved
- or, they can chose to build to current building regulations standards, not to pay for an assessment and instead download a nil-rated certificate of non-assessment (also referred to as a nil-rating) to provide to the home buyer.

As such the Rochford policy requirement that coding 3 be achieved by 2010 and Code 6 by 2013 is out of step with Government advice. The policy wording should explain that it is just the coding that is a requirement of new homes and not necessarily that new homes should be constructed to achieve a standard.

The current Government objectives are for the code to be introduced over a reasonable period with development to be code 3 by 2010, code level 4 by 2013 and code level by 2016. In this regard the policy, as drafted, seeks to achieve code 6 by 2013 and consequently compresses the code requirements into a shorter time scale with the costs associated expected to be subsumed within the housing market though higher prices. This is not a realistic strategy for the delivery of sustainable homes and we consider that the policy should be revised to extend the period of compliance but to also make it more flexible based on local circumstances.

Research undertaken on behalf of the Housing Corporation and English Partnerships, published in February 2007 ‘A cost review of the code for sustainable homes’ reveals that code 6 is unlikely to be unattainable given existing technologies and that achieving code 5 could result in a 12% to 20% increase in costs that would have to be passed onto the consumer. Given the variability of the housing market with peaks and troughs, it is unlikely that the housing market would be able to subsume this level of price increase.

The code system policy as currently drafted does not have regard to site circumstances and so many of the requirements could be difficult to meet. For example, micro electricity generation on site may be difficult to achieve where local circumstances deter the capture of wind or solar power. If more expensive technologies are required to generate power than is the norm then costs will rise. There may be other competing reasons why designs cannot include certain sustainability measures if housing sites are in sensitive landscape and historic locations. Alternatively there may be significant development costs associated with site specific circumstances and so viability of the site’s development becomes a valid consideration. By insisting on the code for sustainable homes other policy objectives such as affordable housing at particular rates and other contributions may need to be reconsidered. Consequently, we are of the view that this policy should be drafted in a manner which enables site specific circumstances to be taken into account. As noted above the Government explains that the code is a certification requirement and does not necessarily mean that buildings are constructed in accordance with a code level.

It is also important to note that it is not the purpose of planning legislation to duplicate other legislation. In this regard, the policy should accept that the Building Regulations will be the main vehicle for implementing this policy and that unless the coding requires external development then there will be no need to specify what is to be carried out in a planning application.
Summary: Policy ED3

We fully support the first sentence of the Policy and note the apparent contradiction with the statements in Policy H1 and elsewhere which seeks to develop on alternative uses at industrial estates such as Eldon Way.

This contradiction is evident in the second paragraph of Policy ED3. In our representations on Policy H1 we have explained why it is not sound to diminish the employment stock at Eldon Way and the importance of maintaining a dominance of employment type uses at this estate. These arguments are not repeated here.

We note the sentiments of the third paragraph and in accordance with our representations elsewhere are of the view that this sentence should be revised to explain that Eldon Way will accommodate principally employment type uses. As noted elsewhere uses which are an alternative to employment would diminish this highly sustainable employment site and this is unsound when assessed against National Policy.

Change to Plan

Appear at exam? Not Specified Soundness Tests i
Agree with locating employment land in certain locations west of Rayleigh and south of London Road. However policy is not specific enough. Much of the Green Belt land south of London Road is visually sensitive public open space and good quality farm land. There would be implications for wildlife, should this part be developed.

PPG4 promotes employment land development in locations well served by rail freight.

Summary:
Agree with locating employment land in certain locations west of Rayleigh and south of London Road. However policy is not specific enough. Much of the Green Belt land south of London Road is visually sensitive public open space and good quality farm land. There would be implications for wildlife, should this part be developed.

PPG4 promotes employment land development in locations well served by rail freight.

Change to Plan:
As many uses relocated from Rawreth Industrial Estate would not be neighbour friendly ie heavier industrial uses, the new employment land would be best located south of the railway line and close to the A127, A129 and A130. This location would be less visually intrusive, have less impact on wildlife, residential areas and be close to main roads which would reduce HGV traffic within the district. It would also be very convenient for any future railway links in line with the aims of PPG4.

Soundness Tests i, ii, iii
Full Text: The approach to the de-allocation of existing employment sites and identification of new employment allocations is unsound. The existing employment sites, with the exception of Stambridge Mills, are occupied. The future employment allocations will inevitably involve a Green Belt release, and this would be counter-productive to the overall strategy.

Summary: The approach to the de-allocation of existing employment sites and identification of new employment allocations is unsound. The existing employment sites, with the exception of Stambridge Mills, are occupied. The future employment allocations will inevitably involve a Green Belt release, and this would be counter-productive to the overall strategy.

Change to Plan: The existing employment sites proposed for re-allocation comprise businesses that are well established and have good occupancy levels. The proposal to identify future employment sites on Green Belt land has not been founded on a robust evidence base. The existing employment sites proposed for housing should be upgraded, alongside the proposal to encourage employment growth allied with London Southend Airport.

Appear at exam? Yes  Soundness Tests i
We object to the allocation of greenfield sites for employment when existing employment sites can be improved to meet the employment allocation.

Lubards Farm is an established employment area which also provides a variety of community based uses. The site extends to 3.5 hectares of existing employment land and it is considered that this area can be redeveloped to create a more sustainable employment area with further allocation on the adjacent land. The site has attractive farmland surroundings which will enhance a high quality office and business premises development.

The site is a similar distance from Rayleigh rail station as the proposed site at West of Rayleigh and has good public transport links with the rail station. The site is only a short distance from the A130 junction at Rettendon and from the A127 Junction. The site is also closer to the settlements of Rayleigh and Hullbridge and agina is already well linked by public transport. It is considered that this site would be preferable to sites on the very western edge of the District.

The site is closer to Rawreth Lane Industrial Estate so businesses will not be displaced any significant distance. The layout of the existing site at Lubards Lodge Farm, through allocation in this strategy, can be improved to consolidate and improve the wider range of employment and community uses.

It is considered that this site offers more potential with less loss of greenfield Green Belt land than the proposed site at West of Rayleigh and therefore the allocation of land West of Rayleigh is unsound.

We would wish to see Land West of Rayleigh replaced by the site at Lubards Lodge Farm

Summary: We object to this policy as it seeks to relocate employment land onto greenfield sites when there are existing employment areas already developed which can be allocated. Employment land can be developed at Lubards Lodge Farm which is already an established employment centre with a significantly developed footprint. The location of the site is between the settlements of Hullbridge & Rayleigh so is very accessible to residential areas and benefits from good public transport provision already existing. The location close to Rawreth Industrial Estate means business will not be displaced any significant distance.

Change to Plan We would wish to see the allocation of land West or Rayleigh deleted and Land at Lubards Lodge Farm, Hullbridge Road, Rayleigh inserted to replace it in the Future Employment Allocations proposed under this policy.

Appear at exam? No Soundness Tests i
The area south of London Road is too vague. This is green belt some of which is agriculture land some of plotland origin. If we use my previous criteria for development in green belt the in the first instance we should look for land previously used of poor quality. There is land at Michelins Farm which fits this criteria with added advantages that it is bounded by the A130, A127, and the A1245 abutting the Fairglen interchange. It also has the railway on one boundary which facilitates any future transport developments favouring rail in the future. Land adjoining forwarded to Basildons ldf.

Summary:
The area south of London Road is too vague. This is green belt some of which is agriculture land some of plotland origin. If we use my previous criteria for development in green belt the in the first instance we should look for land previously used of poor quality. Full Text: Draft Policy ED4 (part 3) is unsound because the proposal to allocate industrial land in proximity to Great Wakering, to provide local employment and mitigate the de-allocation of Star Lane Industrial Estate, is not justified as it is not founded on a robust or credible evidence base.

The amount of this land required, types of uses and location of the site are not set out in the draft policy. It therefore is not justified on a robust or credible evidence base.

The land could in fact be our clients site ‘Tithe Park’. However, this is unclear

The draft policy is unsound as the alternative employment land is likely to be located within the green belt, which by virtue of the nature of employment uses, may have a greater impact than providing additional residential development on green belt land, in light of this, it is not consistent with PPG2.

Summary: Draft Policy ED4 (part 3) is unsound because the proposal to allocate industrial land in proximity to Great Wakering, to provide local employment and mitigate the de-allocation of Star Lane Industrial Estate, is not justified as it is not founded on a robust or credible evidence base.

Additional evidence supplied, Council ref AE26

The alternative employment land is likely to be located within the green belt, which may have a greater impact than providing additional residential development on green belt land, in light of this, it is not consistent with PPG2.

Change to Plan Amend Policy ED4 to reflect our representations.

Appear at exam? Yes Soundness Tests i, iii

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Full Text:
Overall, draft Policy ED4 (part 2) is sound as it is both justified and effective.

The proposed allocation of land north of London Southend Airport for employment uses is in accordance with the emerging Southend Airport Joint Area Action Plan (JAAP). It has been considered by the London Southend Airport & Environs study by Halcrow Group Ltd (June 2008) and is taken into account in the Rochford Employment Land Study by GVA Grimley (September 2008).

The development of the Brickworks Site, as part of the area known as 'north of London Southend Airport', will bring many benefits. The site is previously developed land and currently lies derelict and detracts from the surrounding landscape. Redevelopment will enhance the area and enable the clean up of the site which is likely to incur significant costs.

Whilst the draft policy encourages an Eco-Enterprise centre, it is important that the potential for other employment generating uses are not stifled because of this. It is therefore imperative that the importance of the feasibility study is explicitly stated in the policy, as is proposed. This study will need to examine market conditions, demand for eco-enterprise space, cost of build etc.

Summary:
Overall, draft Policy ED4 (part 2) is sound as it is both justified and effective. The proposed allocation of land north of London Southend Airport for employment uses is in accordance with the emerging Southend Airport Joint Area Action Plan (JAAP).

The development of the Brickworks Site, as part of the area known as 'north of London Southend Airport', will bring many benefits.

However, whilst the draft policy encourages an Eco-Enterprise centre, it is important that the potential for other employment generating uses are not stifled because of this.
We support the principle/policy of providing a range of employment uses across the District rather than focus on provision purely at London Southend Airport.

We also support the principle of a new employment allocation west of Rayleigh. As highlighted in paragraph 11.38 of the Core Strategy, west Rayleigh is an ideal location for strategic employment development. As we have stated in previous submissions to the council, land to the west of Rayleigh has the most direct and least congested link to the two principal roads serving the district (A130 and A127) and the immediate road network has capacity to accommodate further vehicular traffic. Land west of Rayleigh would therefore clearly be an attractive location for commercial/business operators.

However, we consider that the future employment allocation should be north of London Road, not south of London Road as specified in Policy ED4. We put forward several reasons for this:

- Countryside Properties has extensive experience in providing mixed use developments, including schemes that provide both residential units and employment allocations. Bearing in mind the extent of land under option, north of London Road, we could provide a business or employment park on this land without detriment to the residential amenities of the occupiers of any new residential development, providing a comprehensive sustainable mixed use development through careful masterplanning. The viability of an employment allocation north of London Road would be assisted by the sharing of infrastructure costs with any (adjacent) residential led mixed use scheme (the residential element identified in Policy H2).

- If the employment allocation is to provide for a minimum of 2ha for business/industrial park (as recommended in the employment land study), plus land for some of those users (to be relocated) on the Rawreth Industrial Estate (which is approximately 10ha), then probably a minimum of 10 to 12ha of land would be required. We are not sure that this size of site could be found south of London Road without affecting/requiring land occupied by existing buildings e.g. Swallows Aquatics, and/or bringing development close to the Little Wheatleys Road or the Little Wheatleys estate (see further bullet point below re green belt boundaries). There may therefore be questions over the deliverability of this allocation (without a clearer understanding of its location). We consider that 10/12 ha of land could be accommodated north of London Road, without encroaching into the flood zone or affecting any existing properties.

- Our experience shows us that for a location to be attractive, a high quality masterplanned business park of sufficient size must be available to provide the quality of environment that many businesses are now looking for. 10/12 hectares would probably be a minimum, especially if the site is to accommodate and support an Eco-Enterprise Centre (see Policy ED1). A 10 ha site could equate to 400,000 square foot of floorspace. We suggest that such a site should accommodate a variety of uses and size of units. This would enable those smaller/start up business who start on the site to have the ability to grow and still remain on the site, utilizing the enterprise centre, small start up units or urban hives (typically providing 2,000 - 5,000 square foot) then moving up to medium sized warehouse units or hybrid/bespoke buildings. Urban Hives can be adapted to provide office or industrial space.

- As part of our previous "call for sites" submission we stated that a "hopper" or "shuttle" bus service could be provided to serve the site and nearby communities and link the area to the town centre and rail station (transport and service hubs). The benefit of a larger site allocation (mixed use residential/employment and other uses) North of London Road will be more likely to support such a service and help make it more sustainable.

- We question how a new green belt boundary south of London Road could be defined. We would suggest that any allocation here would be separated/divorced from the existing built up area (west of Rayleigh/little Wheatleys) by existing woodland planting, recreational areas, the school and plotlands to the north and west of the school. Any employment site here could not we believe integrate with the existing residential area, unless for example the plotlands are to be included within this allocation (delivery issues with various different ownerships/land assembly) or the woodland or recreation areas are to be lost, contrary to other policies and principles within the Core Strategy and bringing proposed commercial development closer to existing residential properties, to the detriment of their amenities.

Summary:

We question the appropriateness of identifying land south of London Road Rayleigh for a new employment site. We question its deliverability, and fail to see adequate evidence base to justify this decision/allocation.

We consider that the future employment allocation should be north of London Road, not south of London Road as specified in Policy ED4. We put forward several reasons for this.
16232 Object
CHAPTER 11 Policy ED4 - Future Employment Allocations

Change to Plan The Core Strategy should show an allocation for future employment west of Rayleigh to north of London Road, rather than south of London Road.

Appear at exam? Yes Soundness Tests i, ii
In order to meet the number of jobs required in the RSS, additional employment sites will be required. The Employment Land Study recommends that any de-allocations of employment land be compensated for by the allocation of 18 hectares of new employment sites. As the supply of employment land within the District is tight, this will require the release of Green Belt land.

In order to ensure that a co-ordinated approach is taken to the release of Green Belt land, the requirements for both employment and housing land should be considered together. The idea of not releasing land for residential and then releasing it for employment purposes is a contradiction, as it still requires the release of Green Belt.

The first paragraph should be reworded as follows:

"In order to compensate for the de-allocation of the existing employment land, as detailed in Policy ED3, new employment allocations will need to be located in sustainable locations to meet the needs of businesses. In order to ensure that where it is appropriate to release Green Belt sites the requirement for employment and housing sites are considered together. This will ensure that the most co-ordinated approach is adopted for the future provision. With regards future employment growth the Council will seek to direct the majority of this to the west of the District and in proximity to London Southend Airport. Some industrial land will be allocated in proximity to Great Wakering to provide local employment and mitigate the de-allocation of Star Lane Industrial Estate."

Summary:

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Full Text:  It should be noted that the Core Strategy recognises that there is generally sufficient supply of employment sites but that any de-allocation will have to be compensated for. As a consequence of the strategy to reallocate employment sites under Policy H1, additional greenfield employment land is allocated under Policy ED4. As set out in our submission to Policy H1, the Council's strategy to seek the redevelopment of employment sites for alternative uses is questioned. The allocation of Stambridge Mills as a residential site is of particular concern for reasons identified elsewhere.

Should it be found that any of the employment sites proposed for residential development under Policy H1 should not come forward (in accordance with our submission to Policy H1) then some or all of the new employment sites should not come forward.

Proposed Amendment to Policy E4: Any changes to Policy H1 to retain employment sites should result in some or all of the new employment sites being deleted from Policy E4
1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.
The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a 'community anchor store'. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a 'saved' policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, "Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.'

Core Strategy Policy ENV2 should be revised to include specific reference to,
* Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
* the application of the most stringent restrictions on development within the rural and undeveloped coastline;
* any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

* Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with, The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council’s document should fully reflect the County Council’s own approach to this matter as set out in the County Council’s ‘Developer’s Guide to Infrastructure Contributions’.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.
* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.
* The Core Strategy should make specific reference to,
  o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;  
  o Policy CLT2, final sentence: insert after the words ‘primary schools’ the words ‘and Early Years and Childcare facilities;’  
  o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add ‘Land to be allocated within new residential areas, as appropriate’.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,

* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.
* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment’s (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text,  
‘The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment’s (CABE) Building for Life principles.’

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the...
Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends.

**Summary:** The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

**Change to Plan**  
N/A

**Appear at exam?**  
Not Specified

**Soundness Tests**  
N/A
Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1
Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road...renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009
June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential..." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport
Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "...highway improvements serving new developments...in a timely manner...ensuring developments delivered alongside necessary infrastructure". These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009
Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No7 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can’t run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.)

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Para. 1.25, Para. 11.32  Note CH.1 Introduction to CS Submission 2009 para. 1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4  Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii) "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para. 12.38  The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.
One doesn’t perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists
Para.5.4 "Rochford district has unique character...stems from traditional buildings...still dominate towns and villages".

Para.5.17 "Council believes many buildings...are of local distinctiveness...part of...cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conserved items have been systematically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, façade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area". (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane, others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people.to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochard Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary: Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Move to new industrial site near airport contravene PPS4:
- EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely”.
- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii) “reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges”. Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Appear at exam? Not Specified

Soundness Tests i
Ch. 4 Housing: Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths"

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1 T1 & T2 *.highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure". These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Para.1.32
Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).."reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food..."
shopping expenditure”.

2) (10.28) "There is no immediate capacity for additional floorspace”.

3) (10.29) "we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists
Para.5.4 “Rochford district has unique character...stems from traditional buildings...still dominate towns and villages”.
Para.5.17 “Council believes many buildings...are of local distinctiveness...part of...cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 “Community involvement is an essential part of the plan making process”. In Statement of Community Involvement 2006 Rochford RDC “recognises need to enable people...to have their voices heard”.

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible”.

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA’s responsibility to RDC’s job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn’t exist. In PPS 12, Ch.4.6 states: “Core Strategies should be flexible and able to show how they handle contingencies”. 1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify...
Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as have been chosen.

Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the 2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place:
Policy CP1 - Design
3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-side basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of...
open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport:
Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development:

Policies ED3 - Existing Employment Land
ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Soundness Tests i
Full Text:

Policy ED4 is not sound as it is not precisely worded.

The main text of point 1 of policy ED4 confirms that land to the South of London Road, west of Rayleigh will be used for the relocation of displacement of Rawreth Industrial Estate industrial uses and for additional office development. The bullet points then state that industrial development will be acceptable.

The first para of point 1 should be clear and confirm that additional industrial development in addition to that displaced from Rawreth Industrial estate will be acceptable.

Proposed Change

We request the following amendment to point 1 of policy ED4:

The Council will allocate land to the south of London Road, Rayleigh to accommodate a new employment park capable of accommodating businesses displaced by the redevelopment of Rawreth Industrial Estate as well as additional office space B1 - B8 uses. It will have the following characteristics:

Site location plan received, see Council ref AE30

Local Development Framework

Representations on the Core Strategy Submission Document, November 2009
On behalf of Barratts Eastern Counties

Introduction

The requirements of Core Strategies are enshrined in the 2004 Planning and Compensation Act, the Town & Country Planning (Local Development) England (Regulations) 2004 and the 2008 policy guidance in PPS12. The requirements of Core Strategies are clear. And they are legal requirements. The Core Strategy must comply with the Local Development Scheme, Statement of Community Involvement and the Regulations. The Core Strategy must be subject to a sustainability appraisal, have regard to national guidance, conform generally with the Regional Spatial Strategy and have regard to any Sustainable Community Strategy. A Core strategy must be sound - justified, effective and consistent with national policy. The following representations therefore focus on these legal requirements.

HOUSING

Paragraph 4.6 - Evidence Base

To meet the soundness test Submission Core Strategies (SCS) must be justified, that is to say it must be founded on robust and credible evidence base and comprise the most appropriate strategy when considered against reasonable alternatives. The housing strategy in as far as it identifies a need for Green belt sites is sound, however, there are other elements which are unsound.

Paragraph 4.6 notes that the Strategic Housing Land Availability Assessment (SHLAA) has examined the supply of housing. It is presumed that the Table at paragraph 4.6 is the outcome of this examination. Whilst the SHLAA has some legitimacy in that it identifies various sites that are apparently available, we are concerned that because the SHLAA was only published in November 2009 it post dates the SCS. This implies that the SCS is driving the SHLAA exercise rather than the other way round. Whilst this may have no real practical effect on the outcome of the SCS and the identified need for Green Belt sites, the Inspector will be mindful of the advice in paragraphs 33 and 54 of PPS3 that SCS draw on the evidence in SHLAA. It may be that the SCS should explain how the evidence base has been used to justify the strategy.

PPS12 explains at paragraph 4.37 that Core Strategies are based on thorough evidence. Since the SHLAA has only recently been published it is considered that the SCS is unsound as it is not justifiable. This, together with other comments on the SCS, indicates that the process should be delayed to ensure that a more robust document is placed in front of the EiP Inspector.

Table at Paragraph 4.6 - Evidence base

From our review of the available evidence it would appear that the housing land supply is insufficient and that Green Belt release are required. From the wider strategy being promoted we note that some of the sites that the District Council consider to be 'appropriate' are likely to relate to existing employment areas. As set out elsewhere in our representations, we maintain sever reservations that the redevelopment of existing employment sites for alternative uses and particularly the Eldon Way Industrial Estate is unsustainable. We will make reference to the effectiveness of this strategy in relation to sustainability, whether it is justified in the context of National Policy and the deliverability of such a strategy elsewhere.

In particular, paragraph 11.32 of the SCS refers to existing employment land and sites within the UCS. It does not refer the SHLAA and as such it appears that an evidence base to support the re-use of employment land for residential is not reported in the SCS.

Having reviewed the 2008 Annual Monitoring Report, as we did when commenting on the 2008 Preferred Options Core Strategy, we maintain severe doubts as to the appropriateness of some of the previously developed sites identified as potential housing sites and their expected housing yield. Whilst we cannot at this stage ascertain whether the SHLAA
sites referred to in this table correlate with the Annual Monitoring Report and indeed the 2007 Urban Capacity Study, it is our view that there will be some commonality and so the reliance on these sites is likely to be at odds with Government Policy. We shall elaborate on this objection in relation to the specific housing policy below.

We note that the last two rows in the Table at paragraph 4.6 set out figures with and without Green Belt releases. The text to this section of the Core Strategy should, for reasons of clarity, explain that Green belt review will be necessary in order to deliver the required housing.

Paragraph 4.9

The table on page 40, which sets out the settlement tiers, is supported. Rayleigh, Rochford/Ashingdon, Hockley/Hawkewell are clearly the largest settlements in the District and they benefit from good employment, housing, leisure, community and public transport provision. These settlements are the most sustainable ones with the greatest mix of uses. Consequently, it is sensible that the Core Strategy identifies these as top tier settlements and is able to target them with growth accordingly. This component of the strategy is justified by reference to sustainability data and is effective, since targeting development at these locations will ensure a more sustainable pattern of development.

Paragraph 4.14

We maintain that the strategy for redeveloping the Eldon Way Industrial Estate for housing and other alternative uses to employment is unsound. It is neither justified nor effective. The Industrial Land Availability Study 2006 sets out on page 7 strategic objectives. The 3rd objective seeks to Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive. Clearly the strategy as currently drafted envisages major changes to existing industrial estates, including alternative uses. This strategy is not consistent with other strategies and evidence based studies and so cannot be justified in the context of the tests set out in PPS12. It is also an ineffective strategy since the new employment locations that would free up the Eldon Way site for redevelopment relies on transport infrastructure that has no certainty of being delivered. Principally, the erosion of employment uses at Eldon Way could make the settlement of Hockley/Hawkewell less sustainable and thus conflict with the tiered approach on page 40, paragraph 4.9.

Policy H1

Prioritising the use of previously developed land ("pdf") is supported in principle. It is a justified strategy in the context of PPS3 and effective as sequential choices can be made by implementing the policy. However, the District Council is also promoting a strategy which seeks the redevelopment of existing employment locations to alternative uses and by consequence is identifying green field sites for new employment development elsewhere (Policy ED4 refers). This 'land swapping' is not considered consistent with PPS3, nor is it considered to be justified or effective in delivering the desired strategy. This is particularly the case as most of the existing employment sites are occupied and therefore unavailable for redevelopment. In addition, the new Greenfield sites are in an arguably less sustainable locations away from the top tier settlements identified on page 40 of the Submission Core Strategy. Clearly this element of the strategy is inconsistent with the wider strategy.

The Industrial Land Availability Study 2006 is included as an evidence base by the District Council. It includes an introductory section, which explains that the authority wishes to make Rochford the place of choice for new business. It includes several strategic objectives on page 7 including “Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive.” It reviews existing employment areas and identifies vacant land, including land available from allocations. It does not include any assessment of new sites or potential opportunities for new sites that might have been expected to feed into the Core Strategy. The strategy for identifying Green Belt site employment allocation does not appear to be based on any evidence in this document and in that context cannot be justified. The strategy being promoted potentially conflicts with Government policy in PPG13, PPG2 and emerging PPS4.

The Employment Land Study 2008 is a much later document. It has a key recommendation on page ii “we recommend that Rochford District Council adopts strong policies to protect existing employment land.” Furthermore under recommendations for existing sites on page iii-iv of that document it states “In our view, Hockley Trading Centre is a strategically well placed employment location. However, we recognise the ambitions of the Hockley Town Centre masterplan and that within this the Council should consider it to be allocated for other uses. However, we recommend that this reallocation happen only if provision is made within the masterplan for office use within Hockley Town Centre as part of a mixed use scheme.” The view of the writers of this document is clear - the Eldon Way Industrial estate (Hockley Trading Centre) is a good employment site and that it is for other reasons that alternative uses should be considered and only then if office development is supported. This supports our representations that new future uses at the Eldon Way site should be employment dominated and that alternative uses should relate to the objectives of the Town Centre which is to enhance the shopping and leisure facilities. Residential is not an appropriate alternative.

This document recommends the use of land to the west of Rayleigh for employment and envisages Green belt release. However, the SCS does not explain through the evidence base why existing employment sites should be ‘deallocated’ and Green belt land unnecessarily used.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
In addition to these key issues we have some specific concerns. As a consequence we maintain an objection to the second paragraph of Policy H1. This policy states that the Council will seek the redevelopment of various industrial estates including Eldon Way. The Policy says that alternative uses will be sought (presumably alternative to the existing employment offer) and that new land will be allocated elsewhere. This policy statement, in relation to Eldon Way in particular, is unsound for a number of reasons:

The emerging Hockley Area Action Plan consulted upon in 2008 states that the Eldon Way Industrial Estate is strategically well placed. In a sense this statement underplays the true importance of this highly sustainable employment location and only major employment area in Hockley/Hawkwell. The employment area is adjacent to the railway station and located a short distance from the main bus routes that run along Spa Road. Some of the residential areas of the town are also within walking distance of this commercial area, thus providing a potential for sustainable travel by employees. The Eldon Way Industrial Estate is therefore right at the heart of the settlement of Hockley/Hawkwell and provides an opportunity to meet sustainable transport objectives by reducing the need to travel by car. Consequently, this employment area should be highlighted as a premier employment site in sustainability terms, both in the context of PPG13, PPG4 and PPS6. To encourage alternative uses as set out in Policy H1 implies the removal of the majority of employment based activity at Hockley/Hawkwell and this would be contrary to National policy, would not be the most appropriate strategy when considered against alternatives and is therefore unsound.

Whilst it is acknowledged that improvement to the Eldon Way Industrial Estate can and should take place, the extent to which the mix of employment uses should be altered in favour of alternative land uses requires careful consideration. It is our view that a mix of existing or indeed new employment land uses with some Town Centre type uses should dominate the Eldon Way site. A mix of employment types between offices, light industry and other high technology industries should be encouraged as this will provide many locational advantages to the firms that agglomerate together. The Council says that the existing uses on this site are harmful to amenity. However, the site has operated for many years without any significant issues and if renewal for B1 type uses are encouraged then the employment area can be maintained without harm to amenity. Renewal of the employment stock can help develop and improve trade, improve the sustainability of businesses as a whole and make for a more flexible labour market as skill levels are varied. A singularly different use altogether or a variety of uses which excludes employment could undermine the long term sustainability of the area and Town Centre. As such Policy H1 is not an effective strategy and should be amended to acknowledge the importance of Eldon Way and the need to renew the employment stock to ensure that the site maintains its important role as a employment site, albeit with some ancillary alternative use development where appropriate.

The 2008 Retail Study notes that Hockley Town Centre is not strong and there is trade leakage. Eldon Way Industrial Estate provides a customer base for existing town centre uses. Weekday spending within town centres is an important contributor to the viability of many retail and leisure businesses either through expenditure by employees during the lunchtime trade or expenditure by employers, on necessary goods and services. This relationship helps sustain the critical mass of a centre and provides a platform for new retail and leisure growth. It is important to have a balanced centre with a variety of uses. Policy H1, as currently drafted, implies the removal of employment related development and this is likely to harm the vitality and viability of Hockley Town Centre. The Council has presented no evidence to suggest that this is not the case.

Importantly, the 2008 Retail Study explains that there is a need for additional retail and office space. In principle we would support additional office and other B1 type uses plus retail but employment uses should always dominate for the sustainability reasons given above. Retail and office development are likely to present a viable alternative to some of the more industrial type uses.

Consequently, we do not support the phrasing of the third paragraph of Policy H1 and maintain that the most appropriate strategy is to seek renewal of the employment stock with employment based uses and with some new retail development. Removal of employment land uses completely as currently implied-which was the approach adopted in the emerging Hockley Area Action Plan - is not a justifiable strategy.

One of the key tests of a Core Strategy is consistency between policies in the emerging Plan and this strikes at the heart of demonstrating an effective strategy. Policy H1 implies alternative uses to employment and the relocation of Eldon Way to a site identified under Policy ED4. However, Policy RTC6 sets out a suite of policy criteria for Hockley Town Centre which includes employment and commercial activities. In addition Policy ED3 seeks the protection of sustainable employment sites (Eldon Way) and notes that some reallocation of existing employment sites will include a proportion of employment. It notes that in the case of Eldon Way employment development will form a component. The policies appear at odds with one another. The third paragraph of Policy H1 should be deleted as the second paragraph is sufficient to set a strategic context for delivering new housing development. The employment policies and Hockley specific policies should be left to consider the type and quantum of land uses appropriate in the area. If the third paragraph of H1 is to be retained then it should lie in more with Policy RTC6 and in our view explain that employment uses should dominate any redevelopment proposals for the Eldon Way site and that retail and leisure uses should be a supporting proportion.

Implementation, Monitoring and Delivery - page 132 onwards

One of the key tests of soundness is that the Core Strategy should be effective - it should be able to deliver its strategy. The Implementation strategy set out at page 132 onwards of the Core Strategy does not explain how Policy H1, RTC6 and the strategy for redeveloping Eldon Way (Policy ED2 and ED3) will be delivered. The comment at Policy ED3 on
We support the strategy that new housing growth should be targeted at land South of Hawkhell. This area is suitably located to the urban area of Hockley/Hawkwell and to lie in with the settlement tiers on page 40 of the Submission Core Strategy the same terminology for settlement should be used. This ensures a consistency within the SCS. The choice of this location as a housing growth area is appropriate as it would not contribute to the coalescence of the urban area with Ashingdon (there is existing development between this identified housing area at Rectory Road and Ashingdon and moreover, Rectory Road can form a natural physical boundary for the new Green belt boundary. This area is also well located to the existing road network. Cheery Orchard Way has recently been improved and provides much better accessibility to the proposed housing growth area than any other location around Hockley/Hawkwell. The existing bus routes along Rectory Road also make this location sustainable and the additional housing proposed will help underpin the financial viability of bus routes in this area. Locally there are employment opportunities, including the small commercial estate off Main Road. The Eldon Way Industrial Estate adjacent to the Town Centre also provides the opportunity for employment locally. Extensive public open space, play pitches and built leisure facilities are located just to the north of this area and a community hall is located off Briar Close, nearby. The area to the south of Hockley/Hawkwell is close to local shops on the corner of Heycroft Road and Main Road and there are numerous footpath links between this area and the local community including links via Thorpe Road, Thorpe Close, Briar Close, Hawkwell Park and Park Gardens. The area therefore provides the opportunity to enhance existing links, including cycle links, and contribute towards community integration - more so than other sites on the south side of this settlement. The site is also in the control of a house builder and deliverable.

However, we find that the Policy is not fully consistent with national policy and furthermore needs to be reviewed in order to be justified and effective. We have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with this policy and feel that Green Belt review should be more explicit throughout the SCS. We note that it is only Policy H3 which indicates the need for Green Belt land review. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes onto talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H2 and certainly Policy H3 and Policy GB1 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary.

Policy H2 - Phasing and Quantum

The 2008 Preferred Core Strategy document indicated that the area south of Hawkhell should deliver 330 dwellings over a phasing period to post 2021 (see Policy H2 and H3 of that document). The SCS reduces the quantum of housing in this area to 175 but expects delivery by 2015. At a broader level the Preferred Options Core Strategy of 2008, (Policy H2) required 1,450 dwellings to 2015 and a further 1,050 by 2021. In the SCS the figures are now 775 and 1,010 respectively.

Since the SHLAA post dates the publication of the SCS, we are uncertain as to the reason why such a significant reduction in quantum of housing and extensions to the residential envelope is considered necessary. Presumably it is the 'new' strategy to redevelop existing employment areas within the settlements that has led to this change. Our representations on this strategy and specifically the Eldon Way Industrial Estate are included elsewhere within our representations. Previously we have commented on the Table at paragraph 4.6 of the Submission Core Strategy and the lack of evidence to underpin that table. It seems odd that in the space of a year the expected requirement for Greenfield sites has effectively halved on the basis of a SHLAA exercise. The community is therefore not able to effectively
comment on the housing land supply and at this stage the Submission Core Strategy is legally unsound.

That said, we are of the view that the quantum of housing envisaged south of Hockley/Hawkwell should be more than the 175 currently envisage. In coming to this view we have reviewed the Urban Capacity Study and the latest housing figures in the Annual Monitoring Report 2008. We conclude that the shortfall in housing land supply is such that 330 dwellings in this location is appropriate.

The recently published SHLAA is based upon the data obtained from the Urban Capacity Study 2007, a call for sites exercise and data from the Annual Monitoring Report 2008.

The 2007 Urban Capacity Study (UCS)

1. 2007 is widely recognised as being the peak level of house prices in the UK and it was acknowledged by Government and practitioners alike that 2007 house prices were at an unsustainable level. It is our view that utilising the 2007 UCS as an evidence base without reference to the market does not pick up the depressed demand that is likely to now exist. Recent corrections to the housing market now mean that housing land prices are at a much lower and arguably more affordable level than before. The implications are that some pdl may not be viable for housing development. Often brownfield sites have much higher development costs than Greenfield sites and so the yield from urban capacity will be much lower than anticipated in the 2007 study. One example is the employment allocation of the Adopted Local Plan located at 76-92 Main Road, Hawkwell. This site has been allocated for several years and has been available during the most recent rises in residential property prices during 2006-07. As a consequence the lack of progress on the site can only be described by its current occupancy and perhaps it comprises high value uses that do not encourage redevelopment. Despite this the site is identified as having high potential for alternative use and high potential demand. The SHLAA form notes that there is no information on legal constraints (e.g., tenancy agreements) As a consequence it is difficult to see how this could continue to be a potential site and as a consequence the allowance for green field releases should be increased.

2. There are considered to be other instances in the UCS and the recently published SHLAA where the assumptions and calculations would indicate that the 1301 urban capacity figure is over optimistic and the SHLAA assessment is limited. In the assessment of 'non-residential sites in appropriate locations' within the UCS assumptions are made as to the probability of sites coming forward for new housing. 68-72 West Street, Rochford is identified as a high probability site but we note that it has been subject to 7 refusals of planning permission/conservation consent. There is a significant gap between the urban capacity identified as being suitable by the Council and the capacity applied for by the owners. Given its alternate use value, it is debatable whether the two capacity figures can be reconciled. No 247 London Road is another example of a site allocated in the Local Plan but which hasn't come forward. This is now the subject of a proposal for a care home and if approved would further limit the scope for market/affordable housing capacity on the site. A striking example of how the urban capacity study has underestimated is also evidence by 2-4 Alderman's Hill, Hockley - described as a disused service station. There has been no residential development application on this site since 2004 and most recent applications have sought commercial use of the site. Rather than being evidence of housing land deliverability, this particular site evidences the need for commercial uses in the area. There are therefore deliverability doubts over these 'high probability' categories which amount to some 40 units.

3. In relation to the assessment in the UCS entitled 'intensification of existing residential uses' we note that the assessment is premised on an assessment of recent trends taking into account net completions between 2001-2006 and 2005-06. This is effectively an assessment of windfall trends and not an approach that PPS3 encourages. Importantly Table 3-12 in the urban capacity study seeks to project forward urban capacity from residential redevelopment - a period that benefited from high house prices and PPG3 guidance encouraging redevelopment. These two circumstances have markedly changed and so the assumptions and conclusions drawn would also have changed. Even taking into account the UCS discounting, the reliability of the 404 units from this source must be questioned and in our view the 1301 figure cannot be a sound basis for urban capacity and further Greenfield releases are necessary.

4. In the section of the UCS entitled 'subdivision of dwellings' and 'living above the shop' it is estimated that recent trends would result in 7 and 15 units. Our concerns with using trends as a basis for urban capacity are detailed above - PPS3 does not encourage this. Rather, local authorities are charged with surveying their areas, identifying which areas may yield urban capacity and how much and developing policies to achieve that. Government guidance does not encourage the estimation of windfalls in the way the UCS does.

5. Redevelopment of established employment land is a separate section within the UCS. At 1 above we identify the low probability of the Main Road residential allocation coming forward. This remaining section of the UCS considers 11 further employment sites which were first identified in the 2000 UCS. Three of these are considered to have a high probability of coming forward. We have looked at these three sites and can find no evidence that they are likely to come forward. In the 8 years between 2000 and 2008 the three identified high probability employment sites have not been developed and there is no reason to assume that the next 5-10 years will be any different. For example the Rawreth Industrial Estate is identified as being well used in the UCS and although it has some unneighbourly uses there is no indication that the site is available, suitable or deliverable for residential. Land between 39-69 Lower Lambricks, Rayleigh is identified as having a high probability of residential uses. Yet there is no
Core Strategy Submission Document

16925 Object
CHAPTER 11 Policy ED4 - Future Employment Allocations

Evidence of any pre-application advice or planning applications for this area. Stambridge Mills, Mill Lane, Stambridge is a further example. This site is separated from the urban area, in a flood risk zone and protected in the 2006 Replacement Local Plan by Policy EB9 which promotes B1 uses. Against this background there is only two relevant planning applications affecting this area both date from the early 1990’s and relate to a plant room and loading bay. There is no evidence that this is likely to come forward for residential purposes in the next 5-10 years.

6. In the UCS extant permissions are identified as 856 dwellings. It is important to note that this figure needs to be continually reassessed so that from the point of adoption of the Core Strategy a 5 and 10 year housing land supply is available. The SHLAA notes extant permissions for 2009-14 being 106. As noted below extant permissions do not necessarily translate into deliverable sites. There is therefore a contingency that needs to be built in. Further allocations on greenfield land need to be increased and as such the quantum of housing in the area south of Hockley/Hawkwell should be increased to 330 dwellings in order to begin to meet the shortfall identified.

The District Council’s 5 year housing supply assessment

7. The District Council’s Annual Monitoring Report ("AMR") 2008 purports to demonstrate a 5 year housing land supply. The preamble to Table 4.10 in the AMR 2008 explains that Rochford District Council ("RDC") has included units under construction, units with full permission, units with outline permission, units with a resolution to grant, units subject to preapplication discussion/Urban Capacity Assessment and land allocations in its trajectory. The reader is referred to Appendix B which breaks down the sites in more detail. The recently published SHLAA also includes a table showing a potential 1273 dwellings deliverable. However, it refers to "appropriate brownfield sites." Since these ‘appropriate sites’ are do not benefit from an application or a planning permission it is difficult to programme them into the housing delivery trajectory.

8. In the full planning permission category of the AMR 2008 where work has not yet started there can be no guarantee that all these sites will be delivered in the 5 years. This comment relates to the one above in relation to the recently published SHLAA. It is not uncommon for permissions to be obtained to provide a means for valuing a site where the owner has no immediate plans to sell the site or develop housing. Delivery may also be hampered by funding constraints, or site assembly problems (where sites are in an alternative use or relocation constraints). Appendix B of the AMR 2008 does not set out the intentions of the landowner or whether the sites are truly achievable in the 5 year period as per PPS3 requirements. The SHLAA purports to show developer intentions at Appendix C but the assessment by the local authority into the legitimacy of some of the claims is not presented. The evidence base is not as full as it should be to demonstrate the robustness of Table 4.6 of the SCS. It is also unclear the extent to which this table is based on either the UCS 2007, AMR 2008, SHLAA 2009 or a combination of all three. This should be set out clearly.

9. In addition, to the 'non delivery' of a proportion of new homes in the AMR 2008, there is concern at the timings of delivery in that data set, for example, 10 units in 2008-2009 relates to outline planning permissions and it is doubtful whether reserved matters can be turned round quick enough to begin delivering housing in this year period. There could well be examples in that set of data where the delivery of units in the first year of the 5 is unlikely, thus delivery is reduced for that period and pushed back and this process is then compounded throughout the data set up to and beyond year 5. Statistical evidence from the Department of Communities and Local Government ("CLG") reveals that building starts are 43% down on the quarter to March 2009 compared with March 2008. It is not clear whether the recently published SHLAA has taken this into account and unless it does the data in the Table at 4.6 of the SCS cannot be relied upon, particularly given the current recessionary circumstances. In relation to the Table at Paragraph 4.6 a refinement is therefore needed to take into account this effect on phasing.

10. This problem is compounded for other units relied upon where permission has been granted but no start on site has been made; this accounts for a considerable number of sites in 2009-10 period (100 dwellings) which is (year 2 of the 5 year period). A delay in these will require more Greenfield sites to be identified in order to meet the shortfall.

11. Finally we note that the East of England Plan expresses its land supply requirement as a minimum. This strategy is not reflected in the

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Submission version of the Core Strategy policy H2.

12. In summary since neither the UCS nor the Annual Monitoring Report form a SHLAA, reservations are maintained about the degree to which sufficient housing land has been identified.

Policy H3

In the Preferred Options Core Strategy 2008 more locations were identified for housing growth in the post 2021 phase. Whilst it is our view that land south of Hockley/Hawkehall should benefit from a greater number of dwellings than the 175 currently identified (330) in order to make the strategy effective. We are concerned at the significant change in strategy between the Preferred Option Core Strategy and the Submission version, which has significantly less housing growth on green field sites. This change in strategy is so significant that we would question whether it is appropriate in the context of soundness and the consultation processes that have taken place so far.

We also have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with other policies in the SCS and feel that Green Belt review should be more explicit throughout the SCS. As it currently stands there is a potential conflict with national policies and limited justification for the Green belt strategy. We note that in Policy H3, which indicates the need for Green Belt land review, the advice is limited and unclear. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes on to talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H3 and Policy GB1/H2 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that a review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary. Not to do so is unsound for justification and effectiveness reasons.

Policy H4 - Affordable Housing

As currently drafted we feel that the policy is not concise enough and that the policy does not reflect current guidance. The phrase 'at least' would indicate that in most cases affordable housing above 35% will be sought. Our understanding is that the 35% figure is recommended in the SHMA and that to provide a policy framework which seeks to go beyond that figure would potentially be unworkable as many sites could not financially bare the burden of over a third of the net developable area not yielding a value. The policy should be redrafted so that "a target of 35% affordable housing shall be provided on all developments of 15 or more units..."

The last policy paragraph provides some scope to relax this policy, if there are clear site constraints that make on site provision impossible. The policy, though, is not particularly clear on what would constitute exceptional circumstances. For example, physical site constraints, which unusually raise development costs, would be one such reason and this should be specified. There may be other reasons including the nature of housing needs in the part of the District the site is located which justify affordable housing below the 35% target. Design reasons may also have a bearing on how provision is made and in what form, particularly if the site is in an historic area where design might override housing need argument. It is therefore recommended that the policy expand on the type of circumstances where affordable housing may be relaxed and the type of information that will be sought of applicant's who have a need to invoke this part of the policy.

Policy H5

In support of the policy, it is advantageous that no percentages requiring a specific mix are included. This flexibility will enable developers and the Council to respond directly to changing circumstances in the local housing market. In the past some authorities have set out a percentage for the type of housing they require only to find that after a few years of strict implementation there is an oversupply of property of that type and no flexibility in the policy to address the problem.

Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford's main settlements to what essentially
would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Policy ED3

We fully support the first sentence of the Policy and note the apparent contradiction with the statements in Policy H1 and elsewhere which seeks to develop on alternative uses at industrial estates such as Eldon Way.

This contradiction is evidence in the second paragraph of Policy ED3. In our representations on Policy H1 we have explained why it is not sound to diminish the employment stock at Eldon Way and the importance of maintaining a dominance of employment type uses at this estate. These arguments are not repeated here.

We note the sentiments of the third paragraph and in accordance with our representations elsewhere are of the view that this sentence should be revised to explain that Eldon Way will accommodate principally employment type uses. As noted elsewhere uses which are an alternative to employment would diminish this highly sustainable employment site and this is unsound when assessed against National Policy.

Policy ED4 - Future Employment Allocations

In part, the de-allocation strategy is not supported as it is considered unsound when set against sustainability criteria. In relation to the Eldon Way Industrial Estate it is considered critical to the ongoing sustainability of this settlement that employment uses are maintained at this location. It is close to the railway station, bus routes and local residential areas from which the opportunity exists for employees to walk or cycle to work. Its location adjacent to the Town Centre offers opportunity for some retail and leisure development to complement the centre and to maintain a supporting function. These sustainable benefits would not occur with the deallocation of Eldon Way or the significant erosion of its employment floorspace. Whilst redevelopment of the employment site to achieve new employment is supported, the dominant land use should continue to be employment use. As a consequence, the 18ha of land required for employment in this policy is considered to be excessive and the policy should be reviewed to explain that redevelopment of existing employment sites for primarily new employment development will be encouraged.

Policy T4

It is noted that the South Essex Rapid Transit policy, as elaborated upon at paragraph 10.16 notes that Rochford is not served but may be served in future phases. This uncertainty is contrary to the delivery principles of soundness and directly puts at issue the employment land supply strategy in the District which is founded on sustainable access to new sites. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley, Rochford and Rayleigh is unsound.

Appendix H1, CTL1 - Infrastructure

It is recognised that necessary infrastructure provision is an important part of creating a sustainable development and in that context appendix H1 is supported. The supporting text notes that the table at Appendix H1 is not exhaustive and in that context it is very important that the framework properly distinguishes between what should be provided as part of new development schemes and what shouldn't. It is therefore essential that the framework acknowledges the importance of Circular 05/05 and the tests which say that provision of infrastructure and/or contributions should be:

* Relevant to planning
* Necessary to make the proposed development acceptable in planning terms
* Directly related to the proposed development
* Fairly and reasonably related in scale and kind to the proposed development
* Reasonable in all other respects

As is made clear (Paragraph B9 of Circular 5/05) contributions should not be used to make good existing deficiencies in infrastructure provision. Nor are they to be used to secure contributions to the achievement of wider planning objectives that are not necessary for consent to be granted. In that context the Core Strategy should set this out as its policy framework.

Policy GB1 - Green Belt

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The objectives of this policy are supported, although as noted in other representations the SCS is unsound as it does not meet the tests in relation to justification, compliance with national policy or effectiveness of strategy.

Policy GB1 mentions the objective to allocate the minimum amount of Green Belt land necessary. The policy should link to the requirements of PPG2 and RSS which are discussed in relation to the representations on Policy H2 and H3. The policy should set out a timeframe for the review and why Rochford requires a Green Belt review (what the exceptional circumstances are in this District that justify a review of local boundaries. The policy should be amended to set out a 2031 time frame and this may require the SCS to have an extended life span beyond 2021.

We would recommend the deletion of the word character since Green Belt designation is not related to landscape character as currently drafted. For clarity we would also recommend that the Policy or its supporting text explain that a Green Belt review will take place in support of an allocations document (paragraph 6.6) in order to identify an appropriate new boundary. This is particularly necessary given the commitment to a Green Belt review in the adopted Local Development Scheme.

Policy CLT1 - Planning Obligations and Standard Charges

In view of the need to test fully the basis on which standard charges are based it is important that any document produced is in a development plan document that enables an examination in public. The policy should explain this in order that when the document is produced it accords with Policy and is based on sound evidence.

ENV9 - Code for Sustainable Homes

Object. The advice from the Department of Communities and Local Government is that the new requirement to have a rating against the Code does not make it mandatory to build a Code home or to have each new home assessed against the Code. It does however mean that all buyers of new homes be given clear information about the sustainability of the new home. A house builder can do this in one of two ways:

- they can choose to build a Code home, have that home assessed against the Code and provide the home buyer with a Code certificate stating the star rating the home has achieved
- or, they can choose to build to current building regulations standards, not to pay for an assessment and instead download a nil-rated certificate of non-assessment (also referred to as a nil-rating) to provide to the home buyer.

As such the Rochford policy requirement that coding 3 be achieved by 2010 and Code 6 by 2013 is out of step with Government advice. The policy wording should explain that it is just the coding that is a requirement of new homes and not necessarily that new homes should be constructed to achieve a standard.

Policy ED4 - Future Employment Allocations

The current Government objectives are for the code to be introduced over a reasonable period with development to be code 3 by 2010, code level 4 by 2013 and code level by 2016. In this regard the policy, as drafted, seeks to achieve code 6 by 2013 and consequently compresses the code requirements into a shorter time scale with the costs associated expected to be substantially within the housing market though higher prices. This is not a realistic strategy for the delivery of sustainable homes and we consider that the policy should be revised to extend the period of compliance but to also make it more flexible based on local circumstances.

Research undertaken on behalf of the Housing Corporation and English Partnerships, published in February 2007 'A cost review of the code for sustainable homes' reveals that code 6 is unlikely to be unattainable given existing technologies and that achieving code 5 could result in a 12% to 20% increase in costs that would have to be passed onto the consumer. Given the variability of the housing market with peaks and troughs, it is unlikely that the housing market would be able to subsume this level of price increase.

The code system policy as currently drafted does not have regard to site circumstances and so many of the requirements could be difficult to meet. For example, micro electricity generation on site may be difficult to achieve where local circumstances deter the capture of wind or solar power. If more expensive technologies are required to generate power than is the norm then costs will rise. There may be other competing reasons why designs cannot include certain sustainability measures if housing sites are in sensitive landscape and historic locations. Alternatively there may be significant development costs associated with site specific circumstances and so viability of the site's development becomes a valid consideration. By insisting on the code for sustainable homes other policy objectives such as affordable housing at particular rates and other contributions may need to be reconsidered. Consequently, we are of the view that this policy should be drafted in a manner which enables site specific circumstances to be taken into account. As noted above the Government explains that the code is a certification requirement and does not necessarily mean that buildings are constructed in accordance with a code level.

It is also important to note that it is not the purpose of planning legislation to duplicate other legislation. In this regard, the policy should accept that the Building Regulations will be the main vehicle for implementing this policy and that unless the coding requires external development then there will be no need to specify what is to be carried out in a planning application.
Summary: Policy ED4 - Future Employment Allocations

In part, the de-allocation strategy is not supported as it is considered unsound when set against sustainability criteria. In relation to the Eldon Way Industrial Estate it is considered critical to the ongoing sustainability of this settlement that employment uses are maintained at this location. It is close to the railway station, bus routes and local residential areas from which the opportunity exists for employees to walk or cycle to work. Its location adjacent to the Town Centre offers opportunity for some retail and leisure development to complement the centre and to maintain a supporting function. These sustainable benefits would not occur with the deallocation of Eldon Way or the significant erosion of its employment floorspace. Whilst redevelopment of the employment site to achieve new employment is supported, the dominant land use should continue to be employment use. As a consequence, the 18ha of land required for employment in this policy is considered to be excessive and the policy should be reviewed to explain that redevelopment of existing employment sites for primarily new employment development will be encouraged.

Proposals unsound.

Do not need more shops in Hockley, Rayleigh or Rochford. All these centres struggle to fill existing retail units and there is a predominance of charity shops already occupying prime sites which suggests that 'real' retailers cannot see a way to sustain businesses there.

Maybe if rents and rates could be reduced???

Full Text: Core Strategy Submission

Thank you for your email of 21 September consulting The Theatres Trust on the Core Strategy Submission.

The Theatres Trust is the national advisory public body for theatres and a statutory consultee on planning applications affecting land on which there is a theatre. This applies to all theatre buildings, old and new, in current use, in other uses, or disused. Established by The Theatres Trust Act 1976 ‘to promote the better protection of theatres’, our main objective is to safeguard theatre use, or the potential for such use but we also provide expert advice on design, conservation, property and planning matters to theatre operators, local authorities and official bodies.

Due to the specific nature of the Trust’s remit we are concerned with the protection and promotion of theatres and therefore anticipate policies relating to cultural facilities.

Tests of Soundness

We do not find this document to be sound as it does not reflect your Cultural Strategy which is listed as a District Strategy on page 23, nor do we believe it will be effective.

Reasons

The Core Strategy does not address the issues raised in the Cultural Strategy:

Cultural Strategy page 5 - We have already mentioned that culture effects us all on a daily basis, so it is essential that we do not leave future developments to chance. By creating this strategy and continuing the evaluation and development of the action plans, we can ensure that all gaps in provision, opportunities, demands and aspirations, priorities and partners, are identified and acted upon.

Cultural Strategy page 12 - Lack of cultural facilities in the district was also highlighted, including no specific museum or live music and performance focused space, as well as a frustration regarding the lack of cohesive communication about all opportunities in the district.

Policy CLT9 Leisure Facilities only deals with sport and recreation, according to the accompanying text. Policy CLT6 Community Facilities does not include a description of what facilities are included in the policy and there is not Glossary for the document. It is therefore unclear where the issue of the lack of cultural facilities is attended to in the document. The most likely location for cultural facilities would be Rayleigh Town Centre but its Policy RTC4 only states that an Area Action Plan will provide a range of evening uses. The deferring of development implementations to subsequent planning documents places the reliance on these other documents to make the important decisions. The Core Strategy will set the scene for more detailed guidance but should be able to stand on its own.

The document lacks a clear spatial focus and there are few specifics as to the scale of development, the range and mix of uses, how they relate to each other and the infrastructure necessary to achieve this.
The policies seem to be a set of generalities lacking any real analysis of the area and the key challenges facing the District. The wording of policies needs to be robust and clear because of the way they determine whether or not, and how development can take place.

**Summary:**

The Core Strategy does not address the issues raised in the Cultural Strategy:

Cultural Strategy page 5 - We have already mentioned that culture effects us all on a daily basis, so it is essential that we do not leave future developments to chance. By creating this strategy and continuing the evaluation and development of the action plans, we can ensure that all gaps in provision, opportunities, demands and aspirations, priorities and partners, are identified and acted upon.

Cultural Strategy page 12 - Lack of cultural facilities in the district was also highlighted, including no specific museum or live music and performance focused space, as well as a frustration regarding the lack of cohesive communication about all opportunities in the district.

Policy CLT9 Leisure Facilities only deals with sport and recreation, according to the accompanying text. Policy CLT6 Community Facilities does not include a description of what facilities are included in the policy and there is not Glossary for the document. It is therefore unclear where the issue of the lack of cultural facilities is attended to in the document.

The most likely location for cultural facilities would be Rayleigh Town Centre but its Policy RTC4 only states that an Area Action Plan will provide a range of evening uses. The deferring of development implementations to subsequent planning documents places the reliance on these other documents to make the important decisions. The Core Strategy will set the scene for more detailed guidance but should be able to stand on its own.

The document lacks a clear spatial focus and there are few specifics as to the scale of development, the range and mix of uses, how they relate to each other and the infrastructure necessary to achieve this.

The policies seem to be a set of generalities lacking any real analysis of the area and the key challenges facing the District. The wording of policies needs to be robust and clear because of the way they determine whether or not, and how development can take place.

**Change to Plan**

**Appear at exam?** Not Specified

**Soundness Tests** i, ii
1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.
The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a ‘saved’ policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, ‘Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.’

Core Strategy Policy ENV2 should be revised to include specific reference to,

* Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
* the application of the most stringent restrictions on development within the rural and undeveloped coastline;
* any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

* Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with, The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Core Strategy Submission Document

16693 Support
CHAPTER 12 Policy RTC4 - Rayleigh Town Centre

* Paragraph 8.15 of the supporting text should be amended to better support the suggested amendment to Policy ENV1. The existing text of Paragraph 8.15 should be deleted in its entirety and replaced by:

The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

* Page 16 (Sustainable Community Strategy Priority: Promoting a Greener District) should be amended to further support the approach to the Historic Environment. The fourth bullet of the Key Section/Policies of the Core Strategy should be amended to include the word ‘historic’, so that the first sentence of the bullet would read:

The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council’s document should fully reflect the County Council’s own approach to this matter as set out in the County Council’s ‘Developer’s Guide to Infrastructure Contributions’.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.

* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

* The Core Strategy should make specific reference to,
  o Appendix H1, Location at South Canewendon: new Early Years and Childcare facilities;
  o Policy CLT2, final sentence: insert after the words ‘primary schools’ the words ‘and Early Years and Childcare facilities’;
  o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add ‘Land to be allocated within new residential areas, as appropriate’.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,

* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.

* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment’s (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, ‘The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment’s (CABE) Building for Life principles.’

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the
CHAPTER 12  Policy RTC4 - Rayleigh Town Centre

Summary:

Town Centres

Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends.

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.
The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a ‘saved’ policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, 'Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.'

Core Strategy Policy ENV2 should be revised to include specific reference to,
* Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
* the application of the most stringent restrictions on development within the rural and undeveloped coastline;
* any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,
* Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with, The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.
The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach.

The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

* Paragraph 8.15 of the supporting text should be amended to better support the suggested amendment to Policy ENV1. The existing text of Paragraph 8.15 should be deleted in its entirety and replaced by,

The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

* Page 16 (Sustainable Community Strategy Priority: Promoting a Greener District) should be amended to further support the approach to the Historic Environment. The fourth bullet of the Key Section/Policies of the Core Strategy should be amended to include the word 'historic', so that the first sentence of the bullet would read,

The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.

* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

* The Core Strategy should make specific reference to,

  o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;
  o Policy CLT2, final sentence: insert after the words 'primary schools' the words 'and Early Years and Childcare facilities';
  o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the
Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends.

Summary: Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Local Residents have not been given adequate chance to object or clarify what is proposed. We do not necessarily want our local shops demolished and replaced by a supermarket we have not asked for. While appreciating that the housing requirement has been imposed by an unelected regional Authority I feel that the local infrastructure is already inadequate for current needs and will struggle to cope with any further residents unless extra facilities are provided. Under democratic government surely we have the right to object.

I am very concerned that Rochford District Council’s Core Strategy document includes details of the redevelopment of Hockley Town Centre by including plans for Eldon Way and Foundry Industrial Estates. This preempts any public consultation that will take place on this subject in 2010, regarding the Hockley Area Action Plan.

Change to Plan

Remove all references to the specific plans for Eldon Way and Foundry Industrial Estates in the Core Strategy document. Since both these areas will be of major concern to the people of Hockley, when the public consultation period for the Hockley Area Action Plan begins in 2010.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Full Text: The CS misrepresents the findings of The Retail & Leisure Study (R&LS) 2008 and states "Hockley has great potential and has a need for additional convenience floorspace".

Whereas, the R&LS actually states:

Appear at exam? No

Soundness Tests i, ii, iii
CHAPTER 12
Hockley Town Centre, 12.38

Full Text:
Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1
Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road...renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to CS Preferred Options 2008 and HAAP 2009
June 2009 issue CS Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential..." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport
Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "...highway improvements serving new developments...in a timely manner...ensuring developments delivered alongside necessary infrastructure". These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009
Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No7 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development
Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Para.1.25, Para.11.32  Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4  Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii) "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres
The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para.12.38  The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.
The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.
One doesn’t perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists
Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, façade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area[i]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane:, others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion
Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people..to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary: Chapter 12: Retail/Town centres
The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.
Para. 12.38 The Core Strategy states (para. 12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) (10.31) "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Council will work with landowners and its partners to deliver the HAAP. One doesn't perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Change to Plan

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Remove threat of compulsory purchase orders.

Appear at exam?  Not Specified  Soundness Tests  i
Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2 N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential..." to be decided by HAAP (issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 "...highway improvements serving new developments...in a timely manner...ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32
Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "..alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation
Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options
Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPPS1 (27vii)"reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
Objective 16761 - 14229 - Hockley Town Centre, 12.38

CHAPTER 12: Hockley Town Centre, 12.38

shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) “we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 “Rochford district has unique character..stems from traditional buildings..still dominate towns and villages”.

Para.5.17 “Council believes many buildings..are of local distinctiveness..part of..cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh. greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protest. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of mixing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. My parents and I own Foundry Business Park. We have not been directly consulted about the CSP or HAAP and object. In the past six years we have already carried out extensive redevelopment of this site. We have built 24 flats and two substantial office buildings and have 20 small businesses we rent commercial units to. Some have been our tenants for 25 years. These businesses are run by local people for the local community. We wish to further enhance the premises we have to allow these businesses to remain where they are, not sited miles away in a remote place.

The plans for housing on Foundry Business Park and Eldon Way are inappropriate to the area. The infrastructure would not support this. The Eldon Way Estate has a history of land contamination from the Every Ready battery factory that stood on the site some years ago. Housing would be affected by this.

The current businesses are supported by the excellent public transport links they have. Removing them to the north eastern side of the airport area, with little in the way of public transport, notably the Railway, flies in the face of national policies to ensure greater use of public transport in the future to get people to work.
CHAPTER 12  Policy RTC6 - Hockley Town Centre

Full Text: Safe environment for residents - NOT when you install traffic lights at Spa roundabout, how is this a 'safe' environment? Traffic flow is bad enough now 3.30 to 6 o'clock, by putting traffic lights YOU WILL make massive traffic jams. Allowing a major store within 50 feet of proposed traffic lights will cause massive tailbacks, ensuring the residents have to breathe more petrol fumes, how is that safe? Building 200 homes on the Eldon Way estate, possibly 400 extra cars in Hockley, village already comes to a standstill a rush hour, you are blocking up our village with traffic.

Summary: Safe environment for residents - NOT when you install traffic lights at Spa roundabout, how is this a 'safe' environment? I was born in Hockley and have lived here all of my life (43 years). People like the village because it is exactly that...........a village, we do not want to become a town and definitely no more housing as the infrastructure will not cope in spite of any plans you may have to update it.

Please leave Hockley as it is, else you may find a fair proportion of the decent population deciding to leave< I for one would definitely consider it.

If people wanted to live in a bustling town they would go and find one.

CHAPTER 12 Policy RTC6 - Hockley Town Centre

Respondent: Hockley Residents Association (Mr B Guyett) [4951] Agent: N/A
Hockley Residents Association
2 Tonbridge Road
Hockley
Essex
SS5 5HL

Full Text: Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary: The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

- The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
- The proposals also ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:  Previous consultations ignored by RDC:

- The proposals ignore to 95% rejection rate of respondents to RDC’s own Hockley Area Action Plan (HAAP) Consultation 2009, which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Full Text: Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary: The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Change to Plan  Defer to HAAP

Appear at exam?  No  Soundness Tests  i, ii, iii
Previous consultations and public opinion ignored by RDC and HAAP pre-empted: As well as ignoring the Parish Plan and the 95% rejection rate of the HAAP proposals, the Core Strategy proposals pre-empt the next round of the HAAP.

Public opinion in Hockley is strongly against both the HAAP and Core Strategy proposals for Hockley Village Centre. A survey undertaken in October 2009 had 972 responses (over 20% of households) and the key results were:
- shops: only 5% in favour of major redevelopment (43% supported moderate redevelopment and 52% only wanted minor improvements)
- Eldon Way & Foundry Industrial Estates: just 13% wanted major change with a youth centre suggested as the most popular improvement.
- Roads: nearly 2/3rds wanted to retain a roundabout at the Spa Junction instead of traffic lights proposed by RDC.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary: Previous consultations ignored by RDC and HAAP pre-empted:
The proposals ignore both the Parish Plan and the 95% rejection rate of respondents to RDC’s own HAAP Consultation (2009), which included specific proposals for Eldon Way (but did not even mention the Foundry Industrial Estate). A survey completed by 972 residents in October 2009 also confirmed the public’s rejection with only 5% in favour of redevelopment the shops and only 13% supporting redevelopment of the industrial estate. Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Change to Plan: Delete and defer to next round HAAP

Appear at exam? No Soundness Tests i, ii, iii

CHAPTER 12

Full Text:

Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

*Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local
Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?
Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
   * The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
   * the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
   * The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.
the Foundry Industrial Estate has never even been previously mentioned;
The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29 "we recommend that focus be maintained on developing Hockley’s existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
the Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

CHAPTER 12  

Full Text:  
Highway & Traffic Implications  

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".  

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).  

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.  

The site selected for the new industrial estate also contravenes PPS4 which states;  

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.  

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.  

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".  

The Core Strategy also contravenes its own policy T1 and is unsound.  

Summary:  
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".  

The Core Strategy also contravenes its own policy T1 and is unsound.  

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.  

Thus the proposals are not founded on a robust and credible evidence base and are unsound  

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):  

*Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local
Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered. It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district’s highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only “potential” to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?
Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.
   - The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.
   - The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
   - The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned; The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4,6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary: The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.
Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

It also contravenes PPS1 (27 vii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local..."
Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

4) " the Council may wish to consider reclassifying Hockley from a town center, to a district center".

Summary:
6. Previous consultations ignored by RDC:
The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2003), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?
Thus the proposals are not founded on a robust and credible evidence base and are unsound
Please find the following objections:

10 off Unsound Reasons.

1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:
The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC not consulted on proposals to relocate the Eldon Way and Foundry Industrial Estates

EW; CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" absolutely no consultation on concept of moving EW businesses entirely

FIE; has never even been previously mentioned in any plan version; CS states omission was due to typing error!

Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus proposals are not founded on a robust and credible evidence base and are unsound.

8. The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.
There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core Strategies should be flexible and "should be able to show how they will handle contingencies"

Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The CS misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The CS states "The R&LS states Hockley has great potential and has a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) "does not lend itself to a food store capable of retaining a significant proportion of main food shopping expenditure.
2) "there is no immediate capacity for additional floor space."
3) "recommend that focus be maintained on developing Hockley's existing strengths."
4) "the Council may wish to consider reclassifying Hockley from a town center, to a district center".

Summary:

7. RDC not consulted on proposals to relocate the Eldon Way and Foundry Industrial Estates

EW; CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" absolutely no consultation on concept of moving EW businesses entirely

FIE; has never even been previously mentioned in any plan version; CS states omission was due to typing error!

Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus proposals are not founded on a robust and credible evidence base and are unsound.

Soundness Tests i
Please find the following objections: -

1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Change to Plan

Appear at exam? Not Specified Soundness Tests i
I understand that RDC was under government instruction to come up with a Core Strategy proposal, and I believe that it has done a reasonable job in trying to satisfy each parish. However, I have 2 objections with regard to the soundness of the latest proposal in the Hockley area.

**Objection**

There is currently a traffic flow issue on the Hockley Road at peak times. With the additional proposed housing allocations in Rochford, Hawkwell and Hockley, and the associated increase in number of vehicles, the Spa roundabout in Hockley will become gridlocked. There is no satisfactory solution provided in the Core Strategy submission to overcome the problem of road networks. There is no inexpensive solution to the growing problem. Also, no account has been taken of the further increased traffic related to the proposed airport expansion.

**Objection**

The latest version of the Core Strategy proposes to relocate existing businesses from Eldon Way and Foundry Industrial Estates in Hockley to greenbelt land in the vicinity of Southend Airport, and to redevelop the estates for commercial, retail, leisure, community, and residential purposes. The number of proposed residential units is not stated independently in the proposal (although it is shown in the Hockley Town Centre Development Plan), but is reported to be 150 - 200 dwellings. The previous version of the Core Strategy did not show any additional housing in the centre of Hockley.

The Hockley Parish Plan (published October 2007) states that there should be no new large housing estates in Hockley due to insufficient infrastructure in terms of schools, healthcare, leisure facilities and road networks. It also states that there should be no loss of greenbelt or open spaces due to housing development. Both of these conditions are broken by the Eldon Way proposal.

The Parish Plan also discusses the traffic flow issues in the centre of Hockley and the approach roads from Rayleigh, Rochford and Ashingdon. The local roads are narrow and could not cope with the additional vehicles generated by 150 - 200 new dwellings in the centre of Hockley, and would be unbearable during the development period with a constant flow of construction lorries.

In a recent Resident Survey in Hockley, completed in October 2009, with reference to Hockley Centre Redevelopment, 87% of responses were against moving businesses out of Eldon Way to make way for major redevelopment, and if redevelopment was enforced, the least favoured type of development was shown to be residential units with just over 1% of response support.

**Summary:**

The latest version of the Core Strategy proposes to relocate existing businesses from Eldon Way and Foundry Industrial Estates in Hockley to greenbelt land in the vicinity of Southend Airport, and to redevelop the estates for commercial, retail, leisure, community, and residential purposes. The number of proposed residential units is not stated independently in the proposal (although it is shown in the Hockley Town Centre Development Plan), but is reported to be 150 - 200 dwellings. The previous version of the Core Strategy did not show any additional housing in the centre of Hockley.

The Hockley Parish Plan (published October 2007) states that there should be no new large housing estates in Hockley due to insufficient infrastructure in terms of schools, healthcare, leisure facilities and road networks. It also states that there should be no loss of greenbelt or open spaces due to housing development. Both of these conditions are broken by the Eldon Way proposal.

The Parish Plan also discusses the traffic flow issues in the centre of Hockley and the approach roads from Rayleigh, Rochford and Ashingdon. The local roads are narrow and could not cope with the additional vehicles generated by 150 - 200 new dwellings in the centre of Hockley, and would be unbearable during the development period with a constant flow of construction lorries.

In a recent Resident Survey in Hockley, completed in October 2009, with reference to Hockley Centre Redevelopment, 87% of responses were against moving businesses out of Eldon Way to make way for major redevelopment, and if redevelopment was enforced, the least favoured type of development was shown to be residential units with just over 1% of response support.
Re: Core Strategy for Hockley Redevelopment

I object to the Core Strategy for the following reasons:

You are ignoring the views of the local residents, who have overwhelmingly stated via the Hockley Parish Plan that they do not want any large-scale housing development in Hockley, but if there has to be some additional housing, there must be no loss of greenbelt or open spaces and any developments must be matched by the appropriate levels of infrastructure.

Our village needs improvements to build on what we have now rather than a long drawn out proposal, which, by the time it is agreed and completed will have seen Hockley become just a huge housing estate without a thriving centre, because many local businesses will have disappeared due to the dreadfully inadequate transport links.

Our roads simply cannot cope with the existing traffic volumes let alone the massive increase in traffic, which will result from the relocation of businesses and numerous housing developments. Our village is surrounded by some of the most beautiful countryside in the district which we do not want to see disappear forever.

Listed below are some of the technical points as to why I object to the Core Strategy and why I believe it to be inaccurate, misleading and unsound.

By proposing to move employment at Hockley's two business estates to a green field site near the airport, which has no existing public transport links and being 2-3 miles from the nearest railway station, is contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions by placing a reliance on car transport as a means of getting to work.

Though RDC are proposing to upgrade the nearest road to a dual carriageway, the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway. This road is already horrendously busy and virtually grid locked at peak times, so this is quite unbelievable that with the predicted expansion of the airport and new industrial estate, there is no provision for the improvement of the B1013 through Hockley. The proposed development of the business estates for housing (and additional housing proposed for Hawkwell) also means an increase in the volume of traffic in the Hockley area with no provision for improvement or expansion to cope with the higher volume.

The site selected for the new industrial estate contravenes PPS4, which states that for "out-of-centre sites, preference is given to sites which are or will be well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car and which are close to the centre and have a high likelihood of forming links with the centre. As there is no existing public transport, there is no obvious likelihood of forming links with any existing centres. In addition, because of its remote location, accessed by the narrow, busy B1013; it is not suitable for access by cycle or on foot."

It also contravenes PPS1, which states reducing the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

PPS12 4.9 states the infrastructure planning process should identify, as far as possible: infrastructure needs and costs. Neither needs nor, especially, costs have been identified. The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.
Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned. No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation. Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. There is no cross-referencing between concurrent plans affecting the exact same piece of land.

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent, which HAAP will need to follow, and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. It states "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floor space".

What the R&LS actually states is:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29 "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 “The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Invest in what we already have rather than forcing upon us something none of us have asked for. Most people would agree that Hockley needs a facelift but it does not need changing beyond all recognition. This strategy does not propose to deal with the issues that affect this area now, and does not propose to deal with these same issues that will be exacerbated further by the proposals that are being made. Attached are some ideas for relatively quickly achievable solutions, which would enhance the village and deal with some of the traffic problems, without losing "Hockley". We live here because we like it - if we didn't we would have moved!

Make the Spa Pub the roundabout, which would greatly reduce the junction exit combinations that exist at the current mini roundabout.

Traffic will still be able to flow when the brewery lorry parks up - it is very dangerous trying to manoeuvre round it onto that mini roundabout, as you cannot see vehicles coming the other way.
Hockley Ideas:

Demolish the "Alldays" building and use that space to create the "village square", which could be landscaped or used in the way the Rayleigh Market car park is used - farmers markets, market days, parking on non market days. This would maintain the existing focal point of Hockley, the High Street, therefore not being detrimental to the shops on the other side of the road. It would also provide a possible link to the Leisure facilities in Eldon Way.

Summary:

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation. Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. There no cross-referencing between concurrent plans affecting the exact same piece of land.

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent, which HAAP will need to follow, and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. It states "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floor space".

What the R&LS actually states is:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."

Full Text: Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (“one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).”

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; £EC7.3C “out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

£EC7.5.1 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question): “Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is
also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
- The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
- The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
- The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
- The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
- the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
- The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates. The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a “village green, introducing a significant area of public open space”. There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.28) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley’s existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; EC7.3C "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5.1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question): "Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is
also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) (10.31) "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states The Retail & Leisure Study states Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace.

Whereas, the R&LS actually states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.
Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; a€” EC7.3C "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres. a€” EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question): “Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is
also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
* The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
CHAPTER 12

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.
The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the
industrial land" with absolutely no consultation at all on concept of moving existing EW
businesses entirely.
The Foundry Industrial Estate has never even been previously mentioned;
The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP)
consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the
two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village
green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy
is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will
set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant.
Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely
undemocratic and unsound.

a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant.
Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely
undemocratic and unsound.

PPS12, 4.6, states that Core strategies should be flexible and "should be able to show how they will handle
contingencies". Several large planning applications have already been submitted to RDC proposing developments
outside the Core Strategy which does not indicate how such applications will be handled and does not comply with
PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been
identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's
existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.
Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider
reclassifying Hockley from a town centre to a district centre".
The Core Strategy is inaccurate, misleading and unsound.

Objections to RDC's Core Strategy Submission DPD

Reason Unsound

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs not, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which doe not indicate how such applications will be handled and does not comply with
PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion."

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre."

The Core Strategy is inaccurate, misleading and unsound.

Summary:
6. Previous consultations ignored by RDC:

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which doe not indicate how such applications will be handled and does not comply with
PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley’s existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Objections to RDC's Core Strategy Submission DPD

Reason Unsound

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3 per hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."
It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with
PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) “The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace”.

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure."

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion."

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre."

The Core Strategy is inaccurate, misleading and unsound.

Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which doe not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley’s existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Summary: Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

CHAPTER 12
Full Text:

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) “out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.
Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to
the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.
Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states “The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace”. Whereas, the R&LS states: 1) “does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) “There is no immediate capacity for additional space.” 3) “we recommend that focus be maintained on developing Hockley’s existing strengths.” 4) “the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Summary: RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated “we will look at opportunities for more valuable and appropriate uses of the industrial land” with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a “low probability” of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.
1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. 1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.
Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to
the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion."

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Soundness Tests i
1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (*one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in
the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013: Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Core Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure."
2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2)" There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Change to Plan

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3\(^*\) an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (\(^*\) one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPSI (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport inks, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in
the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.
7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant.

Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley’s existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Public Consultation on the Rochford District Council Core Strategy.

In my opinion the Core Strategy Submission Document does not go far enough to explain and justify the proposals that it contains. It fails to clearly set out responsibilities, timescales and risks involved in delivering its objectives, particularly on key infrastructure requirements. It provides little detail on how its objectives can be achieved and the costs involved. It fails to offer alternatives to its preferred options and has taken little notice of previous consultations and public opinion. As advised, my detailed comments are based only on issues of soundness and legal compliance.

1. Highway & Traffic

The Core Strategy proposes to relocate two small industrial estates in Hockley to a new and as yet unbuilt greenfield site near to Southend Airport. This proposal to move employment to out of town locations with no existing public transport links, are contrary to government policy PPG4. This proposal also goes against the Core Strategy’s aims of reducing carbon emissions; reliance on car transport and providing a network of cycle paths. This site is not served by a choice of means of transport, nor is it close to the centre, nor is it suitable for access by cycle or on foot. Therefore, it contravenes PPS4.

As a consequence of moving the above industrial sites from the centre of Hockley, the Core Strategy has proposed a mixed redevelopment including up to 200 residential buildings. However, there has been no re-evaluation of transport needs. ECC Highways have confirmed that the B1013 is running at 72% of its theoretical maximum capacity and the effect of extra housing in Hockley and several other areas within a close proximity will put extra strain upon an already over stretched road system.

The combined strategy of moving industrial sites out of town, scattering housing across the district without detailed consideration for transport needs, funding, ability to deliver is concerning. It is clear that the extent of improvements required and the lack of details as to how this can be achieved and how it can be funded makes this proposal unsound.

Consultation.

Previous consultations have not been fairly considered by Rochford District Council. The Hockley Parish Plan, 2007, clearly states that residents are strongly against any large scale housing development in Hockley. It also stated that any development must be matched by appropriate levels of infrastructure improvements. The proposals also ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Action Plan (HAAP) Consultation (2009) which do include specific proposals for Eldon Way, however, do not mention the a joining Foundry Estate.

Eldon Way and Foundry Industrial Estates form a significant element of the ongoing Hockley Area Action Plan (HAAP) consultation but, the Core Strategy proposals pre-empts the next stage of this consultation. There has been no cross reference between concurrent plans affecting the same bit of land. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a ‘village green, introducing a significant area of public open space’ You would think that we are talking about a large tract of land with unlimited space, not a fairly small industrial estate that has a great deal of support from both businesses and residents of Hockley and a strong rejection to redevelopment.

Should a decision be made as part of the Core Strategy to relocate all these businesses it will set a legal precedent which HAAP will have to follow and renders the next consultation stage of HAAP redundant. Given the response to previous consultations, the inconsistencies between HAAP and the Core Strategy, the current proposals are both undemocratic and unsound.

Summary:

1. Highway & Traffic

The Core Strategy proposes to relocate two small industrial estates in Hockley to a new and as yet unbuilt greenfield site near to Southend Airport. This proposal to move employment to out of town locations with no existing public transport links, are contrary to government policy PPG4. This proposal also goes against the Core Strategy’s aims of reducing carbon emissions; reliance on car transport and providing a network of cycle paths. This site is not served by a choice of means of transport, nor is it close to the centre, nor is it suitable for access by cycle or on foot. Therefore, it contravenes PPS4.

As a consequence of moving the above industrial sites from the centre of Hockley, the Core Strategy has proposed a mixed redevelopment including up to 200 residential buildings. However, there has been no re-evaluation of transport needs. ECC Highways have confirmed that the B1013 is running at 72% of its theoretical maximum capacity and the effect of extra housing in Hockley and several other areas within a close proximity will put extra strain upon an already
over stretched road system.

The combined strategy of moving industrial sites out of town, scattering housing across the district without detailed consideration for transport needs, funding, ability to deliver is concerning. It is clear that the extent of improvements required and the lack of details as to how this can be achieved and how it can be funded makes this proposal unsound.

Consultation.

Previous consultations have not been fairly considered by Rochford District Council. The Hockley Parish Plan, 2007, clearly states that residents are strongly against any large scale housing development in Hockley. It also stated that any development must be matched by appropriate levels of infrastructure improvements. The proposals also ignore the 95% rejection rate of respondents to RDC’s own Hockley Area Action Plan (HAAP) Consultation (2009) which do include specific proposals for Eldon Way, however, do not mention the a joining Foundry Estate.

Eldon Way and Foundry Industrial Estates form a significant element of the ongoing Hockley Area Action Plan (HAAP) consultation but, the Core Strategy proposals pre-empt the next stage of this consultation. There has been no cross reference between concurrent plans affecting the same bit of land. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a ‘village green, introducing a significant area of public open space’ You would think that we are talking about a large tract of land with unlimited space, not a fairly small industrial estate that has a great deal of support from both businesses and residents of Hockley and a strong rejection to redevelopment.

Should a decision be made as part of the Core Strategy to relocate all these businesses it will set a legal precedent which HAAP will have to follow and renders the next consultation stage of HAAP redundant. Given the response to previous consultations, the inconsistencies between HAAP and the Core Strategy, the current proposals are both undemocratic and unsound.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; â€¢ (EC7.3C) “out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres. â€¢ EC7.5 1 “whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car”. Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) “Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges”.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc. The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.
Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:
- The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
- The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:
The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
- The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
- The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
- The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
- The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

CHAPTER 12 Policy RTC6 - Hockley Town Centre

- The Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are
proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the
railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific
development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:
PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and
costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail
is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard
Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy
acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal
is therefore unsound.

Previous consultations ignored by RDC:
• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing
development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open
spaces, and no large housing estate developments. It was also stated that any developments must be matched by the
appropriate levels of infrastructure.
• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP)
Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the
adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:
Previous consultations ignored by RDC:

Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC have not consulted on the very specific proposals  to relocate the Eldon Way and Foundry Industrial Estates
• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the
industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
• The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment
to the Core Strategy states this omission was due to a typing error!
• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:
RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the
industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
the Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Core Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study states Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre"

The Core Strategy is inaccurate, misleading and unsound.

Full Text: Highway & Traffic Implications
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway. The effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:
Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing “an integrated network of cycle paths”.

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The “Core Strategy” is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

“Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc. The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered.”

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; a&d (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres. a&d EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; &£ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres. &£ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 viii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC are proposing to scatter housing across the district in around 12 sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.
Summary:
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states “The infrastructure planning process should identify, as far as possible: infrastructure needs and costs”. Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (e.g. B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Previous consultations ignored by RDC:
• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.
• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
• The Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.
Core Strategy Submission Document

16603 Object
CHAPTER 12 Policy RTC6 - Hockley Town Centre

the Foundry Industrial Estate has never even been previously mentioned;
The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure."
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy’s stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway. However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states; 

\[ EC7.3C \] "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres."

\[ EC7.51 \] "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:
The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Core Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:
1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
2) (10.28) "There is no immediate capacity for additional floor space."
3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre."

The Core Strategy is inaccurate, misleading and unsound.

Summary:
The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre."

1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.
The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a ‘saved’ policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, ‘Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.’

Core Strategy Policy ENV2 should be revised to include specific reference to,
* Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
* the application of the most stringent restrictions on development within the rural and undeveloped coastline;
* any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,
* Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with,
The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the disability, and the range of possible forms of accommodation, including supported, sheltered and extra care recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health needs. The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council’s document should fully reflect the County Council’s own approach to this matter as set out in the County Council’s ‘Developer’s Guide to Infrastructure Contributions’.

In addition, it should be noted that,
* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.
* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.
* The Core Strategy should make specific reference to,
  o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;
  o Policy CLT2, final sentence: insert after the words ‘primary schools’ the words ‘and Early Years and Childcare facilities;’
  o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add ‘Land to be allocated within new residential areas, as appropriate’.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,
* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.
* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment’s (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted.

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the
16695 Support
CHAPTER 12 Policy RTC6 - Hockley Town Centre

Summary: Town Centres

Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends.

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a 'community anchor store'. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

Ch. 4 Housing: Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14  Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry
In CS Preferred Options 2008 policy H2 N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential..." to be decided by HAAP (issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1  Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2  RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1
T1 & T2 *.highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure*.

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which
cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3  Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. ".alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPPS1 (27vi)"reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6  Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6  The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure”.

2) (10.28) "There is no immediate capacity for additional floorspace”.

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists
Para.5.4 "Rochford district has unique character...stems from traditional buildings...still dominate towns and villages”.
Para.5.17 "Council believes many buildings...are of local distinctiveness...part of...cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process”. In Statement of Community Involvement 2006 Rochford RDC “recognises need to enable people...to have their voices heard”.

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible”.

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA’s responsibility to RDC’s job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies”. Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities”. So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary: Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32
Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. ".alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring resents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPPS1 (27vii)"...reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food
shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) “we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”

4) 10.31 “the current nature of Hockley does not lend itself to classification as a ‘town centre’ as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre”.

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists
Para.5.4 “Rochford district has unique character...stems from traditional buildings...still dominate towns and villages”. Para.5.17 “Council believes many buildings...are of local distinctiveness...part of...cherished local scene”.

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protest. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process". In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people...to have their voices heard”.

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible”.

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochord Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA’s responsibility to RDC’s job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn’t exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies”. Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: “the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities”. So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

The Core Strategy states (para.12.38) “The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace.”

Whereas the R&LS actually states:

1) (10.26) “the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure”.

2) (10.28) “There is no immediate capacity for additional floorspace”.

3) (10.29) “we recommend focus be maintained on developing Hockley’s existing strengths, rather than retail expansion”

CHAPTER 12 Policy RTC6 - Hockley Town Centre

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Council will work with landowners and its partners to deliver the HAAP.

Change to Plan
Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.
Remove threat of compulsory purchase orders.

Appear at exam? Not Specified Soundness Tests i, iii

Note: The composite reference number in the box at the top of the page is made up of the following information:Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
The Annual Monitoring Report will only tell you what has happened after the event and there will probably be further
delays while an action plan is produced. Whilst some recognised indicators are proposed they do not have particular
targets to help identify where the strategy is not delivering as expected. Other monitoring is simply reporting what the
current status is with no method of identifying if that is on target or not.

There should be clear targets and measures to identify whether the strategy is delivering to plan and take corrective
action before it gets out of hand.

Change to Plan N/A

Appear at exam? Not Specified  
Soundness Tests N/A
1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and benefit the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.
The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a ‘saved’ policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, 'Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.'

Core Strategy Policy ENV2 should be revised to include specific reference to,

* Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
* the application of the most stringent restrictions on development within the rural and undeveloped coastline;
* any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

* Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with, The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.
The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

Page 16 (Sustainable Community Strategy Priority: Promoting a Greener District) should be amended to further support the approach to the Historic Environment. The fourth bullet of the Key Section/Policies of the Core Strategy should be amended to include the word 'historic', so that the first sentence of the bullet would read, The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

In addition, it should be noted that, * Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.

* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

* The Core Strategy should make specific reference to,
  o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;
  o Policy CLT2, final sentence: insert after the words 'primary schools' the words 'and Early Years and Childcare facilities';
  o Appendix CLT1, Other issues/comment: for Early Years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,

* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.

* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, 'The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment's (CABE) Building for Life principles.'

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the
Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends.

**Summary:** The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

**Change to Plan** Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended, *Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.*

**Appear at exam?** Not Specified  
**Soundness Tests** i
CHAPTER 13
Implementation, Delivery and Monitoring

1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.
The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenity is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a ‘community anchor store’. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a ‘saved’ policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads,

‘Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.’

Core Strategy Policy ENV2 should be revised to include specific reference to,

* Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
* the application of the most stringent restrictions on development within the rural and undeveloped coastline;
* any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

* Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with,

The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.
* Paragraph 8.15 of the supporting text should be amended to better support the suggested amendment to Policy ENV1. The existing text of Paragraph 8.15 should be deleted in its entirety and replaced by,

The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

* Page 16 (Sustainable Community Strategy Priority: Promoting a Greener District) should be amended to further support the approach to the Historic Environment. The fourth bullet of the Key Section/Policies of the Core Strategy should be amended to include the word 'historic', so that the first sentence of the bullet would read,

The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.

* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

* The Core Strategy should make specific reference to,

  o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;
  o Policy CLT2, final sentence: insert after the words 'primary schools' the words 'and Early Years and Childcare facilities;
  o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,

* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.

* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, 'The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment's (CABE) Building for Life principles.'

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the
Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends.

**Summary:**
The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality.

**Change to Plan**
It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, 'The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment's (CABE) Building for Life principles.'

---

Note: The composite reference number in the box at the top of the page is made up of the following information: Object/Support - Representation Number - Respondent Number - Plan Reference - Soundness Tests (if applicable).
Under the heading "risk mitigation" for Policy ENV3, the Council do not make any reference to updating their Strategic Flood Risk Assessment. This will be essential for the delivery of sustainable development in the district and will be required as part of the evidence base for more detailed DPDs being undertaken as part of the LDF. It is not considered adequate to rely solely on the flood maps produced by the Environment Agency and PPS25 requires LPAs to produce a Strategic Flood Risk Assessment.

Acknowledge the requirement to update the SFRA for the District in line with the requirements of PPS25.

Local Development Framework

Representations on the Core Strategy
Submission Document, November 2009
On behalf of Barratts Eastern Counties

Introduction

The requirements of Core Strategies are enshrined in the 2004 Planning and Compensation Act, the Town & Country Planning (Local Development) England (Regulations) 2004 and the 2008 policy guidance in PPS12. The requirements of Core Strategies are clear. They are legal requirements. The Core Strategy must comply with the Local Development Scheme, Statement of Community Involvement and the Regulations. The Core Strategy must be subject to a sustainability appraisal, have regard to national guidance, conform generally with the Regional Spatial Strategy and have regard to any Sustainable Community Strategy. A Core strategy must be sound - justified, effective and consistent with national policy. The following representations therefore focus on these legal requirements.

HOUSING

Paragraph 4.6 - Evidence Base

To meet the soundness test Submission Core Strategies (SCS) must be justified, that is to say it must be founded on robust and credible evidence base and comprise the most appropriate strategy when considered against reasonable alternatives. The housing strategy in as far as it identifies a need for Green belt sites is sound, however, there are other elements which are unsound.

Paragraph 4.6 notes that the Strategic Housing Land Availability Assessment (SHLAA) has examined the supply of housing. It is presumed that the Table at paragraph 4.6 is the outcome of this examination. Whilst the SHLAA has legitimacy in that it identifies various sites that are apparently available, we are concerned that because the SHLAA was only published in November 2009 it post dates the SCS. This implies that the SCS is driving the SHLAA exercise rather than the other way round. Whilst this may have no real practical effect on the outcome of the SCS and the identified need for Green Belt sites, the Inspector will be mindful of the advice in paragraphs 33 and 54 of PPS3 that SCS draw on the evidence in SHLAA. It may be that the SCS should explain how the evidence base has been used to justify the strategy.

PPS12 explains at paragraph 4.37 that Core Strategies are based on thorough evidence. Since the SHLAA has only recently been published it is considered that the SCS is unsound as it is not justifiable. This, together with other comments on the SCS, indicates that the process should be delayed to ensure that a more robust document is placed in front of the EIP Inspector.

Table at Paragraph 4.6 - Evidence base

From our review of the available evidence it would appear that the housing land supply is insufficient and that Green Belt release are required. From the wider strategy being promoted we note that some of the sites that the District Council consider to be 'appropriate' are likely to relate to existing employment areas. As set out elsewhere in our representations, we maintain severe reservations that the redevelopment of existing employment sites for alternative uses and particularly the Eldon Way Industrial Estate is unsustainable. We will make reference to the effectiveness of this strategy in relation to sustainability, whether it is justified in the context of National Policy and the deliverability of such a strategy elsewhere.

In particular, paragraph 11.32 of the SCS refers to existing employment land and sites within the UCS. It does not refer the SHLAA and as such it appears that an evidence base to support the re-use of employment land for residential is not reported in the SCS.

Having reviewed the 2008 Annual Monitoring Report, as we did when commenting on the 2008 Preferred Options Core Strategy, we maintain severe doubts as to the appropriateness of some of the previously developed sites identified as potential housing sites and their expected housing yield. Whilst we cannot at this stage ascertain whether the SHLAA
sites referred to in this table correlate with the Annual Monitoring Report and indeed the 2007 Urban Capacity Study, it is our view that there will be some commonality and so the reliance on these sites is likely to be at odds with Government Policy. We shall elaborate on this objection in relation to the specific housing policy below.

We note that the last two rows in the Table at paragraph 4.6 set out figures with and without Green Belt releases. The text to this section of the Core Strategy should, for reasons of clarity, explain that Green belt review will be necessary in order to deliver the required housing.

Paragraph 4.9

The table on page 40, which sets out the settlement tiers, is supported. Rayleigh, Rochford/Ashtong, Hockley/Hawkwell are clearly the largest settlements in the District and they benefit from good employment, housing, leisure, community and public transport provision. These settlements are the most sustainable ones with the greatest mix of uses. Consequently, it is sensible that the Core Strategy identifies these as top tier settlements and is able to target them with growth accordingly. This component of the strategy is justified by reference to sustainability data and is effective, since targeting development at these locations will ensure a more sustainable pattern of development.

Paragraph 4.14

We maintain that the strategy for redeveloping the Eldon Way Industrial Estate for housing and other alternative uses to employment is unsound. It is neither justified nor effective. The Industrial Land Availability Study 2008 sets out on page 7 strategic objectives. The 3rd objective seeks to support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive. Clearly the strategy as currently drafted envisages major changes to existing industrial estates, including alternative uses. This strategy is not consistent with other strategies and evidence-based studies and so cannot be justified in the context of the tests set out in PPS12. It is also an ineffective strategy since the new employment locations that would free up the Eldon Way site for redevelopment rely on transport infrastructure that has no certainty of being delivered. Principally, the erosion of employment uses at Eldon Way could make the settlement of Hockley/Hawkwell less sustainable and thus conflict with the tiered approach on page 40, paragraph 4.9.

Policy H1

Prioritising the use of previously developed land ("pdf") is supported in principle. It is a justified strategy in the context of PPS3 and effective as sequential choices can be made by implementing the policy. However, the District Council is also promoting a strategy which seeks the redevelopment of existing employment locations to alternative uses and by consequence is identifying greenfield sites for new employment development elsewhere (Policy ED4 refers). This 'land swapping' is not considered consistent with PPS3, nor is it considered to be justified or effective in delivering the desired strategy. This is particularly the case as most of the existing employment sites are occupied and therefore unavailable for redevelopment. In addition, the new Greenfield sites are in an arguably less sustainable locations away from the top tier settlements identified on page 40 of the Submission Core Strategy. Clearly this element of the strategy is inconsistent with the wider strategy.

The Industrial Land Availability Study 2006 is included as an evidence base by the District Council. It includes an introductory section, which explains that the authority wishes to make Rochford the place of choice for new business. It also includes several strategic objectives on page 7 including "Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive." It reviews existing employment areas and identifies vacant land, including land available from allocations. It does not include any assessment of new sites or potential opportunities for new sites that might have been expected to feed into the Core Strategy. The strategy for identifying Green Belt site employment allocation does not appear to be based on any evidence in this document and in that context cannot be justified. The strategy being promoted potentially conflicts with Government policy in PPG13, PPG2 and emerging PPS4.

The Employment Land Study 2008 is a much later document. It has a key recommendation on page ii "we recommend that Rochford District Council adopts strong policies to protect existing employment land." Furthermore under recommendations for existing sites on page iii of that document it states "In our view, Hockley Trading Centre is a strategically well placed employment location. However, we recognise the ambitions of the Hockley Town Centre masterplan and that within this the Council should consider it to be allocated for other uses. However, we recommend that this reallocation happen only if provision is made within the masterplan for office use within Hockley Town Centre as part of a mixed use scheme." The view of the writers of this document is clear - the Eldon Way Industrial estate (Hockley Trading Centre) is a good employment site and that it is for other reasons that alternative uses are being considered and only then if office development is supported. This supports our representations that new future uses at the Eldon Way site should be employment dominated and that alternative uses should relate to the objectives of the Town Centre which is to enhance the shopping and leisure facilities. Residential is not an appropriate alternative.

This document recommends the use of land to the west of Rayleigh for employment and envisages Green belt release. However, the SCS does not explain through the evidence base why existing employment sites should be 'deallocated' and Green belt land unnecessarily used.
In addition to these key issues we have some specific concerns. As a consequence we maintain an objection to the second paragraph of Policy H1. This policy states that the Council will seek the redevelopment of various industrial estates including Eldon Way. The Policy says that alternative uses will be sought (presumably alternative to the existing employment offer) and that new land will be allocated elsewhere. This policy statement, in relation to Eldon Way in particular, is unsound for a number of reasons:

The emerging Hockley Area Action Plan consulted upon in 2008 states that the Eldon Way Industrial Estate is strategically well placed. In a sense this statement underplays the true importance of this highly sustainable employment location and only major employment area in Hockley/Hawkwell. The employment area is adjacent to the railway station and located a short distance from the main bus routes that run along Spa Road. Some of the residential areas of the town are also within walking distance of this commercial area, thus providing a potential for sustainable travel by employees. The Eldon Way Industrial Estate is therefore right at the heart of the settlement of Hockley/Hawkwell and provides an opportunity to meet sustainable transport objectives by reducing the need to travel by car. Consequently, this employment area should be highlighted as a premier employment site in sustainability terms, both in the context of PPG13, PPQ4 and PPS6. To encourage alternative uses as set out in Policy H1 implies the removal of the majority of employment based activity at Hockley/Hawkwell and this would be contrary to National policy, would not be the most appropriate strategy when considered against alternatives and is therefore unsound.

Whilst it is acknowledged that improvement to the Eldon Way Industrial Estate can and should take place, the extent to which the mix of employment uses should be altered in favour of alternative land uses requires careful consideration. It is our view that a mix of existing or indeed new employment land uses with some Town Centre type uses should dominate the Eldon Way site. A mix of employment types between offices, light industry and other high technology industries should be encouraged as this will provide many locational advantages to the firms that agglomerate together. The Council says that the existing uses on this site are harmful to amenity. However, the site has operated for many years without any significant issues and if renewal for B1 type uses are encouraged then the employment area can be maintained without harm to amenity. Renewal of the employment stock can help develop and improve trade, improve the sustainability of businesses as a whole and make for a more flexible labour market as skill levels are varied. A singularly different use altogether or a variety of uses which excludes employment could undermine the long term sustainability of the area and Town Centre. As such Policy H1 is not an effective strategy and should be amended to acknowledge the importance of Eldon Way and the need to renew the employment stock to ensure that the site maintains its important role as an employment site, albeit with some ancillary alternative use development where appropriate.

The 2008 Retail Study notes that Hockley Town Centre is not strong and there is trade leakage. Eldon Way Industrial Estate provides a customer base for existing town centre uses. Weekday spending within town centres is an important contributor to the viability of many retail and leisure businesses either through expenditure by employees during the lunchtime trade or expenditure by employers, on necessary goods and services. This relationship helps sustain the critical mass of a centre and provides a platform for new retail and leisure growth. It is important to have a balanced centre with a variety of uses. Policy H1, as currently drafted, implies the removal of employment related development and this is likely to harm the vitality and viability of Hockley Town Centre. The Council has presented no evidence to suggest that this is not the case. Importantly, the 2008 Retail Study explains that there is a need for additional retail and office space. In principle we would support additional office and other B1 type uses plus retail but employment uses should always dominate for the sustainability reasons given above. Retail and office development are likely to present a viable alternative to some of the more industrial type uses.

Consequently, we do not support the phrasing of the third paragraph of Policy H1 and maintain that the most appropriate strategy is to seek renewal of the employment stock with employment based uses and with some new retail development. Removal of employment land uses completely as currently implied-which was the approach adopted in the emerging Hockley Area Action Plan - is not a justifiable strategy.

One of the key tests of a Core Strategy is consistency between policies in the emerging Plan and this strikes at the heart of demonstrating an effective strategy. Policy H1 implies alternative uses to employment and the relocation of Eldon Way to a site identified under Policy ED4. However, Policy RTC6 sets out a suite of policy criteria for Hockley Town Centre which includes employment and commercial activities. In addition Policy ED3 seeks the protection of sustainable employment sites (Eldon Way) and notes that some reallocation of existing employment sites will include a proportion of employment. It notes that in the case of Eldon Way employment development will form a component. The policies appear at odds with one another. The third paragraph of Policy H1 should be deleted as the second paragraph is sufficient to set a strategic context for delivering new housing development. The employment policies and Hockley specific policies should be left to consider the type and quantum of land uses appropriate in the area. If the third paragraph of H1 is to be retained then it should lie in more with Policy RTC6 and in our view explain that employment uses should dominate any redevelopment proposals for the Eldon Way site and that retail and leisure uses should be a supporting proportion.

Implementation, Monitoring and Delivery - page 132 onwards

One of the key tests of soundness is that the Core Strategy should be effective - it should be able to deliver its strategy. The Implementation strategy set out at page 132 onwards of the Core Strategy does not explain how Policy H1, RTC6 and the strategy for redeveloping Eldon Way (Policy ED2 and ED3) will be delivered. The comment at Policy ED3 on
page 161 identifies it as a potential risk and alludes to land assembly difficulties and the choices to be made by owner/occupiers. In order to deliver the strategy there should be a clear understanding as to whether the new land use values being promoted are sufficient to encourage relocation voluntarily. Secondly there is a need for more information to be gathered and presented to show that current occupiers and landowners are willing to relocate and the timescales likely for this. For example, do the building lease contracts enable early review or are there any break out clauses. There should be some commentary on whether the Council will engage in compulsory purchase orders to pursue their strategy should the ‘encouragement’ route fail. As currently drafted there is no clear path to deliver the strategy and the danger is that despite reallocation, the sites identified for redevelopment will not come forward in the plan period. In this regard, evidence to satisfy the test of soundness is not provided.

Policy H2 - General Locations

We support the strategy that new housing growth should be targeted at land South of Hawkwell. This area is suitably located to the urban area of Hockley/Hawkwell and to do in with the settlement tiers on page 40 of the Submission Core Strategy the same terminology for settlement should be used. This ensures a consistency within the SCS. The choice of this location as a housing growth area is appropriate as it would not contribute to the coalescence of the urban area with Ashingdon (there is existing development between this identified housing area at Rectory Road and Ashingdon and moreover, Rectory Road can form a natural physical boundary for the new Green belt boundary. This area is also well located to the existing road network. Cherry Orchard Way has recently been improved and provides much better accessibility to the proposed housing growth area than any other location around Hockley/Hawkwell. The existing bus routes along Rectory Road also make this location sustainable and the additional housing proposed will help underpin the financial viability of bus routes in this area. Locally there are employment opportunities, including the small commercial estate off Main Road. The Eldon Way Industrial Estate adjacent to the Town Centre also provides the opportunity for employment locally. Extensive public open space, play pitches and built leisure facilities are located just to the north of this area and a community hall is located off Briar Close, nearby. The area to the south of Hockley/Hawkwell is close to local shops on the corner of Heycroft Road and Main Road and there are numerous footpath links between this area and the local community including links via Thorpe Road, Thorpe Close, Briar Close, Hawkwell Park and Park Gardens. The area therefore provides the opportunity to enhance existing links, including cycle links, and contribute towards community integration - more so than other sites on the south side of this settlement. The site is also in the control of one house builder and deliverable.

However, we find that the Policy is not fully consistent with national policy and furthermore needs to be reviewed in order to be justified and effective. We have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with this policy and feel that Green Belt review should be more explicit throughout the SCS. We note that it is only Policy H3 which indicates the need for Green Belt land review. In fact Policy H3 only pays lip service to the need for Green Belt development between this identified housing area at Rectory Road and Ashingdon and moreover, Rectory Road can form a natural physical boundary for the new Green belt boundary. This area is also well located to the existing road network. Cherry Orchard Way has recently been improved and provides much better accessibility to the proposed housing growth area than any other location around Hockley/Hawkwell. The existing bus routes along Rectory Road also make this location sustainable and the additional housing proposed will help underpin the financial viability of bus routes in this area. Locally there are employment opportunities, including the small commercial estate off Main Road. The Eldon Way Industrial Estate adjacent to the Town Centre also provides the opportunity for employment locally. Extensive public open space, play pitches and built leisure facilities are located just to the north of this area and a community hall is located off Briar Close, nearby. The area to the south of Hockley/Hawkwell is close to local shops on the corner of Heycroft Road and Main Road and there are numerous footpath links between this area and the local community including links via Thorpe Road, Thorpe Close, Briar Close, Hawkwell Park and Park Gardens. The area therefore provides the opportunity to enhance existing links, including cycle links, and contribute towards community integration - more so than other sites on the south side of this settlement. The site is also in the control of one house builder and deliverable.

However, we find that the Policy is not fully consistent with national policy and furthermore needs to be reviewed in order to be justified and effective. We have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with this policy and feel that Green Belt review should be more explicit throughout the SCS. We note that it is only Policy H3 which indicates the need for Green Belt land review. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes onto talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H2 and certainly Policy H3 and Policy GB1 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SB7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary.

Policy H2 - Phasing and Quantum

The 2008 Preferred Core Strategy document indicated that the area south of Hawkwell should deliver 330 dwellings over a phased period to post 2021 (see Policy H2 and H3 of that document). The SCS reduces the quantum of housing in this area to 175 but expects delivery by 2015. At a broader level the Preferred Options Core Strategy of 2008, (Policy H2) required 1,450 dwellings to 2015 and a further 1,050 by 2021. In the SCS the figures are now 775 and 1,010 respectively.

Since the SHLAA post dates the publication of the SCS, we are uncertain as to the reason why such a significant reduction in quantum of housing and extensions to the residential envelope is considered necessary. Presumably it is the ‘new’ strategy to redevelop existing employment areas within the settlements that has led to this change. Our representations on this strategy and specifically the Eldon Way Industrial Estate are included elsewhere within our representations. Previously we have commented on the Table at paragraph 4.6 of the Submission Core Strategy and the lack of evidence to underpin that table. It seems odd that in the space of a year the expected requirement for Greenfield sites has effectively halved on the basis of a SHLAA exercise. The community is therefore not able to effectively
comment on the housing land supply and at this stage the Submission Core Strategy is legally unsound.

That said, we are of the view that the quantum of housing envisaged south of Hockley/Hawkwell should be more than the 175 currently envisaged. In coming to this view we have reviewed the Urban Capacity Study and the latest housing figures in the Annual Monitoring Report 2008. We conclude that the shortfall in housing land supply is such that 330 dwellings in this location is appropriate.

The recently published SHLAA is based upon the data obtained from the Urban Capacity Study 2007, a call for sites exercise and data from the Annual Monitoring Report 2008.

The 2007 Urban Capacity Study (UCS)

1. 2007 is widely recognised as being the peak level of house prices in the UK and it was acknowledged by Government and practitioners alike that 2007 house prices were at an unsustainable level. It is our view that utilising the 2007 UCS as an evidence base without reference to the market does not pick up the depressed demand that is likely to now exist. Recent corrections to the housing market now mean that housing land prices are at a much lower and arguably more affordable level than before. The implications are that some pdl may not be viable for housing development. Often brownfield sites have much higher development costs than Greenfield sites and so the yield from urban capacity will be much lower than anticipated in the 2007 study. One example is the employment allocation of the Adopted Local Plan located at 76-92 Main Road, Hawkwell. This site has been allocated for several years and has been available during the most recent rises in residential property prices during 2006-07. As a consequence the lack of progress on the site can only be described by its current occupancy and perhaps it comprises high value uses that do not encourage redevelopment. Despite this the site is identified as having high potential for alternative use and high potential demand. The SHLAA form notes that there is no information on legal constraints (e.g., tenancy agreements) As a consequence it is difficult to see how this could continue to be a potential site and as a consequence the allowance for green field releases should be increased.

2. There are considered to be other instances in the UCS and the recently published SHLAA where the assumptions and calculations would indicate that the 1301 urban capacity figure is over optimistic and the SHLAA assessment is limited. In the assessment of 'non-residential sites in appropriate locations' within the UCS assumptions are made as to the probability of sites coming forward for new housing. 68-72 West Street, Rochford is identified as a high probability site but we note that it has been subject to 7 refusals of planning permission/conservation consent. There is a significant gap between the urban capacity identified as being suitable by the Council and the capacity applied for by the owners. Given its alternate use value, it is debatable whether the two capacity figures can be reconciled. No 247 London Road is another example of a site allocated in the Local Plan but which hasn't come forward. This is now the subject of a proposal for a care home and if approved would further limit the scope for market/affordable housing capacity on the site. A striking example of how the urban capacity study has underestimated is also evidence by 2-4 Alderman’s Hill, Hockley - described as a disused service station. There has been no residential development application on this site since 2004 and most recent applications have sought commercial use of the site. Rather than being evidence of housing land deliverability, this particular site evidences the need for commercial uses in the area. There are therefore deliverability doubts over these 'high probability' categories which amount to some 40 units.

3. In relation to the assessment in the UCS entitled 'intensification of existing residential uses' we note that the assessment is premised on an assessment of recent trends taking into account net completions between 2001-2006 and 2005-06. This is effectively an assessment of windfall trends and not an approach that PPS3 encourages. Importantly Table 3-12 in the urban capacity study seeks to project forward urban capacity from residential redevelopment - a period that benefited from high house prices and PPG3 guidance encouraging redevelopment. These two circumstances have markedly changed and so the assumptions and conclusions drawn would also have changed. Even taking into account the UCS discounting, the reliability of the 404 units from this source must be questioned and in our view the 1301 figure cannot be a sound basis for urban capacity and further Greenfield releases are necessary.

4. In the section of the UCS entitled 'subdivision of dwellings' and 'living above the shop' it is estimated that recent trends would result in 7 and 15 units. Our concerns with using trends as a basis for urban capacity are detailed above - PPS3 does not encourage this. Rather, local authorities are charged with surveying their areas, identifying which areas may yield urban capacity and how much and developing policies to achieve that. Government guidance does not encourage the estimation of windfalls in the way the UCS does.

5. Redevelopment of established employment land is a separate section within the UCS. At 1 above we identify the low probability of the Main Road residential allocation coming forward. This remaining section of the UCS considers 11 further employment sites which were first identified in the 2000 UCS. Three of these are considered to have a high probability of coming forward. We have looked at these three sites and can find no evidence that they are likely to come forward. In the 8 years between 2000 and 2008 the three identified high probability employment sites have not been developed and there is no reason to assume that the next 5-10 years will be any different. For example the Rawreth Industrial Estate is identified as being well used in the UCS and although it has some unneighbourly uses there is no indication that the site is available, suitable or deliverable for residential. Land between 39-69 Lower Lambricks, Rayleigh is identified as having a high probability of residential uses. Yet there is no
16918 Object
CHAPTER 13 Implementation, Delivery and Monitoring

Evidence of any pre-application advice or planning applications for this area. Stambridge Mills, Mill Lane, Stambridge is a further example. This site is separated from the urban area, in a flood risk zone and protected in the 2006 Replacement Local Plan by Policy EB9 which promotes B1 uses. Against this background there is only two relevant planning applications affecting this area both date from the early 1990’s and relate to a plant room and loading bay. There is no evidence that this is likely to come forward for residential purposes in the next 5-10 years.

6. In the UCS extant permissions are identified as 856 dwellings. It is important to note that this figure needs to be continually reassessed so that from the point of adoption of the Core Strategy a 5 and 10 year housing land supply is available. The SHLAA notes extant permissions for 2009-14 being 106. As noted below extant permissions do not necessarily translate into deliverable sites. There is therefore a contingency that needs to be built in. Further allocations on greenfield land need to be increased and as such the quantum of housing in the area south of Hockley/Hawkwell should be increased to 330 dwellings in order to begin to meet the shortfall identified.

The District Council’s 5 year housing supply assessment

7. The District Council’s Annual Monitoring Report (AMR) 2008 purports to demonstrate a 5 year housing land supply. The preamble to Table 4.10 in the AMR 2008 explains that Rochford District Council (RDC) has included units under construction, units with full permission, units with outline permission, units with a resolution to grant, units subject to preapplication discussion/Urban Capacity Assessment and land allocations in its trajectory. The reader is referred to Appendix B which breaks down the sites in more detail. The recently published SHLAA also includes a table showing a potential 1273 dwellings deliverable. However, it refers to “appropriate brownfield sites.” Since these ‘appropriate sites’ are do not benefit from an application or a planning permission it is difficult to programme them into the housing delivery trajectory.

8. In the full planning permission category of the AMR 2008 where work has not yet started there can be no guarantee that all these sites will be delivered in the 5 years. This comment relates to the one above in relation to the recently published SHLAA. It is not uncommon for permissions to be obtained to provide a means for valuing a site where the owner has no immediate plans to sell the site or develop housing. Delivery may also be hampered by funding constraints, or site assembly problems (where sites are in an alternative use or relocation constraints). Appendix B of the AMR 2008 does not set out the intentions of the landowner or whether the sites are truly achievable in the 5 year period as per PPS3 requirements. The SHLAA purports to show developer intentions at Appendix C but the assessment by the local authority into the legitimacy of some of the claims is not presented. The evidence base is not as full as it should be to demonstrate the robustness of Table 4.6 of the SCS. It is also unclear the extent to which this table is based on either the UCS 2007, AMR 2008, SHLAA 2009 or a combination of all three. This should be set out clearly.

9. In addition, to the ‘non delivery’ of a proportion of new homes in the AMR 2008, there is concern at the timings of delivery in that data set, for example, 10 units in 2008-2009 relates to outline planning permissions and it is doubtful whether reserved matters can be turned round quick enough to begin delivering housing in this year period. There could well be examples in that set of data where the delivery of units in the first year of the 5 is unlikely, thus delivery is reduced for that period and pushed back and this process is then compounded throughout the data set up to and beyond year 5. Statistical evidence from the Department of Communities and Local Government (CLG) reveals that building starts are 43% down on the quarter to March 2009 compared with March 2008. It is not clear whether the recently published SHLAA has taken this into account and unless it does the data in the Table at 4.6 of the SCS cannot be relied upon, particularly given the current recessionary circumstances. In relation to the Table at Paragraph 4.6 a refinement is therefore needed to take into account this effect on phasing.

10. This problem is compounded for other units relied upon where permission has been granted but no start on site has been made; this accounts for a considerable number of sites in 2009-10 period (100 dwellings) which is (year 2 of the 5 year period). A delay in these will require more Greenfield sites to be identified in order to meet the shortfall.

11. Finally we note that the East of England Plan expresses its land supply requirement as a minimum. This strategy is not reflected in the
Submission version of the Core Strategy policy H2.

12. In summary since neither the UCS nor the Annual Monitoring Report form a SHLAA, reservations are maintained about the degree to which sufficient housing land has been identified.

Policy H3

In the Preferred Options Core Strategy 2008 more locations were identified for housing growth in the post 2021 phase. Whilst it is our view that land south of Hockley/Hawkwell should benefit from a greater number of dwellings than the 175 currently identified (330) in order to make the strategy effective. We are concerned at the significant change in strategy between the Preferred Option Core Strategy and the Submission version, which has significantly less housing growth on green field sites. This change in strategy is so significant that we would question whether it is appropriate in the context of soundness and the consultation processes that have taken place so far.

We also have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with other policies in the SCS and feel that Green Belt review should be more explicit throughout the SCS. As it currently stands there is a potential conflict with national policies and limited justification for the Green Belt strategy. We note that in Policy H3, which indicates the need for Green Belt land review, the advice is limited and unclear. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes onto talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H3 and Policy GB1/H2 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that a review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary. Not to do so is unsound for justification and effectiveness reasons.

Policy H4 - Affordable Housing

As currently drafted we feel that the policy is not concise enough and that the policy does not reflect current guidance. The phrase 'at least' would indicate that in most cases affordable housing above 35% will be sought. Our understanding is that the 35% figure is recommended in the SHMA and that to provide a policy framework which seeks to go beyond that figure would potentially be unworkable as many sites could not financially bare the burden of over a third of the net developable area not yielding a value. The policy should be redrafted so that "a target of 35% affordable housing shall be provided on all developments of 15 or more units..."

The last policy paragraph provides some scope to relax this policy, if there are clear site constraints that make on site provision impossible. The policy, though, is not particularly clear on what would constitute exceptional circumstances. For example, physical site constraints, which unusually raise development costs, would be one such reason and this should be specified. There may be other reasons including the nature of housing needs in the part of the District the site is located which justify affordable housing below the 35% target. Design reasons may also have a bearing on how provision is made and in what form, particularly if the site is in an historic area where design might override housing need argument. It is therefore recommended that the policy expand on the type of circumstances where affordable housing may be relaxed and the type of information that will be sought of applicant's who have a need to invoke this part of the policy.

Policy H5

In support of the policy, it is advantageous that no percentages requiring a specific mix are included. This flexibility will enable developers and the Council to respond directly to changing circumstances in the local housing market. In the past some authorities have set out a percentage for the type of housing they require only to find that after a few years of strict implementation there is an oversupply of property of that type and no flexibility in the policy to address the problem.

Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford's main settlements to what essentially
would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Policy ED3

We fully support the first sentence of the Policy and note the apparent contradiction with the statements in Policy H1 and elsewhere which seeks to develop on alternative uses at industrial estates such as Eldon Way.

This contradiction is evidence in the second paragraph of Policy ED3. In our representations on Policy H1 we have explained why it is not sound to diminish the employment stock at Eldon Way and the importance of maintaining a dominance of employment type uses at this estate. These arguments are not repeated here.

We note the sentiments of the third paragraph and in accordance with our representations elsewhere are of the view that this sentence should be revised to explain that Eldon Way will accommodate principally employment type uses. As noted elsewhere uses which are an alternative to employment would diminish this highly sustainable employment site and this is unsound when assessed against National Policy.

Policy ED4 - Future Employment Allocations

In part, the de-allocation strategy is not supported as it is considered unsound when set against sustainability criteria. In relation to the Eldon Way Industrial Estate it is considered critical to the ongoing sustainability of this settlement that employment uses are maintained at this location. It is close to the railway station, bus routes and local residential areas from which the opportunity exists for employees to walk or cycle to work. Its location adjacent to the Town Centre offers opportunity for some retail and leisure development to complement the centre and to maintain a supporting function. These sustainable benefits would not occur with the deallocation of Eldon Way or the significant erosion of its employment floorspace. Whilst redevelopment of the employment site to achieve new employment is supported, the dominant land use should continue to be employment use. As a consequence, the 18ha of land required for employment in this policy is considered to be excessive and the policy should be reviewed to explain that redevelopment of existing employment sites for primarily new employment development will be encouraged.

Policy T4

It is noted that the South Essex Rapid Transit policy, as elaborated upon at paragraph 10.16 notes that Rochford is not served but may be served in future phases. This uncertainty is contrary to the delivery principles of soundness and directly puts at issue the employment land supply strategy in the District which is founded on sustainable access to new sites. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley, Rochford and Rayleigh is unsound.

Appendix H1, CTL1 - Infrastructure

It is recognised that necessary infrastructure provision is an important part of creating a sustainable development and in that context appendix H1 is supported. The supporting text notes that the table at Appendix H1 is not exhaustive and in that context it is very important that the framework properly distinguishes between what should be provided as part of new development schemes and what shouldn’t. It is therefore essential that the framework acknowledges the importance of Circular 05/05 and the tests which say that provision of infrastructure and/or contributions should be:

* Relevant to planning
* Necessary to make the proposed development acceptable in planning terms
* Directly related to the proposed development
* Fairly and reasonably related in scale and kind to the proposed development
* Reasonable in all other respects

As is made clear (Paragraph B9 of Circular 5/05) contributions should not be used to make good existing deficiencies in infrastructure provision. Nor are they to be used to secure contributions to the achievement of wider planning objectives that are not necessary for consent to be granted. In that context the Core Strategy should set this out as its policy framework.

Policy GB1 - Green Belt
The objectives of this policy are supported, although as noted in other
representations the SCS is unsound as it does not meet the tests in relation to
justification, compliance with national policy or effectiveness of strategy.

Policy GB1 mentions the objective to allocate the minimum amount of Green Belt land necessary. The policy should link
to the requirements of PPG2 and RSS which are discussed in relation to the representations on Policy H2 and H3. The
policy should set out a timeframe for the review and why Rochford requires a Green Belt review (what the exceptional
circumstances are in this District that justify a review of local boundaries. The policy should be amended to set out a
2031 time frame and this may require the SCS to have an extended life span beyond 2021.

We would recommend the deletion of the word character since Green Belt
designation is not related to landscape character as currently drafted. For clarity we would also recommend that the
Policy or its supporting text explain that a Green Belt review will take place in support of an allocations document
(paragraph 6.6) in order to identify an appropriate new boundary. This is particularly necessary given the commitment to
a Green belt review in the adopted Local Development Scheme.

Policy CLT1 - Planning Obligations and Standard Charges

In view of the need to test fully the basis on which standard charges are based it is important that any document
produced is in a development plan document that enables an examination in public. The policy should explain this in
order that when the document is produced it accords with Policy and is based on sound evidence.

ENV9 - Code for Sustainable Homes

Object. The advice from the Department of Communities and Local Government is that the new requirement to have a
ing rating against the Code does not make it mandatory to build a Code home or to have each new home assessed against
the Code. It does however mean that all buyers of new homes be given clear information about the sustainability of the
new home. A house builder can do this in one of two ways:

- they can chose to build a Code home, have that home assessed against the
Code and provide the home buyer with a Code certificate stating the star rating the home has achieved
- or, they can chose to build to current building regulations standards, not to pay for an assessment and instead
download a nil-rated certificate of non-assessment (also referred to as a nil-rating) to provide to the home buyer.

As such the Rochford policy requirement that coding 3 be achieved by 2010 and Code 6 by 2013 is out of step with
Government advice. The policy wording should explain that it is just the coding that is a requirement of new homes and
not necessarily that new homes should be constructed to achieve a standard.

The current Government objectives are for the code to be introduced over a
reasonable period with development to be code 3 by 2010, code level 4 by 2013 and code level by 2016. In this regard
the policy, as drafted, seeks to achieve code 6 by 2013 and consequently compresses the code requirements into a
shorter time scale with the costs associated expected to be subsumed within the housing market though higher prices.
This is not a realistic strategy for the delivery of sustainable homes and we consider that the policy should be revised to
extend the period of compliance but to also make it more flexible based on local circumstances.

Research undertaken on behalf of the Housing Corporation and English
Partnerships, published in February 2007 'A cost review of the code for sustainable homes' reveals that code 6 is
unlikely to be unattainable given existing technologies and that achieving code 5 could result in a 12% to 20% increase in
costs that would have to be passed onto the consumer. Given the variability of the housing market with peaks and
troughs, it is unlikely that the housing market would be able to subsume this level of price increase.

The code system policy as currently drafted does not have regard to site
circumstances and so many of the requirements could be difficult to meet. For example, micro electricity generation on site may be difficult to achieve where local circumstances deter the capture of
wind or solar power. If more expensive technologies are required to generate power than is the norm then costs will rise.
There may be other competing reasons why designs cannot include certain sustainability measures if housing sites are
in sensitive landscape and historic locations. Alternatively there may be significant development costs associated with
site specific circumstances and so viability of the site's development becomes a valid consideration. By insisting on the
code for sustainable homes other policy objectives such as affordable housing at particular rates and other contributions
may need to be reconsidered. Consequently, we are of the view that this policy should be drafted in a
manner which enables site specific circumstances to be taken into account. As noted above the Government explains
that the code is a certification requirement and does not necessarily mean that buildings are constructed in accordance
with a code level.

It is also important to note that it is not the purpose of planning legislation to duplicate other legislation. In this regard, the
policy should accept that the Building Regulations will be the main vehicle for implementing this policy and that unless
the coding requires external development then there will be no need to specify what is to be carried out in a planning
application.
Summary: Implementation, Monitoring and Delivery - page 132 onwards

One of the key tests of soundness is that the Core Strategy should be effective - it should be able to deliver its strategy. The Implementation strategy set out at page 132 onwards of the Core Strategy does not explain how Policy H1, RTC6 and the strategy for redeveloping Eldon Way (Policy ED2 and ED3) will be delivered. The comment at Policy ED3 on page 161 identifies it as a potential risk and alludes to land assembly difficulties and the choices to be made by owner/occupiers. In order to deliver the strategy there should be a clear understanding as to whether the new land use values being promoted are sufficient to encourage relocation voluntarily. Secondly there is a need for more information to be gathered and presented to show that current occupiers and landowners are willing to relocate and the timescales likely for this. For example, do the building lease contracts enable early review or are there any break out clauses. There should be some commentary on whether the Council will engage in compulsory purchase orders to pursue their strategy should the 'encouragement' route fail. As currently drafted there is no clear path to deliver the strategy and the danger is that despite reallocation, the sites identified for redevelopment will not come forward in the plan period. In this regard, evidence to satisfy the test of soundness is not provided.

We support the Council's identification of Hullbridge as a growth location but cannot support the key diagram as the proposed extensions to residential envelopes pre and post 2021 are too site specific. The purpose of the Core Strategy is not to identify specific locations but indicate general areas for future development. The Core Strategy should identify land at Hullbridge as a growth location and not specifically land South-West of Hullbridge. Fundamentally, the detailed locations and quantum of development should be tested through and articulated within the Allocations DPD.

We consider it appropriate for the Key Diagram to indicate locations for new open space, parkland and riverside walks which should be assessed in terms of feasibility. There are opportunities for Hullbridge to be enhanced with the introduction of high quality public open space, parkland and riverside walks as well as appropriate links to facilities such as the local infant and primary school which would be essential elements of an extension to Hullbridge.

Summary:
The proposed extensions to residential envelopes pre and post 2021 are too site specific. The purpose of the Core Strategy is not to identify specific locations but indicate general areas for future development. The Core Strategy should identify land at Hullbridge as a growth location and not specifically land South-West of Hullbridge. Fundamentally, the detailed locations and quantum of development should be tested through and articulated within the Allocations DPD.

The Key Diagram is missing the opportunity to identify opportunities for public open space, parkland and riverside walks which also exist at Hullbridge, particularly to the West.

Change to Plan
The Key Diagram should identify Hullbridge as a growth settlement but should not identify the location for growth in relation to the existing settlement at this stage. The Core Strategy should also indicate how the open space needs of new development in Hullbridge will be accommodated alongside housing growth.
